Features and Design

This Multimedia Projector is designed with the most advanced technology for portability, durability, and ease of use. This projector utilizes built-in multimedia features, a palette of 16.77 million colors, and matrix liquid crystal display (LCD) technology.

◆ Compact Design

This projector is designed compact in size and weight. It is easy to carry and work anywhere you wish to use.

◆ Compatibility

The projector widely accepts various video and computer input signals including: Computers, 6 Color systems (PAL, SECAM, NTSC, NTSC4.43, PAL-M, and PAL-N), Component video, S-Video and RGB scart.

◆ Simple Computer System Setting

The projector has the Multi-scan system to conform to almost all computer output signals quickly. (p.6)

◆ Digital Zoom (for Computer)

The digital zoom function expands (to approx. 16 times of the screen size) or compresses (to approx. a half of the screen size) the image size, allowing you to focus on crucial information during the presentation. (p.26)

◆ Noise reduction function

The Noise reduction function helps you to reduce the contained noise on the screen to get smoother images. (p.34)

◆ Blackboard Function

Blackboard* can be used as a projection screen.

*The board color is limited to Green. (p.30, 38)

◆ Quick Termination

The AC power cord can be unplugged immediately after turning off the projector without waiting for the termination of the cooling fan rotation.

◆ Multilanguage Menu Display

Operation menu is available in 16 languages: English, German, French, Italian, Spanish, Portuguese, Dutch, Swedish, Finnish, Polish, Hungarian, Romanian, Russian, Chinese, Korean, and Japanese. (p.4)

◆ Logo Function

The Logo function allows you to customize the screen logo with the Logo functions. (p.43-45) You can capture an image for the screen logo, choose a logo between provided and captured.

◆ Switchable Interface Terminal

The projector provides a switchable interface terminal. You can use the terminal as computer input or monitor output conveniently. (p.47)

◆ Power Management

The Power management function reduces power consumption and maintains the lamp life. (p.47)

◆ Lamp Control

Brightness of the projection lamp can be selected. (p.48)

◆ Security Function

The Security function helps you to ensure the security with the Key lock (p.49) and the PIN code lock (p.18, 49, 50) functions. You can lock the operation on the projector and the remote control. Also you can prevent unauthorized persons from using the projector.

◆ Input Search Function

Input signal can be searched automatically. (p.46)

✔ Note:

• The On-Screen Menu and figures in this manual may differ slightly from the product.
• The contents of this manual are subject to change without notice.

Before operating this projector, read this manual thoroughly and operate the projector properly. This projector provides many convenient features and functions. Operating the projector properly enables you to manage those features and maintains it in better condition for a considerable time. Improper operation may result in not only shortening the product-life, but also malfunctions, fire hazard, or other accidents. If your projector seems to operate improperly, read this manual again, check operations and cable connections and try the solutions in the "Troubleshooting" section in the end of this manual. If the problem still persists, contact the dealer where you purchased the projector or the service center.

***CAUTION***

WARNING: TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE COVER (OR BACK). NO USER-SERVICEABLE PARTS INSIDE EXCEPT LAMP REPLACEMENT. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.

THIS SYMBOL INDICATES THAT DANGEROUS VOLTAGE CONSTITUTING A RISK OF ELECTRIC SHOCK IS PRESENT WITHIN THIS UNIT.

THIS SYMBOL INDICATES THAT THERE ARE IMPORTANT OPERATING AND MAINTENANCE INSTRUCTIONS IN THE OWNER'S MANUAL WITH THIS UNIT.

NOTE: This symbol and recycle system are applied to EU countries only and not applied to the countries in the other area of the world.

Your EIKI product is designed and manufactured with high quality materials and components which can be recycled and reused. This symbol means that electrical and electronic equipment, at their end-of-life, should be disposed of separately from your household waste.

Please dispose of this equipment at your local community waste collection/recycling centre. In the European Union there are separate collection systems for used electrical and electronic products. Please help us to conserve the environment we live in!
All the safety and operating instructions should be read before the product is operated.

