Features and Design

This Multimedia Projector is designed with the most advanced technology for portability, durability, and ease of use. This projector utilizes built-in multimedia features, a palette of 16.77 million colors, and matrix liquid crystal display (LCD) technology.

Greater Mobility
Extremely compact in size and weight. It is designed to be carried and work anywhere you wish to use.

Outstanding Compatibility
This projector widely accepts various video and computer input signals including;

- **Computers**
  IBM-compatible or Macintosh computer up to 1280 x 1024 resolution.

- **6 Color Systems**
  NTSC, PAL, SECAM, NTSC 4.43, PAL-M or PAL-N color system can be connected.

- **Component Video**
  Component video signal, such as a DVD player output, high definition TV signals including 480i, 480p, 575i, 575p, 720p, 1035i or 1080i, can be connected.

- **S-Video**
  S-Video signal, such as a S-VHS VCR output signal, can be connected.

- **RGB Scart**
  RGB Scart signal can be connected.

Superb Image Quality
Supports 800 x 600 dots resolution for computer input. Resolution from a computer between SVGA (800 x 600) and SXGA (1280 x 1024) is precisely compressed into 800 x 600 dots.

Multi-Scan System
This projector has Multi-Scan System to conform to almost all computer output signals quickly. No need for troublesome manual adjustment of frequency and other settings. (**P23**)

Auto PC Adjustment
Incoming computer signals are recognized and the best adjustment is automatically set by Auto PC Adjustment. No complicated setup is necessary and projection is always precise. (**P24**)

Digital Zoom (for Computer)
Digital zoom function expands (to approx. 16 times of screen size) or compresses the image size, allowing you to focus on crucial information at a presentation. (**P29**)

Digital Keystone Adjustment
Positioning height of the projector may result in distorted image being displayed in a trapezoid shape. Keystone adjustment solves this problem by digitally altering projection to produce undistorted images. (**P20, P36**)

Interlace Progressive Conversion
High-quality picture is available with this technology which converts interlace signal into progressive signal. (**P35**)

Multi-language Menu Display
Operation menu is displayed in; English, German, French, Italian, Spanish, Portuguese, Dutch, Swedish, Russian, Chinese, Korean or Japanese. (**P36**)

User Logo
A projected image can be captured and used for the starting display of the projector. (**Capture function** P36)
You can also display the captured image in an interval during your presentation instead of blackout image. (**No Show function** P21)

Power Management
Provided to reduce power consumption and maintain the lamp life. (**P37**)

Key Lock Function
Provided to lock the operation of the projector. This function protects the projector from being tampered with by third persons. (**P38**)

**TRADEMARKS**
- Apple, Macintosh, and PowerBook are trademarks or registered trademarks of Apple Computer, Inc.
- IBM, VGA, XGA, and PS/2 are trademarks or registered trademarks of International Business Machines, Inc.
- Windows and PowerPoint are registered trademarks of Microsoft Corporation.
- Each name of corporations or products in the owner’s manual is a trademark or a registered trademark of its respective corporation.
Before operating this projector, read this manual thoroughly to operate the projector properly.

This projector provides many convenient features and functions. Operating the projector properly enables you to manage those features and maintains it in better condition for a considerable time.

Improper operation may result in not only shortening the product-life, but also malfunctions, a fire hazard, or other accidents.

If your projector seems to operate improperly, read this manual again, check operations and cable connections and try the solutions in the “Troubleshooting” section at the end of this booklet. If the problem still persists, contact the sales dealer where you purchased the projector or the service center.

### Safety Precaution

#### WARNING: TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, DO NOT EXPOSE THIS APPLIANCE TO RAIN OR MOISTURE.

- This projector produces intense light from the projection lens. Do not stare directly into the lens as possible. Eye damage could result. Be especially careful that children do not stare directly into the beam.

- Install the projector in a proper position. If not, it may result in a fire hazard.

- Take appropriate space on the top, sides and rear of the projector cabinet for allowing air circulation and cooling the projector. Minimum distance should be taken. If the projector is to be built into a compartment or similarly enclosed, the minimum distances must be maintained. Do not cover the ventilation slot on the projector. Heat build-up can reduce the service life of your projector, and can also be dangerous.

- Do not put any flammable object or spray can near the projector, hot air is exhausted from the ventilation holes.

- If the projector is not to be used for an extended time, unplug the projector from the power outlet.

READ AND KEEP THIS OWNER’S MANUAL FOR LATER USE.

#### CAUTION

Ne peut être utilisé dans une salle d’ordinateurs telle que définie dans la norme ANSI/NFPA 75 Standard for Protection of Electronic Computer/Data Processing Equipment.
Safety Instructions

All the safety and operating instructions should be read before the product is operated.

Read all of the instructions given here and retain them for later use. Unplug this projector from AC power supply before cleaning. Do not use liquid or aerosol cleaners. Use a damp cloth for cleaning.

Follow all warnings and instructions marked on the projector.

For added protection to the projector during a lightning storm, or when it is left unattended and unused for long periods of time, unplug it from the wall outlet. This will prevent damage due to lightning and power line surges.

Do not expose this unit to rain or use near water, for example, in a wet basement, near a swimming pool, etc.

Do not use attachments not recommended by the manufacturer as they may cause hazards.

Do not place this projector on an unstable cart, stand, or table. The projector may fall, causing serious injury to a child or adult, and serious damage to the projector. Use only with a cart or stand recommended by the manufacturer, or sold with the projector. Wall or shelf mounting should follow the manufacturer’s instructions, and should use a mounting kit approved by the manufacturers.

An appliance and cart combination should be moved with care. Quick stops, excessive force, and uneven surfaces may cause the appliance and cart combination to overturn.

Slots and openings in the back and bottom of the cabinet are provided for ventilation, to insure reliable operation of the equipment and to protect it from overheating.

The openings should never be covered with cloth or other materials, and the bottom opening should not be blocked by placing the projector on a bed, sofa, rug, or other similar surface. This projector should never be placed near or over a radiator or heat register.

This projector should not be placed in a built-in installation such as a book case unless proper ventilation is provided.

Never push objects of any kind into this projector through cabinet slots as they may touch dangerous voltage points or short out parts that could result in a fire or electric shock. Never spill liquid of any kind on the projector.

Do not install the projector near the ventilation duct of air-conditioning equipment.

This projector should be operated only from the type of power source indicated on the marking label. If you are not sure of the type of power supplied, consult your authorized dealer or local power company.

Do not overload wall outlets and extension cords as this can result in fire or electric shock. Do not allow anything to rest on the power cord. Do not locate this projector where the cord may be damaged by persons walking on it.

Do not attempt to service this projector yourself as opening or removing covers may expose you to dangerous voltage or other hazards. Refer all servicing to qualified service personnel.

