# **Screen Size and Projection Distance**

The projection screen size varies according to the distance from the lens of the projector to the screen. Install the projector so that projected images are projected onto the screen at the optimum size by referring to the table below. Use the values in the table as a reference when installing the projector.

#### Side View

#### **NORMAL Mode (4:3)**

	(110)					
I	Picture (Screen) size			distance [L]	Distance from the bottom of the image to	
Diag. [χ]	Width	Height	Minimum [L1]	Maximum [L2]	the lens center [H]	
300" (762 cm)	610 cm (240")	457 cm (180")	9.1 m (29' 9")	13.7 m (44' 9")	-10.2 cm (-4 <sup>1</sup> / <sub>64</sub> ")	
250" (635 cm)	508 cm (200")	381 cm (150")	7.6 m (24' 9")	11.4 m (37' 4")	-8.5 cm (-3 <sup>11</sup> / <sub>32</sub> ")	
200" (508 cm)	406 cm (160")	305 cm (120")	6.0 m (19'10")	9.1 m (29'10")	-6.8 cm (-2 <sup>43</sup> / <sub>64</sub> ")	
150" (381 cm)	305 cm (120")	229 cm (90")	4.5 m (14'10")	6.8 m (22' 5")	-5.1 cm (-2 <sup>1</sup> / <sub>64</sub> ")	
100" (254 cm)	203 cm (80")	152 cm (60")	3.0 m (9'11")	4.6 m (14'11")	-3.4 cm (-1 <sup>11</sup> / <sub>32</sub> ")	
84" (213 cm)	171 cm (67")	128 cm (50")	2.5 m (8' 4")	3.8 m (12' 6")	-2.9 cm (-1 <sup>1</sup> /8")	
72" (183 cm)	146 cm (58")	110 cm (43")	2.2 m (7' 2")	3.3 m (10' 9")	-2.4 cm (-31/32")	
60" (152 cm)	122 cm (48")	91 cm (36")	1.8 m (5'11")	2.7 m (8'11")	-2.0 cm (-51/64")	
40" (102 cm)	81 cm (32")	61 cm (24")	1.2 m (4' 0")	1.8 m (6' 0")	-1.4 cm (-17/32")	

Picture size (diag.) (in/cm)

Projection distance(m/ft)

L1: Minimum projection distance (m/ft)

Maximum projection distance (m/ft) Distance from the bottom of the image to the lens center (cm/in) The formula for picture size and projection distance

[Feet/inches] L1 (ft) = 0.0302% / 0.3048 [m/cm]

L1 (m) = 0.0302X L2 (m) = 0.0455X

L2 (ft) = 0.0455x / 0.3048 H (in) = -0.034x / 2.54 H (cm) = -0.034X

#### STRETCH Mode (16:9)

	( /				
	Picture (Screen) size		Projection	distance [L]	Distance from the bottom of the image to
Diag. [χ]	Width	Height	Minimum [L1]	Maximum [L2]	the lens center [H]
250" (635 cm)	553 cm (218")	311 cm (123")	8.2 m (27' 0")	12.4 m (40' 8")	-61.1 cm (-24 <sup>5</sup> / <sub>64</sub> ")
225" (572 cm)	498 cm (196")	280 cm (110")	7.4 m (24' 3")	11.2 m (36' 7")	-55.0 cm (-21 <sup>43</sup> / <sub>64</sub> ")
200" (508 cm)	443 cm (174")	249 cm (98")	6.6 m (21' 7")	9.9 m (32' 6")	-48.9 cm (-19 <sup>17</sup> / <sub>64</sub> ")
150" (381 cm)	332 cm (131")	187 cm (74")	4.9 m (16' 2")	7.4 m (24' 5")	-36.7 cm (-14 <sup>14</sup> / <sub>32</sub> ")
133" (338 cm)	294 cm (116")	166 cm (65")	4.4 m (14' 4")	6.6 m (21' 8")	-32.5 cm (-12 <sup>13</sup> / <sub>16</sub> ")
106" (269 cm)	235 cm (92")	132 cm (52")	3.5 m (11' 5")	5.3 m (17' 3")	-25.9 cm (-10 <sup>13</sup> / <sub>64</sub> ")
100" (254 cm)	221 cm (87")	125 cm (49")	3.3 m (10'10")	5.0 m (16' 3")	-24.5 cm (-9 <sup>5</sup> /8")
92" (234 cm)	204 cm (80")	115 cm (45")	3.0 m (9'11")	4.6 m (15' 0")	-22.5 cm (-8 <sup>55</sup> / <sub>64</sub> ")
84" (213 cm)	186 cm (73")	105 cm (41")	2.8 m (9' 1")	4.2 m (13' 8")	-20.5 cm (-8 <sup>3</sup> / <sub>32</sub> ")
72" (183 cm)	159 cm (63")	90 cm (35")	2.4 m (7' 9")	3.6 m (11' 9")	-17.6 cm (-6 <sup>15</sup> / <sub>16</sub> ")
60" (152 cm)	133 cm (52")	75 cm (29")	2.0 m (6' 6")	3.0 m (9' 9")	-14.7 cm (-5 <sup>25</sup> / <sub>32</sub> ")
40" (102 cm)	89 cm (35")	50 cm (20")	1.3 m (4' 4")	2.0 m (6' 6")	-9.8 cm (-3 <sup>55</sup> / <sub>64</sub> ")

Picture size (diag.) (in/cm)

Projection distance(m/ft)

L1: Minimum projection distance (m/ft)

Maximum projection distance (m/ft)

Distance from the bottom of the image to the lens center (cm/in)

The formula for picture size and projection distance [Feet/inches]

[m/cm]

L1 (m) = 0.0329X L2 (m) = 0.04957X L1 (ft) = 0.0329% / 0.3048 L2 (ft) = 0.04957% / 0.3048 H (in) = -0.24459% / 2.54

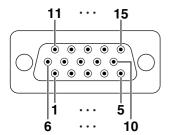

H (cm) = -0.24459X

- There may be an error of ± 3% in the above values.
- Values with a minus (-) sign indicate that the lens center is lower than the bottom of the image.

