PORTABLE LCD COMPUTER PROJECTOR

MODEL LC-4200U

OWNER'S INSTRUCTION MANUAL
INFORMATION TO THE USER
NOTE: This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

SAFETY PRECAUTIONS

WARNING:
TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, DO NOT EXPOSE THIS APPLIANCE TO RAIN OR MOISTURE.

The Portable LCD Computer projector has a grounding-type AC line plug. This is a safety feature to be sure that the plug will fit into the power outlet. Do not try to defeat this safety feature.

Intense light source. Do not stare directly into the projection lens as possible eye damage could result. Be especially careful that children do not stare directly into the beam.

If the Portable LCD Computer projector will not be used for an extended time, unplug the Portable LCD Computer projector from the power outlet.

READ AND KEEP THIS OWNER’S MANUAL FOR LATER USE.

CAUTION
RISK OF ELECTRIC SHOCK
DO NOT OPEN

CAUTION: TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE COVER (OR BACK), NO USER-SERVICEABLE PARTS INSIDE. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.

THIS SYMBOL INDICATES THAT DANGEROUS VOLTAGE CONSTITUTING A RISK OF ELECTRIC SHOCK IS PRESENT WITHIN THIS UNIT.

THIS SYMBOL INDICATES THAT THERE ARE IMPORTANT OPERATING AND MAINTENANCE INSTRUCTIONS IN THE OWNER’S MANUAL WITH THIS UNIT.

IMPORTANT:
For your protection in the event of theft or loss of this Portable LCD Computer projector, please record the Model Number and Serial Number located on the rear of unit and retain this information. Refer to these numbers whenever you call upon your authorized dealer regarding this product. Do not discard shipping carton and packing materials. These items may be needed for storage or future servicing.

Model No: LC-4200U
Serial No:______________
All the safety and operating instructions should be read before the product is operated.

Read all of the instructions given here and retain them for later use. Unplug this projector from AC power supply before cleaning. Do not use liquid or aerosol cleaners. Use a damp cloth for cleaning.

Do not use attachments not recommended by the manufacturer as they may cause hazards.

Do not place this projector on an unstable cart, stand, or table. The projector may fall, causing serious injury to a child or adult, and serious damage to the projector. Use only with a cart or stand recommended by the manufacturer, or sold with the projector. Wall or shelf mounting should follow the manufacturer's instructions, and should use a mounting kit approved by the manufacturer.

Do not expose this unit to rain or use near water... for example, in a wet basement, near a swimming pool or the like.

Slots and openings in the cabinet and the back or bottom are provided for ventilation, to insure reliable operation of the equipment and to protect it from overheating.

The openings should never be covered with cloth or other material, and the bottom opening should not be blocked by placing the projector on a bed, sofa, rug, or other similar surface. This projector should never be placed near or over a radiator or heat register.

This projector should not be placed in a built-in installation such as a bookcase unless proper ventilation is provided.

This projector should be operated only from the type of power source indicated on the marking label. If you are not sure of the type of power supplied, consult your authorized dealer or local power company.

Do not overload wall outlets and extension cords as this can result in fire or electric shock. Do not allow anything to rest on the power cord. Do not locate this projector where the cord will be abused by persons walking on it.

Never push objects of any kind into this projector through cabinet slots as they may touch dangerous voltage points or short out parts that could result in a fire or electric shock. Never spill liquid of any kind on the projector.

Do not attempt to service this projector yourself as opening or removing covers may expose you to dangerous voltage or other hazards. Refer all servicing to qualified service personnel.

Unplug this projector from wall outlet and refer servicing to qualified service personnel under the following conditions:

a. When the power cord or plug is damaged or frayed.

b. If liquid has been spilled into the projector.

c. If the projector has been exposed to rain or water.

d. If the projector does not operate normally by following the operating instructions. Adjust only those controls that are covered by the operating instructions as improper adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore the projector to normal operation.

e. If the projector has been dropped or the cabinet has been damaged.

f. When the projector exhibits a distinct change in performance—this indicates a need for service.

