OWNER'S INSTRUCTION MANUAL
INFORMATION TO THE USER
NOTE: This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

SAFETY PRECAUTIONS
WARNING:
TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, DO NOT EXPOSE THIS APPLIANCE TO RAIN OR MOISTURE.

The Portable LCD projector has a grounding-type AC line plug. This is a safety feature to be sure that the plug will fit into the power outlet. Do not try to defeat this safety feature.

Intense light source. Do not stare directly into the projection lens as possible eye damage could result. Be especially careful that children do not stare directly into the beam.

If the Portable LCD projector will not be used for an extended time, unplug the Portable LCD projector from the power outlet.

READ AND KEEP THIS OWNER'S MANUAL FOR LATER USE.

CAUTION
RISK OF ELECTRIC SHOCK
DO NOT OPEN

CAUTION: TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE COVER (OR BACK). NO USER-SERVICEABLE PARTS INSIDE. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.

IMPORTANT:
For your protection in the event of theft or loss of this Portable LCD projector, please record the Model Number and Serial Number located on the rear of unit and retain this information. Refer to these numbers whenever you call upon your authorized dealer regarding this product.
Do not discard shipping carton and packing materials. These items may be needed for storage or future servicing.

Model No: LC-360
Serial No: __________________
IMPORTANT SAFETY INSTRUCTIONS

All the safety and operating instructions should be read before the product is operated.

Read all of the instructions given here and retain them for later use. Unplug this projector from AC power supply before cleaning. Do not use liquid or aerosol cleaners. Use a damp cloth for cleaning.

Do not use attachments not recommended by the manufacturer as they may cause hazards.

Do not place this projector on an unstable cart, stand, or table. The projector may fall, causing serious injury to a child or adult, and serious damage to the projector. Use only with a cart or stand recommended by the manufacturer, or sold with the projector. Wall or shelf mounting should follow the manufacturer's instructions, and should use a mounting kit approved by the manufacturer.

Do not expose this unit to rain or use near water... for example, in a wet basement, near a swimming pool or the like.

Slots and openings in the cabinet and the back or bottom are provided for ventilation, to insure reliable operation of the equipment and to protect it from overheating.

The openings should never be covered with cloth or other material, and the bottom opening should not be blocked by placing the projector on a bed, sofa, rug, or other similar surface. This projector should never be placed near or over a radiator or heat register.

This projector should not be placed in a built-in installation such as a bookcase unless proper ventilation is provided.

This projector should be operated only from the type of power source indicated on the marking label. If you are not sure of the type of power supplied, consult your authorized dealer or local power company.

Do not overload wall outlets and extension cords as this can result in fire or electric shock. Do not allow anything to rest on the power cord. Do not locate this projector where the cord will be abused by persons walking on it.

Never push objects of any kind into this projector through cabinet slots as they may touch dangerous voltage points or short out parts that could result in a fire or electric shock. Never spill liquid of any kind on the projector.

Do not attempt to service this projector yourself as opening or removing covers may expose you to dangerous voltage or other hazards. Refer all servicing to qualified service personnel.

Unplug this projector from wall outlet and refer servicing to qualified service personnel under the following conditions:

a. When the power cord or plug is damaged or frayed.
b. If liquid has been spilled into the projector.
c. If the projector has been exposed to rain or water.
d. If the projector does not operate normally by following the operating instructions. Adjust only those controls that are covered by the operating instructions as improper adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore the projector to normal operation.
e. If the projector has been dropped or the cabinet has been damaged.
f. When the projector exhibits a distinct change in performance—this indicates a need for service.

When replacement parts are required, be sure the service technician has used replacement parts specified by the manufacturer that have the same characteristics as the original part. Unauthorized substitutions may result in fire, electric shock, or injury to persons.

Upon completion of any service or repairs to this projector, ask the service technician to perform routine safety checks to determine that the projector is in safe operating condition.

This projector is equipped with a grounding type AC line plug. Should you be unable to insert the plug into the outlet, contact your electrician. Do not defeat the safety purpose of this grounding type plug.

Follow all warnings and instructions marked on the projectors.

For added protection for the projector during a lightning storm, or when it is left unattended and unused for long periods of time, unplug it from the wall outlet. This will prevent damage due to lightning and powerline surges.

