**Network Supported**
- Wireless LAN
  - IEEE802.11b/g/n
- Wired LAN
  - 100-Base-TX/10-Base-T

**Memory Viewer**
- USB Memory Viewer

* Refer to the owner's manuals below for details about network and memory viewer function.
  - Network Set-up and Operation

EIKI
Multimedia Projector

MODEL LC-WB42N

Owner's Manual
Features and Design

This Multimedia Projector is designed with the most advanced technology for portability, durability, and ease of use. This projector utilizes built-in multimedia features, a palette of 16.77 million colors, and matrix liquid crystal display (LCD) technology.

♦ Compact Design
This projector is designed compact in size and weight. It is easy to carry and installed anywhere you wish to use.

♦ Capable of 360-degree Projection
This projector is capable of 360-degree projection. *Some restriction required, see page 7.

♦ Simple Computer System Setting
The projector has the Multi-scan system to conform to almost all computer output signals quickly (p.32). Up to WUXGA resolution can be accepted.

♦ Power Management
The Power management function reduces power consumption and maintains the lamp life (p.56).

♦ Quick Termination
The AC power cord can be unplugged immediately after turning off the projector without waiting for the termination of the cooling fan rotation (p.23).

♦ Logo Function
The Logo function allows you to customize the screen logo (pp.50-52). You can capture an image for the screen logo and use it for the starting-up display or between presentations.

♦ Multilanguage Menu Display
Operation menu is available in 17 languages; English, German, French, Italian, Spanish, Portuguese, Dutch, Swedish, Finnish, Polish, Hungarian, Romanian, Russian, Chinese, Korean, Japanese and Thai (p.47).

♦ Security Function
The Security function helps you to ensure security of the projector. With the Key lock function, you can lock the operation on the top control or the remote control (p.59). PIN code lock function prevents unauthorized use of the projector (pp.22, 59-60).

♦ Helpful Maintenance Functions
Lamp and filter maintenance functions provide for better and proper maintenance of the projector.

♦ LAN Network Function
This projector is loaded with the Wired and Wireless LAN network functions.

Note:
• The On-Screen Menu and figures in this manual may differ slightly from the product.
• The contents of this manual are subject to change without notice.

- You can project an image on a computer as well as operate and manage the projector via network.
- This projector corresponds to "Connect to a Network Projector" function that is the standard equipment for Windows Vista.
- The projector has the movie files transmission function that can play movie files transmitted from a computer to the projector. This function enables to playback movies very smoothly. This projector also corresponds to IEEE802.11n(Draft2.0).
- This projector is capable of the wireless LAN simple setting function by attaching the supplied USB memory to a computer.

For details, refer to the owner’s manual of "Network Set-up and Operation."

♦ Memory Viewer Function
Insert the dedicated USB memory into the projector to project images or movie files stored within. You do not have to carry computers or other equipment for a presentation.

For details, refer to the owner’s manual of "Memory viewer function".

♦ Auto setup Function
This function enables Input search, Auto Keystone correction and Auto PC adjustment by simple pressing the AUTO SETUP button (pp. 26,48).

♦ Colorboard Function
At the time of simple projection on the colored wall, you can get the close color image to the color image projected on a white screen by selecting the similar color to the wall color from the preset four colors.

♦ Closed Caption
Closed Caption is a function that displays the audio portion of a TV program as text on the screen. You can turn on the feature and switch the channels (p.57).

♦ Picture in Picture Function
This projector is capable of projecting two images simultaneously by using either built-in P in P mode or P by P mode (p.55).

**Trademarks**

Each name of corporations or products in this book is either a registered trademark or a trademark of its respective corporation.
Before installing and operating this projector, read this manual thoroughly. This projector provides many convenient features and functions. Operating the projector properly enables you to manage those features and maintains it in good condition for many years to come. Improper operation may result in not only shortening the product-life, but also malfunctions, fire hazard, or other accidents.

If your projector seems to operate improperly, read this manual again, check operations and cable connections and try the solutions in the “Troubleshooting” section on pages 69-72 of this manual. If the problem still persists, contact the dealer where you purchased the projector or the service center.

**CAUTION**

**RISK OF ELECTRIC SHOCK**

**DO NOT OPEN**

**CAUTION:** TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE COVER (OR BACK). NO USER-SERVICEABLE PARTS INSIDE EXCEPT LAMP REPLACEMENT. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.

**WARNING:**
- THIS APPLIANCE MUST BE EARTHED.
- TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, DO NOT EXPOSE THIS APPLIANCE TO RAIN OR MOISTURE.

- This projector produces intense light from the projection lens. Do not stare directly into the lens, otherwise eye damage could result. Be especially careful that children do not stare directly into the beam.
- Install the projector in a proper position. Otherwise it may result in fire hazard.
- Allowing the proper amount of space on the top, sides, and rear of the projector cabinet is critical for proper air circulation and cooling of the unit. The dimension shown here indicate the minimum space required. If the projector is to be built into a compartment or similarly enclosed, these minimum distances must be maintained.
- Do not cover the ventilation slot on the projector. Heat build-up can reduce the service life of your projector, and can also be dangerous.
- If the projector is unused for an extended time, unplug the projector from the power outlet.
- Do not project the same image for a long time. The afterimage may remain on the LCD panels by the characteristic of panel.

**CAUTION**

**DO NOT SET THE PROJECTOR IN GREASY, WET, OR SMOKY CONDITIONS SUCH AS IN A KITCHEN TO PREVENT A BREAKDOWN OR A DISASTER. IF THE PROJECTOR COMES IN CONTACT WITH OIL OR CHEMICALS, IT MAY BECOME DETERIORATED.**

**WARNING:**
- THIS APPARATUS MUST BE EARTHED.
- TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, DO NOT EXPOSE THIS APPLIANCE TO RAIN OR MOISTURE.

**WARNING:**

**NE PAS UTILISER DANS UNE SALLE D’ORDINATEURS TELLE QUE DÉFINIE DANS LA NORME ANSI/NFPA 75 STANDARD FOR PROTECTION OF ELECTRONIC COMPUTER/DATA PROCESSING EQUIPMENT.**

READ AND KEEP THIS OWNER’S MANUAL FOR LATER USE.
Safety Instructions

All the safety and operating instructions should be read before the product is operated.

Read all of the instructions given here and retain them for later use. Unplug this projector from AC power supply before cleaning. Do not use liquid or aerosol cleaners. Use a damp cloth for cleaning.

Follow all warnings and instructions marked on the projector.

For added protection to the projector during a lightning storm, or when it is left unattended and unused for long periods of time, unplug it from the wall outlet. This will prevent damage due to lightning and power line surges.

Do not expose this unit to rain or use near water... for example, in a wet basement, near a swimming pool, etc...

Do not use attachments not recommended by the manufacturer as they may cause hazards.

Do not place this projector on an unstable cart, stand, or table. The projector may fall, causing serious injury to a child or adult, and serious damage to the projector. Use only with a cart or stand recommended by the manufacturer, or sold with the projector. Wall or shelf mounting should follow the manufacturer’s instructions, and should use a mounting kit approved by the manufacturers.

An appliance and cart combination should be moved with care. Quick stops, excessive force, and uneven surfaces may cause the appliance and cart combination to overturn.

Slots and openings in the back and bottom of the cabinet are provided for ventilation, to ensure reliable operation of the equipment and to protect it from overheating.

The openings should never be covered with cloth or other materials, and the bottom opening should not be blocked by placing the projector on a bed, sofa, rug, or other similar surface. This projector should never be placed near or over a radiator or heat register.

This projector should not be placed in a built-in installation such as a book case unless proper ventilation is provided.

Never push objects of any kind into this projector through cabinet slots as they may touch dangerous voltage points or short out parts that could result in a fire or electric shock. Never spill liquid of any kind on the projector.

Do not install the projector near the ventilation duct of air-conditioning equipment.

This projector should be operated only from the type of power source indicated on the marking label. If you are not sure of the type of power supplied, consult your authorized dealer or local power company.

Do not overload wall outlets and extension cords as this can result in fire or electric shock. Do not allow anything to rest on the power cord. Do not locate this projector where the cord may be damaged by persons walking on it.

Do not attempt to service this projector yourself as opening or removing Covers may expose you to dangerous voltage or other hazards. Refer all servicing to qualified service personnel.

Unplug this projector from wall outlet and refer servicing to qualified service personnel under the following conditions:

a. When the power cord or plug is damaged or frayed.
b. If liquid has been spilled into the projector.
c. If the projector has been exposed to rain or water.
d. If the projector does not operate normally by following the operating instructions. Adjust only those controls that are covered by the operating instructions as improper adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore the projector to normal operation.
e. If the projector has been dropped or the cabinet has been damaged.
f. When the projector exhibits a distinct change in performance-this indicates a need for service.

When replacement parts are required, be sure the service technician has used replacement parts specified by the manufacturer that have the same characteristics as the original part. Unauthorized substitutions may result in fire, electric shock, or injury to persons.

Upon completion of any service or repairs to this projector, ask the service technician to perform routine safety checks to determine that the projector is in safe operating condition.

NOTE FOR CUSTOMERS IN THE US

LAMP(S) INSIDE THIS PRODUCT CONTAIN MERCURY AND MUST BE RECYCLED OR DISPOSED OF ACCORDING TO LOCAL, STATE OR FEDERAL LAWS.
Safety Instructions

Air Circulation

Openings in the cabinet are provided for ventilation. To ensure reliable operation of the product and to protect it from overheating, these openings must not be blocked or covered.

⚠️ CAUTION

Hot air is exhausted from the exhaust vent. When using or installing the projector, the following precautions should be taken.

– Do not put any flammable object or spray can near the projector, hot air is exhausted from the air vents.
– Keep the exhaust vent at least 3’ (1 m) away from any objects.
– Do not touch a peripheral part of the exhaust vent, especially screws and metallic parts. These areas will become hot while the projector is being used.
– Do not put anything on the cabinet. Objects put on the cabinet will not only get damaged but also may cause fire hazard by heat.

Cooling fans are provided to cool down the projector. The fans’ running speed is changed according to the temperature inside the projector.

Moving the Projector

When moving the projector, close the Slide Shutter and retract adjustable feet to prevent damage to the lens and cabinet.

When the projector is not in use for an extended period, put it into the supplied carrying case with the lens side up.

⚠️ CAUTION

The carrying case (supplied) is intended for protection against dust and scratches on surface of the cabinet, and it is not designed to protect an appliance from external forces. Do not transport the projector by courier or any other transport service with this case, otherwise the projector can be damaged. When handling the projector, do not drop, bump, subject it to strong forces, or put other things on the cabinet.

⚠️ CAUTION IN CARRYING OR TRANSPORTING THE PROJECTOR

– Do not drop or bump the projector, otherwise damages or malfunctions may result.
– When carrying the projector, use a suitable carrying case.
– Do not transport the projector by courier or any other transport service in an unsuitable transport case. This may cause damage to the projector. For information about transporting the projector by courier or any other transport service, consult your dealer.
– Do not put the projector in a case before the projector is cooled enough.
Installing the Projector in Proper Directions

Use the projector properly in specified positions. Improper positioning may reduce the lamp life and result in severe accident or fire hazard.

This projector can project the picture upward, downward or backward, perpendicular to the plane of the screen as shown in the figure below.

![Diagram of projector positioning](image)

Be sure to set the Lamp control in High and the Fan control in On 3 in the setting menu when using the projector inclined at between +40 degrees to +140 degrees to the horizontal plane at altitudes between 0 and approximately 1,600 meters above sea level.

Be sure to set the Fan control in On 2 when using the projector at higher altitudes than the altitudes described above, regardless of the installation position of the projector. (p.61).

Positioning Precautions

Avoid positioning the projector as described below when installing.

1. **Do not roll the projector more than 10 degrees from side to side.**

2. **Do not put the projector on either side to project an image.**

3. **In upward projection, do not tilt the projector over 10 degrees right and left.**

4. **In downward projection, do not tilt the projector over 10 degrees right and left.**
Federal Communications Commission Notice

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy, and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Use of shielded cable is required to comply with class B limits in Subpart B of Part 15 of FCC Rules. Do not make any changes or modifications to the equipment unless otherwise specified in the instructions. If such changes or modifications should be made, you could be required to stop operation of the equipment.

Model Number: LC-WB42N
Trade Name: EIKI
Responsible party: EIKI International, Inc.
Address: 30251 Esperanza Rancho Santa Margarita CA 92688-2132
Telephone No.: 800-242-3454 (949-457-0200)

AC Power Cord Requirement

The AC Power Cord supplied with this projector meets the requirement for use in the country you purchased it.

AC Power Cord for the United States and Canada:

AC Power Cord used in the United States and Canada is listed by the Underwriters Laboratories (UL) and certified by the Canadian Standard Association (CSA).
AC Power Cord has a grounding-type AC line plug. This is a safety feature to be sure that the plug will fit into the power outlet. Do not try to defeat this safety feature. Should you be unable to insert the plug into the outlet, contact your electrician.

AC Power Cord for the United Kingdom:

This cord is already fitted with a moulded plug incorporating a fuse, the value of which is indicated on the pin face of the plug. Should the fuse need to be replaced, an ASTA approved BS 1362 fuse must be used of the same rating, marked thus ▶. If the fuse cover is detachable, never use the plug with the cover omitted. If a replacement fuse cover is required, ensure it is of the same colour as that visible on the pin face of the plug (i.e. red or orange). Fuse covers are available from the Parts Department indicated in your User Instructions. If the plug supplied is not suitable for your socket outlet, it should be cut off and destroyed. The end of the flexible cord should be suitably prepared and the correct plug fitted.