# **RS-232C Specifications and Commands**

### **Computer control**

A computer can be used to control the projector by connecting an RS-232C serial control cable (cross type, commercially available) to the projector. (See page 27 of the projector's operation manual for connection.)

### Communication conditions

Set the serial port settings of the computer to match that of the table.

Signal format: Conforms to RS-232C standard.

Parity bit: None

Baud rate\*: 9,600 bps / 115,200 bps

Stop bit: 1 bit

Plow control: None

\*Set the projector's baud rate to the same rate as used by the computer.

### **Basic format**

Commands from the computer are sent in the following order: command, parameter, and return code. After the projector processes the command from the computer, it sends a response code to the computer.

Command format C2P1 P2 P3 P4 C1 C3 C4 Return code (0DH) Command 4-digit Parameter 4-digit Response code format Normal response Problem response (communication error or incorrect command)  $\mathbf{O}$ K E R R Return code (0DH) Return code (0DH)

- When controlling the projector using RS-232C commands from a computer, wait at least 30 seconds after the power has been turned on, and then transmit the commands. After putting the projector into standby mode, wait at least 90 seconds until the cooling fan stops, and then transmit the commands.
- If more than one command will be sent to the projector, wait for projector reply before sending next command.

## **Note**

When the projector receives the following commands, the on-screen display will not disappear and these
commands will not reset the "Auto Power Off" function timer when no signal is present.
 POWR????, TABN\_\_\_1, TLPS\_\_\_1, TLTT\_\_\_1, TLTL\_\_\_1

### **Commands**

Example: When turning on the projector, make the following setting.

- If an underbar (\_) appears in the parameter column, enter a space.
  If an asterisk (\*) appears in the parameter column, enter a value in the range indicated in brackets under Control Contents.
- \*1 Parameters of CLR Temp settings are as follows.

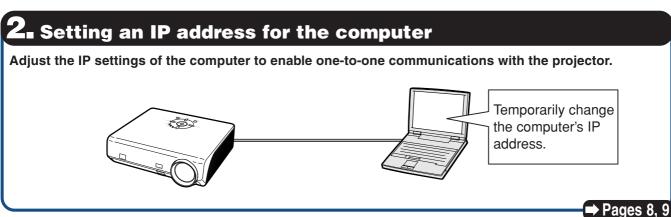

CLR Temps	Parameter			
5500K	_	0	5	5
6500K	_	0	6	5
7500K	_	0	7	5
8500K	_	0	8	5
9300K	_	0	9	3
10500K	_	1	0	5

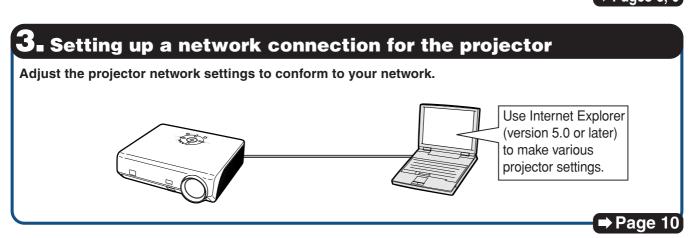

<sup>\*2</sup> For setting the projector name, send the commands in order of PJN1, PJN2 and PJN3.

This section describes the basic procedure for using the projector via the network.

If the network is already constructed, the projector's network settings may need to be changed. Please consult your network administrator for assistance with these settings.

# 1. Connecting the Projector to a Computer

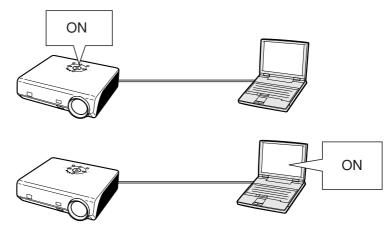

Establishing a one-to-one connection from the projector to a computer. Using a LAN cable (Category 5, cross-over type) you can configure the projector via the computer.

- 1 Disconnect the computer's LAN cable from the existing network.
- 2 Connect a LAN cable (a UTP cable, Category 5, cross-over type) to the projector's LAN terminal and connect the other end of the cable to the computer's LAN terminal.

A LAN cable being connected to the network

- 3 Turn on the projector.
- 4 Turn on the computer.

Confirm that the LINK LED on the rear of the projector illuminates. If the LINK LED does not illuminate, check the following:

- The LAN cable is properly connected.
- The power switches of both the projector and the computer are on.

This completes the connection. Now proceed to "2. Setting an IP Address for the Computer".

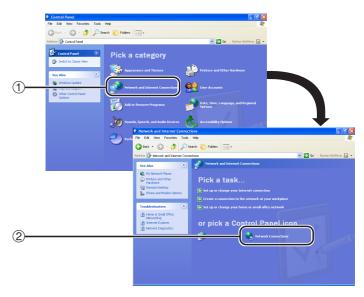

# 2. Setting an IP Address for the Computer

The following describes how to make settings in Windows® XP (Professional or Home Edition).

- 1 Log on the network using the administrator's account for the computer.
- 2 Click "Start", and click "Control Panel".

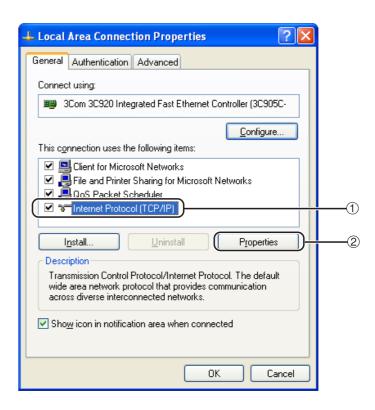

- 3 Click "Network and Internet Connections", and click "Network Connections" in the new window.
  - This manual uses examples to explain the operations in Category View. If you are using Classic View, double-click "Network Connections".