When replacement parts are required, be sure the service technician has used replacement parts specified by the manufacturer that have the same characteristics as the original part. Unauthorized substitutions may result in fire, electric shock, or injury to persons.

Upon completion of any service or repairs to this projector, ask the service technician to perform routine safety checks to determine that the projector is in safe operating condition.

This projector is equipped with a grounding type AC line plug. Should you be unable to insert the plug into the outlet, contact your electrician. Do not defeat the safety purpose of this grounding type plug.

Follow all warnings and instructions marked on the projectors.

For added protection for the projector during a lightning storm, or when it is left unattended and unused for long periods of time, unplug it from the wall outlet. This will prevent damage due to lightning and powerline surges.

An appliance and cart combination should be moved with care. Quick stops, excessive force, and uneven surfaces may cause the appliance and cart combination to overturn.

## POWER REQUIREMENTS

Your projector uses nominal input voltages of 120 VAC. The projector is designed to work with single-phase power systems having a grounded neutral conductor. To reduce the risk of electrical shock, do not plug into any other type of power system. Consult your authorized dealer or service station if you are not sure what type of power is supplied to your building.

![Projector side (Female)](image1)

![AC outlet side (Male)](image2)
**DESCRIPTION**

**FRONT**
- SPEAKER
- AIR INTAKE VENT
- CARRY HANDLE
- TILT STAND
- TOP CONTROLS
- PROJECTION LENS
- REMOVABLE LENS COVER

**REAR**
- MAINS ON/OFF SWITCH
- EXHAUST VENT
- GUARD
- GUARD RELEASE LEVER
- LEVELING FEET

**NOTICE**
Push the guard release lever when the AC cord may not be connected by the guard.

**MOVING THE PROJECTOR**
Use the carry handle when moving projector. Replace the lens cover when moving the projector to prevent damage to the lens.

**NOTE:**
Do not hold the projector by the filter cover when moving. You risk dropping the projector if the cover comes loose.
CONNECTING THE PROJECTOR

Your projector is equipped with various audio/video inputs and outputs including Computer HDB15-pin terminals, Monitor HDB15-pin terminals, and S-VHS video.

COMPUTER MODE

This projector is compatible with many different types of personal computers: using the adapter cable provided, it can be connected directly to any VGA and MAC II or compatible computers equipped with FM-TOWNS (640 × 400), FM-TOWNS (640 × 480), PC-9801 (640 × 400), PC-9821 (640 × 400), PC-9821 (640 × 480), AT&T, AX-286/386, GENOA 6000, and VESA VS901001. (adapter cable not provided).

CONNECTING TO THE COMPUTER INPUT HDB15-PIN TERMINAL

Personal computers can be connected to the HDB15-pin terminal on the projector.
- Connect the computer to this terminal using the adapter cable (two type of adapter cables are provided).

WARNING: For projectors, adapter cable provided is designed to reduce RFI (Radio Frequency Interference) emissions. For regulatory compliance reasons, this cable must be used and must not be replaced by any other cable.

CONNECTING TO THE MONITOR OUTPUT HDB15-PIN TERMINAL

Monitor televisions can be connected to the HDB15-pin terminal on the projector.
- Connect the monitor television to this terminal using the adapter cable (not provided).

CONNECTING TO THE COMPUTER AUDIO INPUT JACKS

- Connect audio outputs from your computer to these jacks.
- If the audio input of the audio equipment is stereo, be sure to connect the right and left channels to the respective right and left jacks.
- If the audio input of the audio equipment is monaural, connect it to the left jack.