Unplug this projector from wall outlet and refer servicing to qualified service personnel under the following conditions:

a. When the power cord or plug is damaged or frayed.
b. If liquid has been spilled into the projector.
c. If the projector has been exposed to rain or water.
d. If the projector does not operate normally by following the operating instructions. Adjust only those controls that are covered by the operating instructions as improper adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore the projector to normal operation.
e. If the projector has been dropped or the cabinet has been damaged.
f. When the projector exhibits a distinct change in performance-this indicates a need for service.

When replacement parts are required, be sure the service technician has used replacement parts specified by the manufacturer that have the same characteristics as the original part. Unauthorized substitutions may result in fire, electric shock, or injury to persons.

Upon completion of any service or repairs to this projector, ask the service technician to perform routine safety checks to determine that the projector is in safe operating condition.

Voor de klanten in Nederland

Bij dit produkt zijn batterijen geleverd. Wanneer deze leeg zijn, moet u ze niet weggooiden maar inleveren als KCA.
Air Circulation

Openings in the cabinet are provided for ventilation and to ensure reliable operation of the product and to protect it from overheating, and these openings must not be blocked or covered.

**CAUTION**

Hot air is exhausted from the exhaust vent. When using or installing the projector, the following precautions should be taken.
- Do not put any flammable objects near the vent.
- Keep the exhaust vent at least 3’(1m) away from any objects.
- Do not touch a peripheral part of the exhaust vent, especially screws and metallic part. This area will become hot while the projector is being used.
- Do not put anything on the cabinet. The materials put on the cabinet will not only get damaged but also cause fire hazard by heat.

Cooling fans are provided to cool down the projector. This projector monitors internal temperature and control the running speed of the cooling fans.

Installing the Projector in Proper Position

Install the projector properly. Improper Installation may reduce the lamp lifetime and cause a fire hazard.

![Image of projector with labels for air intake and exhaust vents]

**CAUTION**

Do not tilt the projector more than 20 degrees above and below.

Do not point the projector up to project an image.

Do not point the projector down to project an image.

Do not put the projector on either side to project an image.

Moving the Projector

When moving the projector, replace the Lens Cover and retract Adjustable Feet to prevent damage to the lens and cabinet.

When the projector is not in use for an extended period, put it into the case (carrying bag) supplied with the projector.

**CAUTION**

Carrying Bag (supplied) is intended for protection from dust and scratches on the surface of a cabinet, and it is not designed to protect an appliance from external forces. Do not transport a projector through a courier or transport services with this bag, otherwise the projector can be damaged. When handling a projector, do not drop, bump, subject it to strong forces or put other things on the cabinet.

**CAUTION IN CARRYING OR TRANSPORTING THE PROJECTOR**

- Do not drop or bump a projector, otherwise damages or malfunctions may result.
- When carrying a projector, use a suitable carrying case.
- Do not transport a projector by using a courier or transport service in an unsuitable transport case. This may cause damage to a projector. To transport a projector through a courier or transport service, consult your dealer for best way.
Federal Communication Commission Notice

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Use of shielded cable is required to comply with class B limits in Subpart B of Part 15 of FCC Rules. Do not make any changes or modifications to the equipment unless otherwise specified in the instructions. If such changes or modifications should be made, you could be required to stop operation of the equipment.

Model Number : LC-SD12
Trade Name : EIKI
Responsible party : EIKI International, Inc.
Address : 30251 Esperanza, Rancho Santa Margarita,

Telephone No. : 800-242-3454 (949-457-0200)

AC Power Cord Requirement

The AC Power Cord supplied with this projector meets the requirement for use in the country you purchased it.

AC Power Cord for the United States and Canada:

AC Power Cord used in the United States and Canada is listed by the Underwriters Laboratories (UL) and certified by the Canadian Standard Association (CSA).
AC Power Cord has a grounding-type AC line plug. This is a safety feature to be sure that the plug will fit into the power outlet. Do not try to defeat this safety feature. Should you be unable to insert the plug into the outlet, contact your electrician.

THE SOCKET-OUTLET SHOULD BE INSTALLED NEAR THE EQUIPMENT AND EASILY ACCESSIBLE.

⚠️ CAUTION
Hot air is exhausted from the exhaust vents. When using or installing the projector, the following precautions should be taken.
- Do not put any flammable objects near these vents.
- Keep front grills at least 3’(1m) away from any objects, especially heat-sensitive objects.
- Do not touch this area, especially screws and metallic part. This area will become hot while the projector is being used.

This projector detects internal temperature and will automatically adjust the running speed of the cooling fans.
A microprocessor included in the projector may occasionally malfunction and need to be reset. If necessary, press this button with a sharp tool to restart the unit. Do not use it excessively.
Parts Names and Functions

Top Controls and Indicators

1. **POWER ON-OFF button**
   - Turn the projector on or off. (☞ P17)

2. **SELECT button**
   - Execute the selected item. (☞ P18)
   - Expand / compress the image in Digital Zoom mode. (☞ P29)

3. **Point ▲▼◄► (VOLUME + / -) buttons**
   - Select an item or adjust the value in the On-Screen Menu. (☞ P18)
   - Pan the image in Digital zoom +/- mode. (☞ P29)
   - Adjust volume level. (the Point ◄► buttons) (☞ P21)

4. **MENU button**
   - Open or close the On-Screen Menu. (☞ P18)

5. **INPUT button**
   - Select the input source. (☞ P22, 30, 31)

6. **LAMP REPLACE indicator**
   - Turn yellow when the life of the projection lamp draws to an end. (☞ P42, 46)

7. **WARNING indicator**
   - Light red when the projector is in the abnormal condition. This indicator also flashes red when the internal projector temperature goes up over the operating range. (☞ P39, 46)

8. **POWER indicator**
   - Flash red until the projector gets ready to be turned on. It turns red when the projector is in the stand-by mode. It remains green while the projector is in operation. (☞ P17, 46)
To insure safe operation, please observe the following precautions:
- Do not bend, drop the remote control, or expose the Remote Control to moisture or heat.
- For cleaning, use a soft dry cloth. Do not apply benzene, thinner, splay or any chemical material.

Operating Range
Point the remote control toward the projector (Infrared Remote Receiver) when pressing any button. Maximum operating range for the remote control is about 16.4’ (5m) and 60° in front of the projector.
Parts Names and Functions

Remote Control Battery Installation

1. Remove the battery compartment lid.
   - Pull up and remove the lid.

2. Slide the batteries into the compartment.
   - Two AAA size batteries
     For correct polarity (+ and −), be sure battery terminals are in contact with pins in compartment.