4 Right-click "Local Area Connection" and select "Properties" from the menu.

5 Click "Internet Protocol (TCP/IP)", and click the "Properties" button.

- 6 Confirm or change an IP address for the setup computer.
  - ① Confirm and note the current IP address, Subnet mask and Default gateway.

Make sure to note the current IP address. Subnet mask and Default gateway as you will be required to reset them later.

② The factory default setting for the projector IP address is "192.168.150.2", Subnet mask is "255.255.255.0" and Default gateway is "0.0.0.0".

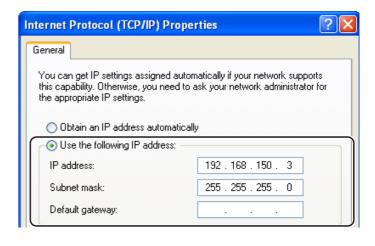

Set temporarily as follows:

IP address: 192.168.150.3 Subnet mask: 255.255.255.0

Default gateway: (Do not input any

values.)

After setting, click the "OK" button, and then restart the computer.

After confirming or setting, proceed to "3. Setting up Network Connection for the Projector".

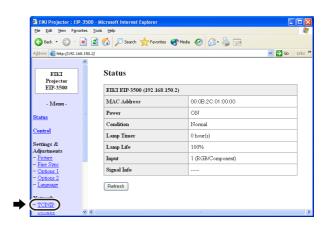

# 3. Setting up a Network Connection for the Projector

Settings for such items as the projector's IP address and subnet mask are compatible with the existing network.

- 1 Start Internet Explorer (version 5.0 or later) on the computer, and enter "http://192.168.150.2/" in "Address", and then press the "Enter" key.
- If a user name and a password have not yet been set, just click the "OK" button.
  - If a user name and a password have been set, input the user name and the password, and click the "OK" button.
  - If the user name or password is entered incorrectly three times, an error message will be displayed.
- When the screen as shown on the right appears, click "TCP/IP".

# The TCP/IP setting screen appears, ready for network settings for the projector.

Items	Setting example / Remarks
IP Address	Factory default setting: 192.168.150.2
	Enter an IP address appropriate
	for the network.
Subnet	Factory default setting: 255.255.255.0
Mask	Set the subnet mask to the same
	as that of the computer and
	equipment on the network.
Default	Factory default setting: 0.0.0.0
Gateway	* When not in use, set to "0.0.0.0".
DNS	Factory default setting: 0.0.0.0
Server	* When not in use, set to "0.0.0.0".

# **⊗** Note

- Confirm the existing network's segment (IP address group) to avoid setting an IP address that duplicates the IP addresses of other network equipment or computers. If "192.168.150.2" is not used in the network having an IP address of "192.168.150.XXX", you don't have to change the projector IP address.
- For details about each setting, consult your network administrator.
- **5** Click the "Apply" button.

# The set values appear. Confirm that the values are set properly, and then click the "Confirm" button.

 After setting items, wait for 10 seconds and then re-access.

#### Network - TCP/IP

IP Address	192 168 150 2
Subnet Mask	255 255 0
Default Gateway	0 0 0 0 **0.0.0.0" means "Using no default gateway."
DNS Server	0 0 0 0 0 * "0.0.0.0" means "Using no DNS server."

#### Network - TCP/IP

IP Address	192 168 150 2
Subnet Mask	255 255 0
Default Gateway	0 0 0 0 0 * "0.0.0.0" means "Using no default gateway."
DNS Server	0 0 0 0 0 0 * "0.0.0.0" means "Using no DNS server."

#### Network - TCP/IP

The TCP/IP settings will be changed as below.

Do you want to change the TCP/IP settings?

IP Address : 192.168.150.2 Subnet Mask : 255.255.255.0 Default Gateway : 0.0.0.0 DNS Server : 0.0.0.0

Confirm Cancel

After you click "Confirm", if you want to continue to operate this projector via the network, please wait for 10 seconds and then re-access to "192.168.150.2".

This completes the network settings.

Change the IP address of the setting computer back to its original address, and then connect the computer and the projector to the network.

# **Controlling the Projector via LAN**

After connecting the projector to your network, enter the projector IP address in "Address" on Internet Explorer (version 5.0 or later) using a computer on the network to start a setup screen that will enable control of the projector via the network.

# Controlling the Projector Using Internet Explorer (Version 5.0 or leter)

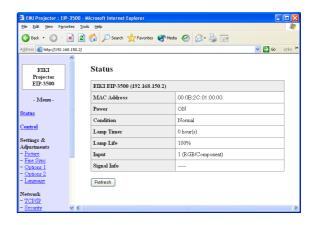

(Version 5.0 or later)

Complete connections to external equipment before starting the operation. (See pages 21-28 of the projector's operation manual.) Complete the AC cord connection. (See page 29 of the projector's operation manual.)

- When connecting the projector to the LAN, use a LAN cable (Category 5). When connecting the projector to a hub, use a straight-through cable.
- 1 Start Internet Explorer (version 5.0 or later) on the computer.
- 2 Enter "http://" followed by the projector IP address set by the procedure on page 11 followed by "/" in "Address", and then press the "Enter" key.
  - The factory default setting for the projector IP address is 192.168.150.2. If you did not change the IP address in "3. Setting up a Network Connection for the Projector" (page 10-11), enter "http://192.168.150.2/".
- A screen for controlling the projector appears, ready for performing various status conditions, control, and settings.