Read all of the instructions given here and retain them for later use. Unplug this projector from AC power supply before cleaning. Do not use liquid or aerosol cleaners. Use a damp cloth for cleaning.

Follow all warnings and instructions marked on the projector.

For added protection to the projector during a lightning storm, or when it is left unattended and unused for long periods of time, unplug it from the wall outlet. This will prevent damage due to lightning and power line surges.

Do not expose this unit to rain or use near water... for example, in a wet basement, near a swimming pool, etc...

Do not use attachments not recommended by the manufacturer as they may cause hazards.

Do not place this projector on an unstable cart, stand, or table. The projector may fall, causing serious injury to a child or adult, and serious damage to the projector. Use only with a cart or stand recommended by the manufacturer, or sold with the projector. Wall or shelf mounting should follow the manufacturer's instructions, and should use a mounting kit approved by the manufacturers.

An appliance and cart combination should be moved with care. Quick stops, excessive force, and uneven surfaces may cause the appliance and cart combination to overturn.

Slots and openings in the back and bottom of the cabinet are provided for ventilation, to ensure reliable operation of the equipment and to protect it from overheating.

The openings should never be covered with cloth or other materials, and the bottom opening should not be blocked by placing the projector on a bed, sofa, rug, or other similar surface. This projector should never be placed near or over a radiator or heat register.

This projector should not be placed in a built-in installation such as a book case unless proper ventilation is provided.

Never push objects of any kind into this projector through cabinet slots as they may touch dangerous voltage points or short out parts that could result in a fire or electric shock. Never spill liquid of any kind on the projector.

Do not install the projector near the ventilation duct of air-conditioning equipment.

This projector should be operated only from the type of power source indicated on the marking label. If you are not sure of the type of power supplied, consult your authorized dealer or local power company.

Do not overload wall outlets and extension cords as this can result in fire or electric shock. Do not allow anything to rest on the power cord. Do not locate this projector where the cord may be damaged by persons walking on it.

Do not attempt to service this projector yourself as opening or removing covers may expose you to dangerous voltage or other hazards. Refer all servicing to qualified service personnel.

Unplug this projector from wall outlet and refer servicing to qualified service personnel under the following conditions:

a. When the power cord or plug is damaged or frayed.
b. If liquid has been spilled into the projector.
c. If the projector has been exposed to rain or water.
d. If the projector does not operate normally by following the operating instructions. Adjust only those controls that are covered by the operating instructions as improper adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore the projector to normal operation.
e. If the projector has been dropped or the cabinet has been damaged.
f. When the projector exhibits a distinct change in performance-this indicates a need for service.

When replacement parts are required, be sure the service technician has used replacement parts specified by the manufacturer that have the same characteristics as the original part. Unauthorized substitutions may result in fire, electric shock, or injury to persons.

Upon completion of any service or repairs to this projector, ask the service technician to perform routine safety checks to determine that the projector is in safe operating condition.
Safety Instructions

Air Circulation

Openings in the cabinet are provided for ventilation and to ensure reliable operation of the product and to protect it from overheating, and these openings must not be blocked or covered.

---

CAUTION

Hot air is exhausted from the exhaust vent. When using or installing the projector, the following precautions should be taken.
– Do not put any flammable object or spray can near the projector, hot air is exhausted from the ventilation holes.
– Keep the exhaust vent at least 3' (1 m) away from any objects.
– Do not touch a peripheral part of the exhaust vent, especially screws and metallic part. This area will become hot while the projector is being used.
– Do not put anything on the cabinet. Objects put on the cabinet will not only get damaged but also cause fire hazard by heat.

Cooling fans are provided to cool down the projector. The fans' running speed is changed according to the temperature inside the projector.

---

Installing the Projector in Proper Position

Install the projector properly. Improper Installation may reduce the lamp life and cause a fire hazard.

Do not tilt the projector more than 20 degrees from side to side.

Do not point the projector up to project an image.

Do not point the projector down to project an image.

Do not put the projector on either side to project an image.

