OWNER'S MANUAL
EIKI INDUSTRIAL CO., LTD.

Printed in China
TINS-CG8WJN1
05P08-CH-NG
IMPORTANT

• For your assistance in reporting the loss or theft of your Projector, please record the Serial Number located on the bottom of the projector and retain this information.
• Before recycling the packaging, please ensure that you have checked the contents of the carton thoroughly against the list of “Supplied accessories” on page 10.

SPECIAL NOTE FOR USERS IN THE U.K.

The mains lead of this product is fitted with a non-rewireable (moulded) plug incorporating a 10A fuse. Should the fuse need to be replaced, a BSI or ASTA approved BS 1362 fuse marked ✓ or ✘ and of the same rating as above, which is also indicated on the pin face of the plug, must be used.

Always refit the fuse cover after replacing the fuse. Never use the plug without the fuse cover fitted.

In the unlikely event of the socket outlet in your home not being compatible with the plug supplied, cut off the mains plug and fit an appropriate type.

DANGER:
The fuse from the cut-off plug should be removed and the cut-off plug destroyed immediately and disposed of in a safe manner.

Under no circumstances should the cut-off plug be inserted elsewhere into a 13A socket outlet, as a serious electric shock may occur.

To fit an appropriate plug to the mains lead, follow the instructions below:

WARNING:
THIS APPARATUS MUST BE EARTHED.

IMPORTANT:
The wires in this mains lead are coloured in accordance with the following code:

- Green-and-yellow : Earth
- Blue : Neutral
- Brown : Live

As the colours of the wires in the mains lead of this apparatus may not correspond with the coloured markings identifying the terminals in your plug proceed as follows:

• The wire which is coloured green-and-yellow must be connected to the terminal in the plug which is marked by the letter E or by the safety earth symbol ✓ or coloured green or green-and-yellow.
• The wire which is coloured blue must be connected to the terminal which is marked with the letter N or coloured black.
• The wire which is coloured brown must be connected to the terminal which is marked with the letter L or coloured red.

IF YOU HAVE ANY DOUBT, CONSULT A QUALIFIED ELECTRICIAN.

Dieses Gerät entspricht den Anforderungen der EG-Richtlinien 89/336/EWG und 73/23/EWG mit Änderung 93/68/EWG.

Ce matériel répond aux exigences contenues dans les directives 89/336/CEE et 73/23/CEE modifiées par la directive 93/68/CEE.

Dit apparaat voldoet aan de eisen van de richtlijnen 89/336/EEG en 73/23/EEG, gewijzigd door 93/68/EEG.

Dette udstyr overholder kravene i direktiv nr. 89/336/EEC og 73/23/EEC med tilæg nr. 93/68/EEC.

Quest’apparecchio è conforme ai requisiti delle direttive 89/336/EEC e 73/23/EEC, come emendata dalla direttiva 93/68/CEE.

Αυτή η συσκευή συμμορφώνεται με τις απαιτήσεις των οδηγιών 89/336/ΕΟΚ και 73/23/ΕΟΚ όπως τροποποιήθηκαν από την οδηγία του Συμβουλίου 93/68/ΕΟΚ.

Este equipamento obedece às exigências das directivas 89/336/CEE e 73/23/CEE, na sua versão corrigida pela directiva 93/68/CEE.

Este aparato satisface las exigencias de las Directivas 89/336/CEE y 73/23/CEE, modificadas por medio de la 93/68/CEE.

Denna utrustning uppfyller kraven enligt riktlinjerna 89/336/EEC och 73/23/EEC så som kompletteras av 93/68/EEC.

Dette produktet oppfyller betingelsene i direktivene 89/336/EEC og 73/23/EEC i endringen 93/68/EEC.

Tämä laite täyttää direktiivien 89/336/EEC ja 73/23/EEC vaatimuksia, joita on muutettu direktiivillä 93/68/EEC.

Tento přístroj je v souladu s požadavky směrnice rady 89/336/EEC a 73/23/EEC, tak jak byly upraveny směrnici rady 93/68/EEC.

Ez a készülék megfelel a Tanács által kiadott, 89/336/EGK és 73/23/EGK irányelveknek és az utóbbi módosító 93/68/EGK irányelveknek.

Šī ierīce atbilst tehniskam prasībām pecc 89/336/EEC un 73/23/EEC direktīvām papildināts ar direktīvu 93/68/EEC.

To urządzenie spełnia wymagania dyrektywy 89/336/EEC i 73/23/EEC wraz z poprawkami dyrektywy 93/68/EEC.

Tento přístroj je v súlade s požiadavkami smernice rady 89/336/EEC a 73/23/EEC tak ako boli upravené smernicou rady 93/68/EEC.

Ta aparat je v skladu z zahtevami Direktiv Sveta 89/336/EEC in 73/23/EEC kot je navedeno v dopolnilu k Direktivi Sveta 93/68/EEC.
Before using the projector, please read this owner's manual carefully.

Introduction

1. WARRANTY
   This is to assure that you immediately receive the full benefit of the parts, service and labor warranty applicable to your purchase.

2. CONSUMER PRODUCT SAFETY ACT
   To ensure that you will promptly receive any safety notification of inspection, modification, or recall that EIKI may be required to give under the 1972 Consumer Product Safety Act, PLEASE READ CAREFULLY THE IMPORTANT "LIMITED WARRANTY" CLAUSE.

WARNING:
High brightness light source. Do not stare into the beam of light, or view directly. Be especially careful that children do not stare directly into the beam of light.

WARNING:
To reduce the risk of fire or electric shock, do not expose this product to rain or moisture.

WARNING:
FCC Regulations state that any unauthorized changes or modifications to this equipment not expressly approved by the manufacturer could void the user's authority to operate this equipment.

CAUTION
The lightning flash with arrowhead symbol, within an equilateral triangle, is intended to alert the user to the presence of uninsulated "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

The exclamation point within a triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the product.

WARNING:
FCC Regulations state that any unauthorized changes or modifications to this equipment not expressly approved by the manufacturer could void the user's authority to operate this equipment.

U.S.A. ONLY

CAUTION: TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE COVER. NO USER-SERVICEABLE PARTS EXCEPT LAMP UNIT. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.
WARNING:
The cooling fan in this projector continues to run for about 90 seconds after the projector enters standby mode. During normal operation, when putting the projector into standby mode always use the STANDBY-ON button on the projector or the STANDBY button on the remote control. Ensure the cooling fan has stopped before disconnecting the power cord.
DURING NORMAL OPERATION, NEVER TURN THE PROJECTOR OFF BY DISCONNECTING THE POWER CORD. FAILURE TO OBSERVE THIS WILL RESULT IN PREMATURE LAMP FAILURE.

INFORMATION
This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the owner's manual, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
• Reorient or relocate the receiving antenna.
• Increase the separation between the equipment and the receiver.
• Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
• Consult the dealer or an experienced radio/TV technician for help.

Declarator of conformity
EIKI PROJECTOR, MODEL EIP-1000T
This device complies with Part 15 of the FCC rules. Operation is subject to the following conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Responsible Party:
EIKI INTERNATIONAL, INC.
30251 Esperanza Rancho Santa Margarita, CA 92688-2132
TEL: 800-242-3454

PRODUCT DISPOSAL
This projector utilizes tin-lead solder, and a pressurized lamp containing a small amount of mercury. Disposal of these materials may be regulated due to environmental considerations. For disposal or recycling information, please contact your local authorities or, if you are located in the United States of America, the Electronic Industries Alliance: www.eiae.org.