3. Replace the compartment lid.

To insure safe operation, please observe the following precautions:
- Use (2) AAA, SUM-4 or LR03 type alkaline batteries.
- Replace two batteries at the same time.
- Do not use a new battery with a used battery.
- Avoid contact with water or liquid.
- Do not expose the remote control to moisture, or heat.
- Do not drop the remote control.
- If a battery has leaked on the remote control, carefully wipe case clean and install new batteries.
- Risk of an explosion if battery is replaced by an incorrect type.
- Dispose of used batteries according to the instructions.
**Positioning the Projector**

- This projector is designed to project on a flat projection surface.
- The projector can be focused from 4.3'(1.3m) to 21.3'(6.5m).
- Refer to the figure below to adjust the screen size.

\[ \text{A : B} = 9 : 1 \]

---

**Note:**
The brightness in a room has a great influence on the picture quality. It is recommended to limit ambient lighting in order to provide the best image.

---

**Adjustable Feet**

The picture tilt and the projection angle can be adjusted by rotating the adjustable feet. The projection angle can be adjusted at 8.0 degrees.

1. Lift the front of the projector and pull the feet lock latches on the both sides of the projector.
2. Release the feet lock latches to lock the adjustable feet and rotate them to adjust position and tilt.
3. To retract the adjustable feet, lift the front of the projector and pull and undo the feet lock latches. Keystone distortion of the projected image can be adjusted by the Menu Operation. (☞ P20, P36)

---

**CAUTION**

Tilt the projector within the adjustable angle not to shorten the lamp life. Proper angle should be taken.
Connecting the AC Power Cord

This projector uses nominal input voltages of 100-120 V or 200-240 V AC. This projector automatically selects the correct input voltage. It is designed to work with single-phase power systems having a grounded neutral conductor. To reduce risk of electrical shock, do not plug into any other type of power system.

Consult your authorized dealer or service station if you are not sure of the type of power supply being in use.

Connect a projector with a peripheral equipment before turning a projector on. (Refer to page 15–16 for connection.)

⚠️ CAUTION

For safety, unplug the AC Power Cord when an appliance is not used.

When this projector is connected to the outlet with the AC Power Cord, an appliance is in the Stand-by Mode and consumes a little electric power.

---

Note:

The AC Power Cord must meet requirement of the country where you use the projector.
Confirm an AC plug type with the chart below and proper AC Power Cord must be used.
If supplied AC Power Cord does not match your AC outlet, contact your sales dealer.

<table>
<thead>

</table>
Connecting to a Computer

IBM-compatible computer or Macintosh computer (VGA / SVGA / XGA / SXGA)

When connecting the cable, the power cords of both the projector and the external equipment should be disconnected from AC outlet. Turn the projector and peripheral equipment on before the computer is switched on.

Note:
—See page 51 for ordering optional parts.

Cables used for connection

Note:
- If both the S-VIDEO jack and the VIDEO jack are connected at the same time when AUTO is selected in the Input Menu, the S-VIDEO jack will override the signal from the VIDEO jack.
- See page 51 for ordering optional parts.

When connecting the cable, the power cords of both the projector and the external equipment should be disconnected from AC outlet. Turn the projector and peripheral equipment on before the computer is switched on.
Basic Operation

**Turning On the Projector**

1. Complete peripheral connections (with a computer, VCR, etc.) before turning on the projector.

2. Connect the projector’s AC Power Cord into an AC outlet. The POWER indicator flashes in a moment and then turns red.

3. Press the POWER ON-OFF button on the top control or on the remote control. The POWER indicator turns green, and the cooling fans start to operate. The starting display appears on the screen and the count-down starts.

4. After the count-down, the input source that was selected last and the Lamp mode status appear on the screen.

**Turning Off the Projector**

1. Press the POWER ON-OFF button on the top control or on the remote control, and the message "Power off?" appears on the screen.

2. Press the POWER ON-OFF button again to turn off the projector. The POWER indicator starts to flash red and continues while the cooling fans are operating. (for approx. 90 seconds)

3. When the projector is cooled down enough to be turned on again, the Power indicator turns red again. Then you can disconnect the AC power cord.

---

**Note:**

- When the Power Management function is ON, the projector detects signal interruption and automatically turns off the projection lamp. (☞ P 37)
- The projector cannot be turned on during the cooling period with the POWER indicator flashing red. You can turn it on again after the POWER indicator lights red.
- Do not use the projector for more than 24 hours continuously. Turn off the projector at least once in 24 hours and give it a rest. Continuous use may result in shortening the lamp lifetime.
- This projector detects internal temperature and automatically controls the running speed of the cooling fans.
- If the WARNING indicator flashes or lights red, see “Warning Indicator” on page 39.
How to Operate the On-Screen Menu

The projector can be adjusted or set via the On-Screen Menu. Refer to the following pages regarding each adjustment and setting procedure.

1 Press the MENU button to display the On-Screen Menu.

2 Press the Point buttons to select a Menu icon to adjust. Press the Point buttons to select an item to adjust.

3 Press the SELECT button to show the item data. Press the Point buttons to adjust the data. Refer to the following pages for respective adjustment.

Note: The selected item is not in active until the SELECT button is pressed.

Basic Operation

Remote Control

Same function as menu for the computer source.

Same function as menu for the computer source.
**Zoom Adjustment**
Move the Zoom Lever upward / downward to zoom the image.

**Focus Adjustment**
Rotate the Focus Ring to adjust the projected picture focus.

**Keystone Adjustment**
If a projected picture has keystone distortion, correct image with the Keystone adjustment.

1. Press the KEYSTONE button on the remote control or select Keystone on the Setting menu (☞ P36 ) to display the Keystone dialog box.
2. Correct keystone distortion by pressing the Point ▲▼ buttons. Press the Point▲ button to reduce the upper part of image, and Press the Point▼ button to reduce the lower part.

- Arrows are white in no correction.
- The arrow of direction being corrected turns red.
- The arrow disappears at the maximum correction.
- If you press the KEYSTONE button on the remote control once more while the keystone dialog box is being displayed, the adjustment will be canceled.

Reduce the upper width with the Point ▲ button. Reduce the lower width with the Point ▼ button.

**Picture Freeze Function**
Press the FREEZE button on the remote control to freeze the picture on-screen. To cancel the Freeze function, press the FREEZE button again or press any other button.
Basic Operation

No Show Function
Press the NO SHOW button on the remote control to black out the image. To restore to normal, press the NO SHOW button again or press any other button. When a projected image is captured and set as “User” in the Logo item in the Setting menu (☞ P36), the screen changes each time you press the NO SHOW button as follows:
black out ➔ the captured image ➔ normal ➔ …

P-Timer Function
Press the P-TIMER button on the remote control. The timer display “00 : 00” appears on the screen and the timer starts to count time (00 : 00 ~ 59 : 59).
To stop P-Timer display, press the P-TIMER button. And then, press the P-TIMER button again to cancel P-Timer function.