WARNING: A PLUG WITH BARED FLEXIBLE CORD IS HAZARDOUS IF ENGAGED IN A LIVE SOCKET OUTLET.

The Wires in this mains lead are coloured in accordance with the following code:
- Green-and-yellow Earth
- Blue . . . . . . . . Neutral
- Brown . . . . . . . Live

As the colours of the wires in the mains lead of this apparatus may not correspond with the coloured markings identifying the terminals in your plug proceed as follows:
The wire which is coloured green-and-yellow must be connected to the terminal in the plug which is marked by the letter E or by the safety earth symbol ▼ or coloured green or green-and-yellow.
The wire which is coloured blue must be connected to the terminal which is marked with the letter N or coloured black.
The wire which is coloured brown must be connected to the terminal which is marked with the letter L or coloured red.

WARNING: THIS APPARATUS MUST BE EARTHED.

THE SOCKET-OUTLET SHOULD BE INSTALLED NEAR THE EQUIPMENT AND EASILY ACCESSIBLE.
Part Names and Functions

Front

1. Infrared Remote Receiver
2. WIRELESS Indicator
3. Focus Ring
4. Projection Lens
5. Zoom Lever
6. Slide Shutter

\[\text{CAUTION}\]

Do not turn on a projector with slide shutter closed. High temperature from light beam may damage slide shutter and result in fire hazard.

2. WIRELESS Indicator and 15 LAN Connection Terminal are for the Network function. Refer to the owner’s manual of “Network Set-up and Operation”.

14. USB Connector (Series A) is for the Memory Viewer function. Refer to the owner's manual of "Memory Viewer function".

\[\text{*}

Kensington Security Slot

This slot is for a Kensington lock used to deter theft of the projector.

* Kensington is a registered trademark of ACCO Brands Corporation.
Part Names and Functions

Rear Terminal

1. **R/C JACK**
   - When using the wired remote control, connect the wired remote control to this jack with a remote control cable (supplied).

2. **USB Connector (Series B)**
   - In order to operate the computer with the remote control and use the PAGE ▲▼ buttons on the remote control during a presentation, connect the USB port of the computer to the USB terminal with a USB cable (not supplied) (p.17).

3. **CONTROL PORT**
   - When controlling the projector with RS-232C, connect the control equipment to this connector with the serial control cable.

4. **COMPUTER IN 1 / COMPONENT IN**
   - Connect output signal from a computer, RGB scart 21-pin video output or component video output to this terminal (pp.17,19).

5. **COMPUTER IN 2 / MONITOR OUT**
   - Connect computer output to this terminal (p.17).
   - This terminal can be used to output the incoming analog RGB signal and component signals from COMPUTER IN 1/COMPONENT IN terminal to the other monitor (p.17).

6. **HDMI**
   - Connect the HDMI signal (including sound signal) from video equipment or the DVI signal from computer to this terminal (pp.17, 19).

7. **LAN Connection Terminal**
   - Connect the LAN cable (refer to the owner’s manual of “Network Set-up and Operation”).

8. **USB Connector (Series A)**
   - Connect the USB memory (refer to the owner’s manual “Network Set-up and Operation”).

9. **S-VIDEO IN**
   - Connect the S-VIDEO output signal from video equipment to this jack (p.18).

10. **AUDIO OUT (VARIABLE)**
    - Connect an external audio amplifier to this jack (pp.17-19).
    - This terminal outputs sound from AUDIO IN terminal or to this jack.

11. **COMPUTER 1 COMPONENT / COMPUTER 2 AUDIO IN**
    - Connect the audio output (stereo) from a computer or video equipment connected to ④, ⑤ or ⑥ to this jack. (pp17, 19)

12. **AUDIO IN**
    - Connect the audio output signal from video equipment connected to ⑨ or ⑬ to this jack.
    - For a mono audio signal (a single audio jack), connect it to the L (MONO) jack (p.18).

13. **VIDEO IN**
    - Connect the composite video output signal to this jack (p.18).

*HDMI* is registered trademarks of HDMI Licensing, LLC.
Part Names and Functions

Top Control

1 SELECT button
- Execute the selected item (p.24).
- Expand or compress the image in the Digital zoom mode (p.39).

2 POINT ▲▼◄► (VOLUME +/-) buttons
- Select an item or adjust the value in the On-Screen Menu (p.24).
- Pan the image in the Digital zoom + mode (p.39).
- Adjust the volume level (Point ▲▼ buttons) (p.27).

3 MENU button
Open or close the On-Screen Menu (p.24).

4 AUTO SETUP/CANCEL button
- Correct vertical keystone distortion and adjust computer display parameters such as Fine sync, Total dots, Horizontal and Vertical position (pp.26, 48).
- Display the image in USB thumb drive or return to the menu bar in Memory Viewer menu.
Refer to the owner's manual of "Memory Viewer function".

5 POWER indicator
- Lights red when the projector is in stand-by mode.
- Lights green during operations.
- Blinks green in the Power management mode (p.56).

6 WARNING indicator
- Lights red when the projector detects an abnormal condition.
- Blinks red when the internal temperature of the projector exceeds the operating range (pp.64, 75).

7 KEYSTONE button
Correct keystone distortion (pp.26, 49).

8 INPUT button
Select an input source (pp.30-31, 40-41).

9 ON/STAND-BY button
Turn the projector on or off (pp.21-23).

10 LAMP REPLACE indicator
Lights yellow when the projection lamp reaches its end of life (pp.67, 75).
**Part Names and Functions**

---

**Remote Control**

1. **L-CLICK button**  
   Act as the left mouse button for wireless mouse operation. (p.15)

2. **ON/STAND-BY button**  
   Turn the projector on or off. (pp.21-23)

3. **WIRED REMOTE jack**  
   Connect the remote control cable (supplied) to this jack when using as a wired remote control. Wireless remote control does not work when the remote control cable is connected to the projector.

4. **SIGNAL EMISSION indicator**  
   Lights red while the laser beam is being emitted from the laser light window or a signal is being sent from the remote control to the projector.

**Note:**

To ensure safe operation, please observe the following precautions:

- Do not bend, drop, or expose the remote control to moisture or heat.
- For cleaning, use a soft dry cloth. Do not apply benzene, thinner, spray, or any chemical material.

---

5. **LASER LIGHT window**  
   A laser beam is emitted from here (p.14).

6. **HDMI button**  
   Select the HDMI input source. (pp.28, 41)

7. **COMPUTER button**  
   Select the COMPUTER input source. (pp.30-31, 41)

8. **INFO. button**  
   Operate the information function. (p.63)

9. **KEYSTONE button**  
   Correct keystone distortion. (pp.26, 49)

10. **Point ▲ ▼ ◄ ► (VOLUME +/-) buttons**  
    - Select an item or adjust the value in the On-Screen Menu. (p.24)
    - Pan the image in the Digital zoom + mode. (p.39)
    - Adjust the volume level. (Point ◄ ► buttons) (p.27)

11. **MENU button**  
    Open or close the On-Screen Menu. (p.24)

12. **FREEZE button**  
    Freeze the picture on the screen. (p.28)

13. **LASER button**  
    – Operate the Laser pointer function. Laser beam is emitted while pressing this button within 1 minute. When using this laser pointer for more than 1 minute, release the LASER button and press it again. (p.14)
    – Display the Pointer on the screen. (p.14)

14. **PAGE ▲ ▼ buttons**  
    Scroll back and forth the pages on the screen when giving a presentation. To use these buttons, connect the projector and your computer with a USB cable. (pp.10, 17)

15. **LAMP button**  
    Select a lamp mode. (pp.28, 58)

16. **D.ZOOM +/- buttons**  
    Zoom in and out the images. (pp.28, 39)

17. **RESET/ON/ALL-OFF switch**  
    When using the remote control, set this switch to “ON.” Set it to “ALL OFF” for power saving when it is not used. Slide this switch to “RESET” to initialize the remote control code or switch Spotlight and Pointer to the Laser pointer function. (pp.13-14)

18. **PIP button**  
    Operate the Picture In Picture function. (pp.28, 55)

19. **SCREEN button**  
    Select a screen mode. (pp.29, 38-39, 46)

20. **IMAGE button**  
    Select the image mode. (pp.29, 36, 43)

21. **MUTE button**  
    Mute the sound. (p.27)

22. **P-TIMER button**  
    Operate the P-timer function. (p.29)

23. **NO SHOW button**  
    Temporarily turn off the image on the screen. (p.29)

24. **R-CLICK button**  
    Act as the right mouse button for wireless mouse operation. (p.15)

25. **SELECT button**  
    – Execute the selected item. (p.24)
    – Expand or compress the image in Digital zoom mode. (p.39)

26. **PRESENTATION POINTER button**  
    Move a pointer of the projector or a pointer for wireless mouse operation. (pp.14-15)

27. **AUTO SET/CANCEL button**  
    – Correct vertical keystone distortion and adjust computer display parameters such as Fine sync, Total dots, Horizontal and Vertical position. (pp.26, 48)
    – Display the image in USB thumb drive or return to the menu bar in Memory Viewer menu.
    Refer to the owner's manual of "Memory viewer function".

28. **NETWORK button**  
    Select the Network input. See the owner's manual of "Network Set-up and Operation" and owner's manual of "Memory viewer function".

29. **VIDEO button**  
    Select the VIDEO input source. (pp.28, 40)
To ensure safe operation, please observe the following precautions:

- Use two (2) AAA or LR03 type alkaline batteries.
- Always replace batteries in sets.
- Do not use a new battery with a used battery.
- Avoid contact with water or liquid.
- Do not expose the remote control to moisture or heat.
- Do not drop the remote control.
- If the battery has leaked on the remote control, carefully wipe the case clean and install new batteries.
- Risk of an explosion if battery is replaced by an incorrect type.
- Dispose of used batteries according to the instructions or your local disposal rule or guidelines.

Remote Control Operating Range

Point the remote control toward the projector when pressing the buttons. Maximum operating range for the remote control is about 16.4′(5 m) and 60 degrees in front of the projector.

Remote Control Code

The eight different remote control codes (Code 1 – Code 8) are assigned to this projector. Switching the remote control codes prevents interference from other remote controls when several projectors or video equipment next to each other are operated at the same time. Change the remote control code for the projector first before changing that for the remote control. See “Remote control” in the Setting Menu on page 58.

1. While pressing the MENU button, press the IMAGE button number of times corresponding to the remote control code. See the list below.

2. To initialize the remote control code, slide the RESET/ON/ALL-OFF switch to RESET, and then to ON. The initial code is set to Code 1.

Part Names and Functions

Laser Pointer Function

This remote control emits a laser beam from the laser light window. Press the LASER button to activate the laser pointer. The signal emission indicator lights red and the red laser beam is emitted. If the LASER button is pressed for more than one minute or if it is released, the laser light goes off.

The laser emitted is a Class II laser. Do not look into the laser light window or point the laser beam at yourself or other people. The following is the caution label for the laser beam.

**CAUTION:** Use of controls, adjustments or performance of procedures other than those specified herein may result in hazardous radiation exposure. Never look directly into the laser light window while a laser is emitted, otherwise eye damage may result.

The caution label is put on the remote control.

**Signal Emission Indicator**

**Laser Light Window**

You can move the Spotlight or Pointer of the projector with the remote control to emphasize a part of the projected image.

1. Press and hold the MENU and the NO SHOW buttons for more than 5 seconds to activate the Pointer function. (The Laser pointer has switched to the Pointer function.)

2. Press the LASER button on the remote control pointing toward the projector. The Spotlight or Pointer is displayed on the screen with the LASER button lighting green. Then move the Spotlight or Pointer with the PRESENTATIONbower button. If the LASER button does not light green and continues to emit a laser beam, try the abovementioned procedure until the LASER button lights green.

3. To clear the Spotlight or Pointer out the screen, press the LASER button pointing toward the projector and see if the LASER button lighting is turned off.

To switch to the Laser pointer again, press and hold the NO SHOW and MENU buttons for more than 5 seconds or slide the RESET/ON/ALL-OFF switch to RESET and then to ON.

When you reset the Pointer function, the remote control code will be reset, as well.

**Note:** You can choose the size of Spotlight (Large/Middle/Small) and the pattern of Pointer (Arrow/Finger/Dot) in the Setting Menu. See “Pointer” on page 54.

**Pointer Function**

You can move the Spotlight or Pointer of the projector with the remote control to emphasize a part of the projected image.

1. Press and hold the MENU and the NO SHOW buttons for more than 5 seconds to activate the Pointer function. (The Laser pointer has switched to the Pointer function.)

2. Press the LASER button on the remote control pointing toward the projector. The Spotlight or Pointer is displayed on the screen with the LASER button lighting green. Then move the Spotlight or Pointer with the PRESENTATION POINTER button. If the LASER button does not light green and continues to emit a laser beam, try the abovementioned procedure until the LASER button lights green.

3. To clear the Spotlight or Pointer out the screen, press the LASER button pointing toward the projector and see if the LASER button lighting is turned off.