Caution Concerning Lamp Replacement
See "Replacing the Lamp" on page 50.

This EIKI projector uses a DMD panel. This very sophisticated panel contains 409,920 pixels (micromirrors). As with any high technology electronic equipment such as large screen TVs, video systems and video cameras, there are certain acceptable tolerances that the equipment must conform to. This unit has some inactive pixels within acceptable tolerances which may result in inactive dots on the picture screen. This will not affect the picture quality or the life expectancy of the unit.
How to Read this Owner’s Manual

- The specifications are slightly different, depending on the model. However, you can connect and operate all models in the same manner.
- In this owner’s manual, the illustration and the screen display are simplified for explanation, and may differ slightly from the actual display.

Using the Menu Screen

Example: Adjusting “Bright”.
- This operation can also be performed by using the buttons on the projector.

1. Press \( \text{MENU} \).
2. The “Picture” menu screen for the selected input mode is displayed.

- Press \( \text{Q} \) or \( \text{O} \) and select “Picture” to adjust.

Menu Selections (Adjustments)

Example: Adjusting “Bright”.

- The operation can also be performed by using the buttons on the projector.

1. Press \( \text{MENU} \).
2. The “Picture” menu screen for the selected input mode is displayed.

- Press \( \text{Q} \) or \( \text{O} \) and select “Picture” to adjust.

- Press \( \text{RETURN} \) to return to the previous menu when the menu is displayed.

---

Info ..........Indicates safeguards for using the projector.
Note ..........Indicates additional information for setting up and operating the projector.

IMPORTANT SAFEGUARDS

CAUTION: Please read all of these instructions before you operate this product and save these instructions for later use.

Electrical energy can perform many useful functions. This product has been engineered and manufactured to assure your personal safety. BUT IMPROPER USE CAN RESULT IN POTENTIAL ELECTRICAL SHOCK OR FIRE HAZARDS. In order not to defeat the safeguards incorporated in this product, observe the following basic rules for its installation, use and servicing.

1. Read Instructions
   All the safety and operating instructions should be read before the product is operated.

2. Retain Instructions
   The safety and operating instructions should be retained for future reference.

3. Heed Warnings
   All warnings on the product and in the operating instructions should be adhered to.

4. Follow Instructions
   All operating and use instructions should be followed.

5. Cleaning
   Unplug this product from the wall outlet before cleaning. Do not use liquid cleaners or aerosol cleaners. Use a damp cloth for cleaning.

6. Attachments
   Do not use attachments not recommended by the product manufacturer as they may cause hazards.

7. Water and Moisture
   Do not use this product near water—for example, near a bath tub, wash bowl, kitchen sink, or laundry tub; in a wet basement; or near a swimming pool; and the like.

8. Accessories
   Do not place this product on an unstable cart, stand, tripod, bracket, or table. The product may fall, causing serious injury to a child or adult, and serious damage to the product. Use only with a cart, stand, tripod, bracket, or table recommended by the manufacturer, or sold with the product. Any mounting of the product should follow the manufacturer’s instructions, and should use a mounting accessory recommended by the manufacturer.

9. Transportation
   A product and cart combination should be moved with care. Quick stops, excessive force, and uneven surfaces may cause the product and cart combination to overturn.

10. Ventilation
    Slots and openings in the cabinet are provided for ventilation to ensure reliable operation of the product and to protect it from overheating, and these openings must not be blocked or covered. The openings should never be blocked by placing the product on a bed, sofa, rug, or other similar surface. This product should not be placed in a built-in installation such as a bookcase or rack unless proper ventilation is provided or the manufacturer’s instructions have been adhered to.

11. Power Sources
    This product should be operated only from the type of power source indicated on the marking label. If you are not sure of the type of power supply to your home, consult your product dealer or local power company. For products intended to operate from battery power, or other sources, refer to the operating instructions.

12. Grounding or Polarization
    This product is provided with one of the following types of plugs. If the plug should fail to fit into the power outlet, please contact your electrician. Do not defeat the safety purpose of the plug.
    a. Two-wire type (mains) plug.
    b. Three-wire grounding type (mains) plug with a grounding terminal.
    This plug will only fit into a grounding type power outlet.

13. Power-Cord Protection
    Power-supply cords should be routed so that they are not likely to be walked on or pinched by items placed upon them, paying particular attention to cords at plugs, convenience receptacles, and the point where they exit from the product.

14. Lightning
    For added protection for this product during a lightning storm, or when it is left unattended and unused for long periods of time, unplug it from the wall outlet and disconnect the cable system. This will prevent damage to the product due to lightning and power-line surges.
15. Overloading
Do not overload wall outlets, extension cords, or integral convenience receptacles as this can result in a risk of fire or electric shock.

16. Object and Liquid Entry
Never push objects of any kind into this product through openings as they may touch dangerous voltage points or short-out parts that could result in a fire or electric shock. Never spill liquid of any kind on the product.

17. Servicing
Do not attempt to service this product yourself as opening or removing covers may expose you to dangerous voltage or other hazards. Refer all servicing to qualified service personnel.

18. Damage Requiring Service
Unplug this product from the wall outlet and refer servicing to qualified service personnel under the following conditions:
   a. When the power-supply cord or plug is damaged.
   b. If liquid has been spilled, or objects have fallen into the product.
   c. If the product has been exposed to rain or water.
   d. If the product does not operate normally by following the operating instructions. Adjust only those controls that are covered by the operating instructions, as an improper adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore the product to normal operation.
   e. If the product has been dropped or damaged in any way.
   f. When the product exhibits a distinct change in performance, this indicates a need for service.

19. Replacement Parts
When replacement parts are required, be sure the service technician has used replacement parts specified by the manufacturer or have the same characteristics as the original part. Unauthorized substitutions may result in fire, electric shock, or other hazards.

20. Safety Check
Upon completion of any service or repairs to this product, ask the service technician to perform safety checks to determine that the product is in proper operating condition.

21. Wall or Ceiling Mounting
This product should be mounted to a wall or ceiling only as recommended by the manufacturer.

22. Heat
This product should be situated away from heat sources such as radiators, heat registers, stoves, or other products (including amplifiers) that produce heat.

Observe the following safeguards when setting up your projector.

Caution concerning the lamp unit
- Potential hazard of glass particles if lamp ruptures. In case of lamp rupture, contact your nearest EIKI Authorized Dealer or Service Center for replacement. See “Replacing the Lamp” on page 50.

Caution concerning the setup of the projector
- For minimal servicing and to maintain high image quality, EIKI recommends that this projector be installed in an area free from humidity, dust and cigarette smoke. When the projector is subjected to these environments, the vents and lens must be cleaned more often. As long as the projector is regularly cleaned, use in these environments will not reduce the overall operation life of the unit. Internal cleaning should only be performed by a EIKI Authorized Dealer or Service Center.

Do not set up the projector in places exposed to direct sunlight or bright light.
- Position the screen so that it is not in direct sunlight or room light. Light falling directly on the screen washes out the colors, making viewing difficult. Close the curtains and dim the lights when setting up the screen in a sunny or bright room.

Caution regarding placing of the projector
- Place the projector on a level site within the adjustment range (8 degrees) of the adjustment foot.