Sound Adjustment

Direct Operation

Volume
Press the VOLUME +/- buttons on the remote control or on the top control to adjust volume. The volume dialog box appears on the screen for a few seconds.
The VOLUME + button to increase volume, and the VOLUME – button for decreasing.

Mute
Press the MUTE button on the remote control to cut off sound. To restore sound to its previous level, press the MUTE button again or press Volume +/-.

Menu Operation

1 Press the MENU button to display the On-Screen Menu. Press the Point ▶ buttons to move the red frame pointer to Sound Menu icon.

2 Press the Point ◀ button to move the red frame pointer to the item that you want to select, and then press the SELECT button.

Volume
To increase volume, Press the Point ▶ button, and Press the Point ◀ button to decrease volume.

Mute
Press the Point ▶ buttons to mute the sound. Dialog box display is changed to “On” and sound is muted. To restore sound to its previous level, press the Point ▶ buttons again.

**Input Source Selection**

**Direct Operation**

Choose Computer by pressing the INPUT button on the top control or the COMPUTER button on the remote control. Before using these buttons, correct input source should be selected through menu operation as described below.

**Menu Operation**

1. Press the MENU button to display the On-Screen Menu. Press the Point ◀▶ buttons to move the red frame pointer to Input Menu icon.
2. Press the Point ▼ button to move the red arrow pointer to Computer and then press the SELECT button. The Source Select Menu will appear.
3. Move the pointer to the correct input source and press the SELECT button.

- **RGB**
  
  When the input source is coming from a computer through the COMPUTER IN / COMPONENT IN terminal, select RGB.

- **Component**
  
  See P31 “Input Source Selection (Component, RGB-Scart 21-pin)”.

- **RGB (Scart)**
  
  See P31 “Input Source Selection (Component, RGB-Scart 21-pin)”. 
Computer System Selection

This projector automatically tunes to various types of computers based on VGA, SVGA, XGA or SXGA with its Multi-scan system and Auto PC Adjustment. If Computer is selected as a signal source, this projector automatically detects the signal format and tunes to project a proper image without any additional setting. (Signal formats provided in this projector is shown on page 49)

Note: The projector may display one of the following messages.

**Auto**
When projector cannot recognize connected signal as PC system provided in this projector, Auto PC Adjustment function operates to adjust projector and the message “Auto” is displayed on the System Menu icon. When image is not provided properly, manual adjustment is required. (☞ P25 - 26)

-----
There is no signal input from computer. Make sure the connection of computer and a projector is set correctly. (☞ “Troubleshooting” P44)

**Mode 1**
User preset adjustment in Computer Adjustment. Adjustment data can be stored in Mode 1 - 5. (☞ P25-26)

**SVGA 1**
Computer systems provided in the projector. The projector chooses a proper system and displays it.

*Mode 1 and SVGA 1 are examples.

Selecting Computer System Manually

PC system can be also selected manually.

1. Press the MENU button to display the On-Screen Menu. Press the Point ➩ buttons to move the red frame pointer to PC System Menu icon.

2. Press the Point ▼ button to move the red arrow pointer to the system that you want to set, and then press the SELECT button.

---

PC SYSTEM MENU

System Menu iconDisplays system being selected.

System Menu iconDisplays system being selected.

Custom Mode (1–5) set in PC Adjust Menu. (☞ P25-26)
Auto PC Adjustment

Auto PC Adjustment function is provided to automatically conform Fine sync, Total dots and Picture Position to your computer. This function can be operated as follows.

1. Press the MENU button to display the On-Screen Menu. Press the Point ◀▶ buttons to move the red frame pointer to the PC Adjust Menu icon.

2. Press the Point ▼ button to move the red frame pointer to the Auto PC Adj. icon and then press the SELECT button twice. This Auto PC Adjustment can be also executed by pressing the Auto PC button on the remote control.

To store adjustment parameters:
Adjustment parameters from Auto PC Adjustment can be memorized in this projector. Once parameters are memorized, the setting can be done just by selecting Mode in PC System Menu (☞ P23). Refer to "Store" of Manual PC Adjustment section (☞ P26).

Note:
- Fine sync, Total dots and Picture Position of some computers can not be fully adjusted with this Auto PC Adjustment function. When the image is not provided properly through this function, manual adjustments are required. (☞ P25, 26)
- Auto PC Adjustment function cannot be operated when 480p, 575p, 480i, 575i, 720p (HDTV), 1035i (HDTV) or 1080i (HDTV) is selected on PC SYSTEM Menu. (☞ P23).
Manual PC Adjustment

Some computers employ special signal formats which may not be tuned by Multi-Scan system of this projector. In this case, the projector cannot reproduce a proper image and the image may be recognized as a flickering picture, a non-synchronized picture, a non-centered picture or a skewed picture.

The Manual PC Adjustment function allows you to precisely adjust several parameters to match those special signal formats. You can store those adjusted parameters in the 5 independent memory areas, enabling you to call up whenever you need.

1 Press the MENU button to display the On-Screen Menu. Press the Point buttons to move the red frame pointer to the PC Adjust Menu icon.

2 Press the Point button to move the red frame pointer to the item that you want to adjust and then press the SELECT button to display the adjustment dialog box. Press the Point buttons to adjust the value.

- **Fine sync**
  Adjust an image as necessary to eliminate flicker from the display. Press the Point buttons to adjust the value. (From 0 to 31.)

- **Total dots**
  Adjust the number of total dots in one horizontal period. Press the Point buttons and adjust number to match your PC image.

- **Horizontal**
  Adjust horizontal picture position. Press the Point buttons to adjust the position.

- **Vertical**
  Adjust vertical picture position. Press the Point buttons to adjust the position.

- **Current mode**
  Press the SELECT button to show the information of computer selected.

- **Clamp**
  Adjust clamp level. When the image has dark bars, try this adjustment.

PC ADJUST MENU

- **Auto PC Adj.**
  Move the red frame pointer to the item and press the SELECT button.

- **Fine sync**
  Shows status (Stored / Free) of the selected Mode. Selected Mode
  Press the SELECT button at this icon to adjust “Clamp,” “Display area (H/V)” or set “Full screen.”

- **Total dots**
  Press the Point buttons to adjust the value.

- **Horizontal**
  Press the SELECT button at this icon to adjust the Current Mode icon to show the information of the computer connected.
**Display area**
Select area displayed with this projector. Select the resolution at the Display area dialog box.

**Display area H**
Adjust the horizontal area displayed with this projector. Press the Point buttons to decrease/increase value to match the resolution of image. Then press the SELECT button.

**Display area V**
Adjust the vertical area displayed with this projector. Press the Point buttons to decrease/ increase the value to match the resolution of the image. Then press the SELECT button.

