
Dieses Gerät entspricht den Anforderungen der EG-Richtlinien 89/336/EWG und 73/23/EWG mit Änderung 93/68/EWG.

Ce matériel répond aux exigences contenues dans les directives 89/336/CEE et 73/23/CEE modifiées par la directive 93/68/CEE.

Dit apparaat voldoet aan de eisen van de richtlijnen 89/336/EGG en 73/23/EEG, gewijzigd door 93/68/EEG.

Dette udstyr overholder kravene i direktiv nr. 89/336/EEC og 73/23/EEC med tillæg nr. 93/68/EEC.

Quest’apparecchio è conforme ai requisiti delle direttive 89/336/EEC e 73/23/EEC, come emendata dalla direttiva 93/68/EEC.

Αυτή η συσκευή συμμορφώνεται με τις απαιτήσεις των οδηγιών του Συμβουλίου 89/336/ΕΟΚ και 73/23/ΕΟΚ όπως τροποποιήθηκαν από την οδηγία του Συμβουλίου 93/68/ΕΟΚ.

Este equipamento obedece às exigências das directivas 89/336/CEE e 73/23/CEE, na sua versão corrigida pela directiva 93/68/CEE.

Este aparato satisface las exigencias de las Directivas 89/336/CEE y 73/23/CEE, modificadas por medio de la 93/68/CEE.

Denna utrustning uppfyller kraven enligt riktlinjerna 89/336/EEC och 73/23/EEC så som kompletteras av 93/68/EEC.

Dette produktet oppfyller betingelsene i direktivene 89/336/EEC og 73/23/EEC i endringen 93/68/EEC.

Tämä laite täyttää direktiivien 89/336/EEC ja 73/23/EEC vaatimukset, joita on muutettu direktiivillä 93/68/EEC.

Tento přístroj je v souladu s požadavky směrnice rady 89/336/EEC a 73/23/EEC, tak jak byly upraveny směrnicí rady 93/68/EEC.

Ez a készülék megfelel a Tanács által kiadott, 89/336/EKG és 73/23/EKG Irányelvnek és az utóbbi módosító 93/68/EKG Irányelvnek

Ši ierice atbilst tehnikam prasībam pec 89/336/EEC un 73/23/EEC direktivam papildinats ar direktīvu 93/68/EEC.

To urządzenie spełnia wymagania dyrektyw 89/336/EEC i 73/23/EEC wraz z poprawkami dyrektywy 93/68/EEC.

Tento přístroj je v súlade s požiadavkami smerníc rady 89/336/EEC a 73/23/EEC tak ako boli upravené smernicou rady 93/68/EEC.

Ta aparat je v skladu z zahtevami Direktiv Sveta 89/336/EEC in 73/23/EEC kot je navedeno v dopolnilu k Direktivi Sveta 93/68/EEC.
SPECIAL NOTE FOR USERS IN THE U.K.
The mains lead of this product is fitted with a non-rewireable (moulded) plug incorporating a 10A fuse. Should the fuse need to be replaced, a BSI or ASTA approved BS 1362 fuse marked ☐ or ☐ and of the same rating as above, which is also indicated on the pin face of the plug, must be used. Always refit the fuse cover after replacing the fuse. Never use the plug without the fuse cover fitted. In the unlikely event of the socket outlet in your home not being compatible with the plug supplied, cut off the mains plug and fit an appropriate type.

DANGER:
The fuse from the cut-off plug should be removed and the cut-off plug destroyed immediately and disposed of in a safe manner. Under no circumstances should the cut-off plug be inserted elsewhere into a 10A socket outlet, as a serious electric shock may occur. To fit an appropriate plug to the mains lead, follow the instructions below:

WARNING:
THIS APPARATUS MUST BE EARTHED.

IMPORTANT:
The wires in this mains lead are coloured in accordance with the following code:

- Green-and-yellow : Earth
- Blue : Neutral
- Brown : Live

As the colours of the wires in the mains lead of this apparatus may not correspond with the coloured markings identifying the terminals in your plug proceed as follows:

• The wire which is coloured green-and-yellow must be connected to the terminal in the plug which is marked by the letter E or by the safety earth symbol ☐ or coloured green or green-and-yellow.
• The wire which is coloured blue must be connected to the terminal which is marked with the letter N or coloured black.
• The wire which is coloured brown must be connected to the terminal which is marked with the letter L or coloured red.

IF YOU HAVE ANY DOUBT, CONSULT A QUALIFIED ELECTRICIAN.
The supplied CD-ROM contains SETUP GUIDE in English, German, French, Spanish, Italian, Portuguese and Japanese.

Le CD-ROM fourni contient le guide d’installation en anglais, allemand, français, espagnol, italien, portugais et japonais.

Den medföljande CD-ROM-skivan innehåller uppställningsguide på engelska, tyska, franska, spanska, italienska, portugisiska och japanska.

El CD-ROM suministrado contiene guía de configuración en inglés, alemán, francés, español, italiano, portugués y japonés.

Il CD-ROM in dotazione contiene guida di impostazione in inglese, tedesco, francese, spagnolo, italiano, portoghese e giapponese.

O CD-ROM fornecido contém guia de configuração em Inglês, Alemão, Francês, Espanhol, Italiano, Português e Japonês.

附送之CD-ROM光碟中，有用英文、德文、法文、西班牙文、意大利文、葡萄牙文和日文所写的設定指南。

附送之CD-ROM光碟中，有用英文、德文、法文、西班牙文、意大利文、葡萄牙文和日文所写的设置指南。

제공된 CD-ROM에는 영어, 독일어, 프랑스어, 스페인어, 이탈리아어, 포르투갈어 그리고 일본어로 작성된 설치 설명서가 포함되어 있습니다。

本機に附属のCD-ROMには、英語・ドイツ語・フランス語・スペイン語・イタリア語・ポルトガル語・日本語のセットアップガイドが収録されています。
Before using the projector, please read this operation manual carefully.

### Introduction

#### 1. WARRANTY
This is to assure that you immediately receive the full benefit of the parts, service and labor warranty applicable to your purchase.

#### 2. CONSUMER PRODUCT SAFETY ACT
To ensure that you will promptly receive any safety notification of inspection, modification, or recall that EIKI may be required to give under the 1972 Consumer Product Safety Act, PLEASE READ CAREFULLY THE IMPORTANT “LIMITED WARRANTY” CLAUSE.

**WARNING:** High brightness light source. Do not stare into the beam of light, or view directly. Be especially careful that children do not stare directly into the beam of light.

**WARNING:** To reduce the risk of fire or electric shock, do not expose this product to rain or moisture.

See bottom of projector.

**CAUTION**
- **RISK OF ELECTRIC SHOCK, DO NOT REMOVE SCREWS EXCEPT SPECIFIED USER SERVICE SCREW.**
- **CAUTION: TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE COVER. NO USER-SERVICEABLE PARTS EXCEPT LAMP UNIT. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.**

The lightning flash with arrowhead symbol, within an equilateral triangle, is intended to alert the user to the presence of uninsulated “dangerous voltage” within the product’s enclosure that may be of sufficient magnitude to constitute a risk or electric shock to persons.

The exclamation point within a triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the product.

**WARNING:** FCC Regulations state that any unauthorized changes or modifications to this equipment not expressly approved by the manufacturer could void the user's authority to operate this equipment.

**INFORMATION**
This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the operation manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference, in which case the user will be required to correct the interference at his own expense.

The enclosed computer cable must be used with the device. The cable is provided to ensure that the device complies with FCC Class A verification.

**WARNING:**
This is a Class A product. In a domestic environment this product may cause radio interference in which case the user may be required to take adequate measures.
WARNING:
The cooling fan in this projector continues to run for about 90 seconds after the projector enters the standby mode. During normal operation, when putting the projector into standby mode always use the POWER button on the projector or on the remote control. Ensure the cooling fan has stopped before disconnecting the power cord. DURING NORMAL OPERATION, NEVER TURN THE PROJECTOR OFF BY DISCONNECTING THE POWER CORD. FAILURE TO OBSERVE THIS WILL RESULT IN PREMATURE LAMP FAILURE.

PRODUCT DISPOSAL
This projector utilizes tin-lead solder, and a pressurized lamp containing a small amount of mercury. Disposal of these materials may be regulated due to environmental considerations. For disposal or recycling information, please contact your local authorities or, if you are located in the United States of America, the Electronic Industries Alliance: www.eiae.org.

Caution Concerning Lamp Replacement
See “Replacing the Lamp” on page 66.

This EIKI projector uses a DMD panel. This very sophisticated panel contains 786,432 pixels micromirrors. As with any high technology electronic equipment such as large screen TVs, video systems and video cameras, there are certain acceptable tolerances that the equipment must conform to. This unit has some inactive pixels within acceptable tolerances which may result in inactive dots on the picture screen. This will not affect the picture quality or the life expectancy of the unit.

- DLP™ (Digital Light Processing) and DMD™ (Digital Micromirror Device) are trademarks of Texas Instruments, Inc.
- Microsoft® and Windows® are registered trademarks of Microsoft Corporation in the United States and/or other countries.
- PC/AT is a registered trademark of International Business Machines Corporation in the United States.
- Adobe® Reader® is a trademark of Adobe Systems Incorporated.
- Macintosh® is a registered trademark of Apple Computer, Inc. in the United States and/or other countries.
- All other company or product names are trademarks or registered trademarks of their respective companies.
- Some IC chips in this product include confidential and/or trade secret property belonging to Texas Instruments. Therefore you may not copy, modify, adapt, translate, distribute, reverse engineer, reverse assemble or discompile the contents thereof.
The menu can be operated to achieve two functions, adjustments and settings. (For setting the menu items, see pages 42 and 43.)

Using the Menu Screen

Menu Selections (Adjustments)

Example: Adjusting "Bright"

This operation can also be performed by using the buttons on the projector.

1. Press \...
2. Press |||| or \\ to display the other menu screens.
   - The menu icon for the selected menu screen is highlighted.

Note
- The "Fine Sync" menu is not available for selecting INPUT 3 or INPUT 4.

IMPORTANT SAFEGUARDS

CAUTION: Please read all of these instructions before you operate this product and save these instructions for later use.

