Notes					
E 122 111 1	10"		40.011.11	(6.)	

Calculations are from the front glass of the lens and are accurate to approximately +/- 3.5%. Specifications are subject to change without prior notice.

For 16:9, width stays the same as 4:3 (ignore the diagonal).

How to use the T/W column. If your screen size does not appear on this chart, use the T/W column to find the lens you need. Divide the Throw distance by the screen Width to get your "target T/W number". Then, look for a lens with a T/W range that covers it.

Understanding Shift/Limits. The numbers in the Shift/Limits column express the projector positions possible as a ratio of the image heights Above:Below a line drawn perpendicular to the screen between the lens and the screen. 1:1 = center of the image. 10:0 = top of the image.

16:9 Height (ft.)

1.50

3.38