---

Moving the Projector

When moving the projector, replace the lens cover and retract the adjustable feet to prevent damage to the lens and cabinet. When the projector is not in use for an extended period, put it into a suitable case to protect the projector.

When handling the projector, do not drop, bump, subject it to strong forces, or put other things on the cabinet.

---

USE CAUTION IN CARRYING OR TRANSPORTING THE PROJECTOR

– Do not drop or bump the projector, otherwise damages or malfunctions may result.
– When carrying the projector, use a suitable carrying case.
– Do not transport the projector by using a courier or transport service in an unsuitable transport case. This may cause damage to the projector.
  To transport the projector through a courier or transport service, consult your dealer for their information.
– Do not put the projector in a case before the projector is cooled enough.
Compliance

Federal Communications Commission Notice
Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Use of shielded cable is required to comply with class B limits in Subpart B of Part 15 of FCC Rules.
Do not make any changes or modifications to the equipment unless otherwise specified in the instructions. If such changes or modifications should be made, you could be required to stop operation of the equipment.

Model Number: LC-XB31/LC-XB33
Trade Name: EIKI

AC Power Cord Requirement
The AC Power Cord supplied with this projector meets the requirement for use in the country you purchased it.

AC Power Cord for the United States and Canada:
AC Power Cord used in the United States and Canada is listed by the Underwriters Laboratories (UL) and certified by the Canadian Standard Association (CSA).
AC Power Cord has a grounding-type AC line plug. This is a safety feature to be sure that the plug will fit into the power outlet. Do not try to defeat this safety feature. Should you be unable to insert the plug into the outlet, contact your electrician.

The AC Power Cord for the United Kingdom:
This cord is already fitted with a moulded plug incorporating a fuse, the value of which is indicated on the pin face of the plug. Should the fuse need to be replaced, an ASTA approved BS 1362 fuse must be used of the same rating, marked thus  ASA. If the fuse cover is detachable, never use the plug with the cover omitted. If a replacement fuse cover is required, ensure it is of the same colour as that visible on the pin face of the plug (i.e. red or orange). Fuse covers are available from the Parts Department indicated in your User Instructions. If the plug supplied is not suitable for your socket outlet, it should be cut off and destroyed.
The end of the flexible cord should be suitably prepared and the correct plug fitted. (See Over)
WARNING: A PLUG WITH BARE FLEXIBLE CORD IS HAZARDOUS IF ENGAGED IN A LIVE SOCKET OUTLET.
The Wires in this mains lead are coloured in accordance with the following code:
Green-and-yellow . . . . . . . . . Earth
Blue . . . . . . . . . . . . . . . . . Neutral
Brown . . . . . . . . . . . . . . . Live
As the colours of the wires in the mains lead of this apparatus may not correspond with the coloured markings identifying the terminals in your plug proceed as follows:
The wire which is coloured green-and-yellow must be connected to the terminal in the plug which is marked by the letter E or by the safety earth symbol  or coloured green or green-and-yellow.
The wire which is coloured blue must be connected to the terminal which is marked with the letter N or coloured black.
The wire which is coloured brown must be connected to the terminal which is marked with the letter L or coloured red.
WARNING: THIS APPARATUS MUST BE EARTHED.

THE SOCKET-OUTLET SHOULD BE INSTALLED NEAR THE EQUIPMENT AND EASILY ACCESSIBLE.

Part Names and Functions

Rear Terminal

1. SERVICE PORT
   - This jack is used to service the projector.

2. COMPUTER IN 1/COMPONENT IN
   - Connect output signal from a computer, RGB scart 21-pin video output, or component video output to this terminal. (p15, 17)
   - When the cable is of the longer variety, it is advisable to use this terminal and not COMPUTER IN 2/MONITOR OUT.