Electrical energy can perform many useful functions. This product has been engineered and manufactured to assure your personal safety. BUT IMPROPER USE CAN RESULT IN POTENTIAL ELECTRICAL SHOCK OR FIRE HAZARDS. In order not to defeat the safeguards incorporated in this product, observe the following basic rules for its installation, use and servicing.

1. Read Instructions
   All the safety and operating instructions should be read before the product is operated.

2. Retain Instructions
   The safety and operating instructions should be retained for future reference.

3. Heed Warnings
   All warnings on the product and in the operating instructions should be adhered to.

4. Follow Instructions
   All operating and use instructions should be followed.

5. Cleaning
   Unplug this product from the wall outlet before cleaning. Do not use liquid cleaners or aerosol cleaners. Use a damp cloth for cleaning.

6. Attachments
   Do not use attachments not recommended by the product manufacturer as they may cause hazards.

7. Water and Moisture
   Do not use this product near water—for example, near a bath tub, wash bowl, kitchen sink, or laundry tub; in a wet basement; or near a swimming pool; and the like.

8. Accessories
   Do not place this product on an unstable cart, stand, tripod, bracket, or table. The product may fall, causing serious injury to a child or adult, and serious damage to the product. Use only with a cart, stand, tripod, bracket, or table recommended by the manufacturer, or sold with the product. Any mounting of the product should follow the manufacturer’s instructions, and should use a mounting accessory recommended by the manufacturer.

9. Transportation
   A product and cart combination should be moved with care. Quick stops, excessive force, and uneven surfaces may cause the product and cart combination to overturn.

10. Ventilation
    Slots and openings in the cabinet are provided for ventilation to ensure reliable operation of the product and to protect it from overheating, and these openings must not be blocked or covered. The openings should not be blocked by placing the product on a bed, sofa, rug, or other similar surface. This product should be unplugged in a built-in installation such as a bookcase or rack unless proper ventilation is provided or the manufacturer’s instructions have been adhered to.

11. Power Sources
    This product should be operated only from the type of power supply to your home. Consult your product dealer or local power company. For products intended to operate from battery power, or other sources, refer to the operating instructions.

12. Grounding or Polarization
    This product is provided with one of the following types of plugs. If the plug should fail to fit into the power outlet, please contact your electrician.
    a. Two-wire type (mains) plug.
    b. Three-wire grounding type (mains) plug with a grounding terminal.
    This plug will only fit into a grounding type power outlet.

13. Power-Cord Protection
    Power-supply cords should be routed so that they are not likely to be walked on or pinched by items placed upon or against them, paying particular attention to cords at plugs, convenience receptacles, and the point where they exit from the product.

14. Lightning
    For added protection this product during a lightning storm, or if it is left unattended and unused for long periods of time, unplug it from the wall outlet and disconnect cable system. This will prevent damage to the product due to lightning and power-line surges.

15. Overloading
    Do not overload wall outlets, extension cords, or integral convenience receptacles as this can result in a risk of fire or electric shock.

16. Object and Liquid Entry
    Never push objects of any kind into this product through openings as they may touch dangerous voltage points or short-out parts that could result in a fire or electric shock.
    Never spill liquid of any kind on the product.

17. Servicing
    Do not attempt to service this product yourself as opening or removing covers may expose you to dangerous voltage or other hazards. Refer all servicing to qualified service personnel.

18. Damage Requiring Service
    Unplug this product from the wall outlet and refer servicing to qualified service personnel under the following conditions:
    a. When the power-supply cord or plug is damaged.
    b. If liquid has been spilled, or objects have fallen into the product.
    c. If the product has been exposed to rain or water.
    d. If the product does not operate normally by following the operating instructions. Adjust only those controls that are covered by the operating instructions, as an improper adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore the product to normal operation.
    e. If the product has been dropped or damaged in any way.
    f. When the product exhibits a distinct change in performance, this indicates a need for service.

19. Replacement Parts
    When replacement parts are required, ensure that the service technician has used replacement parts specified by the manufacturer or have the same characteristics as the original part. Unauthorized substitutions may result in fire, electric shock, or other hazards.

20. Safety Check
    Upon completion of any service or repairs to this product, ask the service technician to perform safety checks to determine that the product is in proper operating condition.

21. Wall or Ceiling Mounting
    This product should be mounted to a wall or ceiling only as recommended by the manufacturer.

22. Heat
    This product should be situated away from heat sources such as radiators, heat registers, stoves, or other products (including amplifiers) that produce heat.
Ensure that you read the following safeguards when setting up your projector.

Caution concerning the lamp unit
- Potential hazard of glass particles if lamp ruptures.
  In case of lamp rupture, contact your nearest EIKI Authorized Projector Dealer or Service Center for a replacement.
  See “Replacing the Lamp” on page 66.

Caution concerning the setup of the projector
- For minimal servicing and to maintain high image quality, EIKI recommends that this projector be installed in an area free from humidity, dust and cigarette smoke. When the projector is subjected to these environments, the vents and lens must be cleaned more often. As long as the projector is regularly cleaned, use in these environments will not reduce the overall operation life of the unit. Internal cleaning should only be performed by a EIKI Authorized Projector Dealer or Service Center.
- Do not set up the projector in places exposed to direct sunlight or bright light.
  ■ Position the screen so that it is not in direct sunlight or room light. Light falling directly on the screen washes out the colors, making viewing difficult. Close the curtains and dim the lights when setting up the screen in a sunny or bright room.
- The projector may be safely tilted to a maximum angle of 12 degrees.
  ■ Placement should be within ±12 degrees of horizontal.

Warning about placing the projector in a high position
- When placing the projector in a high position, ensure to secure it carefully to avoid personal injury caused by the projector falling down.

Do not subject the projector to hard impact and/or vibration.
- Take care with the lens so as not to hit or damage the surface of the lens.

Rest your eyes occasionally.
- Continuously watching the screen for long hours will cause eye strain. Ensure to occasionally rest your eyes.

Avoid locations with extremes of temperature.
- The operating temperature of the projector is from 41°F to 104°F (+5°C to +40°C).
- The storage temperature of the projector is from –4°F to 140°F (–20°C to +60°C).

Do not block the intake and exhaust vents.
- Allow at least 7 7/8 inches (20 cm) of space between the exhaust vent and the nearest wall or obstruction.
- Ensure that the intake vent and the exhaust vent are not obstructed.
- If the cooling fan becomes obstructed, a protection circuit will automatically put the projector into standby mode to prevent overheat damage. This does not indicate a malfunction (See pages 64 and 65.). Remove the projector power cord from the wall outlet and wait at least 10 minutes. Place the projector where the intake and exhaust vents are not blocked, plug the power cord back in and turn on the projector. This will return the projector to the normal operating condition.
Caution regarding usage of the projector
- When using the projector, ensure not to subject it to hard impact and/or vibration, as this can result in damage. Take extra care with the lens. If you are not to use the projector for a long time, ensure to unplug the power cord from the wall outlet, and disconnect any other cables connected to it.
- Do not use the projector by holding the lens.
- When storing the projector, ensure to attach the lens cap to the projector. (See page 11.)
- Do not expose the storage case or projector to direct sunlight or near heat sources. The storage case or projector may change color or become deformed.

Other connected equipment
- When connecting a computer or other audio-visual equipment to the projector, make the connections AFTER unplugging the power cord of the projector from the AC outlet and turning off the equipment to be connected.
- Please read the operation manuals of the projector and the equipment to be connected for instructions on how to make the connections.

Using the projector in other countries
- The power supply voltage and the shape of the plug may vary depending on the region or country you are using the projector in. When using the projector overseas, ensure to use an appropriate power cord for the country you are in.

Temperature monitor function
- If the projector starts to overheat due to setup problems or blockage of the air vents, "X" and "TEMP." will illuminate in the lower left corner of the picture. If the temperature continues to rise, the lamp will turn off, the temperature warning indicator on the projector will blink, and after a 90-second cooling-off period the projector will enter the standby mode. Refer to “Maintenance Indicators” on page 64 for details.

Info
- The cooling fan regulates the internal temperature, and its performance is automatically controlled. The sound of the fan may change during projector operation due to changes in the fan speed. This does not indicate malfunction.
- Do not unplug the power cord during projection or cooling fan operation. This can cause damage due to rise in internal temperature, as the cooling fan also stops.
PDF “SETUP GUIDE” in several languages are included in the CD-ROM, so that you can work with the projector. To utilize this SETUP GUIDE, you need to install Adobe® Reader® on your computer (Windows® or Macintosh®).

Please download Adobe® Reader® from the Internet (http://www.adobe.com).

### Accessing the PDF SETUP GUIDE

**For Windows®:**
1. Insert the CD-ROM in the CD-ROM drive.
2. Double click the “My Computer” icon.
3. Double click the “CD-ROM” drive.
4. Double click the “SETUP” folder.
5. Double click the language (name of the folder) that you want to view.
6. Double click the “SE_E35” pdf file to access the setup guide.

**For Macintosh®:**
1. Insert the CD-ROM in the CD-ROM drive.
2. Double click the “CD-ROM” icon.
3. Double click the “SETUP” folder.
4. Double click the language (name of the folder) that you want to view.
5. Double click the “SE_E35” pdf file to access the setup guide.

• If the desired pdf file cannot be opened by double clicking the mouse, start Adobe® Reader® first, then specify the desired file using the “File”, “Open” menu.

### SETUP GUIDE

Refer to the “SETUP GUIDE” contained on the supplied CD-ROM for details.

- **Attaching the lens cap**
  Push the lens cap on until it clicks into position.
- **Removing the lens cap**
  Pull the lens cap directly outward.

**Part Names and Functions**

- **Adjustment buttons (▲▼◄►)**
  For selecting menu items and other settings.

**Numbers in refer to the main pages in this operation manual where the topic is explained.**
About the Indicators on the Projector

**Power indicator**
- Green on … Normal (Standby)
- Red on … Normal (Power on)

**Lamp indicator**
- Green on … Normal
- Green blinks … The lamp is warming up or shutting down.
- Red on … The lamp has been shut down abnormally or needs to be changed. (See page 64.)

**Temperature warning indicator**
- Off … Normal
- Red on … The internal temperature is abnormally high. (See page 64.)
Numbers in refer to the main pages in this operation manual where the topic is explained.

**Projector (Rear View)**

**Terminals** Refer to “INPUT/OUTPUT Terminals and Connectable Main Equipment” on page 21.

- **AUDIO OUTPUT terminal** 28
  - Audio output terminal of equipment connected to the AUDIO INPUT terminal.