To switch to the Laser pointer again, press and hold the NO SHOW and MENU buttons for more than 5 seconds or slide the RESET/ON/ALL-OFF switch to RESET and then to ON.

When you reset the Pointer function, the remote control code will be reset, as well.

**Spotlight**

**Pointer**

✓ Note: You can choose the size of Spotlight (Large/Middle/Small) and the pattern of Pointer (Arrow/Finger/Dot) in the Setting Menu. See “Pointer” on page 54.
Wireless Mouse Operation

The remote control can be used as a wireless mouse for your computer.

1. Before operating the wireless mouse, connect your computer and the projector with a USB cable (not supplied). See "Connecting to a Computer" on page 17. When the Pointer function is used, the wireless mouse is not available.

2. When a USB cable is connected to the computer and the projector, turn on the projector first, then the computer. If you turn on the computer first, the wireless mouse function may not operate correctly.

Adjustable Feet

Projection angle can be adjusted up to 8.9 degrees with the adjustable feet.

Lift the front of the projector and pull the feet lock latches on both side of the projector.

Release the feet lock latches to lock the adjustable feet and rotate the adjustable feet to a proper height and tilt.

Keystone distortion can be adjusted automatically with the Auto setup function or manually by using the remote control or the menu operation (see pages 26, 48-49).
Positioning the Projector

For projector positioning, see the figures below. The projector should be set perpendicularly to the plane of the screen.

**Note:**
- The brightness in the room has a great influence on picture quality. It is recommended to limit ambient lighting in order to obtain the best image.
- All measurements are approximate and may vary from the actual sizes.

Connecting to a Computer

Cables used for connection
• VGA cables (Mini D-sub 15 pin) *
• USB cable
• Audio cables
• HDMI-DVI cable
(*One cable is supplied; other cables are not supplied with the projector.)

![Diagram of cable connections]

Note:
• Input sound to the COMPUTER1 COMPONENT/COMPUTER 2 AUDIO IN terminal when using the COMPUTER IN 1/COMPONENT IN and the COMPUTER IN 2/MONITOR OUT terminal as input.
• When the AUDIO OUT is plugged-in, the projector's built-in speaker is not available.
• USB cable connection is needed when operating the computer with the remote control or using the PAGE ▲▼ buttons on the remote control.
• When the cable is of the longer variety, it is advisable to use the COMPUTER IN 1 / COMPONENT IN and not the COMPUTER IN 2.

![Warning:]
Unplug the power cords of both the projector and external equipment from the AC outlet before connecting cables.
Connecting to Video Equipment

Cables used for connection
- Video and Audio cable (RCA x 3)
- S-video cable
- Audio cable
(Cables are not supplied with the projector.)

Unplug the power cords of both the projector and external equipment from the AC outlet before connecting cables.

✓ Note:
When the AUDIO OUT is plugged-in, the projector's built-in speaker is not available.
Connecting to Component Video Equipment

Cables used for connection
- Audio cables
- Scart-VGA cable
- Component cable
- HDMI cable
- Component-VGA cable

(Cables are not supplied with this projector.)

![Diagram of cable connections]

Note:
- When the AUDIO OUT is plugged-in, the projector’s built-in speaker is not available.
- See page 80 for ordering optional cables.

Unplug the power cords of both the projector and external equipment from the AC outlet before connecting cables.
Connecting the AC Power Cord

This projector uses nominal input voltages of 100-120 V or 200–240 V AC and it automatically selects the correct input voltage. It is designed to work with single-phase power systems having a grounded neutral conductor. To reduce the risk of electrical shock, do not plug into any other type of power system.

If you are not sure of the type of power being supplied, consult your authorized dealer or service station.

Connect the projector with all peripheral equipment before turning the projector on.

⚠️ CAUTION

The AC outlet must be near this equipment and must be easily accessible.

✓ Note:

Unplug the AC power cord when the projector is not in use. When this projector is connected to an outlet with the AC power cord, it is in Stand-by mode and consumes a little electric power.

---

NOTE ON THE POWER CORD

AC power cord must meet requirement of the country where you use the projector.

Confirm the AC plug type with the chart below and proper AC power cord must be used.

If supplied AC power cord does not match your AC outlet, contact your sales dealer.

<table>

Turning On the Projector

1. Complete peripheral connections (with a computer, VCR, etc.) before turning on the projector.

2. Connect the projector’s AC power cord into an AC outlet. The POWER indicator lights red. Open the slide shutter (see pages 9, 66).

3. Press the ON/SYAND-BY button on the top control or on the remote control. The POWER indicator lights green and the cooling fans start to operate. The preparation display appears on the screen and the countdown starts.

4. After the countdown, the input source that was selected the last time and the lamp control status icon (see page 58) appear on the screen.

5. If there is no signal input when start on the projector, or the current signal is missed while operating the projector, the Video/PC selection window will be displayed on the screen, please move the pointer to input source desired by pressing the Point ▲▼ buttons and press the SELECT button. And then follow the input signal guidance window to correct the signal and connection.

If the projector is locked with a PIN code, PIN code input dialog box will appear. Enter the PIN code as instructed on the next page.

Note:

- When the Logo select function is set to Off, the logo will not be shown on the screen (p.50).
- When Countdown off or Off is selected in the Display function, the countdown will not be shown on the screen (p.49).
- When the Input Search function is set to On2, the input signal will be searched automatically (p.48).
- When Off is selected in the Display function, the Video/PC selection window and the input signal guidance window are not shown on the screen (p.49).
Enter a PIN code
Use the Point ▲▼ buttons to enter a number. Press the Point ► button to fix the number and move the red frame pointer to the next box. The number changes to *. If you fixed an incorrect number, use the Point ◀ button to move the pointer to the number you want to correct, and then enter the correct number.

Repeat this step to complete entering a four-digit number.

After entering the four-digit number, move the pointer to Set. Press the SELECT button so that you can start to operate the projector.

If you entered an incorrect PIN code, PIN code and the number (****) will turn red for a moment. Enter the correct PIN code all over again.

What is PIN code?
PIN (Personal Identification Number) code is a security code that allows the person who knows it to operate the projector. Setting a PIN code prevents unauthorized use of the projector.

A PIN code consists of a four-digit number. Refer to the PIN code lock function in the Setting Menu on pages 59-60 for locking operation of the projector with your PIN code.

CAUTION ON HANDLING PIN CODE
If you forget your PIN code, the projector can no longer be started. Take a special care in setting a new PIN code; write down the number in a column on page 83 of this manual and keep it on hand. Should the PIN code be missing or forgotten, consult your dealer or service center.

Note:
• If the PIN code number is not entered within three minutes after the PIN code dialog box appeared, the projector will be turned off automatically.
• The “1234” is set as the initial PIN code at the factory.

PIN Code Input Dialog Box
After the OK icon disappears, you can operate the projector.
Turning Off the Projector

1 Press the ON/STAND-BY button on the top control or on the remote control, and **Power off?** appears on the screen.

2 Press the ON/STAND-BY button again to turn off the projector. The POWER indicator starts to blink red, and the cooling fans keep running (You can select the level of fans’ quietness and speed. See "Fan" on page 61.). At this time, you can unplug the AC power cord even if the fans are still running.

3 When the projector has cooled down enough, the POWER indicator stops blinking and you can turn on the projector.

<table>
<thead>
<tr>
<th><img src="image.png" alt="Image" /></th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Power off?</strong> disappears after 4 seconds.</td>
</tr>
</tbody>
</table>

TO MAINTAIN THE LIFE OF THE LAMP, ONCE YOU TURN THE PROJECTOR ON, WAIT AT LEAST FIVE MINUTES BEFORE TURNING IT OFF.

DO NOT OPERATE THE PROJECTOR CONTINUOUSLY WITHOUT REST. CONTINUOUS USE MAY RESULT IN SHORTENING THE LAMP LIFE. TURN OFF THE PROJECTOR AND LET STAND FOR ABOUT AN HOUR IN EVERY 24 HOURS.

★ *Note:*
- When the On start function is set to **On**, the projector will be turned on automatically by connecting the AC power cord to an AC outlet (p.57).
- The running speed of cooling fans is changed according to the temperature inside the projector.
- Do not put the projector in a case before the projector is cooled enough.
- If the WARNING indicator blinks or lights red, see "WARNING indicator“ on page 64.
- While the POWER indicator is blinking, the lamp is being cooled down and the projector cannot be turned on. Wait until the POWER indicator stops blinking to turn on the projector again.
- The fan rotation will terminate directly if the AC power cord is unplugged immediately after the projector is turned off.
- The projector can be turned on after the POWER indicator turns red. The waiting time to restart will be shortened when the normal power-off processing for fan cooling is completed, compared with the time the AC power cord is immediately unplugged after the power-off.
How to Operate the On-Screen Menu

The projector can be adjusted or set via the On-Screen Menu. The menus have a hierarchical structure, with a main menu that is divided into submenus, which are further divided into other submenus. For each adjustment and setting procedure, refer to respective sections in this manual.

1. Press the MENU button on the top control or the remote control to display the On-Screen Menu.

2. Use the Point ▲▼ buttons to highlight or select a main menu item. Press the Point ► or the SELECT button to access the submenu items. (The selected item is highlighted in orange.)

3. Use the Point ▲▼ buttons to select the desired submenu item and press the SELECT button to set or access the selected item.

4. Use the Point ▲▼◄► buttons to adjust the setting or switch between each option and press the SELECT button to activate it and return to the submenu.

5. Press the Point ◄ button to return to the main menu. Press the MENU button to exit the On-Screen Menu.
Menu Bar

For detailed functions of each menu, see “Menu Tree” on pages 73-74.

1. **Input**
   - Used to select an input source from **Computer 1, Computer 2, HDMI, Video, S-video** or **Network** (pp.30-31,40-41).

2. **PC adjust**
   - Select **Fine sync, Total dots, Horizontal, Vertical, Clamp, Display area H** and **Display area V** to adjust the parameters to match with the PC input signal format (pp.32-35).

3. **Image select**
   - For computer source, used to select an image mode among **Dynamic, Standard, Real, Blackboard(Green), Colorboard and image 1 - 4** (p.36).
   - For HDMI or Video source, used to select an image mode among **Dynamic, Standard, Cinema, Blackboard(Green), Colorboard and Image 1- 4** (p.43).

4. **Image adjust**
   - For computer source, used to adjust computer image [**Contrast, Brightness, Color temp., White balance (R/G/B), Sharpness and Gamma**] (pp.37-38).
   - For HDMI or Video source, used to adjust picture image [**Contrast, Brightness, Color, Tint, Color temp., White balance (R/G/B), Sharpness, Gamma, Noise reduction** and **Progressive**] (pp.44-45).

5. **Screen**
   - For computer source, used to adjust size of the image [**Normal, True, Full, Custom** and **Digital zoom +/-**] (pp.38-39).
   - For HDMI or Video source, used to set size of image [**Normal, Full, Zoom, Wide, Natural wide** and **Custom**] (p.46).

6. **Sound**
   - Used to adjust the volume or mute the sound (p.27).

7. **Setting**
   - Used to set the projector’s operating configurations (pp.47-62).

8. **Information**
   - Display the input source information: **Input, H-sync freq., V-sync freq., Screen, Language, Lamp status, Lamp counter, Power management, Key lock, PIN code lock** and **Remote control** (p.63).

9. **Network**
   - See the owner’s manual of “Network Set-up and Operation”.

10. **Guide**
    - The key operation is displayed.
Zoom and Focus Adjustment

Rotate the Zoom Lever to zoom in and out. Rotate the Focus Ring to adjust the focus of the image.

Auto Setup Function

Auto setup function is provided to automatically execute the setting of Auto setup (includes Input search, Auto PC adj. and Auto Keystone functions) in the setting menu by just pressing the AUTO SETUP/CANCEL button on the top control or the AUTO SET/CANCEL button on the remote control. Refer to page 48 for the setting of the Auto setup function.

✓ Note:
- Auto Keystone corrects vertical distortion only; it does not correct horizontal distortion.
- Auto Keystone cannot work when Ceiling feature is set to On in the Setting menu (p.53).
- Perfect correction of the image distortion cannot be ensured with the Auto setup function. If the distortion cannot be corrected properly by pressing the AUTO SETUP/CANCEL or AUTO SET/CANCEL button, adjust manually by pressing the KEYSTONE button on the remote control or selecting Keystone in the Setting menu (p.49).
- Fine sync, Total dots, Horizontal and Vertical position of some computers cannot be fully adjusted with the Auto PC adjustment function. When the image is not provided properly with this operation, manual adjustments are required (pp.34-35).

Keystone Correction

If a projected picture still has keystone distortion after pressing the AUTO SETUP/CANCEL button on the top control or the AUTO SET/CANCEL button on the remote control, correct the image manually as follows:

Press the KEYSTONE button on the remote control. The Keystone dialog box appears. Use the Point ▲▼ buttons to correct keystone distortion. The keystone adjustment can be stored (see page 49).

- Reduce the upper width with the Point ▲ button.
- Reduce the lower width with the Point ▼ button.

- The white arrows indicate that there is no correction.
- A red arrow indicates the direction of correction.
- An arrow disappears at the maximum correction.
- If you press the KEYSTONE button on the remote control once more while the keystone dialog box is being displayed, the keystone adjustment will be canceled.
- The adjustable range is limited depending on the input signal.
Sound Adjustment

Direct Operation

Volume
Press the VOLUME +/- buttons on the top control or on the remote control to adjust the volume. The volume dialog box appears on the screen for a few seconds.