3. COMPUTER IN 2 / MONITOR OUT
   - This terminal is switchable and can be used for input from a computer or output the incoming RGB analog signal from COMPUTER IN 1/COMPONENT IN terminal to the other monitor.
   - Set the terminal up as either Computer input or Monitor output properly. (Used for Monitor out, this terminal outputs only incoming signal from COMPUTER IN 1/COMPONENT IN terminal.) (p15, 17, 47)

4. S-VIDEO IN
   - Connect the S-VIDEO output from video equipment to this jack. (p16)

5. AUDIO IN
   - Connect the audio output from video equipment connected to 4 or 8 to this jack. (When the audio output is monaural, connect it to L (MONO) jack.) (p.16)

6. AUDIO OUT (VARIABLE)
   - Connect an external audio amplifier to this jack. (p15-17)
   - This terminal outputs sound from AUDIO IN terminal (5 or 7).

7. COMPUTER/ COMPONENT AUDIO IN
   - Connect the audio output (stereo) from a computer or video equipment connected to 2 or 3 to this jack. (p15, 17)

8. VIDEO IN
   - Connect the composite video output from video equipment to VIDEO jack. (p16)
Part Names and Functions

Top Control

1. SELECT button
   - Execute the selected item. (p.20)
   - Expand or compress the image in Digital zoom mode. (p.34)

2. POINT (▲▼◄►) buttons
   - Select an item or adjust the value in the On-Screen Menu. (p.20)
   - Pan the image in Digital zoom + mode. (p.34)
   - Adjust the volume level. (Point buttons) (p.23)

3. KEYSTONE button
   Correct the keystone distortion. (p.22, 42)

4. POWER indicator
   Emit a red light until the projector gets ready to be turned on. It turns red when the projector is in the stand-by mode. It remains green while the projector is under operation. (p.18, 19, 61)

5. LAMP REPLACE indicator
   Turn yellow when the life of the projection lamp draws to an end. (p.55, 61)

6. WARNING Temp. indicator
   Emit a red light when the projector detects an abnormal condition. This also blinks red when the internal temperature of the projector exceeds the operating range. (p.52, 61)

7. POWER ON/STAND-BY button
   Turn the projector on or off. (p.18, 19)

8. INPUT button
   Select input source. (p.25, 35, 36)

9. MENU button
   Open or close the On-Screen Menu. (p.20)
Remote Control

1 **POWER ON/STAND-BY button**
   Turn the projector on or off. (p.18, 19)

2 **VIDEO button**
   Select VIDEO input source. (p.23, 35)

3 **COMPUTER button**
   Select COMPUTER input source. (p.23, 25, 36)

4 **MENU button**
   Open or close the On-Screen Menu. (p.20)

5 **Point ▲▼ ◄► (VOLUME + / –) buttons**
   – Select an item or adjust the value in the On-Screen Menu. (p.20)
   – Pan the image in Digital zoom + mode. (p.34)
   – Adjust the volume level. (Point ◄► buttons) (p.23)

6 **SELECT button**
   – Execute the selected item. (p.20)
   – Expand or compress the image in Digital zoom mode. (p.34)

7 **D.ZOOM ▲▼ buttons**
   Zoom in and out the images. (p.24, 34)

8 **FREEZE button**
   Freeze the picture. (p.23)

9 **NO SHOW button**
   Temporarily turn off the image on the screen. (p.24)

10 **LAMP CONTROL button**
    Select the lamp mode. (p.24, 48)

11 **MUTE button**
    Mute the sound. (p.23)

12 **P-TIMER button**
    Operate the P-timer function. (p.24)

13 **IMAGE button**
    Select the image level. (p.24, 30, 38)

14 **AUTO PC button**
    Automatically adjust the computer image to its optimum setting. (p.24, 27)

15 **KEYSTONE button**
    Correct the keystone distortion. (p.22, 42)

---

To ensure safe operation, please observe the following precautions:

– Do not bend, drop or expose the remote control to moisture or heat.
– For cleaning, use soft dry cloth. Do not apply benzene, thinner, splay or any chemical material.
Remote Control Battery Installation

1. Open the battery compartment lid.
2. Install new batteries into the compartment.
3. Replace the compartment lid.

To insure safe operation, please observe the following precautions:

- Use two (2) AA or LR6 type alkaline batteries.
- Always replace batteries in sets.
- Do not use a new battery with a used battery.
- Avoid contact with water or liquid.
- Do not expose the remote control to moisture or heat.
- Do not drop the remote control.
- If the battery has leaked on the remote control, carefully wipe the case clean and install new batteries.
- Risk of explosion if a battery is replaced by an incorrect type.
- Dispose of used batteries according to the instructions.