CONNECTING TO THE DIN8 (SERIAL PORT) CONNECTOR

- If you control the projector by computer, you must connect a cable from your computer to this connector.
NOTE: The hook up should be done as per the above illustration. After hook up, turn on the personal computer and monitor and the POWER(LAMP) ON/OFF button to light the projection lamp. Otherwise, the monitor’s image does not appear.
AV MODE

CONNECTING TO THE AV INPUT JACKS

Connect to the video and audio outputs of a VCR, video disc player, video camera, satellite TV tuner or other AV equipment.

- Connect video/audio outputs from external sources to these input jacks.
- If the audio signal from the AV equipment is stereo, be sure to connect the right and left channels to the respective right and left audio input jacks.
- If the external audio signal is monaural, connect it to the left jack.
- Do not connect the video sources to the video input jack (RCA) together with the BNC jack. Use one video input only for video input jack.

S-VHS FORMAT VCR CONNECTION

The AV input includes an extra video input jack marked S-VIDEO to allow connection to an S-VHS format VCR that has separate Y/C video signals. The S-VIDEO jack has priority over the VIDEO (RCA or BNC) jack.

CONNECTING TO THE MONITOR OUTPUT JACKS

These jacks contain the audio/video information that is viewed on the screen.
- Connect video/audio inputs from AV equipment to these output jacks.
- If the audio input of the audio equipment is stereo, be sure to connect the right and left channels to the respective right and left jacks.
- If the audio input of the audio equipment is monaural, connect it to the left jack.
- Whenever the S-VIDEO signal source is viewed on the screen, the video signal available at the MONITOR OUTPUT jack will be in black and white (monochrome).

CONNECTING TO THE EXT. SP. JACK (3.5mm mini type)

This jack contain the audio information that is viewed on the screen. Use to connect a external monaural speaker system when using this jack, turn off the audio from the internal speaker.

CONNECTING TO THE DC 12V SOURCE

Used as a DC source for other equipment such as controllers electric screens.
SETTING-UP THE PROJECTOR

POSITIONING:
- This projector is basically designed to project on a flat projection surface.
- This projector can be focused from 4.9' (1.5m) ~ 19.7' (6.0m).
- Use the illustration below as an example when positioning the projector to the screen.

ROOM LIGHT
The projector should ideally be placed in a room with very limited light. Picture quality will be directly affected by lighting conditions.

DIAGONAL IMAGE SIZES

TILTING AND LEVELING ADJUSTMENTS
Picture adjustments can be made with the tilting stand and the 2 leveling feet.
Hold the projector by the carrying handle on the front and push the tilt stand lock inward. Then, move the front end of the projector up and down, and release the tilt stand lock when at the height you want.
Always hold the projector by the carrying handle when trying to push the tilt stand lock inward.
If you hold the projector anywhere else, you might end up sandwiching your fingers if the projector lowers suddenly.
Adjust leveling of the projector, by rotating the two (left and right) feet on the bottom of the projector.
OPERATION OF CONTROLS

1. POWER (LAMP) ON/OFF BUTTON
   Used to turn projection lamp on or off.

2. POWER INDICATORS
   Lights dim when the projector is on.
   Lights bright when the projector is standby position.

3. READY INDICATORS
   Lights green when projector lamp is ready to be turned on.

4. TEMPERATURE WARNING INDICATOR
   Flashes red when internal projector temperature is too high.

5. LAMP REPLACEMENT INDICATOR
   Lights orange when projection lamp is nearing end of service life.

6. VOLUME BUTTONS
   Used to adjust volume

7. MODE BUTTON
   Used to select video source. (Computer Input or AV Input)

8. MENU BUTTON
   - Computer Mode
     Used to select on-screen adjustment displays for brightness, contrast, horizontal position, vertical position, fine sync and memory. Press repeatedly to cycle.
   - AV Mode
     Used to select on-screen adjustment displays for color, tint, contrast, brightness and sharpness. Press repeatedly to cycle.