# **Confirming the Projector Status (Status)**

#### Status

EIKI EIP-3500 (192.168.150.2)		
MAC Address	00:0B:2C:01:00:00	
Power	ОИ	
Condition	Normal	
Lamp Timer	0 hour(s)	
Lamp Life	100%	
Input	1 (RGB/Component)	
Signal Info		

Refresh

On this screen, you can confirm the projector status. You can confirm the following items:

- MAC Address
- Power
- Condition
- Lamp Timer
- Lamp Life
- Input
- Signal Info

- If you click the "Refresh" button before the screen is displayed completely, an error message ("Server Busy Error") will be displayed. Wait for a moment and then operate again.
- For details about each item, refer to the projector's operation manual.

# **Controlling the Projector** (Control)

#### Control

Power	○ STANDBY • ON	
Input Select	INPUT1 (RGB/Component)	
Volume	1 💌	
AV Mute	⊙ OFF ○ ON	

Refresh

On this screen, you can perform projector control. You can control the following items:

- Power
- Input Select
- Volume
- AV Mute [OFF] [ON]

- If you click the "Refresh" button before the screen is displayed completely, an error message ("Server Busy Error") will be displayed.
   Wait for a moment and then operate again.
- You cannot operate this page while the projector is warming up.
- While the projector is in standby mode, you can only control "Power ON".
- For details about each item, refer to the projector's operation manual.

# **Setting and Adjusting the Projector** (Settings & Adjustments)

Example: "Picture" screen display for INPUT 1

Settings & Adjustments - Picture(INPUT1)

Picture Mode	Standard • Reset
Bright Boost	10 🕶
CLR Temp	7500K 💌
sRGB	⊙ OFF ○ ON
IRIS	High Bright 💌
Signal Type	Auto
Datrock	

Refresh

On these screens, you can make projector settings or adjustments. You can set or adjust the following items:

- Picture Mode
- Bright Boost
- CLR Temp
- sRGB [OFF][ON]
- IRIS
- Signal Type
- Auto Sync [OFF][ON]
- Resize (INPUT 1)
- OSD Display [OFF][ON]
- Video System (INPUT 3/4)
- Background
- Eco Mode [OFF][ON]
- Auto Power Off [OFF][ON]
- Auto Focus (Startup) [OFF][ON]
- Auto Keystone [OFF][ON]
- Internal Speaker [OFF][ON]
- Audio Out [OFF][ON]
- Projection Mode
- RS-232C Speed
- Monitor Out (Standby)
- OSD Language

## Note

- If you click the "Refresh" button before the screen is displayed completely, an error message ("Server Busy Error") will be displayed. Wait for a moment and then operate again.
- You cannot operate this page while the projector is warming up.
- For details about each item, refer to the projector's operation manual.

# Setting the Security (Network - Security)

Address	IP addresses allowing connec-
	tion to the projector.
All IP	No limits are set to IP addresses
Addresses	connecting to the projector.
From only	For security improvement, only an
specific IP	IP address set by "Address 1-3"
addresses	can be connected to the projector.

- User Name and Password can be up to 8 characters.
- You can input the characters below : a-z, A-Z, 0-9, -, \_

# Making General Settings for the Network (Network - General)

#### Network - General

Projector Name	EIP-3500 (MAX 12 characters)
Auto Logout Time	5 minute(s) (0-65535) * If the set value is made 0, the Auto Logout function is disabled.
Data Port	[10002 (1025-65535)
Search Port	[5006] (1025-65535)

Apply

Refresh

# On this screen, you can make general settings relating to the network.

Items	Description
Projector	Setting the projector name.
Name	
Auto	Setting the time interval in
Logout	which the projector will be
Time	automatically disconnected
	from the network in units of a
	minute (from 1 to 65535
	minutes). If the set value is
	made 0, the Auto Logout
	function is disabled.
Data Port	Setting the TCP port number
	used when exchanging a data
	with the projector (from 1025 to
	65535).
Search	Setting the port number used
Port	when searching for the
	projector (from 1025 to 65535).

After clicking the "Apply" button, the set values appear. Confirm that the values are set properly, and then click the "Confirm" button.

## **Note**

- After setting items, wait for 10 seconds and then re-access.
- Projector Name can be up to 12 characters.
- You can input the characters below:
   A-Z, 0-9, -, \_, (,), space
   (When "a-z" are input, they are converted to "A-Z" automatically.)

# Setting for Sending E-mail when an Error Occurs (Mail - Originator Settings)

#### Mail - Originator Settings

SMTP Server	(MAX 64 characters)
Originator E- mail Address	(MAX 64 characters)
Originator Name	(MAX 64 characters)

Apply

Refresh

On this screen, you can make settings for sending e-mail to report when the projector has generated an error.

Items	Setting example / Remarks				
SMTP	Setting an SMTP server				
Server	address for e-mail transmis-				
	sion.				
	e.g.1:192.168.150.253				
	e.g.2 : smtp123.eiki.co.jp				
	* When using a domain name,				
	make settings for the DNS				
	server.				
Originator	Setting the projector's e-mail				
E-mail	address. The e-mail address set				
Address	here becomes Originator E-mail				
	Address.				
Originator	Setting the sender's name.				
Name	The name set here appears in				
	the "Originator Name" column				
	of the body of the message.				

## **⊗**Note

- SMTP Server, Originator E-mail Address and Originator Name can be up to 64 characters.
- You can input the characters below: SMTP Server and Originator E-mail Address: a-z, A-Z, 0-9, !, #, \$, %, &, \*, +, -, /, =, ?, ^, {, |, }, ~, \_, ', ., @,`

(You can input "@" only one time for "Originator E-mail Address".)

Originator Name : a-z, A-Z, 0-9, -, \_, (,), space

 If the settings of "3. Setting up a Network Connection for the Projector" on pages 10 and 11 are incorrectly set, e-mail will not be send.