- **OUTPUT (INPUT 1, 2) terminal** 28
  - Shared computer RGB and component signals output terminal for INPUT 1 and 2.
  - Terminal for connecting a monitor.

- **AUDIO INPUT 1, 2 terminal** 23-25
  - Shared audio input terminal for INPUT 1 and 2.

- **INPUT 2 terminal** 23-25
  - Terminal for computer RGB and component signals.

- **INPUT 1 terminal** 23-25
  - Terminal for computer RGB and component signals.

- **INPUT 3 terminal** 26
  - Terminal for connecting video equipment.

- **INPUT 4 terminal** 26
  - Terminal for connecting video equipment with an S-video terminal.

- **AUDIO INPUT 3, 4 terminal** 26
  - Shared audio input terminal for INPUT 3 and 4.

- **USB terminal** 23

- **RS-232C terminal** 27
  - Terminal for controlling the projector using a computer.

- **LAN terminal** 27
  - Terminal for controlling the projector using a computer via network.

- **Exhaust vent** 63
  - The speed and pitch of the cooling fan may change during operation in response to internal temperature changes. This is normal operation and does not indicate a malfunction.

- **Remote control sensor** 15

- **Kensington Security Standard connector** 13

- **AC socket** 29
  - Connect the supplied Power cord.

**Using the Kensington Lock**

- This projector has a Kensington Security Standard connector for use with a Kensington MicroSaver Security System. Refer to the information that came with the system for instructions on how to use it to secure the projector.
Note

• All the buttons on the remote control, except the MOUSE/Adjustment button, are made of luminous material that is visible in the dark. Visibility will diminish over time. Exposure to light will recharge the luminous buttons.
Using the Remote Control

Usable Range

The remote control can be used to control the projector within the ranges shown in the illustration.

Note

• The signal from the remote control can be reflected off a screen for easy operation. However, the effective distance of the signal may differ depending on the screen material.

When using the remote control:

• Ensure not to drop, expose to moisture or high temperature.
• The remote control may malfunction under a fluorescent lamp. In this case, move the projector away from the fluorescent lamp.

Inserting the Batteries

The batteries (two R-03 batteries (“AAA” size, UM/SUM-4, HP-16 or similar)) are supplied in the package.

1 Press the ▲ mark on the cover and slide it in the direction of the arrow.

2 Insert the batteries.

• Insert the batteries making sure the polarities correctly match the + and − marks inside the battery compartment.

3 Attach the cover and slide it until it clicks into place.

Incorrect use of the batteries may cause them to leak or explode. Please follow the precautions below.

Caution

• Insert the batteries making sure the polarities correctly match the + and − marks inside the battery compartment.
• Batteries of different types have different properties, therefore do not mix batteries of different types.
• Do not mix new and old batteries. This may shorten the life of new batteries or may cause old batteries to leak.
• Remove the batteries from the remote control once they have run out, as leaving them in can cause them to leak. Battery fluid from leaked batteries is harmful to skin, therefore ensure to first wipe them and then remove them using a cloth.

• The batteries included with this projector may run down in a short period, depending on how they are kept. Ensure to replace them as soon as possible with new batteries.
• Remove the batteries from the remote control if you will not be using the remote control for a long time.
Quick Start

This section shows the basic operation (projector connecting with the computer). For details, see the page described below for each step.

**Setup and Projection**

In this section, connection of the projector and the computer is explained using one example.

1. Place the projector facing a screen

2. Connect the projector to the computer and plug the power cord into the AC socket of the projector

When connecting equipment other than the computer, see pages 25 and 26.

3. Remove the lens cap and turn the projector on

On the projector

On the remote control

Page 19

Page 29
4. Adjust the angle

Adjust the projector angle
• Adjust the projector angle using the HEIGHT ADJUST button.

This projector is equipped with an “Auto Keystone Correction” function that automatically corrects any trapezoidal distortion within the projected image. The correction is made automatically provided the vertical incline or decline is within 12 degrees.

5. Adjust the focus and the zoom

① Bring the projected image into focus
• When the projector is turned on, the focus function automatically displays a focus pattern and performs Auto Focus once.

② Adjust the projected image size
• Adjust the projected image size by adjusting zoom.

On the projector
1. Press 
2. Adjust by pressing ▲ or ▼.

On the remote control
Adjust by pressing the ZOOM buttons.

③ To perform Auto Focus again, press the AUTO FOCUS button.

④ The focus pattern is displayed, the focus is automatically adjusted, and then the focus pattern disappears.

6. Select the INPUT mode

Select the “INPUT 1” using the INPUT buttons on the projector or the INPUT1 button on the remote control.

• When pressing ▲▼ on the projector, input mode switches in order of:
  INPUT 1→INPUT 2→INPUT 3→INPUT 4

• When using the remote control, press to switch the INPUT mode.

7. Turn the Power off

Press the POWER button, then press that button again while the confirmation message is displayed, to put the projector into standby mode.

• Unplug the power cord from the AC outlet after the cooling fan stops.
How to Use the Storage Case

When storing the projector, attach the lens cap to the lens, and place it in the supplied storage case.

1. Open the cover of the storage case.

2. Place the projector into the storage case.

   - Ensure the projector has cooled down sufficiently before placing it in the case.
   - Ensure the lens cap is attached to the lens for protection.
   - Place the projector into the storage case with the lens facing the handle.
   - Ensure the projector is held in place by using the fixing band.

3. Close the cover of the storage case.

4. Place the accessories in the front pocket of the storage case.

   - This storage case is only for storing the projector.
Setting up the Projector

Position the projector perpendicular to the screen with the projector’s feet flat and level to achieve an optimal image.

**Note**

- The projector lens should be centered in the middle of the screen. If the horizontal line passing through the lens center is not perpendicular to the screen, the image will be distorted, making viewing difficult.
- For an optimal image, position the screen so that it is not in direct sunlight or room light. Light falling directly on the screen washes out the colors, making viewing difficult. Close the curtains and dim the lights when setting up the projector in a sunny or bright room.

Standard Setup (Front Projection)

Place the projector at the required distance from the screen according to the desired picture size. (For details, refer to page 2 of the “SETUP GUIDE” contained on the supplied CD-ROM.)

**Indication of the Projection Image Size and Projection Distance**

For details, refer to page 2 of the “SETUP GUIDE” contained on the supplied CD-ROM.

Example: NORMAL Mode (4:3)

**Projecting a Reversed Image**

**Projection from behind the Screen**
- Place a translucent screen between the projector and the audience.
- Reverse the image by setting “Rear” in the “PRJ Mode” menu. (See page 59.)

**Projection Using a Mirror**
- Place a mirror (normal flat type) in front of the lens.
- When the translucent screen is placed between the mirror and audience, set to “Front” in the “PRJ Mode” menu. (See page 59.)
- When the mirror is placed on the audience side, set to “Rear” in the “PRJ Mode” menu. (See page 59.)

**Ceiling-mount Setup**
- It is recommended that you use the optional EIKI ceiling-mount bracket for this installation.
- Before mounting the projector, contact your nearest EIKI Authorized Projector Dealer or Service Center to obtain the recommended ceiling-mount bracket (sold separately).
- Invert the image by setting “Ceiling + Front” in “PRJ Mode”. See page 59 for use of this function.

---

*Info*

- When using a mirror, ensure that both the projector and the mirror are carefully placed so the projected light does not shine into the eyes of the audience.
INPUT/OUTPUT Terminals and Connectable Main Equipment

INPUT 1, 2 terminal
- Connecting the computer. (See page 23.)
- Connecting video equipment with component output terminal (DVD player, DTV decoder, DVD recorder with hard disc, etc.). (See page 25.)

INPUT 3 terminal
Connecting video equipment without S-video output terminal. (See page 26.)

INPUT 4 terminal
Connecting video equipment with S-video output terminal (VCR, DVD player, etc.). (See page 26.)

OUTPUT (INPUT 1, 2) terminal
Connecting the monitor when you want to simultaneously watch the projection image on the monitor. (See page 28.)

AUDIO INPUT 1, 2 terminal
Connecting an audio cable. (Shared audio input terminal for INPUT 1 and 2.) (See pages 23 and 25.)

AUDIO INPUT 3, 4 terminal
Connecting an audio cable. (Shared audio input terminal for INPUT 3 and 4.) (See page 26.)

AUDIO OUTPUT terminal
Connecting an audio cable. (Shared audio output terminal for INPUT 1, 2, 3 and 4.) (See page 28.)

RS-232C terminal
Connecting the computer to control the projector. (See page 27.)

USB terminal
Connecting the computer using a USB cable. (See page 23.)

LAN terminal
(10 BASE-T/100 BASE-TX)
Connecting the computer or the HUB using a LAN cable. (See page 27.)
Samples of Cables for Connection

- For more details of connection and cables, refer to the operation manual of the connecting equipment.
- You may need other cables or connectors not listed below.

Connecting to a Computer

Before connecting, ensure the power cord of the projector from the AC outlet is unplugged, and that the devices to be connected are turned off. After making all connections, turn on the projector and then the other devices. When connecting a computer, ensure that it is the last device to be turned on after all the connections are made.

Ensure the operation manuals of the devices to be connected have been read before making connections.

* ø3.5 mm stereo or mono audio cable (commercially available)

Note

- When connecting with a USB cable, you can use the remote control as a mouse for controlling the cursor. See page 24.
- See page 69 “Computer Compatibility Chart” for a list of computer signals compatible with the projector. Use with computer signals other than those listed may cause some of the functions to not work.
- A Macintosh adaptor may be required for use with some Macintosh computers. Contact your nearest Macintosh Dealer.
- Depending on the computer you are using, an image may not be projected unless the signal output setting of the computer is switched to the external output. Refer to the computer operation manual for switching the computer signal output settings.

“Plug and Play” function (when connecting to a 15-pin terminal)

- This projector is compatible with VESA-standard DDC 1/DDC 2B. The projector and a VESA DDC compatible computer will communicate their setting requirements, allowing for quick and easy setup.
- Before using the “Plug and Play” function, ensure to turn on the projector first and the connected computer last.

Note

- The DDC “Plug and Play” function of this projector operates only when used in conjunction with a VESA DDC compatible computer.
Using the Remote Control as the Wireless Computer Mouse

When connecting the projector and the computer with the supplied RGB cable and USB cable (see page 23), you can use the remote control as the computer mouse.