An appliance and cart combination should be moved with care. Quick stops, excessive force, and uneven surfaces may cause the appliance and cart combination to overturn.

POWER REQUIREMENTS

Your projector uses nominal input voltages of 120 VAC. The projector is designed to work with single-phase power systems having a grounded neutral conductor. To reduce the risk of electrical shock, do not plug into any other type of power system. Consult your authorized dealer or service station if you are not sure what type of power is supplied to your building.

Projector side (Female)

AC outlet side (Male)
DESCRIPTION

FRONT

- SPEAKER
- AIR INTAKE VENT
- CARRY HANDLE
- LEVELING/ELEVATING FEET
- INFRARED REMOTE RECEIVER
- REMOVABLE LENS COVER
- TOP CONTROLS
- PROJECTION LENS

REAR

- MAINS ON/OFF SWITCH
- GUARD
- GUARD RELEASE LEVER
- EXHAUST VENT

NOTICE
Connect the AC power supply cord (supplied) to the projector.
Push the guard release lever when the AC cord may not be connected by the guard.

MOVING THE PROJECTOR

Use the carry handle when moving projector.
Replace the lens cover when moving the projector to prevent damage to the lens.

NOTE:
Do not hold the projector by the filter cover when moving. You risk dropping the projector if the cover comes loose.
1 LAMP POWER ON/OFF BUTTON
Used to turn projection lamp on or off.

2 LAMP POWER INDICATOR
Lights dim when the projector is on.
Lights bright when the projector is stand-by position.

3 READY INDICATOR
Lights green when projector lamp is ready to be turned on.

4 TEMPERATURE WARNING INDICATOR
Flashes red when internal projector temperature is too high.

5 LAMP REPLACEMENT INDICATOR
Lights orange when projection lamp is nearing end of service life.

6 VOLUME BUTTONS
Used to adjust volume

7 MODE BUTTON
Used to select video source. (AV 1 or AV 2 Input)

8 MENU BUTTON
Used to select on-screen adjustment displays for color, tint, contrast, brightness and sharpness. Press repeatedly to cycle.

9 LEVEL CONTROL BUTTONS
Used to adjust color, tint, contrast, brightness, sharpness, display, blue background, reverse R/L and reverse T/B by pressing + or - button.

10 NORMAL BUTTON
Used to reset to normal picture adjustment preset by factory.

11 SETTING BUTTON
Used to select on-screen adjustment displays for focus setting pattern, display, blue background, reverse R/L and reverse T/B.
Press repeatedly to cycle.
12 AUDIO INPUT 1 JACKS  
Used to connect an audio input to the projector.

13 VIDEO INPUT 1 JACK  
Used to connect a video source to the projector.

14 VIDEO INPUT (BNC) JACK  
Used to connect a video source to the projector.

15 S-VIDEO INPUT JACK  
Used to connect a S-VHS video source to the projector.

16 AUDIO INPUT 2 JACKS  
Used to connect an audio input to the projector.

17 VIDEO INPUT 2 JACK  
Used to connect a video source to the projector.

18 AUDIO MONITOR OUTPUT JACKS  
Permits audio connection to a monitor.

19 VIDEO MONITOR OUTPUT JACK  
Permits video connection to a monitor.

20 EXT. SP. JACK (3.5 mm mini type)  
Used to connect an external monaural speaker system.

21 DC 12V SOURCE  
Used to connect a DC source (12V, 120mA) for other equipment.

22 WIRED REMOTE JACK  
When using the wired remote control, connect the remote cable (supplied) to this jack.

23 MAINS ON/OFF SWITCH  
Used to turn the projector on.
REMOTE CONTROL OPERATION

1 WIRED REMOTE JACK
   When using the wired remote control, connect the remote cable to this jack.

2 MODE BUTTON
   Used to select video source. (AV 1 or AV 2 Input)

3 LAMP POWER ON/OFF BUTTON
   Used to turn projection lamp on or off.

4 SOUND MUTE BUTTON
   Used to mute sound.

5 VOLUME BUTTONS
   Used to adjust volume.

6 SETTING BUTTON
   Used to select on-screen adjustment displays for focus setting pattern, display, blue background, reverse R/L and reverse T/B. Press repeatedly to cycle.

7 LEVEL CONTROL BUTTONS
   Used to adjust color, tint, contrast, brightness, sharpness, display, blue background, reverse R/L and reverse T/B by pressing + or - button.