When using the projector in high-altitude areas such as mountains (at altitudes of approximately 4,900 feet (1,500 meters) or more)
- When you use the projector in high-altitude areas with thin air, set “Fan Mode” to “High”. Neglecting this can affect the longevity of the optical system.

Warning about placing the projector in a high position
- When placing the projector in a high position, ensure that it is secured carefully to avoid personal injury caused by the projector falling down.

Do not subject the projector to hard impact and/or vibration.
- Protect the lens so as not to hit or damage the surface of the lens.

Rest your eyes occasionally.
- Continuously watching the screen for long hours will cause eye strain. Be sure to occasionally rest your eyes.

Avoid locations with extremes of temperature.
- The operating temperature of the projector is from 41°F to 95°F (+5°C to +35°C).
- The storage temperature of the projector is from −4°F to 140°F (−20°C to +60°C).

Do not block the exhaust and intake vents.
- Allow at least 1 1/16 inches (30 cm) of space between the exhaust vent and the nearest wall or obstruction.
- Be sure that the intake vent and the exhaust vent are not obstructed.
- If the cooling fan becomes obstructed, a protection circuit will automatically put the projector into standby mode to prevent overheating. This does not indicate a malfunction. (See pages 48 and 49.) Remove the projector power cord from the wall outlet and wait at least 10 minutes. Place the projector where the intake and exhaust vents are not blocked, plug the power cord back in and turn on the projector. This will return the projector to the normal operating condition.
When turning off the projector, the cooling fan runs to decrease the internal temperature for a while. Unplug the power cord after the cooling fan stops. The period the cooling fan runs will vary, depending on the circumstances and the internal temperature.

**Caution regarding usage of the projector**

- When using the projector, be sure not to subject it to hard impact and/or vibration, as this can result in damage. Take extra care with the lens. Before moving the projector, be sure to unplug the power cord from the wall outlet, and disconnect any other cables connected to it.
- Do not carry the projector by holding the lens.
- When storing the projector, re-attach the lens cap. (See page 11).
- Do not expose the projector to direct sunlight or place next to heat sources. Doing so may affect the cabinet color or cause deformation of the plastic cover.

**Other connected equipment**

- When connecting a computer or other audio-visual equipment to the projector, make the connections AFTER unplugging the power cord of the projector from the AC outlet and turning off the equipment to be connected.
- Please read the owner's manuals of the projector and the equipment to be connected for instructions on how to make the connections.

**Using the projector in other countries**

- The power supply voltage and the shape of the plug may vary depending on the region or country you are using the projector in. When using the projector overseas, be sure to use an appropriate power cord for the country you are in.

**Temperature monitor function**

- If the projector starts to overheat due to setup problems or blockage of the air vents, and will illuminate in the lower left corner of the picture. If the temperature continues to rise, the lamp will turn off, the temperature warning indicator on the projector will blink, and after a 90-second cooling-off period the projector will enter standby mode. Refer to “Maintenance Indicators” on page 48 for details.

**Info**

- The cooling fan regulates the internal temperature, and its performance is automatically controlled. The sound of the fan may change during projector operation due to changes in the fan speed. This does not indicate malfunction.
- Do not unplug the power cord during projection or cooling fan operation. This can cause damage due to rise in internal temperature, as the cooling fan also stops.
**Accessories**

**Supplied accessories**

- **Remote control**
- **Two R-6 batteries** (*AA* size, UM/SUM-3, HP-7 or similar)
- **3 RCA to 15-pin D-sub adaptor (11.8" (30 cm))**
- **Lens cap (attached)**
- **Power cord**
  - For U.S. and Canada, etc. (6' (1.8 m))
  - For Europe, except U.K. (6' (1.8 m))
- **DIN-D-sub RS-232C adaptor (5 5/6" (15 cm))**
- **Owner’s manual (this manual)**

* Use the power cord that corresponds to the wall outlet in your country.

**Optional accessory**

- **Lamp unit**
  - **AH-11201**
Part Names and Function

Numbers in refer to the main pages in this owner’s manual where the topic is explained.

**Projector**

**Top View**

- **Power indicator** 28, 48
- **STANDBY-ON button** For turning the power on and putting the projector into standby mode.
- **ENTER button** For setting items selected or adjusted on the menu.
- **KEYSTONE button** For entering the Keystone Correction mode.
- **Lamp indicator** 28, 48
- **Temperature warning indicator** 48
- **Volume buttons** (– O/+ Q) For adjusting the speaker sound level.
- **INPUT buttons (▲▼)** For switching input mode 1, 2, 3 or 4.
- **MENU/HELP button** For displaying adjustment and setting screens, and help screen.
- **Adjustment buttons (▲▼/▲▼) For selecting menu items.

**Front View**

- **Focus ring** For adjusting the focus.
- **HEIGHT ADJUST lever** 31
- **Remote control sensor**
- **Intake vent** 47
- **Zoom ring** For enlarging/reducing the picture.

Push both sides of the lens cap to attach or remove.

Numbers in ☐ refer to the main pages in this owner’s manual where the topic is explained.

STANDBY button
For putting the projector into the standby mode.

KEYSTONE button
For entering the Keystone Correction mode.

RETURN button
For returning to the previous menu screen during menu operations.

ON button
For turning the power on.

MENU/HELP button
For displaying adjustment and setting screens, and help screen.

Adjustment buttons (▲▼▲▲)
• For selecting menu items.
• For adjusting the Keystone Correction when in the Keystone Correction mode.

ENTER button
For setting items selected or adjusted on the menu.

FREEZE button
For freezing images.

AV MUTE button
For temporarily displaying the black screen and turning off the sound.

PICTURE MODE button
For selecting the appropriate picture.

Volume buttons
For adjusting the speaker sound level.

AUTO SYNC button
For automatically adjusting images when connected to a computer.

RESIZE button
For switching the screen size (STRETCH, SIDE BAR, CINEMA ZOOM).

INPUT 1, 2, 3 and 4 buttons
For switching to the respective input modes.
Part Names and Functions (Continued)

Inserting the Batteries

1. Press the ▲ mark on the cover and slide it in the direction of the arrow.

2. Insert the batteries.
   - Insert the batteries making sure the polarities correctly match the + and − marks inside the battery compartment.

3. Attach the cover and slide it until it clicks into place.

Incorrect use of the batteries may cause them to leak or explode. Please follow the precautions below.

**Caution**

- Danger of explosion if battery is incorrectly replaced.
- Replace only with the same or equivalent type.
- Insert the batteries making sure the polarities correctly match the + and − marks inside the battery compartment.
- Batteries of different types have different properties, therefore do not mix batteries of different types.
- Do not mix new and old batteries. This may shorten the life of new batteries or may cause old batteries to leak.
- Remove the batteries from the remote control once they have run out, as leaving them in can cause them to leak.
- Battery fluid from leaked batteries is harmful to skin, therefore ensure that you first wipe them and then remove them using a cloth.

- The batteries included with this projector may run down in a short period, depending on how they are kept. Be sure to replace them as soon as possible with new batteries.
- Remove the batteries from the remote control if you will not be using the remote control for a long time.
- Comply with the rules (ordinance) of each local government when disposing of worn-out batteries.
**Usable Range**

The remote control can be used to control the projector within the ranges shown in the illustration.

**Note**
- The signal from the remote control can be reflected off a screen for easy operation. However, the effective distance of the signal may differ depending on the screen material.