Operating Range

Point the remote control toward the projector (Infrared Remote Receiver) when pressing any button. Maximum operating range for the remote control is about 16.4' (5 m) and 60° in front of the projector.
Positioning the Projector

For projector positioning, see the figures below. The projector should be set horizontally to the flat screen.

✔ Note:
- The brightness in the room has a great influence on picture quality. It is recommended to limit ambient lighting in order to obtain the best image.
- The values shown below are approximate and may vary from the actual sizes.

![Diagram of projector positioning](image)

| Screen Size (W x H) mm | 40" | 100" | 150" | 200" | 300"
|------------------------|-----|------|------|------|------
| 4 : 3 aspect ratio     | 813 x 610 | 2032 x 1524 | 3048 x 2286 | 4064 x 3048 | 6096 x 4572
| Zoom (min)             | 5.2' (1.6 m) | 13.8' (4.2 m) | 20.7' (6.3 m) | 27.6' (8.4 m) | 41.3' (12.6 m)
| Zoom (max)             | 4.6' (1.4 m) | 11.5' (3.5 m) | 17.1' (5.2 m) | 23.0' (7.0 m) | 34.4' (10.5 m)

Adjustable Feet

Projection angle can be adjusted up to 10.0 degrees with the adjustable feet.

1. Lift the front of the projector and press the feet lock latches on both sides of the projector.
2. Release the feet lock latches to lock the adjustable feet and rotate the adjustable feet to adjust the position and tilt.
3. To retract the adjustable feet, lift the front of the projector and press and undo the feet lock latches. Keystone distortion of the projected image can be corrected by menu operation. (p.22, 42)
Connecting the AC Power Cord

This projector uses nominal input voltages of 100-120 V or 200-240 V AC. This projector automatically selects the correct input voltage. It is designed to work with single-phase power systems having a grounded neutral conductor. To reduce the risk of electrical shock, do not plug into any other type of power system. Consult your authorized dealer or service station if you are not sure of the type of power being supplied. Connect the projector with all peripheral equipment before turning the projector on. (See pages 15-17 for connection.)

Connect the AC power cord (supplied) to the projector. The AC outlet must be near this equipment and must be easily accessible.

CAUTION

For safety, unplug the AC power cord when the projector is not in use. When this projector is connected to an outlet with the AC power cord, it is in Stand-by mode and consumes a little electric power.

NOTE ON THE POWER CORD

AC power cord must meet requirements of the country where you use the projector. Confirm the AC plug type with the chart below and proper AC power cord must be used. If supplied AC power cord does not match your AC outlet, contact your sales dealer.

<table>

Ground
Connecting to a Computer

Cables used for connection
• VGA Cables (Mini D-sub 15 pin) (Only one cable is supplied.)
• Audio Cables (Mini Plug: stereo)
(*One cable is supplied; other cables are not supplied with the projector.)

Audio cable (stereo)

Note:
• Input sound to the COMPUTER/COMPONENT AUDIO IN terminal when using the COMPUTER IN 1/COMPONENT IN and the COMPUTER IN 2/MONITOR OUT terminal as input.
• When connecting the AUDIO OUT to external audio equipment, the projector's built-in speaker is disconnected.
• When the cable is of the longer variety, it is advisable to use the COMPUTER IN 1/COMPONENT IN and not the COMPUTER IN 2/MONITOR OUT.

⚠️ Unplug the power cords of both the projector and external equipment from the AC outlet before connecting cables.
Connecting to Video Equipment

Cables used for connection
- Video and Audio Cable (RCA x 3)
- S-VIDEO Cable
- Audio Cable (Mini Plug: stereo)

(Cables are not supplied with the projector.)