8 NORMAL BUTTON
   Used to reset to normal picture adjustment preset by factory.

9 MENU BUTTON
   Used to select on-screen adjustment displays for color, tint, contrast, brightness and sharpness. Press repeatedly to cycle.
REMOTE CONTROL BATTERY INSTALLATION

1. Remove the battery compartment lid.

2. Slide the batteries into the compartment.
   
   Note: For correct polarity (+ and - terminal), be sure the battery terminals are in contact with the pins in the compartment.

3. Replace the compartment lid.

The remote control unit can be used as wireless or wired remote control.

USING THE REMOTE CONTROL UNIT (wireless)

Point the remote control toward the projector (Receiver window) whenever pressing the buttons. Maximum operating range for the remote control is about 16.4' (5m) and 90° from the front of the projector.

USING THE REMOTE CONTROL UNIT (wired)

Connect a remote control cable to RC jacks located on the remote control unit and the back of the projector.

To insure safe operation, please observe the following precautions:
* Use (2) AA type batteries.
* Change two batteries at the same time.
* Do not use a new battery with a used battery.
* Avoid contact with water.
* Do not drop the remote control unit.
SETTING-UP THE PROJECTOR

POSITIONING:
- This projector is basically designed to project on a flat projection surface.
- This projector can be focused from 4.9' (1.5m) - 39.4' (12.0m).
- Use the illustration below as an example when positioning the projector to the screen.

SIDE VIEW

ROOM LIGHT
The projector should ideally be placed in a room with very limited light. Picture quality will be directly affected by lighting conditions.

TOP VIEW

DIAGONAL IMAGE SIZES

LEVELING AND ELEVATING ADJUSTMENTS
Picture adjustments can be made with the two leveling/elevating feet. Adjustments of 6° up are possible by rotating the feet on the bottom of the projector. Adjust leveling of the projector, by rotating the two (left and right) feet on the bottom of the projector.

LEVELING/ELEVATING FEET
USING THE PROJECTOR

TO TURN ON THE PROJECTOR

Connect the projector to a video source (VCR, Video Camera, Video Disc Player, etc.) using the appropriate terminals on the rear of the projector (See page 14-15).

Connect the projector's AC power cord into a wall outlet and turn the MAINS ON/OFF switch (located on the back of the projector) to ON position. The LAMP POWER indicator will light RED and the READY indicator will light GREEN.

Press the LAMP POWER ON/OFF button on the projector or on the remote control unit to ON. The LAMP POWER indicator will light dim and the cooling fan will operate. The count-down display (EIKI LCD PROJECTOR and numeral 30) appears on the screen and the count-down starts (30-29-28-...1). The signal from the video source appears after 30 seconds.

CAUTION:
- THIS PROJECTOR USES A METAL-HALIDE ARC LAMP. IF YOU TURN ON THE LAMP, DO NOT TURN IT OFF FOR AT LEAST 5 MINUTES SO THAT ITS LIFE WILL NOT GET SHORTER.
- DO NOT UNPLUG THE PROJECTOR OR TURN THE MAINS ON/OFF SWITCH (LOCATED ON THE BACK OF THE PROJECTOR) TO OFF UNTIL THE COOLING FAN HAS STOPPED OPERATING.

NOTE 1: After you turn off the projector using the LAMP POWER ON/OFF button on the projector (or on the remote control unit) you must wait one minute before you can turn the projector on again.

NOTE 2: TEMPERATURE WARNING INDICATOR flashes red, the projector will automatically turn off. Wait at least 5 minutes before turning the projector on.

if the TEMPERATURE WARNING INDICATOR continues to flash, follow the procedures below:

1. Press LAMP POWER ON/OFF button to OFF.
2. Check the air filter for dust accumulation.
3. Remove dust with vacuum cleaner (See air filter care and cleaning on page 16.)
4. Press LAMP POWER ON/OFF button to ON.

if the TEMPERATURE WARNING INDICATOR still continues to flash, call your authorized distributor or dealer for service.

TO TURN OFF THE PROJECTOR

Press the LAMP POWER ON/OFF button on the projector or on the remote control unit. The "O" POWER OFF?" appears on the screen. Press again the LAMP POWER ON/OFF button to OFF the projector. The cooling fan will operate for 50 seconds after the projector is turned off and LAMP POWER indicator will light bright. (During this "cooling down" period, the projector can not be turned on.)