The mouse pointer can be operated in the following way after it is connected.

■ When moving the cursor
  Press MOUSE/Adjustment button (▲/▼/◄►).

■ When left-clicking
  Press "L-CLICK button".

■ When right-clicking
  Press "R-CLICK button".

■ When your computer supports only a one-click mouse (such as Macintosh)
  Press "L-CLICK and R-CLICK have common function." or "L-CLICK button or R-CLICK button".

Note

• You cannot use this function when displaying the menu screen.
• Confirm that the computer recognizes the USB connection.
• If “Resize” is displayed when signals having a higher resolution than XGA are being input and you have set “Dot By Dot” as the screen size, you cannot operate the mouse function.
Connecting to Video Equipment

The projector has a COMPUTER-RGB/COMPONENT terminal, an S-VIDEO terminal and VIDEO terminal for video input. Refer to the listed illustrations on how to connect audio-visual equipment. The image quality is highest in order of the component signal, the RGB signal, the S-video signal and the video signal. If your audio-visual equipment has a component output terminal or RGB output terminal, use the COMPUTER-RGB/COMPONENT terminal (INPUT 1 or INPUT 2) on the projector for video connection.

When connecting video equipment with component video output terminal
(When connecting to INPUT 1)

Note
- ø3.5 mm minijack to RCA audio cable (commercially available) is required for audio input.
- When you connect video equipment with a 21-pin RGB output (Euro-scart) to the projector, use a commercially available cable that fits in the projector terminal you want to connect.
Connecting to Video Equipment

When connecting video equipment with video output terminal

When connecting video equipment with S-video output terminal

Note

- Ø3.5 mm minijack to RCA audio cable (commercially available) is required for audio input.
- When you connect video equipment with a 21-pin RGB output (Euro-scart) to the projector, use a commercially available cable that fits in the projector terminal you want to connect.
Controlling the Projector by a Computer

When the RS-232C terminal on the projector is connected to a computer with a DIN-D-sub RS-232C adaptor and an RS-232C serial control cable (cross type, commercially available), the computer can be used to control the projector and check the status of the projector. Refer to the “SETUP GUIDE” contained on the supplied CD-ROM for details.

When connecting to a computer using an RS-232C serial control cable and a DIN-D-sub RS-232C adaptor

Note

- The RS-232C function may not operate if your computer terminal is not correctly set up. Refer to the operation manual of the computer for details.
- Refer to page 4 of the “SETUP GUIDE” contained on the supplied CD-ROM for “RS-232C Specifications and Commands”.

Info

- Do not connect the RS-232C cable to a port other than the RS-232C terminal on the computer. This may damage your computer or projector.
- Do not connect or disconnect an RS-232C serial control cable to or from the computer while it is on. This may damage your computer.

When connecting to the LAN terminal using a LAN cable

Note

- When connecting to hub, use straight-through Category 5 (CAT.5) type cable (commercially available).
- When connecting to computer, use cross-over Category 5 (CAT.5) type cable (commercially available).
Connecting to a Monitor with RGB Input Terminal

You can display computer images on both the projector and a separate monitor using two sets of RGB cables.

![Diagram of monitor and computer connection with RGB cables](image)

**Note**
- RGB signals and Component signals can be output to the monitor.
- For this connection, another RGB cable (commercially available) is required.

Connecting to an Amplifier or Other Audio Equipment

Audio signals input from equipment connected to each audio input terminal of the projector can be output to audio equipment.

![Diagram of amplifier and projector connection with audio cables](image)

**Note**
- φ3.5 mm minijack to RCA audio cable (commercially available) is required for audio input.
- Turn off the power of both the projector and audio equipment when connecting.
- When turning off the power in the case of connecting an amplifier or other audio equipment, first turn off the power of the amplifier and then turn off the power of the projector.
- By using external audio components, the volume can be amplified for better sound.
- For details on Variable Audio Output (VAO) and Fixed Audio Output (FAO), see page 58.
Turning the Projector On/Off

Connecting the Power Cord
Plug the supplied power cord into the AC socket on the rear of the projector.

Turning the Projector on
Before performing the steps in this section, connect any equipment that you use with the projector. (See pages 23-28.)

Remove the lens cap and press \( \text{POWER} \) on the projector or \( \text{POWER} \) on the remote control.
• The power indicator illuminates red.
• After the lamp indicator illuminates, the projector is ready to start operation.
• When System Lock is set, the keycode input screen appears. Enter the right keycode to start projection. See page 54 for details.

**Note**
• The lamp indicator illuminates or blinks, indicating the status of the lamp.
  - **Green**: The lamp is ready.
  - **Blinking green**: The lamp is warming up or shutting down.
  - **Red**: The lamp is shut down abnormally or the lamp should be replaced.
• When switching on the projector, a slight flickering of the image may be experienced within the first minute after the lamp has been illuminated. This is normal operation as the lamp's control circuitry is stabilizing the lamp output characteristics. This does not indicate malfunction.
• If the projector is put into standby mode and immediately turned on again, the lamp may take some time to illuminate.

Turning the Power off (Putting the Projector into Standby Mode)

1 Press \( \text{POWER} \) on the projector or \( \text{POWER} \) on the remote control, then press that button again while the confirmation message is displayed, to put the projector into standby mode.
2 Unplug the power cord from the AC outlet after the cooling fan stops.

**Info**
• Do not unplug the power cord during projection or cooling fan operation. The cooling fan in this projector continues to run for about 90 seconds after the projector enters the standby mode. This can cause damage due to rise in internal temperature, as the cooling fan also stops.

**Supplied accessory**

- **Power cord**

**On-screen Display**

Enter STANDBY mode?
Yes: Press Again. No: Please Wait.

Shutting Down. Please Wait.

**Info**
• English is the factory preset language. If you want to change the on-screen display to another language, change the language according to the procedure on page 62.
Using the Adjustment Feet

The height of the projector can be adjusted using the adjustment feet at the front and rear of the projector when the screen is located higher than the projector, the screen is inclined or when the installation site is slightly inclined. Install the projector so that it is as perpendicular to the screen as possible.

1 Press the HEIGHT ADJUST button.
   • The front adjustment foot comes out.

2 Lift the projector to adjust its height while pressing the HEIGHT ADJUST button.
   • The projector is adjustable up to approximately 12 degrees (6 steps).
   • When lowering the projector, it may be difficult to move the front adjustment foot because the installation surface is difficult to slide. In this case, pull the projector back slightly and adjust its height.

3 Remove your hand from the HEIGHT ADJUST button of the projector after its height has been finely adjusted.

4 Finely adjust the height and inclination by turning the rear adjustment feet.
   • When adjusting the height of the projector, trapezoidal distortion occurs. When “Auto Keystone” of the “Options2” menu is set to (ON) (see page 57), keystone correction functions automatically to correct trapezoidal distortion. When you want to adjust the automatically corrected image, use the manual keystone correction. (See page 31.)

Info

• Do not press the HEIGHT ADJUST button when the front adjustment foot comes out without firmly holding the projector.
• Do not hold the lens when lifting or lowering the projector.
• When lowering the projector, be careful not to get your fingers caught in the area between the adjustment foot and the projector.
Correcting Trapezoidal Distortion

Auto Keystone Correction

When the image is projected either from the top or from the bottom towards the screen at an angle, the image becomes distorted trapezoidally. The function for correcting trapezoidal distortion is called Keystone Correction. This projector is equipped with an “Auto Keystone Correction” function that automatically corrects any trapezoidal distortion within the projected image. The correction is made automatically provided the vertical incline or decline is within 12 degrees.

Note
• When not using the Auto Keystone Correction function, set “Auto Keystone” on the “Options2” menu to “OFF”.

Manual Keystone Correction

When you want to make fine adjustments after the Auto Keystone Correction function has been activated, or when you want to make corrections without using the Auto Keystone Correction function, you can make corrections manually using the following procedure.

1 Press on the remote control to enter the Keystone Correction mode.
   • You can also use on the projector.

2 Press ▲, ▼ or ◀, ◀ on the remote control to adjust the Keystone Correction.
   • You can also adjust the Keystone Correction using the ▲, ▼ or ◀, ◀ buttons on the projector.

Note
• Press ◁ on the remote control to return to the default setting.
• Straight lines or the edges of images may appear jagged while adjusting the image.

3 Press .
   • The on-screen display of the Keystone Correction mode will disappear.
   • You can also use on the projector.
Adjusting the Focus

This projector is equipped with an “Auto Focus” function that adjusts the focus automatically when it is turned on. When you want to readjust the focus after the Auto Focus function has been activated, you can operate the Auto Focus function using the following procedure.

Press \( \text{AF} \) on the projector or \( \text{AF} \) on the remote control.
- The focus is adjusted automatically after the focus pattern is displayed, and the focus pattern disappears from the screen.

\[ \text{Note} \]
- Auto Focus can be performed over a range of 40 to 100 inches.
- The ability to adjust the focus automatically depends on the screen conditions and the surrounding brightness.
- Adjust the focus manually when the focus is not adjusted with Auto Focus or when you want to make fine adjustments.

When adjusting the focus using the buttons
  on the projector  on the remote control
1. Press \( \text{AF} \) ZOOM-FOCUS . Adjust by pressing the FOCUS buttons.
2. Adjust by pressing \( \text{\textup{\textbackslash}} \text{ or } \text{\textup{\textvard}} \).

- When not using the Auto Focus function, set “Auto Focus” on the “Options2” menu to \( \text{OFF} \).

Adjusting the Projected Image Size

When adjusting zoom using the buttons
  on the projector  on the remote control
1. Press \( \text{\textup{\textvard}} \) ZOOM-FOCUS . Adjust by pressing the ZOOM buttons.
2. Adjust by pressing \( \text{\textup{\textvard}} \text{ or } \text{\textup{\textvard}} \).

\[ \text{Note} \]
- Manually adjusting the focus or zoom After you have pressed the FOCUS buttons or ZOOM buttons on the remote control, or after you have pressed the ZOOM-FOCUS button on the projector, you can display the test pattern by pressing the ENTER button. The test pattern is useful for making more accurate adjustments.
Switching the INPUT Mode

Select the appropriate input mode for the connected equipment.

Press \ or \ or \ or \ on the remote control to select the input mode.