Note:
- When connecting AUDIO OUT to external audio equipment, the projector's built-in speaker is disconnected.

Unplug the power cords of both the projector and external equipment from the AC outlet before connecting cables.
Connecting to Component Video Equipment

Cables used for connection
- Audio Cables (Mini Plug :stereo)
- Scart-VGA Cable
- Component Cable
- Component-VGA Cable
( Cables are not supplied with the projector.)

Audio Output  RGB Scart  Component Video Output
21-pin Output  (Y, Pb/Cb, Pr/Cr)

Audio cable (stereo)  Scart-VGA cable
Component cable  Component-VGA cable

✔ Note:
- When connecting AUDIO OUT to external audio equipment, the projector's built-in speaker is disconnected.
- See page 64 for ordering optional parts.

⚠️ Unplug the power cords of both the projector and external equipment from the AC outlet before connecting cables.
Basic Operation

Turning On the Projector

1. Complete peripheral connections (with a computer, VCR, etc.) before turning on the projector.
2. Connect the projector's AC power cord into an AC outlet. The POWER indicator becomes red.
3. Press the POWER ON/STAND-BY button on the top control or on the remote control. The POWER indicator becomes green and the cooling fans start to operate. The preparation display appears on the screen and the count down starts.
4. After the countdown, the input source that was selected the last time and the Lamp mode status icon (see page 48) appears on the screen.

If the projector is locked with a PIN code, PIN code Input Dialog Box appears. Enter the PIN code as instructed below.

To Enter a PIN code
Select a number by pressing the Point ▲▼ buttons, and then press the Point ► button to fix the number and move the pointer. The number changes to "✳". If you fixed an incorrect number, move the pointer to the number you want to correct by pressing the Point ◄ button, and then select the correct number by pressing the Point ▲▼ buttons.

Repeat this step to complete entering a four-digit number. "1234" is set as the initial PIN code at the factory.

After entering the four-digit number, move the pointer to "Set" by pressing the Point ► button. Press the SELECT button so that you can start to operate the projector.

If you entered an incorrect PIN code, "PIN code" and the number (✳✳✳✳) turns red. Enter the correct PIN code all over again.

What is PIN code?
PIN (Personal Identification Number) code that allows the person who knows it to operate the projector. Setting a PIN code prevents unauthorized use of the projector.

A PIN code consists of a four-digit number. Refer to the PIN code lock function in the Setting on pages 49 and 50 for locking operation of the projector with your PIN code.

CAUTION ON HANDLING PIN CODE
If you forget your PIN code, the projector can no longer be started. Set a new PIN code with special care, write it down in column on page 66 of this manual, and keep it at hand. Should the PIN code be missing or forgotten, consult your dealer or service center.
Turning Off the Projector

1. Press the POWER ON/STAND-BY button on the top control or on the remote control, and a message "Power off?" appears on the screen.

2. Press the POWER ON/STAND-BY button again to turn off the projector. The POWER indicator starts to blink red, and it continues while the cooling fans are operating for about 90 seconds. (You can select the level of fan quietness and rotation speed. See page 51.) At this time you can disconnect the AC power cord even if the fans are still running.

3. When the projector has cooled down enough, the POWER indicator stops blinking and you can turn on the projector.

To maintain the life of the lamp, once you turn the projector on, wait at least five minutes before turning it off.

Do not operate the projector continuously without rest. Continuous use may result in shortening the lamp life. Turn off the projector and give it a rest about an hour in every 24 hours.