Mute
Press the MUTE button on the remote control to select On to temporarily turn off the sound. To turn the sound back on, press the MUTE button again to select Off or press the VOLUME +/- buttons. The Mute function is also effective for the AUDIO OUT jack.

Menu Operation

1 Press the MENU button to display the On-Screen Menu. Use the Point ▲▼ buttons to select Sound. Press the Point ► or the SELECT button to access the submenu items.

2 Use the Point ▲▼ buttons to select the desired submenu item and press the SELECT button to access the selected item.

Volume
Press the Point ▲ button to turn up the volume; press the Point ▼ button to turn down the volume.

Mute
Press the SELECT button to switch the mute function On/Off. When the sound is turned off, On is displayed. Press the VOLUME +/- buttons again to turn the sound back on.

✓Note:
When selecting P in P of "Picture in Picture" mode, the VOLUME +/- buttons are switched to the subpicture position control, so the direct operation of volume is disable.
Remote Control Operation

Using the remote control for some frequently used operations is advisable. Just pressing one of the buttons enables you to make the desired operation quickly without calling up the On-Screen Menu.

HDMI/COMPUTER/VIDEO/NETWORK button

Press the HDMI, COMPUTER, VIDEO or NETWORK button on the remote control to select the input source. See pages 30-31, 40-41 for details.

Refer to the owner’s manual of “Network Set-up and Operation” for details about the network input.

FREEZE button

Press the FREEZE button on the remote control to freeze the picture on the screen. To cancel the Freeze function, press the FREEZE button again or press any other button.

INFO. button

Display the input source information: Input, H-sync freq., V-sync freq., Screen, Language, Lamp status, Lamp counter, Power management, Key lock, PIN code lock and Remote control (p.63).

D.ZOOM +/- buttons

Press the D.ZOOM +/- buttons on the remote control to enter to the Digital zoom +/- mode. See page 39 for details.

LAMP button

Press the LAMP CONTROL button on the remote control to select the lamp mode for changing the brightness on the screen.

- Auto ............ The brightness according to the input signal (between High and Eco mode).
- High ............ Brighter than the Normal mode.
- Normal ....... Normal brightness
- Eco............... Lower brightness reduces the lamp power consumption and extends the lamp life.

Note:
See the next page for the description of other buttons.

PIP button

Press the PIP button on the remote control to enter P in P or P by P.

Mode of Picture in Pinture and input source will be displayed on the main picture and input source will be displayed on the sub picture for 10 seconds.

See page 55 for details.
NO SHOW button
Press the NO SHOW button on the remote control to black out the image. To restore to normal, press the NO SHOW button again or press any other button. When a projected image is captured and set as User in the Logo selection (see page 50), the screen changes each time you press the NO SHOW button as follows.
black out → the captured image → normal → ......

P-TIMER button
Press the P-TIMER button on the remote control. The P-Timer display 00:00 appears on the screen and the countdown starts (00:00–59:59).
To stop the countdown, press the P-TIMER button. To cancel the P-Timer function, press the P-TIMER button again.

IMAGE button
Press the IMAGE button on the remote control to select a desired image mode of the screen. See pages 36, 43 for details.

SCREEN button
Select the screen size (See pages 38-39, 46 for details).

Note:
See the previous page for the description of other buttons.
Choose **Computer 1** by pressing the INPUT button on the top control or press the COMPUTER button on the remote control. Before using these buttons, correct input source should be selected through Menu operation as described below.

**Input Source Selection (Computer 1: RGB / Component / RGB(Scart) )**

**Direct Operation**

1. Press the MENU button to display the On-Screen Menu. Use the Point ▲▼ buttons to select Input and then press the Point ► or the SELECT button.

2. Use the Point ▲▼ buttons to select **Computer 1** and then press the Point ► button to access the submenu items.

3. When **Computer 1** is selected, use the Point ▲▼ buttons to select RGB and then press the SELECT button.

**Note:**

When the Input Search function is set to On1 or On2 in the Auto setup function, the input signal will be searched automatically (p.48).
Input Source Selection (Computer 2: RGB)

**Direct Operation**

Choose **Computer 2** by pressing the INPUT button on the top control or press the COMPUTER button on the remote control.

* COMPUTER 2 can not be selected when using the COMPUTER IN 2/ MONITOR OUT terminal as MONITOR OUT output.

**Menu Operation**

1. Press the MENU button to display the On-Screen Menu. Use the Point ▲▼ buttons to select **Input** and then press the Point ► or the SELECT button.

2. Use the Point ▲▼ buttons to select **Computer 2** and then press the SELECT button.

3. When **Computer 2** is selected, analog RGB input source will be selected directly.

**Note:**
When the Input Search function is set to On1 or On2, the input signal will be searched automatically (p.48).
Computer System Selection

This projector automatically tunes to various types of computers based on VGA, SVGA, XGA, SXGA, WXGA, UXGA or WUXGA with its Multi-scan system and Auto PC adjustment. If a computer is selected as a signal source, this projector automatically detects the signal format and tunes to project a proper image without any additional settings. (Signal formats provided in this projector are shown on pages 76-77)

One of the following messages may appear when:

- **Auto** The projector cannot recognize the connected signal conforming to the provided PC Systems. **Auto** is displayed on the System Menu box and the Auto PC adjustment function works to display proper images. If the image is not projected properly, a manual adjustment is required (pp.34-35).
- ----- There is no signal input from the computer. Check the connection between your computer and the projector. (See “Troubleshooting” on pp.69-72.)
- **Mode 1** The preset system is manually adjusted in the PC adjust Menu. The adjusted data can be stored in **Mode 1-5** (pp.34-35).
- **SVGA 1** PC Systems provided in this projector is chosen. The projector chooses a proper system provided in the projector and displays it.

*Mode 1 and SVGA 1 are examples.

Selecting Computer System Manually

PC system can also be selected manually.

1. Press the MENU button to display the On-Screen Menu. Use the Point ▲▼ buttons to select Input and then press the Point ► or the SELECT button.

2. Use the Point ▲▼ buttons to select System and then press the Point ► or the SELECT button.

3. Use the Point ▲▼ buttons to select the desired system and then press the SELECT button.

Customized Mode (1–5) set in the PC adjust Menu (pp.34-35). Systems in this dialog box can be selected.
Auto PC adjustment

Auto PC adjustment function is provided to automatically adjust Fine sync, Total dots, Horizontal, Vertical, Clamp, Display area H and Display area V positions to conform to your computer.

Menu Operation

Auto PC adj.

1 Press the MENU button to display the On-Screen Menu. Use the Point ▲▼ buttons to select PC adjust and then press the Point ► or the SELECT button.

2 Use the Point ▲▼ buttons to select Auto PC adj. and then press the SELECT button.

To store adjustment parameters

The adjusted parameters from the Auto PC adjustment can be stored in the projector. Once the parameters are stored, the setting can be done just by selecting a Mode (1–5) in the PC System Menu (see page 32). See also Store on page 35.

Note:

• Fine sync, Total dots, Horizontal and Vertical position of some computers cannot be fully adjusted with the Auto PC adjustment function. When the image is not provided properly with this operation, manual adjustments are required (pp.34-35).
• The Auto PC adjustment cannot be operated when 480i, 575i, 480p, 575p, 720p, 1035i or 1080i is selected in the PC System Menu (p.32), or when the signal is coming from the HDMI terminal.

PC adjust Menu

Please wait... appears while the Auto PC adjustment is in process.
Computer Input

Manual PC adjustment

Some computers employ special signal formats which may not be tuned by Multi-scan system of this projector. Manual PC adjustment enables you to precisely adjust several parameters to match those signal formats. The projector has five independent memory areas to store those parameters manually adjusted. It allows you to recall the setting for a specific computer.

1. Press the MENU button to display the On-Screen Menu. Use the Point ▲▼ buttons to select PC adjust and then press the Point ► or the SELECT button.

2. Use the Point ▲▼ buttons to select the desired item and then press the SELECT button to display the adjustment dialog box. Use the Point◄► buttons to adjust the setting value.

Fine sync
Use the Point◄► buttons to adjust the value, eliminating a flicker from the image displayed (from 0 to 31).

Total dots
Use the Point◄► buttons to adjust the number of total dots in one horizontal period to match your PC image.

Horizontal
Use the Point◄► buttons to adjust the horizontal picture position.

Vertical
Use the Point◄► buttons to adjust the vertical picture position.

Clamp
Use the Point◄► buttons to adjust the clamp level. When the image has dark bars, try this adjustment.

Display area H
Use the Point◄► buttons to adjust the horizontal area displayed by this projector.

Display area V
Use the Point◄► buttons to adjust the vertical area displayed by this projector.
Reset
To reset the adjusted data, select Reset and press the SELECT button. A confirmation box appears and then select Yes. All adjustments will return to their previous figures.

Mode free
To clear the stored data, select Mode free and then press the Point ► or the SELECT button. Move the highlight to the mode that you want to clear and then press the SELECT button.

Store
To store the adjusted data, select Store and then press the Point ► or the SELECT button. Move the highlight to one of the Modes 1 to 5 in which you want to store, and then press the SELECT button.

✓ Note:
• Display area (H/V) cannot be selected when 480i, 575i, 480p, 575p, 720p, 1035i or 1080i is selected in the PC System Menu (p.32).
• When input computer signal to the projector, PC adjust will become available.
Image Mode Selection

Direct Operation
Select the desired image mode among Dynamic, Standard, Real, Blackboard (Green), Colorboard, Image 1, Image 2, Image 3 and Image 4 by pressing the IMAGE button on the remote control.

Menu Operation

1. Press the MENU button to display the On-Screen Menu. Use the Point ▲▼ buttons to select Image select and then press the Point ► or the SELECT button.

2. Use the Point ▲▼ buttons to select the desired item and then press the SELECT button.

Dynamic
For viewing pictures in a bright room.

Standard
Normal picture mode preset on the projector.

Real
Picture mode with improved halftone for graphics.

Blackboard (Green)
For the image projected on a blackboard. This mode helps enhance the image projected on a blackboard. This is mainly effective on a green colored board, not truly effective on a black colored board.

Colorboard
Use the Point ▲▼ buttons to select Colorboard and then press the Point ► or the SELECT button. Use the Point ▲▼ buttons to select the desired item and then press the SELECT button.
At the time of simple projection on the colored wall, you can get the close color image to the color image projected on a white screen by selecting the similar color to the wall color from the preset four colors.

Image 1–4
For viewing with the user preset image mode in the Image adjust Menu (see pages 37-38). This Image memory is provided in each computer, component and video input source.
Image Adjustment

1 Press the MENU button to display the On-Screen Menu. Use the Point ▲▼ buttons to select **Image adjust** and then press the Point ► or the SELECT button.

2 Use the Point ▲▼ buttons select the desired item and then press the SELECT button to display the adjustment dialog box. Use the Point ◀► buttons to adjust the setting value.

Contrast
Press the Point ◀ button to decrease the contrast; press the Point ► button to increase the contrast (from 0 to 63).

Brightness
Press the Point ◀ button to decrease the brightness; press the Point ► button to increase the brightness (from 0 to 63).

Color temp.
Use the Point ◀► buttons to select the desired Color temp. level (XLow, Low, Mid or High).

White balance (Red)
Press the Point ◀ button to lighten red tone; press the Point ► button to deepen red tone (from 0 to 63).

White balance (Green)
Press the Point ◀ button to lighten green tone; press the Point ► button to deepen green tone (from 0 to 63).

White balance (Blue)
Press the Point ◀ button to lighten blue tone; press the Point ► button to deepen blue tone (from 0 to 63).

Sharpness
Press the Point ◀ button to decrease the sharpness of the image; press the Point ► button to increase the sharpness of the image (from 0 to 15).

Gamma
Use the Point ◀► buttons to adjust the gamma value to obtain a better balance of contrast (from 0 to 15).

Reset
To reset the adjusted data, select **Reset** and press the SELECT button. A confirmation box appears and then select Yes. All adjustments will return to their previous figures.

Note:
- When **White balance Red**, **Green** or **Blue** is adjusted, Color temp. will change to **User**.
- When **Blackboard(Green)** or **Colorboard** is selected in Image select, Color temp. will change to **Blackboard** or **Colorboard**.
Computer Input

Store
To store the adjusted data, select Store and press the Point ► or the SELECT button. Use the Point ▲▼ buttons to select one from Image 1 to 4 and press the SELECT button. A confirmation box appears and then select Yes. Stored data can be called up by selecting an Image (1–4) in the Image Mode Selection on page 36.

Screen Size Adjustment
This projector has the picture screen resize function, which enables you to customize the image size.

1 Press the MENU button to display the On-Screen Menu. Use the Point ▲▼ buttons to select Screen and then press the Point ► or the SELECT button.

2 Use the Point ▲▼ buttons select the desired item and then press the SELECT button.

Normal
Provide the image to fit the screen size.

True
Provide the image in its original size. When the original image size is larger than the screen size (1280 x 800), the projector enters to the panning mode automatically. Use the Point ▲▼ buttons to pan the image. When adjusted, the arrows will turn red. When reached to the correction limits, the arrows will disappear.

Full
Provide the full screen image.