**When using the remote control**
- Ensure that you do not drop, expose to moisture or high temperature.
- The remote control may malfunction under a fluorescent lamp. In this case, move the projector away from the fluorescent lamp.
Quick Start

This section shows the basic operation (projector connecting with the video equipment). For details, see the page described below for each step.

Setup and Projection

In this section, connection of the projector and the video equipment is explained using one example.

1. Place the projector facing a wall or a screen

2. Connect the projector to the video equipment and plug the power cord into the AC socket of the projector

3. Remove the lens cap and turn the projector on
4. Turn the video equipment on and start playback

5. Select the INPUT mode

Select the “INPUT 3” using the INPUT button on the projector or INPUT 3 on the remote control.

- When pressing the INPUT button on the projector, input mode switches in the following order: INPUT1 INPUT2 INPUT3 INPUT4.
- When using the remote control, press the INPUT 1/ INPUT 2/ INPUT 3/ INPUT 4 button to switch the INPUT mode.

6. Adjust the focus, image size, and projector angle

1. Adjust the focus by turning the focus ring.
2. Adjust the projection image size by turning the zoom ring.
3. Adjust the projector angle using the HEIGHT ADJUST lever.

7. Correct trapezoidal distortion

Correcting trapezoidal distortion using the Keystone Correction.

8. Turn the Power off

Press the STANDBY-ON button on the projector or the STANDBY button on the remote control, and then press the button again while the confirmation message is displayed, to put the projector into standby mode.

- Unplug the power cord from the AC outlet after the cooling fan stops.
Setting up the Projector

Setting up the Projector
For optimal image quality, position the projector perpendicular to the screen with the projector's feet flat and level. Doing so will eliminate the need for Keystone correction and provide the best image quality. (See page 33.)

Standard Setup (Front Projection)
- Place the projector at the required distance from the screen according to the desired picture size. (See page 20.)

Example of standard setup

Side View

Screen
Lens center

Note
- Refer to page 20 for additional information concerning "Screen Size and Projection Distance".

Ceiling-mount Setup
- It is recommended that you use the optional EIKI ceiling-mount bracket for this installation. Before mounting the projector, contact your nearest EIKI Authorized Dealer or Service Center to obtain the recommended ceiling-mount bracket (sold separately).
- Invert the image by setting “Ceiling + Front” in “PRJ Mode”: See page 43 for use of this function.
**Projection (PRJ) Mode**

The projector can use any of the 4 projection modes, shown in the diagram below. Select the mode most appropriate for the projection setting in use. (You can set the PRJ mode in “SCR-ADJ” menu. See page 43.)

- **Table mounted, front projection**

- **Ceiling mounted, front projection**

- **Table mounted, rear projection** (with a translucent screen)

- **Ceiling mounted, rear projection** (with a translucent screen)

<td>-4 2/3&quot; (12 cm)</td>
</tr>
</tbody>
</table>

Note

- Refer to page 18 concerning "Projection distance [L]" and "Distance from the lens center to the bottom of the image [H]."  
- There are some errors in the values in the diagrams above.  
- Values with a minus (-) sign indicate the distance from the lens center below the bottom of the image.

The formula for picture size and projection distance:

\[
\begin{align*}
L1 (ft) &= \frac{0.0325\chi}{0.3048} \\
L2 (ft) &= \frac{0.03761\chi}{0.3048} \\
H (\text{in}) &= -\frac{0.29601\chi}{2.54} \\
L1 (m) &= \frac{0.0325\chi}{0.3048} \\
L2 (m) &= \frac{0.03761\chi}{0.3048} \\
H (\text{cm}) &= -\frac{0.29601\chi}{2.54} \\
\end{align*}
\]

Where:

- \(\chi\): Picture size (diag.) (in/cm)
- \(L\): Projection distance (ft/m)
- \(L1\): Minimum projection distance (ft/m)
- \(L2\): Maximum projection distance (ft/m)
- \(H\): Distance from the lens center to the bottom of the image (in/cm)
- \(H1\): Minimum distance from the lens center to the bottom of the image (in/cm)
- \(H2\): Maximum distance from the lens center to the bottom of the image (in/cm)

- Refer to page 18 concerning "Projection distance [L]" and "Distance from the lens center to the bottom of the image [H]."  
- There are some errors in the values in the diagrams above.  
- Values with a minus (-) sign indicate the distance from the lens center below the bottom of the image.
## Samples of Cables for Connection

- For more details of connection and cables, refer to the owner’s manual of the connecting equipment.

</tbody>
</table>
Connecting to Video Equipment

Before connecting, ensure that the power cord of the projector is unplugged from the AC outlet and turn off the devices to be connected. After making all connections, turn on the projector first and then the other devices.

The projector is equipped with input terminals that support component, S-video, and video signals. See the illustration below to connect with the audio-visual equipment.

The image quality is highest in the order of the component signal, the S-video signal and the video signal. If your audio-visual equipment has a component output terminal, use the COMPUTER/COMPONENT terminal (INPUT1 or INPUT 2) on the projector for video connection.

When connecting to equipment with component output terminal (INPUT1 or INPUT2)

- **Component cable** (commercially available)
- **3.5 mm minijack to RCA audio cable** (commercially available)
- **3 RCA to 15-pin D-sub adaptor**

*Use the cable when you want to enjoy the sound from the projector’s speaker.
Connecting to Video Equipment (Continued)

When connecting to equipment with S-video output terminal (INPUT3)

To S-video output terminal
To audio output terminal
DVD, etc.
RCA audio cable* (commercially available)
*S Use the cable when you want to enjoy the sound from the projector’s speaker.

To INPUT3 terminal
To AUDIO (INPUT3, 4) terminal
S-video cable (commercially available)

When connecting to equipment with video output terminal (INPUT4)

To audio output terminal
To video output terminal
DVD, etc.
RCA audio cable* (commercially available)
*S Use the cable when you want to enjoy the sound from the projector’s speaker.

To INPUT4 terminal
To AUDIO (INPUT3, 4) terminal
Composite video cable (commercially available)
Connecting to a Computer

When connecting a computer, ensure that it is the last device to be turned on after all the connections are made.

Ensure that you have read the owner’s manuals of the devices to be connected before making connections.

To audio output terminal

To RGB output terminal

To INPUT1 terminal

To AUDIO (INPUT1, 2) terminal

* ø3.5 mm stereo or mono audio cable (commercially available)

When using the ø3.5 mm mono audio cable, the volume level will be half of when using the ø3.5 mm stereo audio cable.

Note

- See page 54 “Computer Compatibility Chart” for a list of computer signals compatible with the projector. Use with computer signals other than those listed may cause some of the functions to not work.
- A Macintosh adaptor may be required for use with some Macintosh computers. Contact your nearest Macintosh Dealer.
- Depending on the computer you are using, an image may not be projected unless the computer’s external output port is switched on. Refer to the specific instructions in the owner’s manual of your computer to enable your computer’s external output port.
Connecting to a Monitor with RGB Input Terminal

You can display computer images on both the projector and a separate monitor using two sets of RGB cables.

- RGB signals and Component signals can be output to the monitor.

**Note**

- RGB signals and Component signals can be output to the monitor.
Connecting to an Amplifier or Other Audio Equipment

The audio input from devices connected to the AUDIO INPUT terminals on the projector can be output to audio equipment. The audio output is determined according to the selected input mode.