Note:
- When the On start function is on, this projector is turned on automatically by connecting the AC power cord to an AC outlet. (p.48)
- The running speed of cooling fans is changed according to the temperature inside the projector.
- Do not put the projector in a case before the projector is cooled enough.
- If the WARNING TEMP. indicator blinks or emits a red light, see "Warning Temp. Indicator" on page 52.
- While the POWER indicator is blinking, lamp is being cooled down and the projector cannot be turned on. Wait until the POWER indicator stops blinking to be turned on again.
- The fan rotation will terminate directly if the AC power cord is unplugged immediately after the projector is turned off.
- The projector can be turned on after the POWER indicator turns red. The waiting time to restart will be shortened when the normal power-off processing for fan cooling is completed, compared with the time the AC power cord is immediately unplugged after the power-off.
How to Operate the On-Screen Menu

The projector can be adjusted or set via the On-Screen Menu. Refer to the following pages regarding each adjustment and setting procedures.

1. Press the MENU button to display the On-Screen Menu.

2. Press the Point ▼ buttons to select a Menu icon to adjust and press the Point ▲ buttons to select an item to adjust.

3. Press the SELECT button to show the item data. To adjust the data, press the Point ▼ buttons. Refer to the following pages for each adjustment.

To close the On-Screen Menu, press the MENU button again.

✔ Note:
The selected item is not active until the SELECT button is pressed.
## Menu Bar

For detailed functions, see Menu Tree on p.59, 60.

### Same function

- As menu for computer source.
- As menu for computer source.
- As computer menu.
Basic Operation

Zoom and Focus Adjustment

Rotate the Zoom Ring to zoom in and out. Rotate the Focus Ring to adjust the projected picture focus.

Keystone Correction

If a projected picture has keystone distortion, correct the image with Keystone adjustment.

Press the KEYSTONE button on the top control or on the remote control. The keystone dialog box appears. Correct keystone distortion by pressing the Point ▲▼ buttons. Keystone adjustment can be memorized. (p.42)

Reduce the upper width with Point ▲ button.
Reduce the lower width with Point ▼ button.

Keystone

• The arrows are white when there is no correction.
• The direction of the arrow being corrected turns red.
• The arrows disappear at the maximum correction.
• If you press the KEYSTONE button on the top control or on the remote control once more while the keystone dialog box is being displayed, the keystone adjustment is canceled.

Top Control

Remote Control
Sound Adjustment

Direct Operation

Volume
Press the VOLUME+/– buttons on the top control or on the remote control to adjust the volume. The volume dialog box appears on the screen for a few seconds.

Mute
Press the MUTE button on the remote control to cut off the sound. To restore the sound to its previous level, press the MUTE button again or press the VOLUME +/- buttons.
Mute function is also effective for AUDIO OUT jack.

Menu Operation

1 Press the MENU button to display the On-Screen Menu. Press the Point ▲▼ buttons to move the red framed pointer to the Sound Menu icon.

2 Press the Point ▲▼ buttons to move the red framed pointer to the item that you want to select, and then press the SELECT button.

Volume
Press the Point ► button to turn up the volume, and press the Point ◄ button to turn down the volume.

Mute
Press the Point ▲▼ buttons to cut off the sound. Dialog box display changes to "On" and the sound is cut off. To restore the sound to its previous level, press the Point ▲▼ buttons again.

Remote Control Operation

For some frequently used operations, using the remote control is advisable. Just pressing one of the buttons enables you to make the operation, and no need for calling up the On-Screen Menu.

COMPUTER/VIDEO buttons
Press the COMPUTER or VIDEO button on the remote control to select the input source. For more detail, see pages 25, 35 and 36.

FREEZE button
Press the FREEZE button on the remote control to freeze the picture on the screen. To cancel the Freeze function, press the FREEZE button again or press any other button.

✔ Note:
See the next page for the other buttons.
AUTO PC button
Press the AUTO PC button on the remote control to operate the Auto PC function. For more detail, see page 27.

D.ZOOM buttons
Press the D.ZOOM buttons on the remote control to zoom in and zoom out the images. For more detail, see page 34.

NO SHOW button
Press the NO SHOW button on the remote control to black out the image. To restore to normal, press the NO SHOW button again or press any other button. When a projected image is captured and set as "User" in the Logo selection (p.43), the screen changes each time you press the NO SHOW button as follows.

black out ➜ the captured image ➜ normal ➜ ....

KEYSTONE button
For detail, see page 22.