**Full screen**
Press the Point buttons to switch Full screen function to “On” or “Off.” Set “On” to resize the image with 4 x 3 aspect ratio to fit the screen.

**Note:**
Display area, Display area (H/V) and Full screen cannot be adjusted when 480p, 575p, 480i, 575i, 720i(HDTV), 1035i(HDTV) or 1080i(HDTV) is selected on PC SYSTEM Menu. (☞ P23).

**Reset**
Reset all adjust parameters on adjustment dialog box to previous figures.

**Mode free**
To clear adjustment parameters previously set, move the red frame pointer to the Mode free icon and then the SELECT button. Move the red arrow pointer to the Mode that you want to clear and then press the SELECT button.

**Store**
To store adjustment parameters, move the red frame pointer to the Store icon and then press the SELECT button. Move the red arrow pointer to any of Mode 1 to 5 that you want to store to and then press the SELECT button.

**Quit**
Close PC Adjust Menu.

**Vacant Mode**
Shows values of “Total dots,” “Horizontal,” “Vertical,” “Display area H,” and “Display area V.”
**Image Level Selection**

**Direct Operation**
Select image level among Standard, Real, Image 1, Image 2, Image 3 and Image 4 by pressing the IMAGE button on the remote control.

**Standard**
Normal picture adjustment preset on this projector.

**Real**
Picture adjustment improved in reproduction of halftones. This adjustment is suitable for providing better image in brighter place.

**Image 1–4**
User preset picture adjustment in Image Adjust Menu (☞ P28).

**Menu Operation**

1. Press the MENU button to display the On-Screen Menu. Press the Point  buttons to move the red frame pointer to the Image Select Menu icon.

2. Press the Point  button to move the red frame pointer to the level that you want to set and then press the SELECT button.

**Standard**
Normal picture adjustment preset on this projector.

**Real**
Picture adjustment improved in reproduction of halftones. This adjustment is suitable for providing better image in brighter place.

**Image 1–4**
User preset picture adjustment in Image Adjust Menu (☞ P28).
**Image Level Adjustment**

1. Press the MENU button to display the On-Screen Menu. Press the Point ▼ buttons to move the red frame pointer to the Image Adjust Menu icon.

2. Press the Point ▼ button to move the red frame pointer to the item that you want to adjust, and then press the SELECT button. The level of each item is displayed. Adjust each level by pressing the Point ▼ buttons.

- **Contrast**
  - Press the Point ▼ buttons to adjust the image contrast. (From 0 to 63.)

- **Brightness**
  - Press the Point ▼ buttons to adjust the image brightness. (From 0 to 63.)

- **Color temp.**
  - Press the Point ▼ buttons to select the Color temp. level you want to select. (XLow, Low, Mid, or High)

- **White balance (Red)**
  - Press the Point ▼ buttons to adjust the red tone. (From 0 to 63.)

- **White balance (Green)**
  - Press the Point ▼ buttons to adjust the green tone. (From 0 to 63.)

- **White balance (Blue)**
  - Press the Point ▼ buttons to adjust the blue tone. (From 0 to 63.)

- **Gamma**
  - Press the Point ▼ buttons to obtain better balance of contrast. (From 0 to 15.)

- **Auto grayscale**
  - When this function is “On”, it automatically enhances contrast of bright and dark part of the image.

- **Reset**
  - Reset all adjustments to previous figures.

- **Store**
  - To store manually preset image, move the red frame pointer to the Store icon and press the SELECT button to display the Image Level Menu. Move the red frame pointer to the Image 1 to 4 where you want to set and then press the SELECT button. A confirmation box will appear and select “Yes”.

- **Quit**
  - Close the Image Adjust Menu.
**Screen Size Adjustment**

This projector has a picture screen resize function, which enables you to customize the image size.

1. Press the MENU button to display the On-Screen Menu. Press the Point ▶ buttons to move the red frame pointer to the Screen Menu icon.

2. Press the Point ▼ button to move the red frame pointer to the function that you want to select. Then press the SELECT button.

![Screen Menu icon](image)

**Normal**

Provide an image to fit the screen size.

**True**

Provide image in its original size. When the original image size is larger than screen size (800 x 600), this projector enters “Digital zoom +” mode automatically.

**Wide**

Provide image to fit wide video aspect ratio (16 : 9) by expanding image width uniformly. This function can be used for providing a squeezed video signal at 16 : 9.

**Digital zoom +**

When Digital zoom + is selected, the On-Screen Menu disappears and the message “D. Zoom +” is displayed. Press the SELECT button to expand image size. And press the Point ▲▼◀► buttons to pan the image. The panning function can work only when the image is larger than screen size.

A projected image can be also expanded by pressing the D.ZOOM ▲ button on the remote control.

**Digital zoom –**

When Digital zoom – is selected, the On-Screen Menu disappears and the message “D. Zoom –” is displayed. Press the SELECT button to compress image size.

A projected image can be also compressed by pressing the D.ZOOM ▼ button on the remote control.

To cancel Digital zoom +/- mode, press any button except the D.ZOOM ▲▼ buttons, the SELECT and the Point buttons.

---

**Note:**

- This Screen Menu cannot be operated when 720p(HDTV), 1035i(HDTV) or 1080i(HDTV) is selected on PC System Menu. (☞ P23).
- True and Digital zoom +/- cannot be selected when 480i, 575i, 480p, 575p is selected on PC System Menu. (☞ P23).
- This projector cannot display any resolution higher than 1280 X 1024. If your computer’s screen resolution is higher than 1280 X 1024, reset the resolution to the lower before connecting projector.
- The image data in other than SVGA (800 x 600) is modified to fit the screen size in initial mode.
- The panning function may not operate properly if the computer system prepared on PC Adjust Menu is used.
**Input Source Selection (Video, S-Video)**

**Direct Operation**

Choose Video by pressing the INPUT button on the top control or the VIDEO button on the remote control. Before using these buttons, correct input source should be selected through menu operation as described below.

**Menu Operation**

1. Press the MENU button to display the On-Screen Menu. Press the Point ▶️ buttons to move the red frame pointer to the Input Menu icon.

2. Press the Point ▼️ button to move the red arrow pointer to Video and then press the SELECT button. Source Select Menu will appear.

3. Move the pointer to the source that you want to select and then press the SELECT button.

**Auto**

When selecting Auto, the projector automatically detects incoming video signal, and adjusts itself to optimize its performance. The projector selects connection in the following order:

1st S-VIDEO  
2nd VIDEO  

If both the S-VIDEO jack and the VIDEO jack are connected at the same time when Auto is selected in the Input Menu, the S-VIDEO jack will override the signal from the VIDEO jack.

**Video**

When video input signal is connected to VIDEO jack, select Video.