- ø3.5 mm minijack to RCA audio cable (commercially available) is required.
- Before connecting, ensure that both the projector and the audio equipment to be connected are turned off.
- When turning off the projector while it is connected to audio equipment, ensure that you turn off the audio equipment first and then the projector.
- The volume level of external equipment changes in accordance with the volume level of the projector.
Turning the Projector On/Off

Connecting the Power Cord

Plug the supplied power cord into the AC socket on the rear of the projector.

Turning the Projector on

Note that the connections to external equipment and power outlet should be done before performing the operations written below. (See pages 23 to 28.)

Remove the lens cap and press STANDBY-ON on the projector or ON on the remote control.

Note

• About the Lamp Indicator
  The lamp indicator illuminates to indicate the status of the lamp.
  Red: The lamp is on.
  Blinking in red: The lamp is warming up or shutting down.
  Green: The lamp is shut down abnormally or the lamp should be replaced.
• When switching on the projector, a slight flickering of the image may be experienced within the first minute after the lamp has been illuminated. This is normal operation as the lamp’s control circuitry is stabilising the lamp output characteristics. It should not be regarded as faulty operation.
• If the projector is put into standby mode and immediately turned on again, the lamp may take some time to start projection.

Info

• English is the factory default language. If you want to change the on-screen display to another language, change the language according to the procedure on page 43.

Supplied accessory

- Power cord
- AC socket
- Power indicator
- Lamp indicator
- ON button
- STANDBY-ON button
Turning the Power off (Putting the Projector into Standby Mode)

1. Press \textit{STANDBY-ON} on the projector or \textit{STANDBY} on the remote control, then press that button again while the confirmation message is displayed, to put the projector into standby mode.

2. Unplug the power cord from the AC outlet after the cooling fan stops.
   - The power indicator on the projector blinks in red while cooling.
   - The power indicator changes to green when the projector finishes cooling.

Info
- Do not unplug the power cord during projection or cooling fan operation. This can cause damage due to rise in internal temperature, as the cooling fan also stops.

Locking the Operation Buttons on the Projector (Keylock Function)

Use this function to lock the operation buttons on the projector.

- **Locking the Operation Buttons**
  Hold down \textit{ENTER} on the projector for about 5 seconds while the projector is being turned on.
  - The keylock function does not affect the operation with the remote control buttons.
  - You cannot use the keylock function while the projector is warming up.

- **Taking the Keylock off**
  Hold down \textit{ENTER} on the projector for about 5 seconds.
  - When the projector is in standby mode, you can release the keylock by holding down \textit{ENTER} and \textit{STANDBY-ON} on the projector simultaneously for about 5 seconds.

Info
- Keylock does not function while the projector is: displaying “Menu” screens, in standby mode, warming up, changing input signals, operating “Auto Sync” function, or in “Freeze” mode.
Image Projection

Switching the Input Mode

Select the appropriate input mode for the connected equipment.

Press INPUT 1, INPUT 2, INPUT 3 or INPUT 4 on the remote control to select the input mode.

- When pressing INPUT (▲/▼) on the projector, input mode switches in the following order:
  INPUT1 INPUT2 INPUT3 INPUT4
- When “Auto Search” is set to “On”, INPUT (▲/▼) on the projector functions as the Auto Search buttons. (See page 44.)

Adjusting the Projected Image

1 Adjusting the Focus

You can adjust the focus with the focus ring on the projector.

Rotate the focus ring to adjust the focus while watching the projected image.

2 Adjusting the Screen Size

You can adjust the screen size using the zoom ring on the projector.

Rotate the zoom ring to enlarge or shrink the screen size.
3 Adjusting the Height

The height of the projector can be adjusted using the adjustment feet at the front and rear of the projector.

When the screen is above the projector, the projection image can be made higher by adjusting the projector.

1 Lift the projector to adjust its height while lifting the HEIGHT ADJUST lever.

2 Remove your hands from the HEIGHT ADJUST lever of the projector after its height has been finely adjusted.
   • The angle of projection is adjustable up to 8 degrees from the surface on which the projector is placed.

3 Use the rear adjustment foot to make the projector level.
   • The projector is adjustable ±1 degree from the standard position.

Note
   • When adjusting the height of the projector, trapezoidal distortion occurs. Follow the procedures in Keystone Correction to correct the distortion. (See pages 33 and 43.)

Info
   • Do not apply too much pressure on the projector when the front adjustment foot comes out.
   • When lowering the projector, be careful not to get your fingers caught in the area between the adjustment foot and the projector.
   • Hold the projector firmly while lifting or carrying.
   • Do not hold by the lens area.
Image Projection (Continued)

**Adjusting the Volume**

Press \(\text{K} / \text{L} \) on the remote control or \(-/+\) on the projector to adjust the volume.

- Pressing \(\text{K} / -\) will lower the volume.
- Pressing \(\text{L} / +\) will raise the volume.
- When the projector is connected to external equipment, the volume level of the external equipment changes in accordance with the volume level of the projector. Set the projector’s volume to the lowest level when turning the projector on/off or changing the input signal.
- When you do not want to output the sound from the projector’s speaker while the projector is connected to external equipment, set “Speaker” in “PRJ-ADJ” menu to “Off”. (See page 45.)

**Displaying the Black Screen and Turning off the Sound Temporarily**

Press \(\text{AV MUTE}\) on the remote control to temporarily display a black screen and turn off the sound.

- Pressing \(\text{AV MUTE}\) again will turn the projected image back on.
Correcting Trapezoidal Distortion

When the image is projected either from the top or from the bottom towards the screen at an angle, the image becomes distorted trapezoidally. The function for correcting trapezoidal distortion is called Keystone Correction.

**Note**
- The Keystone Correction can be adjusted up to an angle of approximately ±13 degrees and the screen can also be set up to an angle of approximately ±13 degrees (when the resize mode is set to “STRETCH” (see page 34)).

1. Press 📀 KEYSTONE to enter the Keystone Correction mode.
   - You can also display the on-screen display of the Keystone Correction mode with 📀 KEYSTONE on the projector.

2. Press ▲/▼ or ◀/▶ to adjust the Keystone Correction.
   - You can also adjust the Keystone Correction using the adjustment buttons on the projector.

**Note**
- Press 📀 RETURN while the on-screen display of the Keystone Correction mode is on the screen to return to the default setting.

3. Press 📀 KEYSTONE.
   - The on-screen display of the Keystone Correction mode will disappear.
   - You can also use 📀 KEYSTONE on the projector.

**Info**
- While adjusting the image using Keystone Correction, straight lines and the edges of the image may appear jagged.
### Image Projection (Continued)

#### Resize Mode

This function allows you to modify or customize the resize mode to enhance the input image. Depending on the input signal, you can choose “STRETCH”, “SIDE BAR” or “CINEMA ZOOM” image.

Press **RESIZE**.

- See page 43 for setting on menu screen.

- Cutout area on which images cannot be projected.
Operating with the Remote Control

Freezing a Moving Image

1. Press \button{FREEZE}. The projected image is frozen.
2. Press \button{FREEZE} again to return to the moving image from the currently connected device.

Selecting the Picture Mode

You can select the appropriate picture mode to best match the projected image you are watching.

Press \button{PICTURE MODE}.