-note:
• The Screen Menu, except for Normal and Custom, cannot be operated when 720p(HDTV), 1035i (HDTV) or 1080i (HDTV) is selected in the PC System Menu (p.32).
• This projector cannot display any resolution higher than 1920 x 1200. If your computer’s screen resolution is higher than it, reset the resolution to the lower before connecting to the projector.
• The image data in other than 1024 x 768 is modified to fit the screen size in initial mode.
• True, Full and Digital zoom +/- cannot be selected when 480i, 575i, 480p or 575p is selected in the PC System Menu (p.32).
Custom

Adjust the screen scale and position manually with this function.
Press the Point ▶ button at Custom and the Custom is displayed on the screen, you can use the Point ▲▼ buttons to choose the item you want to adjust.

Scale H/V .......... Adjust the Horizontal/Vertical screen scale.
H&V ................... When set to On, the aspect ratio is fixed.
Scale V appears dimmed and becomes unavailable. Adjust Scale H, then the screen scale is automatically modified based on the aspect ratio.

Position H/V ...... Adjust the Horizontal/Vertical screen position.

Common .......... Save the adjusted scale to all the inputs. Press the SELECT button at Common to display a confirmation box. To save the scale, press the SELECT button at Yes.
When Custom is selected, the saved scale is used.

Reset ................ Reset the all adjusted values. Press the SELECT button at Reset to display a confirmation box. To reset, press the SELECT button at Yes.

For zooming in and out the images

Digital zoom +

Select Digital zoom +. The On-Screen Menu disappears and D. zoom + appears. Press the SELECT button to expand the image size. Use the Point ▲▼◄► buttons to pan the image. The Panning function can work only when the image is larger than the screen size.
A projected image can be also expanded by pressing the D.ZOOM + button on the remote control.

Digital zoom -

Select Digital zoom -. The On-Screen Menu disappears and D. zoom – appears. Press the SELECT button to compress image size.
The projected image can be also compressed by pressing the D.ZOOM - button on the remote control.

To exit the Digital zoom +/- mode, press any button except the D.ZOOM +/- buttons, SELECT and Point buttons.

To return to the previous screen size, select a screen size from the Screen Size Adjustment Menu or select an input source from the Input Source Selection Menu (see pages 30-31) again or adjust the screen size with the D.ZOOM +/- buttons.

Remote Control

✓ Note:
• When no signal is detected, Normal is set automatically and the Aspect dialog box disappears.
• The adjustable range for Scale H/V and Position H/V is limited depending on the input signal.

✓ Note:
• The panning function may not operate properly if the stored Mode in the PC adjust Menu is used (p.35).
• The minimum compression ratio is limited depending on the input signal, when the Keystone function is working or when the custom is selected for the screen size.
• True, Full and Digital zoom +/- cannot be selected when 480i, 575i, 480p or 575p is selected in the PC System Menu (p.32).
• Digital zoom +/- cannot be selected when Full or True is selected.
• When Custom is selected, the Digital zoom - function is disabled.
Choose Video or S-video by pressing the INPUT button on the top control or the VIDEO button on the remote control.

**Remote Control**

![Remote Control Diagram]

**Menu Operation**

1. Press the MENU button to display the On-Screen Menu. Use the Point ▲▼ buttons to select Input and then press the Point ► or the SELECT button.

2. Use the Point ▲▼ buttons to select either Video or S-video and then press the SELECT button.

- **Video** When video input signal is connected to the VIDEO jack, select Video.
- **S-video** When video input signal is connected to the S-VIDEO jack, select S-video.

**Note:**
- Network is for the Network function. See the owner’s manual of “Network Set-up and Operation”.
- When the Input Search function is set to On1 or On2 in the Auto setup function, the input signal will be searched automatically (p.48).

* COMPUTER 2 can not be selected when using the COMPUTER IN 2/MONITOR OUT terminal as MONITOR OUT output.
Video Input

Input Source Selection (Component, RGB Scart 21-pin, HDMI)

Direct Operation
Choose **Computer 1** by pressing the INPUT button on the top control or press the COMPUTER button on the remote control; choose **HDMI** by pressing the INPUT button on the top control or press the HDMI button on the remote control.

Before using these buttons, correct input source should be selected through Menu operation as described below.

**Remote Control**

![Remote Control Diagram]

* **COMPUTER 2** cannot be selected when using the COMPUTER IN 2/ MONITOR OUT terminal as MONITOR OUT output.

**Menu Operation**

1. Press the MENU button to display the On-Screen Menu. Use the Point ▲▼ buttons to select **Input** and then press the Point ► or the SELECT button.

2. Use the Point ▲▼ buttons to select **Computer 1** and then press the Point ► button; use the Point ▲▼ buttons to select **HDMI**, and then press the SELECT button.

3. When **Computer 1** is selected, use the Point ▲▼ buttons to select **Component** or **RGB(Scart)** and then press the SELECT button.

**Component**

When the input source is coming from video equipment connected to the COMPUTER IN 1/COMPONENT IN terminal with a Component-VGA Cable, select **Component**.

**RGB (Scart)**

When the input source is coming from video equipment connected to the COMPUTER IN 1/COMPONENT IN terminal with a Scart-VGA Cable, select **RGB (Scart)**.

**HDMI**

When the video signal is connected to the HDMI terminal, select **HDMI**.

**Note:**

- **Network** is for the Network function. See the owner’s manual of “Network Set-up and Operation”.
- When the Input Search function is set to **On1** or **On2**, the input signal will be searched automatically (p.48).
Video System Selection

1 Press the MENU button to display the On-Screen Menu. Use the Point ▲▼ buttons to select Input and then press the Point ► or the SELECT button.

2 Use the Point ▲▼ buttons to select Video, S-video or Computer 1(Component) and then press the SELECT button.

3 Use the Point ▲▼ buttons to select System and then press the Point ► or SELECT button. Use the Point ▲▼ buttons to select the desired system and then press SELECT button.

Video or S-video

Auto
The projector automatically detects an incoming video system, and adjusts itself to optimize its performance. When Video System is PAL-M or PAL-N, select the system manually.

PAL/SECAM/NTSC/NTSC4.43/PAL-M/PAL-N
If the projector cannot reproduce proper video image, select a specific broadcast signal format from among PAL, SECAM, NTSC, NTSC 4.43, PAL-M and PAL-N.

Component

Auto
The projector automatically detects an incoming video signal, and adjusts itself to optimize its performance.

COMPONENT VIDEO SIGNAL FORMAT
If the projector cannot reproduce proper video image, select a specific component video signal format among 480i, 575i, 480p, 575p, 720p, 1035i and 1080i.

Note:
The AV System Menu cannot be selected when selecting RGB (Scart).
Image Mode Selection

Direct Operation
Select the desired image mode among Dynamic, Standard, Cinema, Blackboard (Green), Colorboard, Image 1, Image 2, Image 3 and Image 4 by pressing the IMAGE button on the remote control.

Menu Operation
1. Press the MENU button to display the On-Screen Menu. Use the Point ▲▼ buttons to select Image select and then press the Point ► or the SELECT button.
2. Use the Point ▲▼ buttons to select the desired item and then press the SELECT button.

Dynamic
For viewing pictures in a bright room.

Standard
Normal picture mode preset on the projector.

Cinema
Picture mode adjusted with fine tone.

Blackboard (Green)
For the image projected on a blackboard. This mode helps enhance the image projected on a blackboard. This is mainly effective on a green colored board, not truly effective on a black colored board.

Colorboard
Use the Point ▲▼ buttons to select Colorboard and then press the Point ► or the SELECT button. Use the Point ▲▼ buttons to select the desired item and then press the SELECT button.
At the time of simple projection on the colored wall, you can get the close color image to the color image projected on a white screen by selecting the similar color to the wall color from the preset four colors.

Image 1–4
For viewing with the user preset image mode in the Image adjust Menu (see pages 44-45). This Image memory is provided in each computer, component and video input source.
Image Adjustment

1. Press the MENU button to display the On-Screen Menu. Use the Point ▲▼ buttons to select **Image adjust** and then press the Point ► or the SELECT button.

2. Use the Point ▲▼ buttons select the desired item and then press the SELECT button to display the adjustment dialog box. Use the Point ◀▶ buttons to adjust the setting value.

Contrast
Press the Point ◀ button to decrease the contrast; press the Point ► button to increase the contrast (from 0 to 63).

Brightness
Press the Point ◀ button to decrease the brightness; press the Point ► button to increase the brightness (from 0 to 63).

Color
Press the Point ◀ button decrease the intensity of the color; press the Point ► button increase the intensity of the color (from 0 to 63).

Tint
Press the Point ◀▶ buttons to adjust the tint value to get a proper color balance (from 0 to 63).

Color temp.
Use the Point ◀▶ buttons to select the desired Color temp. level (XLow, Low, Mid or High).

White balance (Red)
Press the Point ◀ button to lighten red tone; press the Point ► button to deepen red tone (from 0 to 63).

White balance (Green)
Press the Point ◀ button to lighten green tone; press the Point ► button to deepen green tone (from 0 to 63).

White balance (Blue)
Press the Point ◀ button to lighten blue tone; press the Point ► button to deepen blue tone (from 0 to 63).

**Note:**
- When **White balance Red, Green or Blue** is adjusted, the Color temp. level will change to **User**.
- **Tint** cannot be selected when the video system is **PAL, SECAM, PAL-M or PAL-N** (p.42).
- When **Blackboard(Green) or Colorboard** is selected in Image select, **Color temp.** will change to **Blackboard or Colorboard**.
Sharpness
Press the Point ◄ button to decrease the sharpness of the image; press the Point ► button to increase the sharpness of the image (from 0 to 15).

Gamma
Use the Point ◄► buttons to adjust the gamma value to obtain a better balance of contrast (from 0 to 15).

Noise reduction
Noise interference on the screen can be reduced. Select one of the following options to get smoother images.
- Off .......... Disabled.
- L1 .......... Lower reduction.
- L2 .......... Higher reduction.

Progressive
An interlaced video signal can be displayed in progressive mode. Select one of the following options.
- Off .......... Disabled.
- L1 .......... For an active picture.
- L2 .......... For a still picture.
- Film ...... For watching a film. With this function, the projector reproduces pictures faithful to the original film quality.

Reset
To reset the adjusted data, select Reset and press the Point ► or the SELECT button. A confirmation box appears and then select Yes. All adjustments will return to their previous figures.

Store
To store the adjusted data, select Store and press the SELECT button. Use the Point ▲▼ buttons to select one from Images 1 to 4 and press the SELECT button. A confirmation box appears and then select Yes. Stored data can be called up by selecting an Image (1-4) in the Image Mode Selection on page 43.

✓ Note:
Noise reduction and Progressive cannot be selected when 480p, 575p, 720p, 1035i or 1080i is selected (p.42).
Video Input

Screen Size Adjustment

This projector has the picture screen resize function, which enables you to customize the image size.

1 Press the MENU button to display the On-Screen Menu. Use the Point ▲▼ buttons to select Screen and then press the Point ► or SELECT button.

2 Use the Point ▲▼ buttons select the desired item and then press the SELECT button.

Normal
Provide the image to fit the screen size while maintaining the aspect ratio of input signal.

Full
Provide the full screen image.

Zoom
Pan the horizontal direction of the image and cut the vertical direction of the image to fit the screen size (16:9). Only for 4:3 video aspect ratio signals.

Wide
Provide the image at the 16:9 wide screen ratio.

Natural wide
Modify the 4:3 aspect ratio image to fit the screen size (16:9 aspect ratio) by stretching the image to make it look natural.

Custom
Adjust the screen scale and position manually with this function.

Press the Point ► button at Custom and the Custom is displayed on the screen, you can use the Point ▲▼ buttons to choose the item you want to adjust.

Scale H/V ............ Adjust the Horizontal/Vertical screen scale.

H&V .................... When set to On, the aspect ratio is fixed. Scale V appears dimmed and becomes unavailable. Adjust the Scale H, then the screen scale is automatically modified based on the aspect ratio.

Position H/V ....... Adjust the Horizontal/Vertical screen position.

Common ............ Save the adjusted scale to all the inputs. Press the SELECT button at Common to display a confirmation box. To save the scale, press the SELECT button at Yes. When Custom is selected, the saved scale is used.

Reset ............... Reset the all adjusted values. Press the SELECT button at Reset to display a confirmation box. To reset, press the SELECT button at Yes.

Note:
• When no signal is detected, Normal is set automatically and the Aspect dialog box disappears.
• The adjustable range for Scale H/V and Position H/V is limited depending on the input signal.
• Wide, Zoom and Natural wide cannot be operated when 720p, 1035i or 1080i is selected in the AV System Menu (p.42).
Setting

This projector has a Setting menu that allows you to set up the other various functions described below.

1. Press the MENU button to display the On-Screen Menu. Press the Point ▲▼ buttons to select Setting and press the Point ► or the SELECT button to access the submenu items.

2. Use the Point ▲▼ buttons to select the desired item and then press the Point ► or the SELECT button to access the selected item.

3. Use the Point ▲▼ buttons to select the desired item and then press the SELECT button.

Language

The language used in the On-Screen Menu is available in English, German, French, Italian, Spanish, Portuguese, Dutch, Swedish, Finnish, Polish, Hungarian, Romanian, Russian, Chinese, Korean, Japanese and Thai.