- When pressing \ or \ on the projector, input mode switches in order of:
  \ INPUT 1 ↔ INPUT 2 ↔ INPUT 3 ↔ INPUT 4

Note

- When no signal is received, “NO SIGNAL” will be displayed. When a signal that the projector is not preset to receive is received, “NOT REG.” will be displayed.
- The INPUT mode is not displayed when “OSD Display” of the “Options1” menu is set to “ ” (OFF). (See page 51.)

About the INPUT mode

<table>
<thead>
<tr>
<th>INPUT 1/2 (RGB/Component)</th>
<th>Used for projecting images from equipment that sends RGB signals or component signals connected to the RGB input terminal.</th>
</tr>
</thead>
<tbody>
<tr>
<td>INPUT 3 (Video)</td>
<td>Used for projecting images from equipment connected to the VIDEO input terminal.</td>
</tr>
<tr>
<td>INPUT 4 (S-Video)</td>
<td>Used for projecting images from equipment connected to the S-VIDEO input terminal.</td>
</tr>
</tbody>
</table>

Adjusting the Volume

Press \ or \ or \ or \ on the projector or VOL \ or \ on the remote control to adjust the volume.

Note

- Pressing \ or \ will lower the volume.
  Pressing \ or \ will raise the volume.
Displaying the Black Screen and Turning off the Sound Temporarily

Press on the remote control to temporarily display a black screen and turn off the sound.

Note
• Pressing again will turn the projected image and sound back on.

Displaying an Enlarged Portion of an Image

Graphs, tables and other portions of projected images can be enlarged. This is helpful when providing more detailed explanations.

1 Press on the remote control.
   • Enlarges the image.
   • Pressing or enlarges or reduces the projected image.

Note
• You can change the location of the enlarged image using , , and .

2 Press on the remote control to cancel the operation.
   • The magnification then returns to x1.

Note
In the following cases, the image will return to the normal size (x1).
• When switching the INPUT mode.
• When has been pressed.
• When the input signal is changed.
• When the input signal resolution and refresh rate (vertical frequency) change.
• When has been pressed.
Freezing a Moving Image

1 Press \( \text{FREEZE} \) on the remote control.
   • The projected image is frozen.

2 Press \( \text{FREEZE} \) again to return to the moving image from the currently connected equipment.

Selecting the Picture Mode

You can select the suitable picture mode for the projected image, such as movie or video game.

Press \( \text{PICTURE MODE} \) on the remote control.
• When pressing \( \text{PICTURE MODE} \), the picture mode changes in order of
  \( \text{STANDARD} \rightarrow \text{PRESENTATION} \rightarrow \text{CINEMA} \rightarrow \text{GAME} \)

Note
• Press \( \text{UNDO} \) to return to the “STANDARD” mode.
• This function can also be accessed from the OSD menu (see page 44).

Switching the High Brightness/High Contrast Mode

This function controls the quantity of the projected light and the contrast of the image.

Press \( \text{IRIS} \) on the remote control.
• The mode is switched between “HIGH BRIGHTNESS MODE” and “HIGH CONTRAST MODE”.

Note
• This function can also be accessed from the OSD menu (see page 46).
This function allows you to modify or customize the resize mode to enhance the input image. Depending on the input signal, you can choose “NORMAL”, “DOT BY DOT”, “BORDER” or “STRETCH” image.

**Resize Mode**

Press \( \text{on the remote control.} \)
- Pressing \( \) changes the display as shown on pages 36 and 37.
- To return to the standard image, press \( \) while “RESIZE” is displayed on the screen.
- This function can also be accessed from the OSD menu (see page 50).

### COMPUTER

<table>

Using the Menu Screen

The menu can be operated to achieve two functions, adjustments and settings. (For setting the menu items, see pages 42 and 43.)

Menu Selections (Adjustments)

Example: Adjusting “Bright”
• This operation can also be performed by using the buttons on the projector.

1 Press \[ \text{MENU} \].
• The “Picture” menu screen for the selected input mode is displayed.

2 Press \[ \text{\textgreater} \] or \[ \text{\textless} \] to display the other menu screens.
• The menu icon for the selected menu screen is highlighted.

<table>
<thead>
<tr>
<th>Menu icon</th>
<th>Menu screen</th>
</tr>
</thead>
<tbody>
<tr>
<td>📊</td>
<td>Picture</td>
</tr>
<tr>
<td>⏸️</td>
<td>Fine Sync</td>
</tr>
<tr>
<td>🟢</td>
<td>Options1</td>
</tr>
<tr>
<td>🟢</td>
<td>Options2</td>
</tr>
<tr>
<td>🗣️</td>
<td>Language</td>
</tr>
</tbody>
</table>

Note
• The “Fine Sync” menu is not available for selecting INPUT 3 or INPUT 4.
3 Press ▲ or ▼ to select the item you want to adjust.
• The selected item is highlighted.

To adjust the projected image while viewing it

Press 「」 or 「」
• The selected single adjustment item (e.g. “Bright”) appears instead of the menu.
• When pressing ▲ or ▼, the following item (“Red” after “Bright”) will be displayed.

Note
• Press 「」 to return to the previous screen.

4 Press ◄ or ► to adjust the item selected.
• The adjustment is stored.

5 Press MENU.
• The menu screen will disappear.
Using the Menu Screen

The menu can be operated to achieve two functions, adjustments and settings. (For adjusting the menu items, see pages 40 and 41.)

Menu Selections (Settings)

Example: Setting “Menu Position”
• This operation can also be performed by using the buttons on the projector.

1 Press \[ \text{MENU} \].
• The “Picture” menu screen for the selected input mode is displayed.

2 Press \[ \text{SEL./ADJ.} \] or \[ \text{SEL.} \] to display the other menu screens.
• The menu icon for the selected menu screen is highlighted.

<table>
<thead>
<tr>

</tr>
<tr>
<td><img src="image" alt="Options2" /></td>
<td>Options2</td>
</tr>
<tr>
<td><img src="image" alt="Language" /></td>
<td>Language</td>
</tr>
</tbody>
</table>

Note
• The “Fine Sync” menu is not available for selecting INPUT 3 or INPUT 4.
3 Press ▲ or ▼ to select the item you want to set, and then press ► to display the sub menu.
• The selected item is highlighted.
• When you select “System Lock” on the “Options1” menu or “Password” on the “Options2” menu, press ▪.

![Note]
• Press ◄ or ◄ to return to the previous screen.
• For some items, press ◄ or ► to select the icon using “►”.

4 Press ▲ or ▼ to select the setting of the item displayed in the sub menu.

5 Press ◄.
• The selected item is set.

6 Press ◄.
• The menu screen will disappear.
You can adjust the projector’s picture to your preferences using the “Picture” menu.

### Selecting the Picture Mode

This function allows you to select the picture mode in accordance with brightness of the room or content of the image to be projected. In all picture modes, items on the “Picture” menu can be adjusted and saved.

Menu operation ➔ Page 42

#### Example: “Picture” screen menu for INPUT 1 (RGB) mode

![Picture menu](image)

#### Description of Picture Modes

<table>
<thead>
<tr>
<th>Selectable items</th>
<th>Description</th>
</tr>
</thead>
<tbody>

</tr>
</tbody>
</table>

*1 “Color”, “Tint” and “Sharp” are not displayed when selecting INPUT 1/INPUT 2 and setting the “Signal Type” to “RGB” or setting the “Signal Type” to “Auto” and the input signal is recognized as an RGB signal.

*2 “Red” and “Blue” cannot be adjusted when “sRGB” is set to “ON”.

#### Note

- You can also press on the remote control to select the picture mode. (See page 35.)
Emphasizing the Contrast

This function emphasizes the bright portions of images to obtain a higher contrast image.

Menu operation ➞ Page 40

Example: “Picture” screen menu for INPUT 1 (RGB) mode

Description of Bright Boost Setting

<table>
<thead>
<tr>
<th>Description</th>
<th>Selectable items</th>
</tr>
</thead>
<tbody>
<tr>
<td>To improve color reproduction, lower</td>
<td>5500K</td>
</tr>
<tr>
<td>bright boost setting.</td>
<td>6500K</td>
</tr>
<tr>
<td></td>
<td>7500K</td>
</tr>
<tr>
<td></td>
<td>8500K</td>
</tr>
<tr>
<td></td>
<td>9300K</td>
</tr>
<tr>
<td></td>
<td>10500K</td>
</tr>
<tr>
<td>To increase brightness, increase bright boost setting.</td>
<td></td>
</tr>
</tbody>
</table>

Note

- “Bright Boost” cannot be set when “sRGB” is set to “” (ON).

Adjusting the Color Temperature

Menu operation ➞ Page 42

Example: “Picture” screen menu for INPUT 1 (RGB) mode

Description of Color Temperature Settings

<table>
<thead>
<tr>
<th>Selectable items</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>5500K</td>
<td>For lower color temperature for warmer, reddish incandescent-like images.</td>
</tr>
<tr>
<td>6500K</td>
<td></td>
</tr>
<tr>
<td>7500K</td>
<td></td>
</tr>
<tr>
<td>8500K</td>
<td></td>
</tr>
<tr>
<td>9300K</td>
<td>For higher color temperature for cooler, bluish, fluorescent-like images.</td>
</tr>
<tr>
<td>10500K</td>
<td></td>
</tr>
</tbody>
</table>

Note

- Values on “CLR Temp” are only for general standard purposes.
- “CLR Temp” cannot be set when “sRGB” is set to “” (ON).
sRGB Setting

When you want to display the image in a natural tint based on an original image from the computer, select “sRGB” and set it to “ON” (ON).

Menu operation  ➪  Page 42

Example: “Picture” screen menu for INPUT 1 (RGB) mode

<table>
<thead>
<tr>
<th>Picture Mode</th>
<th>Contrast</th>
<th>Bright</th>
<th>Red</th>
<th>Blue</th>
<th>Bright Boost</th>
<th>CLR Temp</th>
<th>7500K</th>
</tr>
</thead>
<tbody>
<tr>
<td>sRGB</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Note

• An international standard of color reproduction regulated by the IEC (International Electrotechnical Commission). As the fixed color area has been decided by the IEC, the images are displayed in a natural tint based on an original image, when “sRGB” is set to “ON” (ON).
• You cannot set the items, “Red”, “Blue”, “CLR Temp”, “Bright Boost” on the “Picture” menu, when “sRGB” is set to “ON” (ON).
• For additional information about the sRGB function, visit “http://www.srgb.com/”.