- When pressing \button{PICTURE MODE}, the picture mode changes in the following order:
  - Standard ➔ Natural ➔ Dynamic ➔ Movie1 ➔ Movie2

Note
- See page 41 for details on the picture mode.

Auto Sync (Auto Sync Adjustment)

Auto Sync function works when detecting input signal after the projector turns on.

Press \button{AUTO SYNC} to manually adjust with Auto Sync function.

Note
- When the optimum image cannot be achieved with Auto Sync adjustment, use the help menu for manual adjustments. (See page 46.)
Menu Items

The following shows the items that can be set in the projector.

**“Picture” menu**

**INPUT 1 (Component)/INPUT 2 (Component)/INPUT 3/INPUT 4**

- **Picture Mode**
  - Standard
- **Contrast**: 0
- **Brightness**: 0
- **Color**: 0
- **Tint**: 0
- **Sharpness**: 0
- **CLR Temp**: 7500K
- **Bright Boost**: 1
- **Progressive**: 3D Progressive
- **Lamp Setting**: Bright
- **Reset**: ENTER

**“Screen adjustment (SCR-ADJ)” menu**

**INPUT 1 (Component)/INPUT 2 (Component)/INPUT 3/INPUT 4**

- **Picture Mode**: Standard
- **Contrast**: 0
- **Brightness**: 0
- **Color**: 0
- **Tint**: 0
- **Sharpness**: 0
- **CLR Temp**: 7500K
- **Bright Boost**: 1
- **Progressive**: 3D Progressive
- **Lamp Setting**: Bright
- **Reset**: ENTER

* You can adjust the menu items with icons (▲, ▼, ◄, ►) using the respective buttons on the remote control.

*1 Items when inputting component signal through INPUT 1 or INPUT 2, or when selecting INPUT 3 or INPUT 4.

*2 “Tone” will appear on the menu screen only when PAL or SECAM signals are input (including when forcibly changed to those input signals). There is basically no need to adjust “Tone”, but you can adjust the picture tone with this adjustment when inputting PAL or SECAM signals.

*3 Items when inputting RGB signal through INPUT 1 or INPUT 2.

---

**Note:**

- You can adjust the menu items with icons (▲, ▼, ◄, ►) using the respective buttons on the remote control.

- *1 Items when inputting component signal through INPUT 1 or INPUT 2, or when selecting INPUT 3 or INPUT 4.

- *2 “Tone” will appear on the menu screen only when PAL or SECAM signals are input (including when forcibly changed to those input signals). There is basically no need to adjust “Tone”, but you can adjust the picture tone with this adjustment when inputting PAL or SECAM signals.

- *3 Items when inputting RGB signal through INPUT 1 or INPUT 2.

- Press \textbf{RETURN} to return to the previous screen when the menu is displayed.
Using the Menu Screen (Continued)

3 Press ▲ or ▼ and select “Bright” to adjust.
   • The selected item is highlighted.

To adjust the projected image while watching it
Press ENTER.
   • The selected item (e.g. “Bright”) is displayed by itself at the bottom of the screen.
   • When pressing ▲ or ▼, the following item (“Color” after “Bright”) will be displayed.

Note
   Press ENTER again to return to the previous screen.

4 Press ▲ or ▼ to adjust the item selected.
   • The adjustment is stored.

5 Press MENU/HELP.
   • The menu screen will disappear.

Note
   • Menu buttons do not function while the projector is operating the “Auto Sync”, “FREEZE”, or “AV MUTE” functions.

### Menu operation

- Example: “Picture” screen menu for INPUT 3 mode
- Example: “Picture” screen menu for INPUT 1 (RGB) mode

### Selecting the Picture Mode

- You can set or adjust each item in the “Picture” menu to your preference. Any changes you make are retained in memory.

### Note

- You can also press PICTURE MODE on the remote control to select the picture mode. (See page 36.)
Progressive

• In NTSC or PAL 60Hz, even if the Progressive mode has been set, the three-two pull down enhancement will be enabled automatically when the film source has been entered.
• When the image is blurred or noisy, switch to the optimal mode.
• When using progressive inputs, inputs are directly displayed so that 2D Progressive, 3D Progressive and Film Mode cannot be selected.

* The film source is a digital video recording with the original encoded as is at 24 frames/second. The projector can convert this film source to progressive video at 60 frames/second with NTSC and PAL 60Hz or at 50 frames/second with PAL 50Hz and SECAM to play back a high-definition image.

Adjusting the Projector Function ("PRJ - ADJ" menu)

Menu operation ➔ Page 39

1 Auto Search Function

This function automatically searches for and switches to the input mode in which signals are being received, when the projector is turned on, or when the INPUT button is pressed.

Note
When "Auto Search" is set to "On"

- If two or more input signals are found, the projector selects the input source in the order of INPUT 1 ➔ INPUT 2 ➔ INPUT 3 ➔ INPUT 4 when you press INPUT (P/R) on the projector.
- While “Auto Search” is set to “On”, press ➔ INPUT 1, ➔ INPUT 2, ➔ INPUT 3 or ➔ INPUT 4 on the remote control to select an input mode other than the input mode selected by the projector.

2 Auto Sync (Auto Sync Adjustment)

<table>
<thead>
<tr>
<th>Selectable items</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>On</td>
<td>Auto Sync adjustment will occur when the projector is turned on or when the input signals are switched, when connected to a computer.</td>
</tr>
<tr>
<td>Off</td>
<td>Auto Sync adjustment is not automatically performed.</td>
</tr>
</tbody>
</table>

Note
- Auto Sync adjustment is also performed by pressing ➔ AUTO SYNC on the remote control.
- The Auto Sync adjustment may take some time to complete, depending on the image of the computer connected to the projector.
- When the optimum image cannot be achieved with Auto Sync adjustment, use manual adjustments. (See page 46.)
• When the Auto Power Off function is set to "On", 5 minutes before the projector enters standby mode, the message "Enter STANDBY mode in X min." will appear on the screen to indicate the remaining minutes.

<table>
<thead>
<tr>
<th>Selectable items</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>On</td>
<td>When no input signal is detected for more than 15 minutes, the projector will automatically enter standby mode.</td>
</tr>
<tr>
<td>Off</td>
<td>The Auto Power Off function will be disabled.</td>
</tr>
</tbody>
</table>

Note
- When the Auto Power Off function is set to "On", 5 minutes before the projector enters standby mode, the message “Enter STANDBY mode in X min.” will appear on the screen to indicate the remaining minutes.

Menu operation ➔ Page 39

This function changes the fan rotation speed.

<table>
<thead>
<tr>
<th>Selectable items</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Normal</td>
<td>Suitable for normal environments.</td>
</tr>
<tr>
<td>High</td>
<td>Select this when using the projector at altitudes of approximately 4,900 feet (1,500 meters) or more.</td>
</tr>
</tbody>
</table>

When “Fan Mode” is set to “High”, the fan rotation speeds up, and the fan noise becomes louder.

You can confirm the cumulative lamp usage time and the remaining lamp life (percentage).

<table>
<thead>
<tr>
<th>Lamp usage condition</th>
<th>Remaining lamp life</th>
</tr>
</thead>
<tbody>
<tr>
<td>Life</td>
<td>100%</td>
</tr>
<tr>

<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>On</td>
<td>The audio signal is output from the internal speaker.</td>
</tr>
<tr>
<td>Off</td>
<td>The audio signal is not output from the internal speaker.</td>
</tr>
</tbody>
</table>

Note
- It is recommended that the lamp be changed when the remaining lamp life becomes 5%.
- The lamp life may vary depending on the usage condition.
Troubleshooting with “Help” menu

This function advises you to solve the problems during usage.