### **Controlling the Projector via LAN**

## Setting Error Items and Destination Addresses to which E-mail is to be Sent when an Error Occurs (Mail - Recipient Settings)

Mail - Recipient Settings

Recipient Addresses	E-mail Address	Error Mail
Addresses	(MAX 64 characters)	Lamp Temp Fan
	1	Tes
	2	Tes
	3	Tes
	4	Tes
	5	Tes

Apply Refresh

On this screen, you can input e-mail destinations to which error notification (error items) e-mails are sent.

Items	Description		
E-mail	Set addresses to which error		
Address	notification e-mail is sent. You		
	can set up to five addresses.		
Error Mail	Error e-mail is sent on the error		
(Lamp, Temp,	items checked in their check		
Fan)	boxes.		
Test	Send test e-mail. This allows		
	you to confirm that the settings		
	for e-mail transmission are		
	properly set.		

- E-mail Address can be up to 64 characters.
- You can input the characters below : a-z, A-Z, 0-9, !, #, \$, %, &, \*, +, -, /, =, ?, ^, {, |, }, ~, \_, ', ., @, `

(You can input "@" only one time.)

• For details about error items, refer to the projector's operation manual.

# **Setting the Projector Using RS-232C or Telnet**

Connect the projector to a computer using RS-232C or Telnet, and open the SETUP MENU on the computer to carry out various settings for the projector.

# When Connecting Using RS-232C

- 1 Launch general purpose terminal emulator.
- 2 Input settings for the RS-232C port of the terminal emulator as follows.

Baud Rate : 9600 bps\*
Data Length : 8 bit
Parity Bit : None
Stop Bit : 1 bit
Flow Control : None

- \* This is the factory default setting. If the value of Baud Rate for the projector has been changed, set Baud Rate here according to the changed value on the projector.
- Input "PJS11234" and press the "Enter" key.
- 4 "OK" is displayed. Input "PJS25678" and press the "Enter" key within 10 seconds.
- **5** "OK" is displayed. Press the "Enter" key.
- 6 "User Name:" is displayed. Input the user name and press the "Enter" key.
  - If a user name has not yet been set, just press the "Enter" key.

- 7 "Password:" is displayed. Input the password and press the "Enter" key.
  - If a password has not yet been set, just press the "Enter" key.
- 8 Input "setup" and press the "Enter" key.
  - SETUP MENU will be displayed.

#### **VSETUP MENU**

# Note

- User name and password are not set in the factory default settings.
- If the user name or password is entered incorrectly three times, SETUP MENU will be quit.

### **Setting the Projector Using RS-232C or Telnet**

# When Connecting Using Telnet

- 1 Click "Start" from the Windows® desktop and select "Run".
- 2 Enter "telnet 192.168.150.2" in the text box that opens up. (If the IP address of the projector is 192.168.150.2.)
- 3 Click the "OK" button.
- 4 "User Name:" is displayed. Input the user name and press the "Enter" key.
  - If a user name has not yet been set, just press the "Enter" key.
- 5 "Password:" is displayed. Input the password and press the "Enter" key.
  - If a password has not yet been set, just press the "Enter" key.
- 6 Input "setup" and press the "Enter" key.
  - SETUP MENU will be displayed.

#### **VSETUP MENU**

Baud rate settings for the RS-232C terminals. (Page 23)

[7]Projector Name (Factory default setting : EIP- 3500)

It is possible to assign a projector name. (Page 23)

[A] Advanced Setup

Enters ADVANCED SETUP MENU. (Page 24)

[D]Disconnect All

Disconnect all connections. (Page 24)

[V] View All Setting

Displays all setting values. (Page 20)

Can also be used with ADVANCED SETUP MENU.

[S] Save & Quit

Save set values and quit menu. (Page 21)

[Q]Quit Unchanged

Quit menu without saving setting values. (Page 21)

### **ADVANCED SETUP MENU**

#### **▼ADVANCED SETUP MENU**

# [1] Auto Logout Time (Factory default setting : 5 minutes)

Setting of time until automatic disconnection of network connection. (Page 24)

[2] Data Port (Factory default setting: 10002)

Setting the TCP port number used when exchanging data. (Page 24)

[5] Network Ping Test

It is possible to confirm that a network connection between the projector and a computer etc. is working normally. (Page 25)

- [6] Accept IP Addr(1)
- [7] Accept IP Addr(2)
- [8] Accept IP Addr(3)
- [9]Accept All IP Addr (Factory default setting : Accept All)

For improved security, it is possible to set up to three IP addresses allowing connection to the projector. Set IP addresses can be cancelled using [9] Accept All IP Addr. (Page 25)

- [0] Search Port (Factory default setting : 5006)
  Setting the port number used when searching for
- the projector. (Page 26)
  [!] Restore Default Setting

Restores all setting values that can be set using the menu to the default state. (Page 26)

[Q]Return to Main Menu

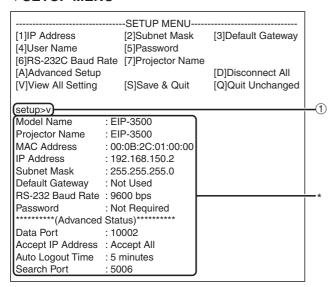

Return to the main SETUP MENU. (Page 26)

# Controlling the Projector Using RS-232C or Telnet

Enter number or symbol of item to be selected on the SETUP MENU. When setting, input the details to be set. Setting is carried out one item at a time, and saved at the end.

# View Setting Detail List ([V]View All Setting)

#### **VSETUP MENU**

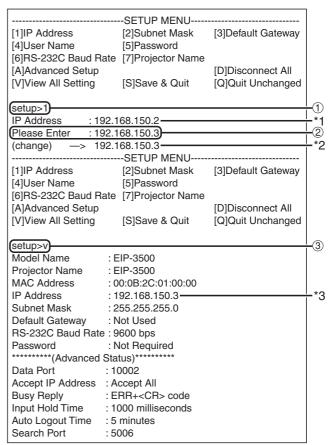

① Enter "v" and press the "Enter" key. Display all setting values(\*).