9. LEVEL CONTROL BUTTONS
   - Computer Mode
     Used to adjust brightness, contrast, horizontal position, vertical position, fine sync, memory, display, blue background, reverse R/L and reverse T/B by pressing + or - button.
   - AV Mode
     Used to adjust color, tint, contrast, brightness, sharpness, display, blue background, reverse R/L and reverse T/B by pressing + or - button.

10. NORMAL BUTTON
    Used to reset to normal picture adjustment preset by factory.

11. SYSTEM BUTTON
    - Computer Mode
      Used to select computer system.
    - AV Mode
      Used to select color system.

12. SETTING BUTTON
    Used to select on-screen adjustment displays for focus setting pattern, display, blue background, reverse R/L and reverse T/B. Press repeatedly to cycle.
13 COMPUTER INPUT TERMINAL
Used to connect a computer to the projector.

14 MONITOR OUTPUT TERMINAL
Used to connect a monitor to the projector.

15 COMPUTER AUDIO INPUT JACKS
Used to connect a computer audio input to the projector.

16 SERIAL PORT CONNECTOR
Used to connect a computer to the projector.

17 WIRED REMOTE JACK
When using the wired remote control, connect the remote cable to this jack.

18 AUDIO INPUT JACKS
Used to connect an audio input to the projector.

19 VIDEO INPUT JACK
Used to connect a video source to the projector.

20 VIDEO INPUT (BNC) JACK
Used to connect a video source to the projector.

21 S-VIDEO INPUT JACK
Used to connect a S-VHS video source to the projector.

22 AUDIO MONITOR OUTPUT JACKS
Permits audio connection to a monitor.

23 VIDEO MONITOR OUTPUT JACK
Permits video connection to a monitor.

24 EXT. SP. JACK (3.5 mm mini type)
Used to connect an external monaural speaker system.

25 DC 12V SOURCE
Used to connect a DC source (12V, 120mA) for other equipment.

26 MAINS ON/OFF SWITCH
Used to turn the projector on.
REMOTE CONTROL OPERATION

1 MODE BUTTON
   Used to select video source. (Computer Input or AV Input)

2 POWER (LAMP) ON/OFF BUTTON
   Used to turn projection lamp on or off.

3 SOUND MUTE BUTTON
   Used to mute sound.

4 VOLUME BUTTONS
   Used to adjust volume.

5 LEVEL CONTROL BUTTONS
   • Computer Mode
     Used to adjust brightness, contrast, horizontal position, vertical position, fine sync and memory by pressing + or - button.
   • AV Mode
     Used to adjust color, tint, contrast, brightness and sharpness by pressing + or - button.

6 NORMAL BUTTON
   Used to reset to normal picture adjustment preset by factory.

7 MENU BUTTON
   • Computer Mode
     Used to select on-screen adjustment displays for brightness, contrast, horizontal position, vertical position, fine sync and memory. Press repeatedly to cycle.
   • AV Mode
     Used to select on-screen adjustment displays for color, tint, contrast, brightness and sharpness. Press repeatedly to cycle.

8 SYSTEM SELECT BUTTON
   • Computer Mode
     Used to select computer system.
   • AV Mode
     Used to select color system.

9 LIGHT UP BUTTON
   Press to light the back light for function buttons on the remote control unit for 5 seconds. Press any other function button during the lighting to light for another 5 seconds.

10 WIRED REMOTE JACK
   When using the wired remote control, connect the remote cable to this jack.
The remote control unit can be used as wireless or wired remote control.

**USING THE REMOTE CONTROL UNIT (wireless)**

Point the remote control toward the back of the projector (Receiver window) whenever pressing the buttons. Maximum operating range for the remote control is about 16.4' (5m) and 60° from the back of the projector.

**USING THE REMOTE CONTROL UNIT (wired)**

Connect a remote control cable to RC jacks located on the remote control unit and the back of the projector.