Utilizing “Help” menu functions

Example: When the picture has a green tint
When the picture has a green tint on INPUT 1 (Component)/INPUT 2 (Component).

1. Press MENU/HELP.
2. Press ▼ or ▲ to select “Help”, then press ENTER.
3. Press ▼ or ▲ to select “Color is faded or poor” on Help menu, then press ENTER.

Note
- You can adjust the items with check marks (✓).
- The items in the “Help” menu change, depending on the input signal or setting that you have selected.
- If the problem is not solved, refer to “Troubleshooting”. (see pages 55 and 56)
Cleaning the lens
- Use a commercially available blower or lens cleaning paper (for glasses and camera lenses) for cleaning the lens. Do not use any liquid type cleaning agents, as they may wear off the coating film on the surface of the lens.
- As the surface of the lens can easily get damaged, be sure not to scrape or hit the lens.

Cleaning the exhaust and intake vents
- Use a vacuum cleaner to clean dust from the exhaust vent and the intake vent.

Maintenance

Cleaning the projector
- Ensure that you have unplugged the power cord before cleaning the projector.
- The cabinet as well as the operation panel is made of plastic. Avoid using benzene or thinner, as these can damage the finish on the cabinet.
- Do not use volatile agents such as insecticides on the projector.
- Do not attach rubber or plastic items to the projector for long periods. The effects of some of the agents in the plastic may cause damage to the quality or finish of the projector.
- Wipe off dirt gently with a soft flannel cloth.
- When the dirt is hard to remove, soak a cloth in a mild detergent diluted with water, wring the cloth well and then wipe the projector. Strong cleaning detergents may discolor, warp or damage the coating on the projector. Make sure to test on a small, inconspicuous area on the projector before use.
- If you want to clean the air vents during projector operation, be sure to press STANDBY-ON on the projector or STANDBY on the remote control and put the projector into standby mode. After the cooling fan has stopped, clean the vents.
Maintenance Indicators

- The warning lights (power indicator, lamp indicator and temperature warning indicator) on the projector indicate problems inside the projector.
- If a problem occurs, either the temperature warning indicator or the lamp indicator will illuminate red, and the projector will enter standby mode. After the projector has entered standby mode, follow the procedures given below.

**Top View**

- **Temperature warning indicator**
- **Lamp indicator**
- **Power indicator**

**About the temperature warning indicator**

If the temperature inside the projector increases, due to blockage of the air vents, or the setting location, **TEMP.** will illuminate in the lower left corner of the picture. If the temperature keeps on rising, the lamp will turn off and the temperature warning indicator will blink, the cooling fan will run, and then the projector will enter standby mode. After **TEMP.** appears, be sure to perform the measures described on page 49.

**About the lamp indicator**

- When the remaining lamp life becomes 5% or less, **(yellow)** and “Change The Lamp” will be displayed on the screen. When the percentage becomes 0%, it will change to **(red)**, the lamp will automatically turn off and then the projector will automatically enter standby mode. At this time, the lamp indicator will illuminate in red.
- If you try to turn on the projector a fourth time without replacing the lamp, the projector will not turn on.

**Indicators on the Projector**

<table>

</tbody>
</table>
• If the temperature warning indicator illuminates, and the projector enters standby mode, follow the possible solutions above and then wait until the projector has cooled down completely before plugging in the power cord and turning the power back on. (At least 10 minutes.)

• If the power is turned off for a brief moment due to power outage or some other cause while using the projector, and the power supply recovers immediately after that, the lamp indicator will illuminate in red and the lamp may not be lit. In this case, unplug the power cord from the AC outlet, replace the power cord in the AC outlet and then turn the power on again.

• The cooling fan keeps the internal temperature of the projector constant and this function is controlled automatically. The sound of the cooling fan may change during operation because the fan speed may change and this is not a malfunction.

• Do not unplug the power cord after the projector has entered standby mode and while the cooling fan is running. The cooling fan runs for about 90 seconds.

### Maintenance indicator

#### Problem

- The internal temperature is abnormally high.
- The lamp does not illuminate.
- The lamp unit cover is open.

#### Cause

- Blocked air intake
- The lamp is shut down abnormally.
- Remaining lamp life becomes 5% or less.
- Burnt-out lamp
- Lamp circuit failure

#### Possible Solution

- Relocate the projector to an area with proper ventilation. (See page 8)
- Disconnect the power cord from the AC outlet, and then connect it again.
- Carefully replace the lamp. (See page 51.)
- Take the projector to your nearest EIKI Authorized Dealer or Service Center for repair.
- Please exercise care when replacing the lamp.
- Securely install the cover.

- Red on (Standby)
- Red on
- Red on (Standby)
- Green on/ Red on (Cooling)
- Green blinks

- Time to change the lamp.
- The lamp does not illuminate.
- The power indicator blinks in green when the projector is on.

- Cooling fan breakdown
- Internal circuit failure
- Clogged air intake
- Lamp circuit failure

- Take the projector to your nearest EIKI Authorized Dealer or Service Center for repair.
- Please exercise care when replacing the lamp.
- Securely install the cover.

### Info

- If the temperature warning indicator illuminates, and the projector enters standby mode, follow the possible solutions above and then wait until the projector has cooled down completely before plugging in the power cord and turning the power back on. (At least 10 minutes.)
- If the power is turned off for a brief moment due to power outage or some other cause while using the projector, and the power supply recovers immediately after that, the lamp indicator will illuminate in red and the lamp may not be lit. In this case, unplug the power cord from the AC outlet, replace the power cord in the AC outlet and then turn the power on again.
- The cooling fan keeps the internal temperature of the projector constant and this function is controlled automatically. The sound of the cooling fan may change during operation because the fan speed may change and this is not a malfunction.
- Do not unplug the power cord after the projector has entered standby mode and while the cooling fan is running. The cooling fan runs for about 90 seconds.
Regarding the Lamp

Lamp
- It is recommended that the lamp (sold separately) be replaced when the remaining lamp life becomes 5% or less, or when you notice a significant deterioration in the picture and color quality. The lamp life (percentage) can be checked with the on-screen display. (see page 45)
- Purchase a replacement lamp of type AH-11201 from your place of purchase, nearest EIKI Authorized Dealer or Service Center.

Caution Concerning the Lamp
- This projector utilizes a pressurized mercury lamp. A loud sound may indicate lamp failure. Lamp failure can be attributed to numerous sources such as: excessive shock, improper cooling, surface scratches or deterioration of the lamp due to a lapse of usage time. The period of time up to failure largely varies depending on the individual lamp and/or the condition and the frequency of use. It is important to note that failure can often result in the bulb cracking.
- When the lamp replacement indicator and on-screen display icon are illuminated, it is recommended that the lamp be replaced with a new one immediately, even if the lamp appears to be operating normally.
- Should the lamp break, there is also a possibility that glass particles may spread inside of the projector. In such a case, it is recommended you contact your nearest EIKI Authorized Dealer or Service Center to assure safe operation.
- Should the lamp break, the glass particles may spread inside the lamp cage or gas contained in the lamp may be vented into the room from the exhaust vent. Because the gas in this lamp includes mercury, ventilate the room well if the lamp breaks and avoid all exposure to the released gas. In case of exposure to the gas, consult a doctor as soon as possible.