**S-Video**

When video input signal is connected to S-VIDEO jack, select S-Video.
Input Source Selection (Component, RGB Scart 21-pin)

Direct Operation

Choose Computer by pressing the INPUT button on the top control or the COMPUTER button on the remote control. Before using these buttons, correct input source should be selected through menu operation as described below.

Menu Operation

1. Press the MENU button to display the On-Screen Menu. Press the Point ▶ buttons to move the red frame pointer to the Input Menu icon.

2. Press the Point ▼ button to move the red arrow pointer to Computer and then press the SELECT button. The Source Select Menu will appear.

3. Move the pointer to the source that you want to select and then press the SELECT button.

**Component**
When the input source is coming from video equipment connected to the COMPUTER IN /COMPONENT IN terminal with a Component-VGA Cable, select Component.

**RGB (Scart)**
When the input source is coming from video equipment connected to the COMPUTER IN/COMPONENT IN terminal with a Scart-VGA Cable, select RGB (Scart).

*Note:* Component-VGA Cable and Scart-VGA Cable are optionally supplied. See page 51 for order.
**Video System Selection**

1. Press the MENU button to display the On-Screen Menu. Press the Point buttons to move the red frame pointer to the AV System Menu icon.

2. Press the Point button to move the red arrow pointer to the system that you want to select and then press the SELECT button.

**Video Jack or S-Video Jack**

*Auto*

The projector automatically detects incoming Video system, and adjusts itself to optimize its performance. When Video System is PAL-M or PAL-N, select the system manually.

*PAL / SECAM / NTSC / NTSC4.43 / PAL-M / PAL-N*

If projector cannot reproduce proper video image, it is necessary to select a specific broadcast signal format among PAL, SECAM, NTSC, NTSC4.43, PAL-M, and PAL-N.

**COMPONENT VIDEO SIGNAL FORMAT**

If the projector cannot reproduce proper video image, it is necessary to select a specific component video signal format among 480i, 575i, 480p, 575p, 720p, 1035i and 1080i.
**Image Level Selection**

**Direct Operation**

Select image level among Standard, Cinema, Image 1, Image 2, Image 3 and Image 4 by pressing the IMAGE button on the remote control.

- **Standard**
  Normal picture adjustment preset on this projector.

- **Cinema**
  Picture level adjusted for the picture with fine tone.

- **Image 1~4**
  User preset picture adjustment in Image Adjust Menu (☞ P34-35).

**Menu Operation**

1. Press the MENU button to display the On-Screen Menu. Press the Point buttons to move the red frame pointer to the Image Select Menu icon.

2. Press the Point button to move the red frame pointer to the level that you want to set and then press the SELECT button.

- **Standard**
  Normal picture adjustment preset on this projector.

- **Cinema**
  Picture level adjusted for the picture with fine tone.

- **Image 1~4**
  User preset picture adjustment in Image Adjust Menu (☞ P34-35).
**Image Level Adjustment**

1. **Press the MENU button to display the On-Screen Menu.** Press the Point \( 
\uparrow \downarrow \) buttons to move the red frame pointer to the Image Adjust Menu icon.

2. **Press the Point \( \downarrow \) button to move the red frame pointer to the item you want to adjust and then press the SELECT button.** The level of each item is displayed. Adjust each level by pressing the Point \( 
\uparrow \downarrow \) buttons.

- **Contrast**
  Press the Point \( 
\uparrow \downarrow \) buttons to adjust the image contrast. (From 0 to 63.)

- **Brightness**
  Press the Point \( 
\uparrow \downarrow \) buttons to adjust the image brightness. (From 0 to 63.)

- **Color**
  Press the Point \( 
\uparrow \downarrow \) buttons to adjust color intensity. (From 0 to 63.)

- **Tint**
  Press the Point \( 
\uparrow \downarrow \) buttons to obtain proper color. (From 0 to 63.)

- **Color temp.**
  Press the Point \( 
\uparrow \downarrow \) buttons to select the Color temp. level that you want to select. (XLow, Low, Mid, or High)

- **White balance (Red)**
  Press the Point \( 
\uparrow \downarrow \) buttons to adjust the red tone. (From 0 to 63.)

- **White balance (Green)**
  Press the Point \( 
\uparrow \downarrow \) buttons to adjust the green tone. (From 0 to 63.)

- **White balance (Blue)**
  Press the Point \( 
\uparrow \downarrow \) buttons to adjust the blue tone. (From 0 to 63.)

- **Sharpness**
  Press the Point \( 
\uparrow \downarrow \) buttons to adjust the image sharpness. (From 0 to 15.)

- **Gamma**
  Press the Point \( 
\uparrow \downarrow \) buttons to obtain better balance of contrast. (From 0 to 15.)

**Note:**
- Tint cannot be selected when the video system is PAL, SECAM, PAL-M or PAL-N.
**Auto grayscale**
When this function is "On", it automatically enhances contrast of bright and dark part of image.

**progressive**
Interlace video signal can be displayed in a progressive picture.
- Off ···· Not activated.
- L1 ···· Select “L1” for an active picture.
- L2 ···· Select “L2” for a still picture.

*Note:* The Progressive cannot be selected when 1080i, 1035i, 720p, 575p, or 480p is selected.

**Reset**
Reset all adjustments to previous figures.

**Store**
To store the adjusted data, move the red frame pointer to the Store icon and press the SELECT button to display the Image Level Menu. Move the red frame pointer to the Image Level 1 to 4 and then press the SELECT button. A confirmation box will appear and select [Yes].

**Quit**
Close the Image Menu.

---

**Screen Size Adjustment**
This projector has a picture screen resize function, which enables you to customize the image size.

1. Press the MENU button to display the On-Screen Menu. Press the Point buttons to move the red frame pointer to the Screen Menu icon.

2. Press the Point button and move the red frame pointer to the function that you want to select and then press the SELECT button.

**Normal**
Provides image at a normal video aspect ratio of 4 : 3.

**Wide**
Provides image at a wide screen ratio of 16 : 9.

*Note:* The Screen Menu cannot be operated when 720p, 1035i, or 1080i is selected on the AV System Menu (☞ P32).
Setting Menu

1. Press the MENU button to display the On-Screen Menu. Press the Point ▲▼ buttons to move the red frame pointer to the SETTING icon.

2. Press the Point ▼ button to move the red frame pointer to the item that you want to set. Then press the SELECT button to display the Setting dialog box.

Language

Language used in the On-Screen Menu is selectable from among English, German, French, Italian, Spanish, Portuguese, Dutch, Swedish, Russian, Chinese, Korean and Japanese.

Keystone

This function corrects distortion of a projected image. Select either Store or Reset with the Point ▲▼ buttons, and then press the Select button. The keystone dialog box appears. Adjust keystone with the Point ▲▼ buttons.