To insure safe operation, please observe the following precautions:
* Use (3) AA type batteries.
* Change three batteries at the same time.
* Do not use a new battery with a used battery.
* Avoid contact with water.
* Do not drop the remote control unit.
USING THE PROJECTOR

TO TURN ON THE PROJECTOR

Connect the projector to a video source (Computer, VCR, Video Camera, Video Disc Player, etc.) using the appropriate terminals on the rear of the projector (See page 6-9).

Connect the projector's AC power cord into a wall outlet and turn the MAINS ON/OFF switch (located on the back of the projector) to ON position. The POWER indicator will light RED and the READY indicator will light GREEN.

Press the POWER (LAMP) ON/OFF button on the projector or on the remote control unit to ON. The POWER indicator will light dim and the cooling fan will operate. The wait display (EIKI LCD PROJECTOR and numeral 30) appears on the screen and the count-down starts (30-29-28-...1). The signal from the video source appears after 30 seconds.

CAUTION:
- THIS PROJECTOR USES A METAL-HALIDE ARC LAMP. IF YOU TURN ON THE LAMP, DO NOT TURN IT OFF FOR AT LEAST 5 MINUTES SO THAT ITS LIFE WILL NOT GET SHORTER.
- DO NOT UNPLUG THE PROJECTOR OR TURN THE MAINS ON/OFF SWITCH (LOCATED ON THE BACK OF THE PROJECTOR) TO OFF UNTIL THE COOLING FAN HAS STOPPED OPERATING.

NOTE 1: After you turn off the projector using the POWER (LAMP) ON/OFF button on the projector (or on the remote control unit) you must wait one minute before you can turn the projector on again.

NOTE 2: TEMPERATURE WARNING INDICATOR flashes red, the projector will automatically turn off. Wait at least 5 minutes before turning the projector on.

If the TEMPERATURE WARNING INDICATOR continues to flash, follow the procedures below:

1. Press POWER (LAMP) ON/OFF button to OFF.
2. Check the air filter for dust accumulation.
3. Remove dust with vacuum cleaner (See air filter care and cleaning on page 20.)
4. Press POWER (LAMP) ON/OFF button to ON.

If the TEMPERATURE WARNING INDICATOR still continues to flash, call your authorized distributor or dealer for service.

TO TURN OFF THE PROJECTOR

Press the POWER (LAMP) ON/OFF button on the projector or on the remote control unit. The "POWER OFF?" appears on the screen. Press again the POWER (LAMP) ON/OFF button to OFF the projector. The cooling fan will operate for 50 seconds after the projector is turned off and POWER indicator will light bright. (During this "cooling down" period, the projector can not be turned on.) After 10 seconds, the READY indicator will light green again and the projector may be turned on by pressing the POWER (LAMP) ON/OFF button.

ADJUST THE PROJECTOR

FOCUS ADJUSTMENT

Turn the focus ring using your fingers for sharper, crisper picture. When focusing, press setting button to select focus setting pattern. (See other function setting on page 17.)

ZOOM ADJUSTMENT

Turn the zoom ring using zoom ring knob to obtain your desired picture size.
VIDEO MODE SELECT
Press the MODE button (located on projector or remote control unit) to select Computer Input or AV Input. The "COMPUTER" or "AV" display will appear on the screen.

VOLUME ADJUSTMENT
Press VOLUME buttons (located on projector or remote control unit) to adjust the volume. The screen display will appear. Pressing (+) will increase volume and the green indicator will increase to the right on the screen. Pressing (-) will decrease volume and the green indicator will decrease to the left on the screen.

SOUND MUTE ADJUSTMENT
Pressing SOUND MUTE button on the remote control unit will mute audio. Press SOUND MUTE button again to restore audio to its previous level.

PICTURE ADJUSTMENT
The normal picture level is factory preset on the projector and can be obtained anytime by pressing the NORMAL button on the projector, or on the remote control unit. (The Normal display will appear for 5 seconds.) Picture adjustments can be made by using the MENU and LEVEL buttons on the projector, or on the remote control unit. (See picture adjustment on page 18-19.)