After 10 seconds, the READY indicator will light green again and the projector may be turned on by pressing the LAMP POWER ON/OFF button.

ADJUST THE PROJECTOR

FOCUS ADJUSTMENT

Turn the focus ring using your fingers for sharper, crisper picture. When focusing, press setting button to select focus setting pattern. (See other function setting on page 12.)

ZOOM ADJUSTMENT

Turn the zoom ring using zoom ring knob to obtain your desired picture size.
VIDEO MODE SELECT
Press the MODE button (located on projector or remote control unit) to select AV 1 Input or AV 2 Input. The "AV1" or "AV2" display will appear on the screen.

VOLUME ADJUSTMENT
Press the VOLUME buttons (located on projector or remote control unit) to adjust the volume. The screen display will appear.
Pressing (+) to increase volume and the green indicator to increase to the right on the screen.
Pressing (−) to decrease volume and the green indicator to decrease to the left on the screen.

SOUND MUTE ADJUSTMENT
Pressing the SOUND MUTE button on the remote control unit to mute audio and volume indicator to red. Press the SOUND MUTE button again to restore audio to its previous level.

PICTURE ADJUSTMENT
The normal picture level is factory preset on the projector and can be obtained anytime by pressing the NORMAL button on the projector, or on the remote control unit. (The Normal display will appear for 5 seconds.)
Picture adjustments can be made by using the MENU and LEVEL buttons on the projector, or on the remote control unit. (See picture adjustment on page 13.)

OTHER FUNCTION SETTING
This projector has other function settings: focus setting pattern, display, blue background, reverse R/L or reverse T/B. These setting by using SETTING and LEVEL buttons on the projector or on the remote control unit.
1. Press SETTING button to select the function.
Each time the SETTING button is pressed, the control function changes as follows:

2. Adjust the display, blue background, reverse R/L and reverse T/B by pressing LEVEL (− and +) buttons.
3. The ON-SCREEN display will disappear automatically in 5 seconds.

FOCUS ADJUSTMENT PATTERN
This function lets you project an easier-to-focus picture on the screen. When focusing, select this function with the setting button. (The focus setting pattern will appear for 10 seconds.)

DISPLAY
When this function is in the "ON" position, on-screen displays always appear when adjustments are made. Although these on-screen displays are very helpful, these may spoil the view if adjustments are made during presentations. The certain displays do not appear when display switch is "OFF". The following displays do not appear:
• Count-down Display
• Volume Display
• Sound Mute Display
• Normal Display

BLUE BACK
When this function is in the "ON" position, the projector will present a blue image without video noise on the screen when the video source is unplugged or turned off.

REVERSE R/L
When this function is in the "ON" position, the picture reversed for a rear projection.

REVERSE T/B
When this function is in the "ON" position, the picture inverted for a ceiling-mounted projection.

NORMAL
BUTTON

NORMAL
BUTTON

Picture adjustments have been preset at the factory to our quality standards. The picture adjustments can be made by the MENU and LEVEL buttons on the projector or on the remote control unit.

1. Press the MENU button to select the picture adjustments function. Each time the MENU button is pressed, the control function changes as follows:

2. Adjust the color intensity, tint, contrast, brightness or sharpness by pressing the LEVEL (+ and -) buttons.

3. The ON-SCREEN display will disappear automatically in 5 seconds.

- Press the LEVEL CONTROL buttons to make adjustments. Refer to the control chart below.

</table>

NOTE: The projector is equipped with a built-in memory feature that can maintain the picture adjustment levels if the projector is turned off and AC power cord is disconnected. If the NORMAL button is pressed, the projector will return to factory preset level.
CONNECTING THE PROJECTOR

Your projector is equipped with various audio/video inputs and outputs including S-VHS video.

CONNECTING TO THE AV INPUT 1 JACKS

Connect to the video and audio outputs of a VCR, video disc player, video camera, satellite TV tuner or other AV equipment.

- Connect video/audio outputs from external sources to these input jacks.
- If the audio signal from the AV equipment is stereo, be sure to connect the right and left channels to the respective right and left audio input jacks.
- If the external audio signal is monaural, connect it to the left jack.
- Do not connect the video sources to the video input jack (RCA) together with the BNC jack. Use one video input only for video input jack.