Info

• When “sRGB” is set to “ON” (ON), the projected image may become dark, but this does not indicate a malfunction.

Switching the High Brightness/High Contrast Mode

This function changes the brightness and contrast of the projected image. It can be operated using the IRIS button on the remote control.

Menu operation  ➪  Page 42

Example: “Picture” screen menu for INPUT 1 (RGB) mode

<table>
<thead>
<tr>
<th>Picture Mode</th>
<th>Contrast</th>
<th>Bright</th>
<th>Red</th>
<th>Blue</th>
<th>Bright Boost</th>
<th>CLR Temp</th>
<th>7500K</th>
</tr>
</thead>
<tbody>
<tr>
<td>sRGB</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>

<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>High Brightness</td>
<td>High brightness is given priority over high contrast.</td>
</tr>
<tr>
<td>High Contrast</td>
<td>High contrast is given priority over high brightness.</td>
</tr>
</tbody>
</table>
Signal Type Setting

This function allows you to select the input signal type RGB or Component for INPUT 1 or INPUT 2.

Menu operation  Page 42

Example: “Picture” screen menu for INPUT 1 (RGB) mode

Description of Signal Type Settings

<table>
<thead>
<tr>
<th>Selectable items</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Auto</td>
<td>Input signals are automatically recognized as RGB or Component.</td>
</tr>
<tr>
<td>RGB</td>
<td>Set when RGB signals are received.</td>
</tr>
<tr>
<td>Component</td>
<td>Set when Component signals are received.</td>
</tr>
</tbody>
</table>
You can adjust the computer image, match the computer display mode, and confirm the input signal using the “Fine Sync” menu.

**Adjusting the Computer Image**

Use the Fine Sync function in case of irregularities such as vertical stripes or flickering in portions of the screen.

Menu operation ➔ Page 40

**Example: “Fine Sync” screen menu for INPUT 1 (RGB) mode**

**Description of Adjustment Items**

<table>
<thead>
<tr>
<th>Selectable items</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Clock</td>
<td>Adjusts vertical noise.</td>
</tr>
<tr>
<td>Phase</td>
<td>Adjusts horizontal noise (similar to tracking on your VCR).</td>
</tr>
<tr>
<td>H-Pos</td>
<td>Centers the on-screen image by moving it to the left or right.</td>
</tr>
<tr>
<td>V-Pos</td>
<td>Centers the on-screen image by moving it up or down.</td>
</tr>
</tbody>
</table>

**Note**

- You can automatically adjust the computer image by setting “Auto Sync” on the “Fine Sync” menu to “ON” (ON) or pressing \( \mathbb{U} \) on the projector or \( \mathbb{U} \) on the remote control. See next page for details.
- To reset all adjustment items, select “Reset” and press \( \mathbb{U} \).

**Special Modes Setting**

Ordinarily, the type of input signal is detected and the correct resolution mode is automatically selected. However, for some signals, the optimal resolution mode in “Special Modes” on the “Fine Sync” menu may need to be selected to match the computer display mode.

Menu operation ➔ Page 42

**Example: “Fine Sync” screen menu for INPUT 1 (RGB) mode**

**Note**

- If your computer displays patterns which repeat every other line (horizontal stripes), flickering may occur which makes the image hard to see.
- See “Checking the Input Signal” on the next page for information on the currently selected input signal.
Auto Sync Adjustment

Used to automatically adjust a computer image.

Menu operation ➔ Page 42

Example: “Fine Sync” screen menu for INPUT 1 (RGB) mode

Description of Auto Sync Adjustment

<table>
<thead>
<tr>
<th>Selectable items</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>(ON)</td>
<td>Auto Sync adjustment will occur when the projector is turned on or when the input signals are switched, when connected to a computer.</td>
</tr>
<tr>
<td>(OFF)</td>
<td>Auto Sync adjustment is not automatically performed.</td>
</tr>
</tbody>
</table>

Note

- Auto Sync adjustment is also performed by pressing on the projector or on the remote control.
- The Auto Sync adjustment may take some time to complete, depending on the image of the computer connected to the projector.
- When the optimum image cannot be achieved with Auto Sync adjustment, use manual adjustments. (See page 48.)

Checking the Input Signal

Menu operation ➔ Page 42

Example: “Fine Sync” screen menu for INPUT 1 (RGB) mode

Note

- The projector will display the number of scanned lines available from audio-visual equipment such as a DVD player or Digital Video.
- The projector will display the resolution when connecting the computer.
Using the “Options1” Menu

You can use the “Options1” menu to enhance the usage for the projector.

Checking the Lamp Life Status

You can confirm the cumulative lamp usage time and the remaining lamp life (percentage).

Menu operation ➔ Page 42

Example: “Options1” screen menu for INPUT 1 (RGB) mode

<table>
<thead>
<tr>
<th>Lamp usage condition</th>
<th>“Life”</th>
<th>Remaining lamp life</th>
</tr>
</thead>
<tbody>
<tr>
<td>Operated exclusively in Eco mode</td>
<td>100%</td>
<td>Approx. 3,000 hours</td>
</tr>
<tr>
<td>Operated exclusively in Standard mode</td>
<td>5%</td>
<td>Approx. 150 hours</td>
</tr>
<tr>
<td>Operated exclusively in Standard mode</td>
<td>100%</td>
<td>Approx. 2,000 hours</td>
</tr>
<tr>
<td>Operated exclusively in Standard mode</td>
<td>100%</td>
<td>Approx. 100 hours</td>
</tr>
</tbody>
</table>

Setting the Resize Mode

Depending on the input signal, you can select the screen image.

Menu operation ➔ Page 42

Example: “Options1” screen menu for INPUT 1 (RGB) mode

Selectable items of Resize Modes

- Normal
- Border
- Dot By Dot*
- Stretch

*Item when inputting RGB signal through INPUT 1 or INPUT 2

Note

- It is recommended that the lamp be changed when the remaining lamp life becomes 5%.
- The table above indicates rough estimates in the case of using only in each mode shown.
- Remaining lamp life changes within the range of the values shown depending on the frequency at which “Eco Mode” is switched to “ ” (Eco mode) and “ ” (Standard mode). (See page 52.)
- The lamp life may vary depending on the usage condition.

Note

- For details of the Resize mode, see pages 36 and 37.
- You can also press on the remote control to set the resize mode. (See page 36.)
Setting On-screen Display

This function allows you to turn the on-screen messages on or off.

Menu operation ➔ Page 42

Example: “Options1” screen menu for INPUT 1 (RGB) mode

Description of OSD Display Settings

<table>
<thead>
<tr>
<th>Selectable items</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>ON</td>
<td>All On-screen Displays are displayed.</td>
</tr>
<tr>
<td>OFF</td>
<td>INPUT/VOLUME/AV MUTE/FREEZE/AUTO SYNC/ENLARGE/ “An invalid button has been pressed.” are not displayed.</td>
</tr>
</tbody>
</table>

Setting the Video System

The video input system mode is factory preset to “Auto”; however, a clear picture from the connected audio-visual equipment may not be received, depending on the video signal difference. In that case, switch the video signal.

Menu operation ➔ Page 42

Example: “Options1” screen menu for INPUT 3 (Video) mode

Description of Video Systems

<table>
<thead>
<tr>
<th>Selectable items</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>PAL</td>
<td>When connected to PAL video equipment.</td>
</tr>

System Lock Function

This function prevents unauthorized use of the projector. Once this function is activated, users must enter the correct keycode each time the projector is turned on. We suggest you record the keycode in a safe place where only authorized users have access.

Note
• If you input a wrong keycode, the cursor returns to the first point of the “Old Code”.
• The preset keycode is 4 ▼ buttons on the projector. If this keycode is set, the keycode input screen does not appear when turning the power on.

3 Press the 4 buttons on the remote control or on the projector to enter the new keycode in “New Code”.

Note
• You cannot use the following buttons for keycode:
  • POWER button
  • L-CLICK/ENTER button
  • R-CLICK/UNDO button
  • MENU button
  • AUTO FOCUS button
  • ZOOM-FOCUS button
  • ZOOM buttons
  • FOCUS buttons
• System Lock function recognizes each button on the remote control or on the projector as an individual button, even if they share the same button name. If you set the keycode with the buttons on the projector, use only those buttons on the projector. If you set the keycode with the buttons on the remote control, use only those buttons on the remote control.

4 Enter the same keycode in “Reconfirm”.

Note
Not displaying the keycode input screen when turning the projector on
• Press ▼ on the projector for four times in steps 2 and 3 above.

When the System Lock is set
• When System Lock is set, the keycode input screen appears after the power is turned on. When it appears, enter the right keycode to start projection. Failure to enter the keycode will cause images not to be projected even when signals are entered to the projector.

Menu operation ➔ Page 42

Example: “Options1” screen menu for INPUT 1 (RGB) mode

Setting the keycode

1 Select “System Lock” on the “Options1” menu, then press .
• A message is displayed.
• Read this message, and press .

2 Press the 4 buttons on the remote control or on the projector to enter the preset keycode in “Old Code”.
• When setting the keycode for the first time, press ▼ on the projector for four times.

Setting the keycode

Old Code
New Code
Reconfirm

System Lock

On-screen Display

Info
• If you lose or forget your keycode, contact your nearest EIKI Authorized Projector Dealer or Service Center. Even if the product warranty is valid, the keycode reset will incur a charge.

Menu operation ➔ Page 42

Using the “Options1” Menu
Changing the keycode

<table>
<thead>

</tr>
</tbody>
</table>

1 Press the buttons on the remote control or on the projector to enter the preset keycode in “Old Code”.

2 Press the 4 buttons on the remote control or on the projector to enter the new keycode in “New Code”.

3 Enter the same keycode in “Reconfirm”.

When System Lock is set

If you have set the system lock, enter the keycode and follow the procedure below to release the system lock.

▼ Input screen for keycode

<table>
<thead>
<tr>
<th>System Lock</th>
<th></th>
</tr>
</thead>
</table>

1 Press on the remote control or on the projector to turn on the projector.

2 When the keycode input screen appears, enter the right keycode to start projection.

Note
- When System Lock is set, the keycode input screen appears after the power is turned on.
- If no keycode is entered, the image will not be displayed, even if the projector receives the input signal.