### Set Items

Example: When setting IP Address (change from 192.168.150.2 to 192.168.150.3)

#### **VSETUP MENU**

- ① Enter "1" (number of item to be set), and press the "Enter" key.
  - Display current IP address (\*1).
- ② Enter IP address to be set and press the "Enter" key.
  - Display IP address after change (\*2).
- ③ Enter "v" and press the "Enter" key to verify setting detail list.
  - IP address is being changed (\*3).

- Verification of setting detail list can be omitted.
- Setting details are not effective until they have been saved. (Page 21)
- If an invalid number is entered, an error message ("Parameter Error!") will be displayed.

# **Save Settings and Quit** ([S]Save & Quit)

Save set values and quit menu.

#### **VSETUP MENU**

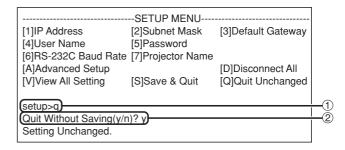

[1]IP Address [4]User Name [6]RS-232C Baud Rate	SETUP MENU [2]Subnet Mask [5]Password [7]Projector Name	[3]Default Gateway	
[A]Advanced Setup [V]View All Setting	[S]Save & Quit	[D]Disconnect All [Q]Quit Unchanged	
setup>s All Connection will be d Continue(y/n)? y	isconnect.		
Apply New settingDor	10.		

- ① Enter "s" and press the "Enter" key.
- ② Enter "y" and press the "Enter" key.

# Quit without Saving Settings ([Q]Quit Unchanged)

Quit menu without saving setting values.

#### **VSETUP MENU**

- ① Enter "q" and press the "Enter" key.
- ② Enter "y" and press the "Enter" key.

### **Controlling the Projector Using RS-232C or Telnet**

The setting procedure for each item will be explained. For the basic procedure, please refer to "Set Items" on page 20.

# IP Address Setting ([1]IP Address)

Setting of IP address.

(setup>1)		
IP Address	:192.168.150.2	
Please Enter	:192.168.150.3	2
(change) —>	192.168.150.3	*

- ① Enter "1" and press the "Enter" key.
- ② Enter numerical value to be set and press the "Enter" key.

Display IP address after change (\*).

# Subnet Mask Setting ([2]Subnet Mask)

Setting subnet mask.

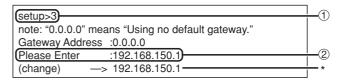

(setup>2)		
		I U
Subnet Mask	:255.255.255.0	
Please Enter	:255.0.0.0	
1 -	255.0.0.0	
(change) —>	233.0.0.0	

- ① Enter "2" and press the "Enter" key.
- ② Enter numerical value to be set and press the "Enter" key.

Display subnet mask after change (\*).

# **Default Gateway Setting** ([3]Default Gateway)

Setting default gateway.

- ① Enter "3" and press the "Enter" key.
- ② Enter numerical value to be set and press the "Enter" key.

Display gateway address after change (\*).

 If the values for IP Address, Subnet Mask or Gateway of the projector have been changed via Telnet, the computer cannot be connected to the projector depending on the computer's network settings.

# **User Name Setting** ([4]User Name)

Carrying out security protection using user name.

(setup>4)		<b>-</b> (1)
		<u> </u>
User Name	<u>:</u>	
Please Enter	: EIP-3500 <b>)</b> —	<b>-</b> (2)
(change) —>	EIP-3500 —	<b>-</b> *
(onange)	LII 0000	

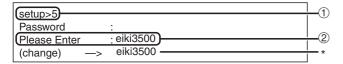

- ① Enter "4" and press the "Enter" key.
- ② Enter user name and press the "Enter" key. Display set user name (\*).

- User name can be up to 8 characters.
- You can input the characters below : a-z, A-Z, 0-9, -,
- In the default state, user name is not set.

# Password Setting ([5]Password)

Carrying out security protection using password.

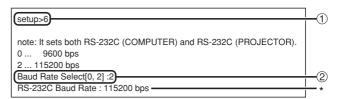

- ① Enter "5" and press the "Enter" key.
- ② Enter password and press the "Enter" key. Display set password (\*).

- Password can be up to 8 characters.
- You can input the characters below : a-z, A-Z, 0-9, -, \_
- In the default state, the password is not set.

# RS-232C Baud Rate Setting ([6]RS-232C Baud Rate)

Setting of baud rate for RS-232C (COMPUTER and PROJECTOR) terminals.

- ① Enter "6" and press the "Enter" key.
- ② Select and enter the number 0 or 2 and press the "Enter" key.

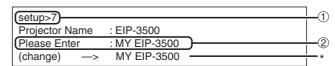

Display set baud rate (\*).

• Set the projector's baud rate to the same rate as that used by the computer.

# **Projector Name Setting** ([7]Projector Name)

It is possible to assign a projector name.

- ① Enter "7" and press the "Enter" key.
- ② Enter projector name. Display set projector name (\*).

## Note 🌑

- Projector name can be up to 12 characters.
- You can input the characters below:
   A-Z, 0-9, -, \_, (,), space
   (When "a-z" are input, they are converted to "A-Z" automatically.)
- It is the same as the name which can be confirmed or set, using RS-232C commands "PJN0", "PJN1", "PJN2" and "PJN3".

# Disconnecting All Connections ([D]Disconnect All)

It is possible to disconnect all the TCP/IP connections currently recognized by the projector. Even if the COM Redirect port is fixed in the Busy status due to a problem, it is possible to force the Ready status back by carrying out this disconnection.

- ① Enter "d" and press the "Enter" key.
- ② Enter "y" and press the "Enter" key.