S-VHS FORMAT VCR CONNECTION

The AV 1 input includes an extra video input jack marked S-VIDEO to allow connection to an S-VHS format VCR that has separate Y/C video signals. The S-VIDEO jack has priority over the VIDEO (RCA or BNC) jack.

CONNECTING TO THE AV INPUT 2 JACKS

Connect to the video and audio outputs of a VCR, video disc player, video camera, satellite TV tuner or other AV equipment.

- Connect video/audio outputs from external sources to these input jacks.
- If the audio signal from the AV equipment is stereo, be sure to connect the right and left channels to the respective right and left audio input jacks.
- If the external audio signal is monaural, connect it to the left jack.

CONNECTING TO THE MONITOR OUTPUT JACKS

These jacks contain the audio/video information that is viewed on the screen.

- Connect video/audio inputs from AV equipment to these output jacks.
- If the audio input of the audio equipment is stereo, be sure to connect the right and left channels to the respective right and left jacks.
- If the audio input of the audio equipment is monaural, connect it to the left jack.
- Whenever the S-VIDEO signal source is viewed on the screen, the video signal available at the MONITOR OUTPUT jack will be in black and white (monochrome).

CONNECTING TO THE EXT. SP. JACK (3.5mm mini type)

This jack contain the audio information that is viewed on the screen. Use to connect a external monaural speaker system when using this jack, turn off the audio from the internal speaker.

CONNECTING TO THE DC 12V SOURCE

Used as a DC source for other equipment such as controllers electric screens.
AIR FILTER CARE AND CLEANING

The removable air filter prevents dust from accumulating on the surface of the projection lens and projection mirror. Should the air filter become clogged with dust particles, it will reduce the cooling fan's effectiveness and may result in internal heat built up and reduce the life of the projector.

The air filter should be cleaned about every 100 hours. Clean the air filter more often when the projector is used in a particularly dusty or smoky place.

When the air filter is blackened and beyond cleaning, it is time to change new air filter. Request service from an authorized dealer or service station.

Be sure to face the air filter in the correct direction when installing inside of the filter cover. Attach the air filter with the arrow on the "AIR FLOW" label facing towards the inside of the projector.

To clean the air filter, follow the cleaning procedures below:
1. Turn the LAMP POWER ON/OFF button OFF.
2. Remove the air filter cover from the side of the projector.
3. Remove the air filter and sponge from the filter cover.
4. Clean the air filter and sponge with a vacuum cleaner.
5. Replace the air filter and sponge. Make sure that air filter cover is fully inserted.

⚠️ Do not clean with water. Doing so may damage the air filter.
Do not operate the projector with air filter removed.

RECOMMENDATION

TO ENJOY PICTURE IMAGE, USE THE PROJECTOR IN THE CLEAN ENVIRONMENT. USAGE IN THE CLEAN ENVIRONMENT IS RECOMMENDED.

When used under the dusty or smoky conditions, dust may accumulate on the liquid crystal panel and lens inside it, and may resultantly be projected on the screen together with the picture.

When the above symptoms are noticed contact the place where your purchased or the nearest service center for the cleaning.

LAMP REPLACEMENT & TEMPERATURE WARNING INDICATORS

LAMP REPLACEMENT INDICATOR

When the lamp nears the end of its service life, the picture quality and color quality will deteriorate and the lamp replacement indicator will light orange.

⚠️ DO NOT ATTEMPT TO REMOVE OR CHANGE THE PROJECTION LAMP. THE LAMP CAN ONLY BE CHANGED BY QUALIFIED SERVICE PERSONNEL.

TEMPERATURE WARNING INDICATOR

The TEMPERATURE WARNING INDICATOR flashes red when the internal temperature of the projector exceeds the normal temperature.

Possible causes for the temperature warning may be:
1. Ventilation slots at the front or rear of the projector are blocked. In such an event, reposition the projector so that ventilation slots are not obstructed.
2. Air filter is clogged with dust particles. Remove dust from the air filter by following instructions in the Air Filter Care and Cleaning section above.

If the TEMPERATURE WARNING INDICATOR still continues to flash after checking (1) and (2), call your authorized dealer or service station.
# HELPFUL HINTS-Problems and Solutions