Note
- System Lock function recognizes each button on the remote control or on the projector as an individual button, even if they share the same button name. If you set the keycode with the buttons on the projector, use only those buttons on the projector. If you set the keycode with the buttons on the remote control, use only those buttons on the remote control.
Helpful Functions Set during Installation ("Options2" menu)

Setting a Password

- There is no factory preset for the password, so the "Options2" menu is enabled.
- If you do not want others to operate the "Options2" menu, set a password.

Menu operation ➔ Page 42

Example: "Options2" screen menu

<table>
<thead>
<tr>
<th>Options2</th>
<th>Password</th>
<th>Auto Focus</th>
<th>Auto Keystone</th>
<th>Speaker</th>
<th>Audio Out</th>
<th>PJ Mode</th>
<th>RS-232C</th>
<th>Monitor Out</th>
<th>LAN/RS232C</th>
<th>Projector</th>
<th>IP Address</th>
<th>MAC Address</th>
<th>All Reset</th>
</tr>
</thead>
<tbody>
<tr>
<td>Password</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

1. Select "Password" from the "Options2" menu, and press ➔ ENTER. • The screen for entering the password is displayed.

2. Press ▲ or ▼ to set the first digit in "New Password" and then press ➔．

3. Enter the remaining 3 digits and press ➔ ENTER.

4. Enter the same password in "Reconfirm" and press ➔ ENTER.

Changing the Password

<table>
<thead>
<tr>
<th>Password</th>
<th>Old Password</th>
<th>- - - -</th>
<th>New Password</th>
<th>- - - -</th>
<th>Reconfirm</th>
<th>- - - -</th>
</tr>
</thead>
</table>

1. Press ▲, ▼ and ➔ to enter the password in "Old Password" and press ➔．

2. Press ▲, ▼ and ➔ to set the new password in "New Password" and press ➔．

3. Enter the same 4-digit password in "Reconfirm" and press ➔．

Note

- If you do not want to set a password, leave the fields blank in steps 2 and 3 and press ➔．
- To cancel the password settings, press ➔．

If You Forget Your Password

If you forget the password, delete it using the following procedure and set a new password.

Press ➔ ENTER ➔ ENTER ➔ ENTER ➔ ENTER ➔ ENTER ➔ MENU ➔ ENTER

Note

- You can only use the buttons on the projector to delete the password.
Auto Focus Setting

When the projector is turned on, the focus pattern is displayed automatically and the focus is adjusted automatically.

Menu operation ➔ Page 42

Example: “Options2” screen menu

<table>
<thead>
<tr>
<th>Selectable items</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>(ON)</td>
<td>Focus is adjusted automatically when the power is turned on.</td>
</tr>
<tr>
<td>(OFF)</td>
<td>Focus is not adjusted automatically when the power is turned on.</td>
</tr>
</tbody>
</table>

Note

• Auto Focus can be performed over a range of 40 to 100 inches.
• The ability to adjust the focus automatically depends on the screen conditions and the surrounding brightness.
• When the distance between the projector and the screen does not change (fixing installation), it is recommended that “Auto Focus” is set to “(OFF).”
• The Auto Focus function can be used with the AUTOFOCUS function on the projector or with the AUTOFOCUS button on the remote control.
• Adjust the focus manually when the focus is not adjusted with Auto Focus or when you want to make fine adjustments. (See page 32.)

Auto Keystone Setting

When the image is projected either from the top or from the bottom towards the screen at an angle, the image becomes distorted trapezoidally. This trapezoidal distortion is corrected automatically.

Menu operation ➔ Page 42

Example: “Options2” screen menu

<table>
<thead>
<tr>
<th>Selectable items</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>(ON)</td>
<td>The projected image is corrected trapezoidal distortion automatically.</td>
</tr>
<tr>
<td>(OFF)</td>
<td>The projected image is not corrected trapezoidal distortion automatically.</td>
</tr>
</tbody>
</table>

Note

• Trapezoidal distortion can be corrected with the Auto Keystone Correction function for angles up to about 12 degrees vertically with respect to the screen.
• When the screen is slanting or the image is deteriorated, set “Auto Keystone” to “(OFF).”
• You can make corrections manually when you want to make fine adjustments after the Auto Keystone Correction function has been activated. (See page 31.)
**Setting the Audio Output Type**

This function determines whether the audio level output from the AUDIO OUTPUT terminal is fixed or variable by linking with VOLUME.

Menu operation  ➡  Page 42

**Example: “Options2” screen menu**

- **Audio Out**: FAO (Fixed Audio Output), VAO (Variable Audio Output)
- **Password**:
- **Auto Focus**:
- **Auto Keystone**:
- **Speaker**:
- **PRJ Mode**: Front
- **RS-232C**: 9600bps
- **Monitor Out**: Enable
- **LAN/RS232C**: Enable
- **Projector**: ELP-3500
- **IP Address**: 192.168.150.2
- **MAC Address**: 00:0B:2C:01:00:00
- **All Reset**:

**Description of Audio Out Settings**

- **FAO**: Audio output that does not vary in strength with the volume level of the source projector.
- **VAO**: Audio output that varies in strength with the volume level of the source projector.

**Info**

- When "Audio Out" has been set to “VAO”, first make sure to lower the volume of the projector before turning the power on or off and when switching the input.
**Reversing/Inverting Projected Images**

This projector is equipped with a reverse/invert image function that allows you to reverse or invert the projected image for various applications.

Menu operation ➔ Page 42

**Example: “Options2” screen menu**

<table>
<thead>
<tr>
<th>PRJ Mode</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Front</td>
<td>Normal image</td>
</tr>
<tr>
<td>Ceiling + Front</td>
<td>Inverted image</td>
</tr>
<tr>
<td>Rear</td>
<td>Reversed image</td>
</tr>
<tr>
<td>Ceiling + Rear</td>
<td>Reversed and inverted image</td>
</tr>
</tbody>
</table>

**Note**

- This function is used for the reversed image and ceiling-mount setups. (See page 20.)

**Selecting the Transmission Speed (RS-232C)**

Make sure that both the projector and computer are set for the same baud rate.

Menu operation ➔ Page 42

**Example: “Options2” screen menu**

<table>
<thead>
<tr>
<th>Selectable items</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>RS-232C</td>
<td>9600bps</td>
</tr>
<tr>
<td>Monitor Out</td>
<td>Enable</td>
</tr>
<tr>
<td>LAN/RS232C</td>
<td>Enable</td>
</tr>
<tr>
<td>Projector</td>
<td>EIP-3500</td>
</tr>
<tr>
<td>IP Address</td>
<td>192.168.150.2</td>
</tr>
<tr>
<td>MAC Address</td>
<td>00:0B:2C:01:00:00</td>
</tr>
</tbody>
</table>

**Description of RS-232C**

<table>
<thead>
<tr>
<th>Selectable items</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>9600 bps</td>
<td>Transmission speed is slow.</td>
</tr>
<tr>
<td>115200 bps</td>
<td>Transmission speed is rapid.</td>
</tr>
</tbody>
</table>

**Note**

- Refer to the “SETUP GUIDE” contained on the supplied CD-ROM for RS-232C Specifications and Command Settings.
- Refer to the computer’s operation manual for instructions for setting the computer’s baud rate.
Monitor Output Settings

When the Monitor Out has been set to “Enable", the monitor output is activated and power is consumed even in the standby mode. It is recommended that the Monitor Out be set to “Disable” when it is not connected. This reduces power consumption when the projector is in the standby mode.

Menu operation ➔ Page 42

Example: “Options2” screen menu

<table>
<thead>
<tr>
<th>Selectable items</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Enable</td>
<td>The monitor output function is activated even if the projector is in standby mode.</td>
</tr>
<tr>
<td>Disable</td>
<td>The monitor output function is switched off when the projector is in standby mode.</td>
</tr>
</tbody>
</table>

LAN/RS232C Setting

When the LAN/RS232C has been set to “Enable", the LAN/RS232C is activated and power is consumed even in the standby mode. It is recommended that the LAN/RS232C be set to “Disable” when it is not connected. This reduces power consumption when the projector is in the standby mode.

Menu operation ➔ Page 42

Example: “Options2” screen menu

<table>
<thead>
<tr>
<th>Selectable items</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Enable</td>
<td>The LAN/RS232C function is activated even if the projector is in standby mode.</td>
</tr>
<tr>
<td>Disable</td>
<td>The LAN/RS232C function is switched off when the projector is in standby mode.</td>
</tr>
</tbody>
</table>

Note

• When you want to control the projector using the LAN/RS232C function, set “Enable.”
Confirming the Network Information for the Projector

You can confirm the projector name, IP address and MAC address.

Menu operation  ➔ Page 42

Example: “Options2” screen menu

Description of Network Information

<table>
<thead>
<tr>
<th>Displayed Items</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Projector</td>
<td>The projector name is displayed. (Factory preset: EIP-3500)</td>
</tr>
<tr>
<td>IP Address</td>
<td>The IP address set for the projector is displayed. (Factory preset: 192.168.150.2)</td>
</tr>
<tr>
<td>MAC Address</td>
<td>The MAC address of the projector is displayed.</td>
</tr>
</tbody>
</table>

Note

- For information on how to change the projector name and IP address, see “SETUP GUIDE” contained in the supplied CD-ROM.

Note

About the network settings

- “Projector” and “IP Address” on the “Options2” menu and the network setting items described on the “SETUP GUIDE” are initialized.

The following items or menu cannot be initialized.

- “Fine Sync” menu
- Special Modes
- “Options1” menu
- Lamp Timer (Life)
- System Lock
- “Language” menu
Selecting the On-screen Display Language

The projector can switch the on-screen display language among 11 languages: English, German, Spanish, Dutch, French, Italian, Swedish, Portuguese, Chinese, Korean or Japanese.

Example: “Language” screen menu for INPUT 1 (RGB) mode

1. Press \[\text{MENU}\] on the remote control.
   • The “Picture” menu will be displayed.
2. Press \[\downarrow\] or \[\uparrow\] to select the “Language” menu icon (.shader).
   • The “Language” menu will be displayed.
3. Press \[\uparrow\] or \[\downarrow\] to select the desired language, and then press \[\text{ENTER}\].
   • The language you selected will be set as the on-screen display.
4. Press \[\text{MENU}\].
   • The “Language” menu will disappear.