Store . . . . . stores the keystone adjustment even if the AC power cord is disconnected.

Reset . . . . . resets the keystone adjustment when the AC power cord is disconnected.

Blue back

When this function is “On,” the projector will project a blue image on the screen if any input signal is not detected.

Display

This function decides whether to display On-Screen Displays. 

On . . . . . . show all the On-Screen Displays.

Off . . . . . . set On-Screen Displays disappeared except;

• On-Screen Menu
• “Power off?” message (☞ P17)
• P-TIMER (☞ P21)
• “No signal” message (☞ P37)
• “Wait a moment!” message

Logo

This function decides what to be displayed on the starting display. 

User . . . . . . the image you captured

Default . . . . . the factory set logo

Off . . . . . . count-down only

Capture

This function is used to capture the image being projected and use it for a start-up display. After capturing the projected image, go to the Logo function (above) and set it as “User”. Then the captured image will be displayed when turning on the projector next time.

To capture the image, select “Yes”. To cancel the Capture function, select “No”. Before capturing an image, select Standard in the Image Select Menu to capture a proper image. (☞ P27, P33)

A signal from a computer can be captured up to XGA (1024 x 768).

A signal from video equipment can be captured except for 720p, 1035i, and 1080i. When capturing the image that has been adjusted by Keystone function, the adjusted data is automatically reset and the projector captures an image without keystone adjustment.
For reducing power consumption as well as maintaining the lamp life, Power management function turns off the projection lamp when the input signal is interrupted and no button is pressed for 30 seconds or more.

If the input signal is interrupted and no button is pressed for 30 seconds or more, the timer display with the message "No signal" appears on the screen. The count-down of the set time will get started. The count-down time can be set between 1 and 30 minutes.

When the count-down time has been elapsed, the lamp will be turned off to cool itself down. The POWER indicator is flashing red during this cooling-off period. The next operation depends on the setting as follows:

- **Ready** . . . . . When the lamp has been fully cooled down, the POWER indicator changes to green flashing. In this condition, the projection lamp will be turned on if the input signal is reconnected or any button on the top control or the remote control is pressed.
- **Shutdown** . . . When the lamp has been fully cooled down, the power will be turned off.
- **Off** . . . . . . . Power management function is canceled.

**Ceiling**

When this function is “On”, picture is top / bottom and left / right reversed. This function is used to project the image from a ceiling mounted projector.

**Rear**

When this function is “On”, picture is left / right reversed. This function is used to project the image to a rear projection screen.

**Power management**

This function allows you to change brightness of the screen.

- **Normal mode** . . . . . . . normal brightness
- **Auto mode** . . . . . . . the controlled brightness according to the input signal
- **Eco mode** . . . . . . . lowers brightness, reduces the lamp power consumption, and extends the lamp life.
Remote control

This projector has two different remote control codes; the factory-set normal code (Code 1) and the secondary code (Code 2). This switching function prevents remote control interference when operating several projectors or video equipment at the same time. When operating the projector in “Code 2,” both the projector and remote control must be switched to “Code 2.”

To change the code of the projector:
Set the remote control in the SETTING MENU to “Code 2.”

To change the code of the remote control:
Press and hold both the MENU and the IMAGE buttons on the remote control together for 10 seconds or more. After changing the code, make sure the remote control operates properly. To return to the normal code (Code 1), operate both the projector and remote control in the ways above again.

Note:
- When battery of the remote control is replaced, the remote control code automatically returns to the normal code (Code 1).

USB

This projector is equipped with the USB port for interactive operation between the projector and computer. Select either of the followings as needed.

- When using the PAGE ▲▼ buttons on the remote control. (☞P9)
- When controlling the projector with a computer.
  This item is provided for future use. Not available now.

Key lock

This function locks operation of the top control and the remote control. It is useful to prevent operation by a third person.

- Not locked.
- Lock the operation of the top control.
  To unlock, use the remote control.
- Lock the operation of the remote control.
  To unlock, use the top control.

If the top control accidentally becomes locked and you do not have the remote control nearby, disconnect the AC power cord to turn off the power, and then while pressing the SELECT button, reconnect the AC power cord. This will unlock the top control operation.

Lamp counter reset

This function is used to reset the lamp replace counter. When replacing the projection lamp, reset the lamp replace counter by using this function. Refer to page 43 for operation.

Factory default

This function returns all setting values except for the lamp counter to the factory default settings.
**Warning Indicator**

The WARNING indicator shows the state of the function which protects the projector. Check the state of the WARNING indicator and the POWER indicator to take proper maintenance.

**The projector is shut down and the WARNING indicator is flashing red**

When the temperature inside the projector exceeds the normal temperature, the projector is automatically shut down to protect the inside of the projector. The POWER indicator is flashing and the projector is being cooled down. When the temperature inside the projector returns to normal, the POWER indicator lights red and the projector can be turned on.

*Note:*
After the temperature inside the projector returns to normal, the WARNING indicator still continues to flash. When the projector is turned on again, the WARNING indicator stops flashing.

**Then check the items below.**

- Did you provide appropriate space for the projector to be ventilated? Check the installing condition to see if ventilation slots are not blocked.
- Is the projector not installed near the ventilation duct of air-conditioning equipment which may be hot? Install the projector away from the ventilation duct of air-conditioning equipment.
- Are the air filters clean? Clean the air filters periodically.

**The projector is shut down and the WARNING indicator lights red**

When the projector detects an abnormal condition, it is automatically shut down to protect the inside and the WARNING indicator lights red. In this case, disconnect the AC power cord and reconnect it, and then turn the projector on once again for check. If the projector is still turned off and the WARNING indicator lights red, disconnect the AC power cord and contact the service station for check and repair.

**CAUTION**

**DO NOT LEAVE THE PROJECTOR WITH THE AC POWER CORD CONNECTED UNDER THE ABNORMAL CONDITION. IT MAY RESULT IN FIRE OR ELECTRIC SHOCK.**
Air Filter

Removable air filters prevent dust from accumulating on the surface of optical elements inside the projector. Should air filters become clogged with dust particles, it will reduce the cooling fans’ effectiveness and may result in internal heat buildup and adversely affect the life of the projector. Clean air filters following the steps below:

1. Turn off the projector, and disconnect AC power cord from the AC outlet.
2. Turn the projector upside down and remove air filters by pulling the latches upward.
3. Clean the air filters with a brush or wash out dust and particles.
4. Replace each air filter properly. Make sure that the air filters are fully inserted.

**CAUTION**
Do not operate the projector with the air filters removed. Dust may accumulate on optical elements inside the projector degrading picture quality. Do not put small parts into Air Intake Vents. It may result in malfunction of the projector.