Menu position

This function is used to change the position of the On-Screen Menu. Select Menu position and press the Point ► or the SELECT button. The Menu position screen appears.

The Menu position changes each time you press SELECT button as follows:
- the top left → the top right → the center → the bottom left → the bottom right → the top left →...
**Auto setup**

This function enables Input search, Auto Keystone correction and Auto PC adjustment by pressing the AUTO SETUP/CANCEL button on the top control or the AUTO SET/CANCEL button on the remote control. Settings for those functions can be altered as follows:

**Input search**

This function detects the input signal automatically. When a signal is found, the search will stop. Use the Point ▲▼ buttons to select one of the following options.

- **Off** .... Input search will not work.
- **On 1** .... Input search works under the following situation.
  - When pressing the AUTO SETUP/CANCEL button on the top control.
  - When pressing the AUTO SET/CANCEL button on the remote control.
- **On 2** .... Input search works under the following situation.
  - When turning on the projector by pressing the ON/STAND-BY button on the top control or the remote control.
  - When pressing the AUTO SET/CANCEL button on the remote control.
  - When pressing the AUTO SETUP/CANCEL button on the top control.
  - When the current input signal is cut off.*

*If the No show or Freeze function is active, cancel it to activate the Input search. It is also unavailable when OnScreen menu is displayed.

**Auto PC adj.**

- **On** .... Enables Auto PC adjustment when pressing the AUTO SET/CANCEL button on the remote control or the AUTO SETUP/CANCEL button on the top control.
- **Off** .... Disables Auto PC adjustment.

**Auto Keystone**

- **Auto** .... Always works and corrects keystone distortion according to the projector's tilt.
- **Manual** .... Works only when pressing the AUTO SETUP/CANCEL button on the top control or the AUTO SET/CANCEL button on the remote control.
- **Off** .... Disables Auto Keystone.

✓ **Note:**

- **Input search** is set to On 1 or On 2, the status of Input and Lamp are displayed every time the signal is switched.
- Only the last selected input source can be detected.
- If the INPUT button on the top control or the HDMI, COMPUTER, VIDEO or NETWORK buttons on the remote control is pressed during Input search is in progress, Input search will stop and go back to the previous input signal.
- **Input search**, **Auto PC adj.** and **Auto Keystone** cannot be set Off at the same time.
Keystone

This function is used to store or reset the keystone correction when the AC power cord is unplugged.

**Store** ....... Keep the keystone correction even when the AC power cord is unplugged.

**Reset** ....... Release the keystone correction when the AC power cord is unplugged.

To correct keystone distortion, press the SELECT button. **Keystone** appears on the screen. Use the Point ▲▼ buttons to correct keystone distortion (p.26).

Background

Select the background screen for when no input signal is detected. Press the Point ▲▼ buttons to switch between each option.

- **Blue** . . Blue colored background.
- **User** . . The image you captured.
- **Black** . . Black colored background.

Display

This function decides whether to display On-Screen Displays.

**On** .......................... Show all the On-Screen displays. Use this function when you want to project images after the lamp becomes bright enough. The factory default setting is in this option.

**Countdown Off** ....... Show the input image instead of the countdown when turning on the projector. Use this function when you want to project the image as early as possible even when the lamp is not bright enough.

**Off** .......................... Hide the On-Screen Displays except;
  • On-Screen Menu
  • **Power off?** (p.23)
  • **No signal** for Power management (p.56)
  • **Please wait** ...
  • Arrows for the True function in the Screen Menu (p.38)
  • P-Timer
Logo (Logo and Logo PIN code lock settings)
This function allows you to customize the screen logo with Logo select, capture, Logo PIN code lock and Logo PIN code change functions.

✓ Note:
When On is selected in the Logo PIN code lock function, Logo select, capture and Logo PIN code change cannot be selected.

Logo select
This function decides on the starting-up display from among following options.
User ........ Show the image you captured.
Default .... Show the factory-set logo.
Off ............ Show the countdown display only.
Capture
This function enables you to capture an image being projected to use it for a starting-up display or interval of presentations.

Select Capture and press the SELECT button. A confirmation box appears and select Yes to capture the projected image.

After capturing the projected image, go to the Logo select function and set it to User. Then the captured image will be displayed the next time you turn on the projector or when you press the NO SHOW button (see page 29).

To cancel the capture function, select Yes in the "Quit?" confirmation box.

✓ Note:
• Before capturing an image, select Standard in the Image Select Menu to capture a proper image (pp.36, 43).
• A signal from a computer can be captured up to WXGA (1280 x800). A signal from video equipment can be captured except for 720p, 1035i and 1080i.
• When capturing the image that has been adjusted by the Keystone function, the adjusted data is automatically reset and the projector captures an image without keystone correction.
• When Logo PIN code lock is set to On, capture cannot be selected.
• When starting to capture a new image, the previously stored image is cleared even if you cancel the capturing.
• When there is no captured image or it is interrupted while capturing an image, User cannot be selected, you can only switch between Default and Off.

Logo PIN code lock
This function prevents an unauthorized person from changing the screen logo.

Off ........... The screen logo can be changed freely from the Logo Menu (p.50).
On ............ The screen logo cannot be changed without a Logo PIN code.

If you want to change the Logo PIN code lock setting, press the SELECT button and the Logo PIN code dialog box appears. Enter a Logo PIN code by following the steps below. The initial Logo PIN code is set to "4321" at the factory.
Enter a Logo PIN code
Use the Point ▲▼ buttons to enter a number. Press the Point ► button to fix the number and move the red frame pointer to the next box. The number changes to *. If you fixed an incorrect number, use the Point ◄ button to move the pointer to the number you want to correct, and then enter the correct number.

Repeat this step to complete entering a four-digit number.

After entering the four-digit number, move the pointer to Set. Press the SELECT button so that you can start to operate the projector.

If you entered an incorrect Logo PIN code, Logo PIN code and the number (****) will turn red for a moment. Enter the correct Logo PIN code all over again.

Change the Logo PIN code lock setting
Use the Point ▲▼ buttons to switch On or Off, and then press the SELECT button to close the dialog box.

Logo PIN code change
Logo PIN code can be changed to your desired four-digit number. Press the Point ▼ button to select Logo PIN code change and then press the SELECT button. The New Logo PIN code input dialog box appears. Set a new Logo PIN code.

Be sure to note the new Logo PIN code and keep it on hand. If you lost the number, you could no longer change the Logo PIN code setting. For details on PIN code setting, refer to “PIN code lock” on pages 59-60.

CAUTION:
WHEN YOU HAVE CHANGED THE LOGO PIN CODE, WRITE DOWN THE NEW PIN CODE IN COLUMN OF THE LOGO PIN CODE NO.
MEMO ON PAGE 83, AND KEEP IT SECURELY.
SHOULD THE LOGO PIN CODE BE LOST OR FORGOTTEN, THE LOGO PIN CODE SETTING CAN NO LONGER BE CHANGED.
Ceiling
When this function is set to On, the picture will be top/bottom and left/right reversed. This function is used to project the image from a ceiling-mounted projector.

Rear
When this function is set to On, the picture will be left/right reversed. This function is used to project the image from rear of the screen.

HDMI setup
This function is only used for HDMI input source.

Image
Normal: When the output of Digital R/G/B equipment is set to Standard.
Enhanced: When the output of Digital R/G/B equipment is set to Enhanced.

Sound
HDMI: When Digital input source is input, Sound is set to HDMI.
Computer 2: When DVI input source is changed to HDMI input source, Sound is set to Computer 2.

The names for the output setting of Digital R/G/B vary from equipment to equipment. For details, refer to the owner’s manual of your Digital R/G/B equipment. When the black parts of the image are destroyed or stand out, please switch to Normal or Enhanced, and then switch the output type of the HDMI Digital R/G/B output equipment.

Terminal
The COMPUTER IN 2/MONITOR OUT terminal on the back of the projector is switchable for computer 2 input or monitor output. (See page 10)

Computer 2 . . . Computer input
Monitor out . . . Monitor out

Terminal function is not available when selecting Computer 2 to the input source. Change the input source to the others (HDMI or Computer 1 or Video) so that the Terminal function will be available. (pp.30-31, 40-41)
Pointer
You can emphasize a part of the projected image with this function. Use the Point ▲▼ buttons to choose Spotlight (Large, Middle or Small), Arrow, Finger or Dot and press the SELECT button. See "Pointer Function" on page 14.

Standby mode
This function is available when operating the projector via network.

Normal .... Supply the power to the network function even after turning off the projector. You can turn on/off the projector via network, modify network environment, and receive an e-mail about projector status while the projector is powered off.

Eco ........... Select Eco when you do not use the projector via network. The projector's network function will stop when turning off the projector.

Refer to the owner's manual of "Network Set-up and Operation".

✓ Note:
• Factory default is Eco.
• When selecting Normal, the cooling fans may be running depending on the temperature inside the projector even if the projector is turned off.
**Picture in Picture**

This function is used to project two videos simultaneously by placing a separate small sub screen within the main screen. (Picture in Picture combinations provided in this projector are shown on pages 78.) Only the sound on the main picture is heard, the sound on the sub picture cannot be heard. (In P in P, the big picture is main picture, and the small one is sub picture; in P by P, the left picture is main picture, and the right one is sub picture.)

- **Mode**
  - P in P: The sub picture in the main picture.
  - P by P: The sub picture by the main picture.
  - Off: Exit the Picture in Picture menu.

- **Subpicture size**
  - Choose between Large, Small, and Middle.

- **Subpicture position**
  - Set a position for subpicture. This function is used to set Subpicture position as follows:
    - the top left → the bottom left →
    - the bottom right → the top right →

**Selecting the Main picture or Sub picture**

During Picture in Picture mode, and no operation on the On Screen Menu, press the SELECT button to select main or sub picture. (When the sub picture is selected, a red frame will be displayed.)

**Switching of the Input Source**

In the main picture or the sub picture mode, choose input source by pressing the INPUT button on the top control or pressing the COMPUTER, VIDEO, HDMI or NETWORK button on the remote control or through Input Menu operation.

**Operation of the Sub picture**

In Picture in Picture mode, press the SELECT button to select the sub picture (the frame becomes to red), and then use the Point ▲▼◄► buttons to change Subpicture size, switch the Main picture and the Sub picture, and move Subpicture position.

- In Picture in Picture mode, press the Point ▲ button to switch the Main picture and the Sub picture.
- In P in P, press the Point ▼ button to change Subpicture size.
- In P in P, press the Point ◄► buttons to move Subpicture position.

**Note:**

- When the input signal(s) is/are incompatible, X mark will be displayed on the Main/Sub picture.
- When the sub picture is set to the same signal as the main picture, X mark will be displayed.
- **Subpicture position** and **Subpicture size** are only used for P in P.
- When P in P or P by P is set, Total dots is disabled in the PC adjust menu.
- In Picture in Picture mode, the Freeze function is disabled.
- During Picture in Picture mode and the Menu screen is displayed, via the remote control operation, these functions are disabled as below:
  - Change Subpicture size.
  - Move Subpicture position.
  - Switching of the Main picture and Sub picture.
  - Select the Sub picture mode by the SELECT button.
Power management

For reducing power consumption as well as maintaining the lamp life, the Power management function turns off the projection lamp when the projector is not operated for a certain period.

Select one of the following options:

**Ready** .................. When the lamp has been fully cooled down, the POWER indicator changes to green blinking. In this condition, the projection lamp will be turned on if the input signal is reconnected or any button on the top control or remote control is pressed.

**Shut down** ............ When the lamp has been fully cooled down, the power will be turned off.

**Off** ..................... Power management function is off.

**Timer** ................... If the input signal is interrupted and no button is pressed for more than 30 seconds, the timer display with **No signal** appears. It starts the countdown until the lamp is turned off. Use the Point ▲▼ buttons to set the Timer(1~30min).

✓ Note:
Factory default is **Ready: 5 min**.
On start
When this function is set to On, the projector will be automatically turned on just by connecting the AC power cord to a wall outlet.

✓ Note:
Be sure to turn off the projector properly (see “Turning Off the Projector” on page 23). If the projector is turned off in the incorrect sequence, the On start function does not work properly.

Closed caption
Closed Caption is a function that displays the audio portion of a TV program as text on the screen. If the input signal contains closed captions, you can turn on the feature and switch the channels. Press the Point ▲▼ buttons to select Off, CC1, CC2, CC3 or CC4. If the closed caption is not clear, you can change the text from Color to White.

✓ Note:
The Closed Caption is available only under the situation below.
• When the input signal is NTSC of composite and S-video, and the system is set according to the signal or set on Auto.
• The system must be set on NTSC or Auto in Video System Selection. (p.42)
• The icon of Closed caption is displayed in gray while it is not available.
• The Closed caption is unavailable when On-Screen menu and P-Timer are displayed, and Picture in Picture is active.

Press the Point ▲▼ buttons to select Off, CC1, CC2, CC3 or CC4, and then Press the SELECT button.
Remote control

The eight different remote control codes (Code 1-Code 8) are assigned to the projector, the factory-set, initial code (Code 1) and the other seven codes (Code 2 to Code 8). The same code should be set on both the projector and the remote control. For example, operating the projector in Code 7, the remote control code also must be switched to Code 7.

To change the code for the projector
Select a remote control code in this Setting Menu.