 If Disconnect All is performed, the connection to the projector via network will be forcibly disconnected.

# **Entering ADVANCED SETUP MENU**

([A]Advanced Setup)

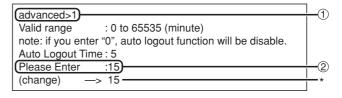

Enters ADVANCED SETUP MENU.

① Enter "a" and press the "Enter" key.

# Setting Auto Logout Time (ADVANCED[1]Auto Logout Time)

If there is no input after a fixed time, the projector automatically disconnects network connection using the Auto Logout function. It is possible to set the time until the projector is automatically disconnected in units of a minute (from 1 to 65535 minutes).

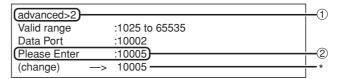

- ① Enter "1" and press the "Enter" key.
- ② Enter numerical value and press the "Enter" key. Display set numerical value (\*).

- If the set value is made 0, the Auto Logout function is disabled.
- If an invalid number is entered, an error message ("Parameter Error!") will be displayed and the screen returns to the ADVANCED SETUP MENU.

# Data Port Setting (ADVANCED[2]Data Port)

Setting of TCP port number. It is possible to set in the range of 1025 to 65535.

- ① Enter "2" and press the "Enter" key.
- ② Enter numerical value and press the "Enter" key. Display set numerical value (\*).

Set according to need. Normally, use with the factory default setting.

# **Carrying out Network Ping Test**

### (ADVANCED[5]Network Ping Test)

It is possible to confirm that a network connection between the projector and a computer etc. is working normally.

(advanced>5)	<b>—</b> ①
	(I)
Ping dest IP addr :192.168.150.1	
Please Enter :192.168.150.152	-(2)
(change) —> 192.168.150.152 —————	<b>—</b> *1
32 bytes from 192.168.150.152: icmp_seq = 1, time = 0 ms	
32 bytes from 192.168.150.152: icmp_seq = 2, time = 0 ms	*0
32 bytes from 192.168.150.152: icmp_seq = 3, time = 0 ms	
32 bytes from 192.168.150.152: icmp_seq = 4, time = 0 ms	

- ① Enter "5" and press the "Enter" key.
- ② Enter IP address of device to be tested and press the "Enter" key.

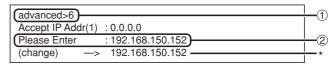

Display entered IP address (\*1). Display test result (\*2).

- If the "Enter" key is pressed without entering an IP address, the Ping destination IP address used previously is entered.
- If there is a fault with the connection, "Error: No answer" is displayed after a 5 second retry. In this case, please confirm the settings for the projector and the computer, and contact your network administrator.

# Setting of Accept IP Address (ADVANCED[6]Accept IP Addr(1) - [8]Accept IP Addr(3))

It is possible to improve security of the projector by allowing connection from only a prescribed IP address. It is possible to set up to three IP addresses allowing connection to the projector.

- ① Enter "6", "7" or "8" and press the "Enter" key.
- ② Enter numerical value and press the "Enter" key. Display set numerical value (\*).

- To invalidate the Accept IP Address being currently set, enter "0.0.0.0".
- If there is one or more Accept IP Addr being set, no connections are allowed from IP addresses that are not yet set. They can be cancelled using [9]Accept All IP Addr.

# Accepting All IP Addresses (ADVANCED[9]Accept All IP Addr)

Removes IP addresses set with "Accept IP Addr".

- ① Enter "9" and press the "Enter" key.
- 2 Enter "y" and press the "Enter" key.

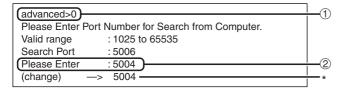

- At the point in time where "y" was entered, the numerical values for Accept IP Addr(1)-(3) are reset to "0.0.0.0".
- If "n" is entered, setting is not altered.

### Controlling the Projector Using RS-232C or Telnet

# **Setting of Search Port** (ADVANCED[0]Search Port)

Sets the port number used when searching for the projector from the network.

- ① Enter "0" and press the "Enter" key.
- ② Enter numerical value and press the "Enter" key. Display set numerical value (\*).

Set according to need. Normally, use with the factory default setting.

# Return to Default Settings (ADVANCED[!]Restore Default Setting)

Returns all menu setting values to the default state.

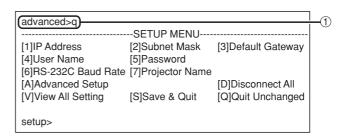

- ① Enter "!" and press the "Enter" key.
- ② Enter "y" and press the "Enter" key.

If the values for IP Address, Subnet Mask or Gateway of the projector have been returned to the default settings via Telnet, the computer cannot be connected to the projector depending on the computer's network settings.

# Return to Main Menu (ADVANCED[Q]Return to Main Menu)

Returns to the main SETUP MENU.

① Enter "q" and press the "Enter" key. Returns to the SETUP MENU.

# **Troubleshooting**

### Communication cannot be established with the projector

### When connecting the projector using serial-connection

- Check that the RS-232C terminal of the projector and a computer or the commercially available controller are connected correctly.
- ◀ Check that the RS-232C cable is a cross-over cable.
- ◆ Check that the RS-232C port setting for the projector corresponds to the setting for the computer or the commercially available controller.

# When connecting the projector to a computer using network (LAN)-connection

- Check that the cable's connector is firmly inserted in the LAN terminal of the projector.
- Check that the cable is firmly inserted into a LAN port for a computer or a network device such as a hub.
- Check that the LAN cable is a Category 5 cable.
- Check that the LAN cable is a cross-over cable when connecting the projector to a computer directly.
- Check that the LAN cable is a straight-through cable when connecting the projector with a network device such as a hub.
- Check that the power supply is turned on for the network device such as a hub between the projector and a computer.