SYSTEM SELECT
- COMPUTER MODE
When a computer is connected to the projector and both of the computer and the projector are turned on, the type of the connected computer system appears on the screen. (See "ON-SCREEN DISPLAY" on page 23.) If any of the following 3 computer systems is connected to the projector and the projector cannot discriminate those systems, press the "SYSTEM" button to select the correct system of the connected computer.

1. "MAC II NORMAL" and "MAC LC 13RGB"
2. "VGA 840 x 400" and "VGA 720 x 400"
3. "VGA 640 x 480" and "GENOA"

For example: The display of "MAC II NORMAL" will appear on-screen when the signal comes from Mac II normal, Super Mac and/or Raster Ops. In case of connecting Mac LC 13" RGB monitor, press SYSTEM button (located on projector or remote control unit) to select the display of "MAC LC 13RGB".

NOTE:
1. If no input signal from the computer, the "NO SIGNAL" display appears on the screen.
2. If the projector cannot discriminate the input signal from the computer, the "NOT COMPATIBLE" display appears on the screen.
- **AV MODE**
Press the SYSTEM button (located on projector or remote control unit) to select AUTO, PAL, SECAM, NTSC4.43 or NTSC.
Each time the SYSTEM button is pressed, the color system changes as follows:
When the color system is set to "AUTO" position, this projector can receive color programs from one of the 4 systems (PAL, SECAM, NTSC4.43 or NTSC), automatically.
If the picture quality is poor, make sure the proper color system is selected to match the video source.

```
AUTO  PAL  SECAM  NTSC4.43  NTSC
```

**TEXT SELECT**
**(VGA 720 × 400 and VGA 640 × 400 used only)**
Press the SYSTEM button (located on projector or remote control unit) to select "VGA 720×400", "TEXT", or "VGA 640×400", "GRAPHIC".

**NOTE:** "720×400" TEXT mode is projected to be compressed as "640 × 400".

**OTHER FUNCTION SETTING**
This projector has other function settings: focus setting pattern, display, blue background, reverse R/L or reverse T/B. These settings by using SETTING and LEVEL buttons on the projector.
1. Press SETTING button to select the function.
2. Adjust the display, blue background, reverse R/L and reverse T/B by pressing LEVEL (- and +) buttons.
3. The ON-SCREEN display will disappear automatically in 5 seconds.

- **FOCUS ADJUSTMENT PATTERN**
This function lets you project an easier-to-focus picture on the screen. When focusing, select this function with the setting button. (The focus setting pattern will appear for 10 seconds.)

- **DISPLAY**
When this function is "ON" position, the projector to see the on-screen display of all setting and adjustment will be appeared.
When this function is "OFF" position, the projector to see the on-screen display of any setting and adjustment (related of Picture Adjustment and Other function Setting) will be appeared.

- **BLUE BACK**
When this function is in the "ON" position, the projector will project the blue image without video noise on the screen when the video source is unplugged or turned off.

- **REVERSE R/L**
When this function is in the "ON" position, the left/right picture reverse capability lets you project onto a rear projection screen.

- **REVERSE T/B**
When this function is in the "ON" position, the top/bottom picture reverse.
PICTURE ADJUSTMENTS

(A) COMPUTER MODE

Picture adjustments have been preset at the factory to our quality standards. The picture adjustments can be made by the MENU and LEVEL buttons on the projector or on the remote control unit.

1. Press the MENU button to select the picture adjustments function.
   Each time the MENU button is pressed, the control function changes as follows:

   NOTE: "V. POSITION" will be skipped, less than 480 line displays computer connected.

2. Adjust the brightness, contrast, H. position, V. position or fine sync by pressing the LEVEL (+ and -) buttons.
3. The ON-SCREEN display will disappear automatically in 5 seconds.

4. Then press the MENU button to select the MEMORY menu. Press the LEVEL + button to save the picture adjustment levels in memory.