To change the code for the remote control:
While holding down the MENU button, press the IMAGE button the number of times corresponding to the remote control code for the projector. See “Remote Control Code” on page 13.

✓ Note:
- When different codes are set on the projector and on the remote control, any operation cannot be made. In that case, switch the code on the remote control to fit the code on the projector.
- If the batteries are removed from the remote control for a long period of time, the remote control code will be reset.
Security (Key lock and PIN code lock)
This function allows you to use the Key lock and PIN code lock function to set the security for the projector operation.

**Key lock**
This function locks the top control and remote control buttons to prevent operation by unauthorized persons.

- ..... Unlocked.
- ..... Lock the operation of the top control. To unlock, use the remote control.
- ..... Lock the operation of the remote control. To unlock, use the top control.

If the top control accidentally becomes locked and you do not have the remote control nearby or there is something wrong with your remote control, contact the dealer where you purchased the projector or the service center.

**PIN code lock**
This function prevents the projector from being operated by unauthorized persons and provides the following setting options for security.

- Off .......... Unlocked.
- On1 ........ Enter the PIN code every time turning on the projector.
- On2 ........ Enter the PIN code to operate the projector once the power cord is disconnected; as long as the AC power cord is connected, the projector can be operated without a PIN code.

Whenever you change the PIN code lock setting or the PIN code (the four-digit number), you are required to enter the PIN code. The "1234" is set as the initial PIN code at the factory.

If you want to change the PIN code lock setting, Press the SELECT button and the PIN code dialog box appears.
Enter a PIN code
Use the Point ▲▼ buttons to enter a number. Press the Point ► button to fix the number and move the red frame pointer to the next box. The number changes to *. If you fixed an incorrect number, use the Point ◄ button to move the pointer to the number you want to correct, and then enter the correct number.

Repeat this step to complete entering a four-digit number.

After entering the four-digit number, move the pointer to Set. Press the SELECT button so that you can start to operate the projector.

If you entered an incorrect PIN code, PIN code and the number (****) will turn red for a moment. Enter the correct PIN code all over again.

Change the PIN code lock setting
Use the Point ▲▼ buttons to select Off, On1 or On2. Press the SELECT button to close the dialog box.

PIN code change
The PIN code can be changed to your desired four-digit number. Press the Point ▼ button to select PIN code change and press the SELECT button. The New PIN code input dialog box appears. Set a new PIN code.

CAUTION:
WHEN YOU HAVE CHANGED THE PIN CODE, WRITE DOWN THE NEW PIN CODE IN COLUMN OF THE PIN CODE NO. MEMO ON PAGE 83, AND KEEP IT SECURELY. IF YOU FORGET YOUR PIN CODE, THE PROJECTOR CAN NO LONGER BE STARTED.
Fan
This function provides the following options in the cooling fans’ operation when the projector is turned off (p.23).
L1 ...... Normal operation
L2 ...... Slower and lower-sound than the normal operation (L1), but it takes more time to cool the projector down.

Fan control
Choose the running speed of cooling fans from the following options according to the ground elevation under which you use the projector.
Off.......Normal speed. Set this function to Off when using the projector in non-high altitude environment.
On 1... Faster than Off mode. Select this mode when using the projector in high altitudes (about 1,200 meters or more above the sea level) where the fans have less cooling effect.
On 2....Faster than On 1 mode. Select this mode when using the projector in higher altitudes than above where the fans have lesser cooling effect.
On 3....Be sure to set the Lamp control in High and the Fan control in On 3 when using the projector inclined at between +40 degrees to +140 degrees to the horizontal plane at altitudes between 0 and approximately 1,600 meters above sea level.

✓ Note:
• The fan noise becomes louder in On1, On2 and On3.
• Setting Fan control to On1, On2 or On3 affects L2 operation in Fan.

Lamp counter
This function is used to display the cumulative lamp operating time and reset the lamp counter.
When the lamp life is left 0 hour, the Lamp replacement icon (Fig.1) will appear on the screen, indicating that the end of lamp life is reached.
When replacing the projection lamp, reset lamp counter. See "Resetting the Lamp Counter" on page 68.

✓ Note:
The Lamp replacement icon (Fig.1) will not appear when the Display function is set to Off (p.49), during “Freeze” (p.28) or “No show” (p.29).
Filter counter
This function is used to set a frequency for the filter cleaning.
When the projector reached a specified time between cleanings, a Filter warning icon appears on the screen, notifying the cleaning is necessary. After cleaning the filter, be sure to select Reset and set the timer. The Filter warning icon will not turn off until the filter counter is reset.

For details about resetting the timer, refer to "Resetting the Filter Counter" on page 65.

Fig.1 Filter warning icon

Filter warning icon appears on the screen at a set time.

✓ Note:
This icon also appears at turning on.

✓ Note:
The Filter warning icon (Fig.1) will not appear when the Display function is set to Off (p.49), during “Freeze”(p.28), or "No show" (p.29).

Warning log
This function records anomalous operations while the projector is in operation and use it when diagnosing faults. Up to 10 warning logs are displayed with the latest warning message at the top of the list, followed by previous warning messages in chronological order.

✓ Note:
When the Factory default function is executed, all the warning log records will be deleted.

Factory default
This function returns all setting values except for the User logo, PIN code lock, Logo PIN code lock and Filter counter to the factory default settings.

Filter counter
Warning log
Factory default
## Information

### Input Source Information Display

The Information Menu is used for checking the status of the image signal being projected and the operation of the projector.

#### Direct Operation

Press the INFO. button on the remote control to display the Information Menu.

#### Menu Operation

Press the Point ▲▼ buttons to select Information. The Information Menu is displayed.

See below for displayed information.

#### Input

The selected input source is displayed.

**H-sync freq.**
The horizontal frequency of the input signal is displayed in KHz or - - - - - when no signal.

**V-sync freq.**
The vertical frequency of the input signal is displayed in Hz or - - - - - when no signal. Numbers of Hz doubles when during Interlace.

**Screen**
The selected screen size is displayed.

**Language**
The selected language is displayed.

**Lamp status**
The selected lamp mode is displayed.

**Lamp counter**
The cumulative lamp operating time is displayed.

**Power management**
Off, Ready, Shut down or Timer is displayed.

**Key lock**
The selected Key lock icon is displayed.

**PIN code lock**
Off, On 1 or On 2 is displayed.

**Remote control**
The selected remote code is displayed.
WARNING indicator

The WARNING indicator shows the state of the function which protects the projector. Check the state of the WARNING indicator and the POWER indicator to take proper maintenance.

**The projector is shut down and the WARNING indicator is blinking red.**

When the temperature inside the projector reaches a certain level, the projector will be automatically shut down to protect the inside of the projector. The POWER indicator is blinking while the projector is being cooled down. When the projector has cooled down enough (to its normal operating temperature), it can be turned on again by pressing the POWER ON/STAND-BY button.

✓ Note:

The WARNING indicator continues to blink even after the temperature inside the projector returns to normal. When the projector is turned on again, the WARNING indicator stops blinking.

Then check the matters below:

- Did you provide appropriate space for the projector to be ventilated? Check the installing condition to see if the air vents of the projector are not blocked.
- Has the projector been installed near an Air-Conditioning/Heating Duct or Vent? Move the installation of the projector away from the duct or vent.
- Are the filters clean? Clean the filters periodically.

**The projector is shut down and the WARNING indicator lights red.**

When the projector detects an abnormal condition, it is automatically shut down to protect the inside of the projector and the WARNING indicator lights red. In this case, unplug the AC power cord and reconnect it, and then turn the projector on once again to verify operation. If the projector cannot be turned on and the WARNING indicator still lights red, unplug the AC power cord and contact the service station.

CAUTION

DO NOT LEAVE THE PROJECTOR WITH THE AC POWER CORD CONNECTED UNDER AN ABNORMAL CONDITION. IT MAY RESULT IN FIRE OR ELECTRIC SHOCK.
Cleaning the Filters

Filter prevents dust from accumulating on the optical elements inside the projector. Should the filters become clogged with dust particles, it will reduce cooling fans’ effectiveness and may result in internal heat buildup and adversely affect the life of the projector. If a Filter warning icon appears on the screen, clean the filters immediately. Clean the filters by following the steps below.

1. Turn off the projector, and unplug the AC power cord from the AC outlet.
2. Turn the projector over and remove the filters by pulling the latches upward.
3. Gently clean the filters by using a brush or rinse it softly.
4. When rinsing the filters, dry them well. Replace the filters properly. Make sure that the filters are fully inserted to the projector.

**CAUTION**
Do not operate the projector with the filters removed. Dust may accumulate on the optical elements degrading picture quality. Do not put anything into the air vents. Doing so may result in malfunction of the projector.

**RECOMMENDATION**
We recommend avoiding dusty/smoky environments when you operate the projector. Usage in these environments may cause poor image quality. When using the projector under dusty or smoky conditions, dust may accumulate on a lens, LCD panels, or optical elements inside the projector degrading the quality of a projected image. When the symptoms above are noticed, contact your authorized dealer or service station for proper cleaning.

Resetting the Filter Counter

Be sure to reset the Filter counter after cleaning or replacing the filters.

1. Press the MENU button to display the On-Screen Menu. Use the Point ▲▼ buttons to select Setting and then press the Point ► or the SELECT button.
2. Use the Point ▲▼ buttons to select Filter counter and then press the SELECT button. Use the Point ▲▼ buttons to select Filter counter reset and then press the SELECT button. Filter counter Reset? appears. Select Yes to continue.
3. Another confirmation dialog box appears, select Yes to reset the Filter counter.
Slide Shutter

Slide Shutter is provided to protect the surface of the lens against scratches and dirt. When you are not using the projector, close the Slide Shutter. To open or close, slide the Slide Shutter on the front of the cabinet. Do not close the shutter when the projection lamp is on.

Cleaning the Projection Lens

Unplug the AC power cord before cleaning.

Gently wipe the projection lens with a cleaning cloth that contains a small amount of non-abrasive camera lens cleaner or use a lens cleaning paper or commercially available air blower to clean the lens.

Avoid using an excessive amount of cleaner. Abrasive cleaners, solvents or other harsh chemicals might scratch the surface of the lens.

Cleaning the Projector Cabinet

Unplug the AC power cord before cleaning.

Gently wipe the projector body with a soft dry cleaning cloth. When the cabinet is heavily soiled, use a small amount of mild detergent and finish with a soft dry cleaning cloth. Avoid using an excessive amount of cleaner. Abrasive cleaners, solvents or other harsh chemicals might scratch the surface of the cabinet.

When the projector is not in use, put the projector in an appropriate carrying case to protect it from dust and scratches.
Lamp Replacement

When the projection lamp of the projector reaches its end of life, the Lamp replacement icon appears on the screen and LAMP REPLACE indicator lights yellow. Replace the lamp with a new one promptly. The timing when the LAMP REPLACE indicator should light is depending on the lamp mode.

Note:
The Lamp replacement icon will not appear when the Display function is set to Off (p.49), during “Freeze” (p.28), or “No show” (p.29).

CAUTION

Allow a projector to cool for at least 45 minutes before you open the Lamp Cover. The inside of the projector can become very hot.

Follow these steps to replace the lamp.

1. Turn off the projector and unplug the AC power cord. Let the projector cool for at least 45 minutes.
2. Remove the screw and open the lamp cover.
3. Loosen the two (2) screws that secure the lamp. Lift the lamp out of the projector by using the handle.
4. Replace the lamp with a new one and secure the two (2) screws. Make sure that the lamp is set properly. Close the lamp cover and secure the screw.
5. Connect the AC power cord to the projector and turn on the projector.
6. Reset the lamp counter. See “Resetting the Lamp Counter” on the next page.

ORDER REPLACEMENT LAMP

Replacement lamp can be ordered through your dealer. When ordering a projection lamp, give the following information to the dealer.

- Model No. of your projector : LC-WB42N
- Replacement Lamp Type No. : POA-LMP111
  (Service Parts No. 610 333 9740)
Maintenance and Cleaning

Resetting the Lamp Counter

Be sure to reset the Lamp counter after the lamp is replaced. When the Lamp counter is reset, the LAMP REPLACE indicator stops lighting and the Lamp replacement icon disappears.

1. Press the MENU button to display the On-Screen Menu. Use the Point ▲▼ buttons to select Setting and then press the Point ► or the SELECT button.

2. Use the Point ▲▼ buttons to select Lamp counter and then press the SELECT button. Use the Point ▲▼ buttons to select Lamp counter reset and then press SELECT button. Lamp counter Reset? appears. Select Yes to continue.

3. Another confirmation dialog box appears, select Yes to reset the Filter counter.

✓ Note:
Do not reset the Lamp counter without implementing lamp replacement. Be sure to reset the Lamp counter only after replacing the lamp.

LAMP HANDLING PRECAUTIONS
This projector uses a high-pressure lamp which must be handled carefully and properly. Improper handling may result in accidents, injury, or create a fire hazard.

● Lamp life may differ from lamp to lamp and according to the environment of use. There is no guarantee of the same life for each lamp. Some lamps may fail or terminate their life in a shorter period of time than other similar lamps.

● If the projector indicates that the lamp should be replaced, i.e., if the LAMP REPLACE indicator lights up, replace the lamp with a new one IMMEDIATELY after the projector has cooled down. (Follow carefully the instructions in the Lamp Replacement section of this manual.) Continuous use of the lamp with the LAMP REPLACE indicator lighted may increase the risk of lamp explosion.