Note
• This procedure can also be performed by using the buttons on the projector.
Cleaning the projector

- Ensure the power cord is unplugged before cleaning the projector.
- The cabinet as well as the operation panel is made of plastic. Avoid using benzene or thinner, as these can damage the finish on the cabinet.
- Do not use volatile agents such as insecticides on the projector. Do not attach rubber or plastic items to the projector for long periods. The effects of some of the agents in the plastic may cause damage to the quality or finish of the projector.

- Wipe off dirt gently with a soft flannel cloth.
- When the dirt is hard to remove, soak a cloth in a mild detergent diluted with water, wring the cloth well and then wipe the projector. Strong cleaning detergents may discolor, warp or damage the coating on the projector. Make sure to test on a small, inconspicuous area on the projector before use.

Cleaning the lens

- Use a commercially available blower or lens cleaning paper (for glasses and camera lenses) for cleaning the lens. Do not use any liquid type cleaning agents, as they may wear off the coating film on the surface of the lens.
- As the surface of the lens can easily get damaged, ensure not to scrape or hit the lens.

Cleaning the exhaust and intake vents

- Use a vacuum cleaner to clean dust from the exhaust vent and the intake vent.

Info

- If you want to clean the air vents during projector operation, ensure to press on the projector or on the remote control and put the projector into standby mode. After the cooling fan has stopped, unplug the power cord from the AC socket and clean the vents.
Maintenance Indicators

■ The warning lights on the projector indicate problems inside the projector.
■ If a problem occurs, either the temperature indicator or the lamp indicator will illuminate red, and the projector will enter the standby mode. After the projector has entered the standby mode, follow the procedures given below.

About the temperature warning indicator

If the temperature inside the projector increases, due to blockage of the air vents, or the setting location, "TEMP. " will illuminate in the lower left corner of the picture. If the temperature keeps on rising, the lamp will turn off and the temperature warning indicator will blink, the cooling fan will run for a further 90 seconds, and then the projector will enter the standby mode. After "TEMP. " appears, ensure to perform the measures described on page 65.

About the lamp indicator

■ When the remaining lamp life becomes 5% or less, “更换灯泡” (yellow) and “Change The Lamp." will be displayed on the screen. When the percentage becomes 0%, it will change to “更换” (red), the lamp will automatically turn off and then the projector will automatically enter the standby mode. At this time, the lamp indicator will illuminate in red.
■ If you try to turn on the projector a fourth time without replacing the lamp, the projector will not turn on.
## Maintenance indicator

<tr>
<td>Red on (Standby)</td>
<td>The lamp does not illuminate.</td>
</tr>
<tr>
<td>• Lamp circuit failure</td>
<td>• Please exercise care when replacing the lamp.</td>
</tr>
</tbody>
</table>
Regarding the Lamp

Lamp

- It is recommended that the lamp unit (optional: AH-35001) be replaced when the remaining lamp life becomes 5% or less, or when you notice a significant deterioration in the picture and color quality. The lamp life (percentage) can be checked with the on-screen display. See page 50.
- Purchase a replacement lamp unit of type AH-35001 from your place of purchase, nearest EIKI Authorized Dealer or Service Center.

Caution Concerning the Lamp

- This projector utilizes a pressurized mercury lamp. A loud sound may indicate lamp failure. Lamp failure can be attributed to numerous sources such as: excessive shock, improper cooling, surface scratches or deterioration of the lamp due to a lapse of usage time. The period of time up to failure largely varies depending on the individual lamp and/or the condition and the frequency of use. It is important to note that failure can often result in the bulb cracking.
- When the lamp replacement indicator and on-screen display icon are illuminated, it is recommended that the lamp be replaced with a new one immediately, even if the lamp appears to be operating normally.
- Should the lamp break, the glass particles may spread inside the lamp cage or gas contained in the lamp may be vented into the room from the exhaust vent. Because the gas in this lamp includes mercury, ventilate the room well if the lamp breaks and avoid all exposure to the released gas. In case of exposure to the gas, consult a doctor as soon as possible.
- Should the lamp break, there is also a possibility that glass particles may spread inside of the projector. In such a case, it is recommended you contact your nearest EIKI Authorized Dealer or Service Center to assure safe operation.

Replacing the Lamp

Caution

- Do not remove the lamp unit from the projector right after use. The lamp will be very hot and may cause burn or injury.
- Wait at least one hour after the power cord is disconnected to allow the surface of the lamp unit to fully cool before removing the lamp unit.

- Carefully change the lamp by following the instructions described in this section. *If you wish, you may have the lamp replaced at your nearest EIKI Authorized Dealer or Service Center.

* If the new lamp does not illuminate after replacement, take your projector to the nearest EIKI Authorized Dealer or Service Center for repair.
Removing and Installing the Lamp Unit

Info

- Ensure the lamp unit is removed using the handle. Ensure the glass surface of the lamp unit or the inside of the projector are not touched.
- To avoid injury to yourself and damage to the lamp, ensure to carefully follow the steps below.
- Do not loosen other screws except for the lamp unit cover and lamp unit.

1. Press \( \text{POWER} \) on the projector or \( \text{POWER} \) on the remote control to put the projector into standby mode.
   - Wait until the cooling fan stops.

   **Warning!**
   - Do not remove the lamp unit from the projector right after use. The lamp and parts around the lamp will be very hot and may cause burn or injury.

2. Disconnect the power cord.
   - Unplug the power cord from the AC socket.
   - Leave the lamp until it has fully cooled down (about 1 hour).

3. Remove the lamp unit cover.
   - Turn the projector over. Loosen the user service screw (1) that secures the lamp unit cover. Pressing the tab, remove the lamp unit cover (2).
Regarding the Lamp

4 Remove the lamp unit.
   • Loosen the securing screws from the lamp unit. Hold the lamp unit by the handle and pull it in the direction of the arrow. At this time, keep the lamp unit horizontal and do not tilt it.

5 Insert the new lamp unit.
   • Press the lamp unit firmly into the lamp unit compartment. Fasten the securing screws.

6 Replace the lamp unit cover.
   • Align the lamp unit cover and slide it to close. Then tighten the user service screw to secure the lamp unit cover.

Info
   • If the lamp unit and lamp unit cover are not correctly installed, the power will not turn on, even if the power cord is connected to the projector.

Resetting the Lamp Timer

Reset the lamp timer after replacing the lamp.

Info
   • Make sure to reset the lamp timer only when replacing the lamp. If you reset the lamp timer and continue to use the same lamp, this may cause the lamp to become damaged or explode.

1 Connect the power cord.
   • Plug the power cord into the AC socket of the projector.

2 Reset the lamp timer.
   • While simultaneously holding down ▼ and ◄ on the projector, press  on the projector.
   • “LAMP 0000H” is displayed, indicating that the lamp timer is reset.
Note

- This projector may not be able to display images from notebook computers in simultaneous (CRT/LCD) mode. Should this occur, turn off the LCD display on the notebook computer and output the display data in “CRT only” mode. Details on how to change display modes can be found in your notebook computer’s operation manual.
- When this projector receives 640 × 350 VESA format VGA signals, “640 × 400” appears on the screen.
- When projecting the RGB interlace signal using INPUT 1/2 with “Signal Type” set to “Auto” or “RGB”, the image may not be projected as desired. In this case, select either INPUT 3 (Video) or INPUT 4 (S-Video).

**Computer Compatibility Chart**

The table below lists signal codes that are compatible with the projector. When the images are distorted or cannot be projected, adjust the output signal of your computer and so forth while referring to the table below.

### Computer

- Multiple signal support
- Horizontal Frequency: 15–70 kHz
- Vertical Frequency: 43–85 Hz
- Pixel Clock: 12–108 MHz
- Sync signal: Compatible with TTL level
- Compatible with sync on green signal
- SXGA+ and SXGA compatible in intelligent compression
- Intelligent Compression and Expansion System resizing technology

The following is a list of modes that conform to VESA. However, this projector supports other signals that are not VESA standards.

<table>

As a part of policy of continuous improvement, EIKI reserves the right to make design and specification changes for product improvement without prior notice. The performance specification figures indicated are nominal values of production units. There may be some deviations from these values in individual units.
**Aspect Ratio**
Width and height ratio of an image. The normal aspect ratio of a computer and video image is 4:3. There are also wide images with an aspect ratio of 16:9 and 21:9.

**Auto Sync**
Optimizes projected computer images by automatically adjusting certain characteristics.

**Background**
Initial setting image projected when no signal is being output.

**Border**
Projects a 4:3 image fully within a 16:9 screen by keeping the aspect ratio at 4:3.

**Clock**
Clock adjustment is used to adjust vertical noise when clock level is incorrect.

**CLR Temp (Color temperature)**
Function that can be used to adjust the color temperature to suit the type of image input to the projector. Decrease the color temperature to create warmer, reddish images for natural flesh tones, or increase to create cooler, bluish images for a brighter picture.

**Dot by dot**
Mode that projects images in their native resolution.

**Intelligent compression**
High quality resizing of lower and higher resolution images to fit the projector’s native resolution.

**Keystone Correction**
Function to digitally correct a distorted image when the projector is set up at an angle, smoothens out jaggies on keystone images and compresses the image not only horizontally but vertically keeping the 4:3 aspect ratio.

**Password**
A password is set so that changes cannot be made in the “Options2” setting.

**Phase**
Phase shift is a timing shift between isomorphic signals with the same resolution. When phase level is incorrect, the projected image typically displays horizontal flicker.

**Picture Mode**
Image quality enhancement function that offers a richer image by brightening the darker portions of the image without altering the brightness of the brighter portions. You can select four different modes: STANDARD, PRESENTATION, CINEMA and GAME.

**Resize**
Allows you to modify or customize the picture display mode to enhance the input image. You can select four different modes: NORMAL, DOT BY DOT, BORDER and STRETCH.

**sRGB**
An international standard of color reproduction regulated by the IEC (International Electrotechnical Commission). As the fixed color area has been decided by the IEC, the color changes according to DLP features, so that the images are displayed in a natural tint based on an original image, when “sRGB” is set to “ON”.

**Stretch**
Mode that stretches the 4:3 image horizontally to display it fully on a 16:9 screen.

**System Lock**
If the “Keycode” set in the projector is not correctly entered, the projector will not operate even if signals are entered.