### Check the network settings for the computer and the projector

- Check the following network settings for the projector.
  - IP Address

Check that the IP address for the projector is not duplicated on the network.

Subnet Mask

When the gateway setting for the projector is "0.0.0.0" (Not Used), or the gateway setting for the projector and the default gateway setting for the computer are the same:

- The subnet masks for the projector and the computer should be the same.
- The IP address parts shown by the subnet mask for the projector and the computer should be the same.

(Example)

When the IP address is "192.168.150.2" and the subnet mask is "255.255.255.0" for the projector, the IP address for the computer should be "192.168.150.X" (X=3-254) and the subnet mask should be "255.255.255.0".

Gateway

When the gateway setting for the projector is "0.0.0.0" (Not Used), or the gateway setting for the projector and the default gateway setting for the computer are the same:

- The subnets for the projector and the computer should be the same.
- The IP address parts shown by the subnet mask for the projector and the computer should be the same.

(Example)

When the IP address is "192.168.150.2" and the subnet mask is "255.255.255.0" for the projector, the IP address for the computer should be "192.168.150.X" (X=3-254) and the subnet mask should be "255.255.255.0".

• The factory default setting of the network setting for the projector

IP address: 192.168.150.2 Subnet mask: 255.255.255.0

Gateway address: 0.0.0.0 (Not Used)

• For network settings for the projector, refer to page 10.

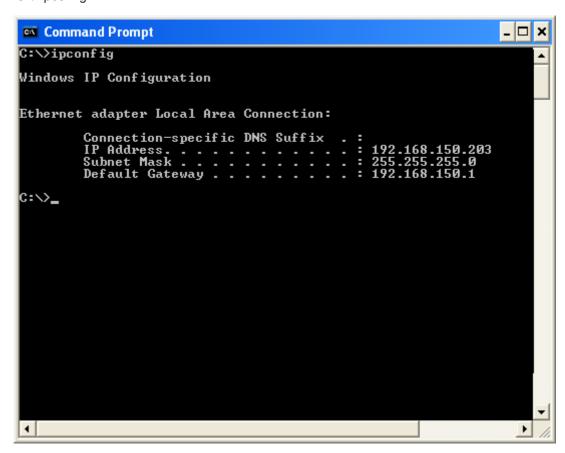

### **Troubleshooting**

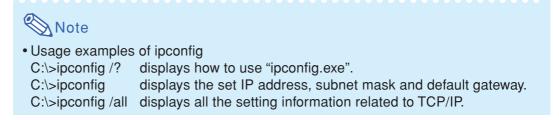

- Take the following steps for checking the network settings for the computer.
  - 1. Open a command prompt (MS-DOS Prompt).
    - In the case of Windows<sup>®</sup> 98 or 98SE: click "START" → "Programs" → "MS-DOS Prompt" in order.
    - In the case of Windows® Me: click "START" → "Programs" → "Accessories" → "MS-DOS Prompt" in order.
    - In the case of Windows® 2000: click "START" → "Programs" → "Accessories" → "Command Prompt" in order.
    - In the case of Windows® XP: click "START" → "All Programs" → "Accessories" → "Command Prompt" in order.
  - 2. After launching the command prompt (MS-DOS Prompt), enter the command "ipconfig", and press the "Enter" key.

• Communication may not be established even after carrying out the network settings for the computer. In such cases, restart your computer.

#### C:\>ipconfig

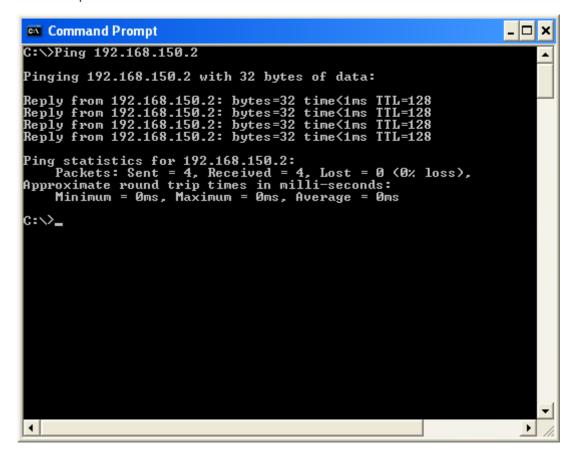

3. To return to the Windows® screen, enter "exit" and press the "Enter" key.

### **Troubleshooting**

- Check if the "TCP/IP" protocol is operating correctly using the "PING" command. Also, check if an IP address is set.
  - 1. Open a command prompt (MS-DOS Prompt).
    - In the case of Windows<sup>®</sup> 98 or 98SE: click "START" → "Programs" → "MS-DOS Prompt" in order.
    - In the case of Windows<sup>®</sup> Me: click "START" → "Programs" → "Accessories" → "MS-DOS Prompt" in order.
    - In the case of Windows® 2000: click "START" → "Programs" → "Accessories" → "Command Prompt" in order.
    - In case of Windows® XP: click "START" → "All Programs" → "Accessories" → "Command Prompt" in order.
  - After launching the command prompt (MS-DOS Prompt) enter a command "PING".
     Entry example C:\>Ping XXX.XXX.XXXX
     "XXX.XXX.XXXX" should be entered with an IP address to be connected to, such as the projector.
  - When connecting normally, the display will be as follows. (The screen may be slightly different depending on the OS type). <Example> when the IP address connected to is "192.168.150.2"

4. When a command cannot be sent, "Request time out" will be displayed.
Check the network setting again.
If communication can still not be established properly, contact your network administrator.
5. To return to the Windows® screen, enter "exit" and then press the "Enter" key.

◀ Initialize the settings. (See page 61 of the projector's operation manual.)

A connection cannot be made because you have forgotten your user name or your password.

After the initialization, carry out setting again.

# **Dimensions**

Units: inches (mm)