**RECOMMENDATION**
We recommend avoiding dusty/smoky environments when operating a projector. Usage in these environments may cause poor image quality.

When using under dusty or smoky conditions, dust may accumulate on or optical elements inside the projector. This condition may degrade the quality of a projected image.
When the above symptoms are noticed, contact your authorized dealer or service station for proper cleaning.

Attaching the Lens Cover

1. Thread the string through the hole on the lens cover and then tie a knot in the string to secure it in place.
2. Thread the other end of the string through the hole at the bottom of the projector. Then pass the lens cover through the resulting loop of the string. Tie a knot in the string to secure it in place.
Cleaning the Projection Lens

Follow these steps to clean the projection lens:

1. Disconnect the AC power cord before cleaning.

2. Apply a non-abrasive camera lens cleaner to a soft, dry cleaning cloth. Avoid using an excessive amount of cleaner. Abrasive cleaners, solvents or other harsh chemicals might scratch a surface.

3. Lightly wipe Projection Lens with a cleaning cloth.

4. When the projector is not in use, replace the Lens Cover.

Cleaning the Projector Cabinet

Follow these steps to clean the projector cabinet:

1. Disconnect the AC power cord before cleaning.

2. Lightly wipe the projector body with a soft, dry cleaning cloth. When it is heavily soiled, use a small amount of mild detergent and finish with a soft, dry cleaning cloth. Avoid using an excessive amount of cleaner. Abrasive cleaners, solvents, or other harsh chemicals might scratch the surface.

3. When the projector is not in use, put the projector in an appropriate carrying case to protect it from being exposed to the dust and being scratched.
**Lamp Replacement**

When the life of the projection lamp draws to an end, LAMP REPLACE indicator lights yellow. If this indicator lights yellow, replace the projection lamp with a new one promptly.

![TOP CONTROL]

This indicator lights yellow when the life of the projection lamp draws to an end.

---

**CAUTION**

Allow the projector to cool, for at least 45 minutes before you open the Lamp Cover. The inside of the projector can become very hot.

For continued safety, replace with the lamp assembly of the same type. Do not drop the lamp assembly or touch the glass bulb. The glass can shatter and may cause injury.

---

Follow these steps to replace the lamp assembly.

1. Turn off the projector and disconnect the AC plug. Allow the projector to cool at least for 45 minutes.
2. To remove the lamp cover, remove the screw with a screwdriver.
3. Remove two screws with a screwdriver and pull out the lamp assembly by grasping the handle.
4. Replace the lamp assembly with a new one and tighten the two screws back into the position. Make sure that the lamp assembly is set properly. Replace the lamp cover and tighten the screw.
5. Connect the AC Power Cord to the projector and turn on the projector.
6. **Reset the Lamp Replace Counter.** Refer to “Lamp Replace Counter” on the next page.

**Note:** Do not reset the Lamp Replace Counter when the projection lamp has not been replaced.

---

**ORDER REPLACEMENT LAMP**

Replacement Lamp can be ordered through your dealer. When ordering a projection lamp, give the following information to the dealer.

- **Model No. of your projector**: LC-SD12
- **Replacement Lamp Type No.**: POA-LMP57
  
  (Service Parts No. 610 308 3117)
Lamp Replace Counter

Be sure to reset the lamp replace counter after Lamp Assembly is replaced. When the lamp replace counter is reset, the LAMP REPLACE Indicator stops lighting.

1 Turn projector on, press the MENU button to display the On-Screen Menu. Press the Point buttons to move the red frame pointer to the Setting Menu icon.

2 Press the Point button to move the red frame pointer to “Lamp counter reset” and then press the SELECT button. The message “Lamp replace counter reset?” is displayed. Move the pointer to [Yes] and then press the SELECT button.

3 Another confirmation dialog box appears and select [Yes] to reset the lamp replace counter.

Note:
~Do not reset the Lamp Replace Counter until after the projection lamp is replaced.

LAMP HANDLING PRECAUTIONS

This projector uses a high-pressure lamp which must be handled carefully and properly. Improper handling may result in an accidents, injury, or create a fire hazard.

- Lamp lifetime may differ from lamp to lamp and according to the environment of use. There is no guarantee of the same lifetime for each lamp. Some lamps may fail or terminate their lifetime in a shorter period of time than other similar lamps.

- If the projector indicates that the lamp should be replaced, i.e., if the LAMP REPLACE INDICATOR lights up, replace the lamp with a new one IMMEDIATELY after the projector has cooled down. ( Follow carefully the instructions in the LAMP REPLACEMENT section of this manual. ) Continuous use of the lamp with the LAMP REPLACE INDICATOR lighted may increase the risk of lamp explosion.

- A Lamp may explode as a result of vibration, shock or degradation as a result of hours of use as its lifetime draws to an end. Risk of explosion may differ according to the environment or conditions in which the projector and lamp are being used.

IF A LAMP EXPLODES, THE FOLLOWING SAFETY PRECAUTIONS SHOULD BE TAKEN.

If a lamp explodes, disconnect the projector’s AC plug from the AC outlet immediately. Contact an authorized service station for a checkup of the unit and replacement of the lamp. Additionally, check carefully to ensure that there are no broken shards or pieces of glass around the projector or coming out from the cooling air circulation holes. Any broken shards found should be cleaned up carefully. No one should check the inside of the projector except those who are authorized trained technicians and who are familiar with projector service. Inappropriate attempts to service the unit by anyone, especially those who are not appropriately trained to do so, may result in an accident or injury caused by pieces of broken glass.
Troubleshooting

Before calling your dealer or service center for assistance, check the matters below once again.

- Make sure you have properly connected the projector to peripheral equipment as described in the section “Installation” on P15-16.
- Make sure all equipment is connected to AC outlet and turned on the power.
- When you operate the projector with a computer, and it does not project an image, restart the computer.

WARNING:
High voltages are used to operate this projector. Do not attempt to open the cabinet.

If the problem still persists after following all operating instructions, contact the sales dealer where you purchased the projector or the service center. Give the model number and explain the difficulty. We will advise you how to obtain service.

Problem:
Remote Control does not work.

Try These Solutions
- Check the battery.
- Make sure nothing is between the infrared remote receiver and remote control.
- Make sure you are not too far from the projector when using the remote control.
  Maximum operating range is 16.4’ (5m).
- Make sure the code of the remote control is set to conform to the projector.
  (☞ P38)
- Unlock Key lock for the remote control in the Setting Menu. (☞ P38)

The CE Mark is a Directive conformity mark of the European Community (EC).

This symbol on the nameplate means the product is Listed by Underwriters Laboratories Inc. It is designed and manufactured to meet rigid U.L. safety standards against risk of fire, casualty and electrical hazards.
# Indicators and Projector Condition

Check the indicators for projector condition.