NOTE: The projector is equipped with a built-in memory feature that can maintain the picture adjustment levels if the projector is turned off and AC power cord is disconnected. If the NORMAL button is pressed, the projector will return to factory preset level.
(B) AV MODE

Picture adjustments have been preset at the factory to our quality standards. The picture adjustments can be made by the MENU and LEVEL buttons on the projector or on the remote control unit.

1. Press the MENU button to select the picture adjustments function.
   Each time the MENU button is pressed, the control function changes as follows:

![Diagram of menu options]

NOTE: TINT will be skipped during in the PAL and SECAM mode.

2. Adjust the color intensity, tint, contrast, brightness or sharpness by pressing the LEVEL (+ and -) buttons.
3. The ON-SCREEN display will disappear automatically in 5 seconds.

- Press the LEVEL CONTROL buttons to make adjustments.
  Refer to the control chart below.

<table>
<thead>

</tbody>
</table>

NOTE: The projector is equipped with a built-in memory feature that can maintain the picture adjustment levels if the projector is turned off and AC power cord is disconnected. If the NORMAL button is pressed, the projector will return to factory preset level.
AIR FILTER CARE AND CLEANING

The removable air filter prevents dust from accumulating on the surface of the projection lens and projection mirror. Should the air filter become clogged with dust particles, it will reduce the cooling fan's effectiveness and may result in internal heat built up and reduce the life of the projection lamp.

The air filter should be cleaned about every 100 hours. Clean the air filter more often when the projector is used in a particularly dusty or smoky place.

When the air filter is blackened and beyond cleaning, it is time to change new air filter. Request service from an authorized dealer or service station.

Be sure to face the air filter in the correct direction when installing inside of the filter cover. Attach the air filter with the arrow on the "AIR FLOW" label facing towards the inside of the projector.

To clean the air filter, follow the cleaning procedures below:
1. Turn the POWER (LAMP) ON/OFF button OFF.
2. Remove the air filter cover from the side of the projector.
3. Remove the air filter and sponge from the filter cover.
4. Clean the air filter and sponge with a vacuum cleaner.
5. Replace the air filter and sponge. Make sure that air filter cover is fully inserted.

⚠️ Do not clean with water. Doing so may damage the air filter.
Do not operate the projector with air filter removed.

RECOMMENDATION

TO ENJOY PICTURE IMAGE, USE THE PROJECTOR IN THE CLEAN ENVIRONMENT. USAGE IN THE CLEAN ENVIRONMENT IS RECOMMENDED.

When used under the dusty or smoky conditions, dust may accumulate on the liquid crystal panel and lens inside it, and may resultantly be projected on the screen together with the picture.

When the above symptoms are noticed contact the place where your purchased or the nearest service center for the cleaning.

LAMP REPLACEMENT & TEMPERATURE WARNING INDICATORS

LAMP REPLACEMENT INDICATOR

When the lamp nears the end of its service life, the picture quality and color quality will deteriorate and the lamp replacement indicator will light orange.

⚠️ DO NOT ATTEMPT TO REMOVE OR CHANGE THE PROJECTION LAMP. THE LAMP CAN ONLY BE CHANGED BY QUALIFIED SERVICE PERSONNEL.

TEMPERATURE WARNING INDICATOR

The TEMPERATURE WARNING INDICATOR flashes red when the internal temperature of the projector exceeds the normal temperature.

Possible causes for the temperature warning may be:
1. Ventilation slots at the front or rear of the projector are blocked. In such an event, reposition the projector so that ventilation slots are not obstructed.

2. Air filter is clogged with dust particles. Remove dust from the air filter by following instructions in the Air Filter Care and Cleaning section above.

If temperature warning indicator remains on after performing the checks listed above, cooling fan/internal circuits may be malfunctioning. Request service from an authorized dealer or service station.
### HELPFUL HINTS-Problems and Solutions

Check the following chart before requesting service.