Replacing the Lamp
- Do not remove the lamp unit from the projector right after use. The lamp will be very hot and may cause burn or injury.
- Carefully change the lamp by following the instructions described in this section. * If you wish, you may have the lamp replaced at your nearest EIKI Authorized Dealer or Service Center.
  * If the new lamp does not light after replacement, take your projector to the nearest EIKI Authorized Dealer or Service Center for repair.
Removing and Installing the Lamp Unit

**Warning!**
- Do not remove the lamp unit from the projector right after use. The lamp and parts around the lamp will be very hot and may cause burns or injury.

**Info**
- Make sure that you remove the lamp unit by the handle. Do not touch the glass surface of the lamp unit or the inside of the projector.
- To avoid injury to yourself and damage to the lamp, be sure to carefully follow the steps below.
- Do not loosen other screws except for the lamp unit cover and lamp unit.

1. **Press □STANDBY-ON on the projector or □STANDBY on the remote control to put the projector into standby mode.**
   - Wait until the cooling fan stops.

2. **Disconnect the power cord.**
   - Unplug the power cord from the AC socket.
   - Leave the lamp until it has fully cooled down (about 1 hour).

3. **Remove the lamp unit cover.**
   - Turn the projector over. Loosen the user service screw (①) that secures the lamp unit cover. Remove the lamp unit cover (②).
Regarding the Lamp (Continued)

4 Remove the lamp unit.
   • Loosen the securing screws from the lamp unit. Hold the lamp unit by the handle and pull it in the direction of the arrow. At this time, keep the lamp unit horizontal and do not tilt it.

5 Insert the new lamp unit.
   • Press the lamp unit firmly into the lamp unit compartment. Fasten the securing screws.

6 Replace the lamp unit cover.
   • Align the tab on the lamp unit cover (1) and place it while pressing the tab (2) to close it. Then tighten the user service screw to secure the lamp unit cover.

   **Info**
   • If the lamp unit and lamp unit cover are not correctly installed, the power will not turn on, even if the power cord is connected to the projector.

Resetting the Lamp Timer

Reset the lamp timer after replacing the lamp.

   **Info**
   • Make sure to reset the lamp timer only when replacing the lamp. If you reset the lamp timer and continue to use the same lamp, this may cause the lamp to become damaged or explode.

1 Connect the power cord.
   • Plug the power cord into the AC socket of the projector.

2 Reset the lamp timer.
   • While simultaneously holding down ♯MENU/HELP, ENTER and ▼ on the projector, press STANDBY-ON on the projector.
   • “LAMP 0000H” is displayed, indicating that the lamp timer is reset.

When this projector receives 640 K 350 VESA format VGA signals, "640 K 400" appears on the screen.

**Computer Compatibility Chart**

- Multiple signal support
  - Horizontal Frequency: 15-70 kHz,
  - Vertical Frequency: 45-85 Hz,
  - Pixel Clock: 12-108 MHz
- Compatible with sync on green signal
- Compatible with the signals below in intelligent compression
  - SVGA, XGA, SXGA, SXGA+
- Intelligent Compression and Expansion System resizing technology

The following is a list of modes that conform to VESA. However, this projector supports other signals that are not VESA standards.

This unit is equipped with a microprocessor. Its performance could be adversely affected by incorrect operation or interference. If this should happen, unplug the Unit and plug it in again after more than 5 minutes.
Specifications

Product type: Projector
Model: EIP-1000T

Video system:
- NTSC3.58/NTSC4.43/PAL/PAL-M/PAL-N/PAL-60/SECAM/DTV480/DTV480P/DTV540P/DTV576i/DTV576P/DTV720P/DTV1035i/DTV1080i/DTV1080P

Display method:
- Single Chip Digital Micromirror Device™ (DMD™) by Texas Instruments

DMD panel:
- Panel size: 0.53", 1 chip DMD
- No. of dots: 409,920 dots (854 [H] × 480 [V])

Lens:
- 1~1.15 × zoom lens, F2.4~2.6, f = 19.0~21.9 mm
- 15-pin mini D-sub connector

Projection lamp:
- 275 W DC lamp
- 15-pin mini D-sub connector

Component input signal
- (INPUT 1/2):
  - Y: 1.0 Vp-p, sync negative, 75 Ω terminated
  - Pc: 0.7 Vp-p, 75 Ω terminated
  - Pγ: 0.7 Vp-p, 75 Ω terminated
- (OUTPUT) signal
  - RGB separate/sync on green type analog input: 0~0.7 Vp-p, positive, 75 Ω terminated
- HORIZONTAL SYNC. SIGNAL: TTL level (positive/negative)
- VERTICAL SYNC. SIGNAL: Same as above
- S-video input signal
  - 4-pin mini DIN connector
- (INPUT 3):
  - Y (luminance signal): 1.0 Vp-p, sync negative, 75 Ω terminated
  - C (chrominance signal): Burst 0.286 Vp-p, 75 Ω terminated
- (OUTPUT) signal
  - RCA connector: VIDEO, composite video, 1.0 Vp-p, sync negative, 75 Ω terminated

Audio input signal
- 3.5 mm minijack or RCA terminal: 0.5 Vrms, more than 22 kΩ (stereo)
- 3.5 mm minijack: 0.5 Vrms, less than 2.2 kΩ

Audio output signal
- 4 cm × 2.85 cm oval × 1
- Input current: 3.6 A
- Rated voltage: AC 100~240 V
- Rated frequency: 50/60 Hz

Power consumption:
- 350 W (Lamp Setting “Bright”)/330 W (Lamp Setting “Eco + Quiet”) with AC 100 V
- 285 W (Lamp Setting “Bright”)/265 W (Lamp Setting “Eco + Quiet”) with AC 240 V

Power consumption (standby):
- 4 W (AC 100 V) ~ 5 W (AC 240 V)

Heat dissipation:
- 1,315 BTU/hour (Lamp Setting “Bright”)/1,145 BTU/hour (Lamp Setting “Eco + Quiet”) with AC 100 V
- 1,240 BTU/hour (Lamp Setting “Bright”)/1,070 BTU/hour (Lamp Setting “Eco + Quiet”) with AC 240 V

Operating temperature:
- 41°F to 95°F (+5°C to +35°C)

Storage temperature:
- -4°F to 140°F (–20°C to +60°C)

Cabinet:
- Plastic

I/R carrier frequency:
- 38 kHz

Dimensions (approx.):
- 12 13/32" × 4 13/32" × 11 1/2" (315 [W] × 109 [H] × 280 [D] mm) (main body only)
- 12 13/32" × 4 13/32" × 11 7/8" (315 [W] × 120 [H] × 294 [D] mm) (including adjustment foot and projecting parts)

Weight (approx.):
- 8.6 lbs. (3.9 kg)

Replacement parts:
- Remote control, Power cord for U.S. and Canada, etc., Power cord for Europe, except U.K., 3 RCA to 15-pin D-sub adaptor, DIN-D-sub RS-232C adaptor, Owner’s manual

As a part of policy of continuous improvement, EIKI reserves the right to make design and specification changes for product improvement without prior notice. The performance specification figures indicated are nominal values of production units. There may be some deviations from these values in individual units.