● A Lamp may explode as a result of vibration, shock or degradation as a result of hours of use as its lifetime draws to an end. Risk of explosion may differ according to the environment or conditions in which the projector and lamp are being used.

IF A LAMP EXPLODES, THE FOLLOWING SAFETY PRECAUTIONS SHOULD BE TAKEN.
If a lamp explodes, disconnect the projector’s AC plug from the AC outlet immediately. Contact an authorized service station for a checkup of the unit and replacement of the lamp. Additionally, check carefully to ensure that there are no broken shards or pieces of glass around the projector or coming out from the cooling air circulation holes. Any broken shards found should be cleaned up carefully. No one should check the inside of the projector except those who are authorized trained technicians and who are familiar with projector service. Inappropriate attempts to service the unit by anyone, especially those who are not appropriately trained to do so, may result in an accident or injury caused by pieces of broken glass.
Appendix

Troubleshooting

Before calling your dealer or service center for assistance, check the items below once again.

– Make sure you have properly connected the projector to peripheral equipment as described on pages 17-19.
– Make sure all equipment is connected to AC outlet and the power is turned on.
– When the projector does not project an image from the connected computer, restart the computer.

<table>
<thead>
<tr>
<th>Problem:</th>
<th>– Solutions</th>
</tr>
</thead>
</table>
| No power | – Plug the power cord of the projector into the AC outlet.  
– See if the POWER indicator lights red.  
– Wait until the POWER indicator stops blinking to turn on the projector again. The projector can be turned on after the POWER indicator turns red. See page 21.  
– Check the WARNING indicator. If the WARNING indicator lights red, projector cannot be turned on. See page 64.  
– Check the projection lamp. See page 67.  
– Unlock the Key lock function for the projector. See page 59. |
| The initial display is not shown. | – Make sure Off or Countdown off is not chosen at display function. See page 49. |
| The initial display is not same as the default set. | – Make sure User or Off is not chosen at Logo (select) function. See page 50. |
| Input signal switches automatically. (or does not switch automatically) | – Make sure Input search function is adjusted properly. See page 48. |
| When the projector is on and you press the input button, an icon other than the Lamp mode icon appears. | – That is the Filter warning icon. See page 62. |
| An icon other than Input mode or Lamp mode icon appears. | – That is the Lamp replacement icon or the Filter warning icon. See pages 61, 62. |
| Image is out of focus. | – Adjust focus of the projector. See page 26.  
– Provide proper distance between the projector and the projection screen. See page 16.  
– Check the projection lens to see if it needs cleaning. See page 66.  
– Moving the projector from a cool to warm place may result in moisture condensation on the projection lens. In such cases, leave the projector off and wait until condensation evaporates. |
| Image is Left/Right reversed.  
Image is Top/Bottom reversed. | – Check the Ceiling/Rear function. See page 53.  
– Check the Ceiling function. See page 53. |
| Picture is not bright enough. | – Check if the Contrast or Brightness are adjusted properly. See pages 37, 44.  
– Check if Image mode is selected properly. See pages 36, 43.  
– Check the lamp control function. See pages 28, 58.  
– Check the LAMP REPLACE indicator. If it lights, the end of lamp life is approaching. Replace the lamp with a new one promptly. See page 67. |
### Appendix

| No image | – Check the connection between your computer or video equipment and the projector. See pages 17-19.  
|          | – See if the input signal is correctly output from your computer. Some laptop computers may need to change the setting for monitor output when connecting to a projector. See your computer's instruction manual for the setting.  
|          | – It takes about 30 seconds to display an image after turning on the projector. See page 21.  
|          | – Check the Input signal, color system, video system or computer system mode.  
|          | – Make sure the temperature is not out of the specified Operating Temperature (41°F–95°F [5°C–35°C]).  
|          | – When No Show function is operating, the image cannot be displayed. Press the NO SHOW button or any other button on the remote control. |

| No sound | – Check the audio cable connection from audio input source.  
|          | – Adjust the audio source.  
|          | – Press the Volume + button. See page 27.  
|          | – Press the Mute button. See page 27.  
|          | – When the AUDIO OUT is plugged-in, the projector's built-in speaker is not available.  
|          | – Is the image projected? You will hear the sound only when the image is projected. |

| The color is strange. | – Check the Input signal, color system, video system or computer system mode.  
|                      | – Make sure Blackboard is not selected on Image select menu. See pages 36, 43. |

| Some displays are not seen during the operation. | – Check the Display function. See page 49. |

| Auto PC adjustment function does not work. | – Check the Input signal. Auto PC adj.function can not work when 480p, 575p, 720p, 480i, 575i, 1035i or 1080i is selected. See page 33.  
|                                              | – The icon is not available in grayout when the digital signal is input. |

| The setting does not remain after turning off power. | – Make sure you selected Store after adjusting setting. Some settings can not be stored if not registered with Store. See page 38, 45. |

| Power management does not work. | – Power management function can not work while Freeze or No Show function is running. See page 56. |

| Capture function does not work. | – Check the connection and the input signal to see if there is signal. |

| Auto setup does not work properly. | – Make sure Off is not selected at any function of "Auto setup". See page 48.  
|                                    | – Make sure On is not selected at the Ceiling function. See page 53. |

<p>| Auto keystone function does not work even when the projector is tipped. | – Make sure the Auto keystone function is not set to Manual. Press the AUTO SETUP/CANCEL button on the top control. See pages 26, 48. |</p>

**WARNING:**
High voltages are used to operate this projector. Do not attempt to open the cabinet.

If problems still persist after following all operating instructions, contact the dealer where you purchased the projector or the service center. Specify the model number and explain about the problem. We will advise you how to obtain service.

## Indicators and Projector Condition

Check the indicators for projector condition.

<table>
<thead>
<tr>
<th>Indicators</th>
<th>Projector Condition</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="POWER red/green" /> <img src="image" alt="WARNING red" /> <img src="image" alt="LAMP REPLACE yellow" /></td>
<td>The projector is off. (The AC power cord is unplugged.)</td>
</tr>
<tr>
<td><img src="image" alt="POWER red/green" /> <img src="image" alt="WARNING red" /></td>
<td>The projector is in stand-by mode. Press the ON/STAND-BY button to turn on the projector.</td>
</tr>
<tr>
<td><img src="image" alt="POWER red/green" /> <img src="image" alt="WARNING red" /></td>
<td>The projector is operating normally.</td>
</tr>
<tr>
<td><img src="image" alt="POWER red/green" /> <img src="image" alt="WARNING red" /> <img src="image" alt="LAMP REPLACE yellow" /></td>
<td>The projector is preparing for stand-by or the projection lamp is being cooled down. The projector cannot be turned on until cooling is completed and the POWER indicator stops blinking.</td>
</tr>
<tr>
<td><img src="image" alt="POWER red/green" /> <img src="image" alt="WARNING red" /> <img src="image" alt="LAMP REPLACE yellow" /></td>
<td>The projector is in the Power management mode.</td>

- ![POWER red/green](image) ![WARNING red](image) ![LAMP REPLACE yellow](image)

When the projection lamp reaches its end of life, the LAMP REPLACE indicator lights yellow. When this indicator lights yellow, replace the projection lamp with a new one promptly.
## Compatible Computer Specifications

Basically this projector can accept the signal from all computers with the V-, H-Frequency mentioned below and less than 140 MHz of Dot Clock for analog signal and 110 MHz of Dot Clock for digital signal.

When selecting these modes, PC adjustment can be limited.

When the input signal is Analog, refer to the chart below.

- o: Picture in Picture combinations are enabled
- -: Picture in Picture combinations are disabled

**Note:**
- When the input signal(s) is/are incompatible, X mark will be displayed on the Main/Sub picture.
- Depending on the frequency or signal type of PC/AV input, the display resolution may be lowered or images may not be displayed on the Main/Sub picture.
  - <Display resolution is lowered when:>
    - Inputting PC analog signals: Between 100-140 MHz
  - <Images are not displayed and X mark appears when:>
    - Inputting PC analog signals: More than 140MHz
    - Inputting PC digital signals: More than 100MHz
    - Inputting AV digital signals: 1080p
  - <Picture in Picture is disabled when:>
    - Inputting signal formats: SXGA20, WUXGA 1, WUXGA 2, WSXGA+ 1, WXGA+2, UXGA 1, UXGA 2, UXGA 3, UXGA4, D-1080p
# Technical Specifications

## Mechanical Information
- **Projector Type**: Multi-media Projector
- **Dimensions (W x H x D)**: 13.16” x 3.09” x 10.30” (334.2 x 78.4 x 261.5mm) (Not including protrusions)
- **Net Weight**: 8.2 lbs (3.7 kg)
- **Feet Adjustment**: 0˚ to 8.9˚

## Panel Resolution
- **LCD Panel System**: 0.74” TFT Active Matrix type, 3 panels
- **Panel Resolution**: 1,280 x 800 dots
- **Number of Pixels**: 3,072,000 (1,280 x 800 x 3 panels)

## Signal Compatibility
- **Color System**: PAL, SECAM, NTSC, NTSC4.43, PAL-M, and PAL-N
- **High Definition TV Signal**: 480i, 480p, 575i, 575p, 720p, 1035i, and 1080i
- **Scanning Frequency**: H-sync. 15 kHz–100 kHz, V-sync. 50–100 Hz

## Optical Information
- **Projection Image Size (Diagonal)**: Adjustable from 40” to 300”
- **Throw Distance**: 3.3’ (1.0m) - 39.7’ (12.1m)
- **Projection Lens**: F1.7–2.5 lens with f=19.2 mm–30.2 mm with manual zoom and focus
- **Projection Lamp**: 275 W

## Interface
- **Video Input Jack**: RCA Type x 1
- **S-video Input Jack**: Mini DIN 4 pin x 1
- **Audio Input Jacks**: RCA Type x 2
- **Computer 1 /Computer2 Audio Input Jacks**: Mini Jack x 2
- **Computer In 1/ Component Input Terminal**: Mini D-sub 15 pin x 1
- **Computer In 2/MONITOR OUT Terminal**: Mini D-sub 15 pin x 1
- **Control port**: D-sub 9 pin x 1
- **USB Connectors**: USB connector (Series A x1, Series B x 1)
- **Audio Output Jack**: Mini Jack (stereo) x 1 (variable)
- **LAN Connection Terminal**: 100 Base-TX (100Mbps)/10 Base-T (10Mbps), RJ45
- **HDMI**: x 1

## Audio
- **Internal Audio Amp**: 1.0 W RMS
- **Built-in Speaker**: 1 speaker, ø1.10” (28 mm)

## Power
- **Voltage and Power Consumption**: AC 100–120 V (4.0A Max. Ampere), 50/60 Hz (The U.S.A and Canada)
  AC 200–240 V (2.0A Max. Ampere), 50/60 Hz (Continental Europe and The U.K.)

## Operating Environment
- **Operating Temperature**: 41˚F–95˚F (5 ºC–35 ºC)
- **Storage Temperature**: 14˚F–140˚F (-10˚C–60˚C)

## Remote Control
- **Battery**: AAA or LR03 Type x 2
- **Operating Range**: 5 m±30˚
- **Dimensions**: 45 mm (W) x 23 mm (H) x 145 mm (D)
- **Net Weight**: 3.5 oz 99 g (including batteries)
- **Laser Pointer**: Class II Laser (Max. Output: 1 mW/Wave length: 640–660 nm)
**Accessories**
- Owner’s Manual (CD-ROM)
- Quick Reference Guide
- Safety Manual
- AC Power Cord
- Remote Control and Batteries
- VGA Cable
- PIN Code Label
- Network Application (CD-ROM)
- Soft Carrying Case
- USB thumb drive for Auto Capture
- Case (for USB thumb drive)
- Hook and Loop Fastener
- Remote control cable

- The specifications are subject to change without notice.
- LCD panels are manufactured to the highest possible standards. Even though 99.99% of the pixels are effective, a tiny fraction of the pixels (0.01% or less) may be ineffective by the characteristics of the LCD panels.

**Optional Parts**

The parts listed below are optionally available. When ordering those parts, specify the item name and Model No. to the sales dealer.

PJ Link Notice

This projector is compliant with PJLink Standard Class 1 of JBMIA (Japan Business Machine and Information System Industries Association). This projector supports all commands defined by PJLink Class 1 and is verified conformance with PJLink Standard Class 1.

For PJ Link password, see page 51 on the owner’s manual of “Network Set-up and Operation.”

| 4 | ----- | 8 | ----- |
PIN Code Number Memo

Write down the PIN code number in the column below and keep it with this manual securely. If you forgot or lost the number and unable to operate the projector, contact the service station.

| PIN Code Lock No. |  |  |  | Factory default set No: 1 2 3 4* |
| Logo PIN Code Lock No. |  |  |  | Factory default set No: 4 3 2 1* |

*Should the four-digit number be changed, the factory set number will be invalid.

While the projector is locked with the PIN code.

Put the label below (supplied) on in a prominent place of the projector's body while it is locked with a PIN code.

USB Thumb Drive Case

While the USB thumb drive is not in use, put it in the USB Thumb Drive Case to prevent lose USB thumb drive. Use hook and loop fastener, the USB Thumb Drive Case will be a fixed place on the projector.

USB thumb drive case (supplied)  Hook and loop fastener (supplied)