IMAGE button
Press the IMAGE button on the remote control to select a desired image level of the screen. For more detail, see pages 30 and 38.

P-TIMER button
Press the P-TIMER button on the remote control. The timer display "00 : 00" appears on the screen and the timer starts to count time (00 : 00 ~ 59 : 59). To stop the P-Timer, press the P-TIMER button. Press the P-TIMER button again, then the P-timer display disappears.

LAMP CONTROL button
Press the LAMP CONTROL button on the remote control to select the lamp mode for changing the brightness of the screen.

❖ Normal...normal brightness
❖ Auto......brightness according with the input signal
❖ Eco........lower brightness reduces the lamp power consumption and extends the lamp life.
Computer Input

Input Source Selection

Direct Operation

Choose either Computer 1 or Computer 2 by pressing the INPUT button on the top control or press the COMPUTER button on the remote control. Before using these buttons, correct input source should be selected through Menu operation as described below.

Top Control

INPUT button

Computer 1

Computer 2

Video

Remote Control

COMPUTER button

Computer 1

Computer 2

See Note at the bottom of this page.

Menu Operation

1 Press the MENU button to display the On-Screen Menu. Press the Point buttons to move the red framed pointer to the Input Menu icon.

2 Press the Point buttons to move the red arrow pointer to either Computer 1 or Computer 2, and then press the SELECT button.

3 After the Source Select Menu appeared for Computer 1, move the pointer to RGB and then press the SELECT button.

Input Menu

Input Menu icon

Move the pointer (red arrow) to Computer 1 and press the SELECT button.

Source Select Menu

Move the pointer to RGB and press the SELECT button.

Input Menu

Move the pointer (red arrow) to Computer 2 and press the SELECT button.

✔ Note:

• When the Input Search function is set On1 or On2, the input signal will be searched automatically (p.46)

• Computer 2 is not displayed when the COMPUTER IN / MONITOR OUT terminal is set as Monitor out. (p.47)

• Computer 2 (COMPUTER IN / MONITOR OUT) can accept only RGB signal.
Computer System Selection

This projector automatically tunes to various types of computers based on VGA, SVGA, XGA, SXGA, WXGA, or UXGA with its Multi-scan system and Auto PC Adjustment. If Computer is selected as a signal source, this projector automatically detects the signal format and tunes to project a proper image without any additional setting. (Signal formats provided in this projector is shown on page 62)

One of the following messages may appear when:

**Auto**

The projector cannot recognize the connected signal conforming to the provided PC Systems. The message "Auto" is displayed on the PC System Menu icon and the Auto PC Adjustment function works to display proper images. If the image is not projected properly, a manual adjustment is required. (p.28, 29)

-----

There is no signal input from computer. Check the connection between your computer and the projector. (See "Troubleshooting" on page 57.)

**Mode 1**

The preset system is manually adjusted in the PC Adjust Menu. The adjusted data can be stored in Mode 1 ~ 5. (p.28, 29)

**SVGA 1**

PC Systems provided in this projector is chosen. The projector chooses a proper system provided in the projector and displays it.

*Mode 1 and SVGA 1 are examples.

Selecting Computer System Manually

PC system can also be selected manually.

1. Press the MENU button to display the On-Screen Menu. Press the Point ➤ buttons to move the red framed pointer to the PC System Menu icon.

2. Press the Point ▲▼ buttons to move the red arrow pointer to the system that you want to set, and then press the SELECT button.
Auto PC Adjustment

Auto PC Adjustment function is provided to automatically adjust Fine sync, Total dots, Horizontal, and Vertical to conform to your computer. Auto PC Adjustment function can be operated as follows.

Direct Operation

The Auto PC adjustment function can be operated directly by pressing the AUTO PC button on the remote control unit.

Menu Operation

1. Press the MENU button to display the On-Screen Menu. Press the Point buttons to move the red framed pointer to PC Adjust Menu item.

2. Press the Point buttons to move the red framed pointer to Auto PC Adj. item and then press the SELECT button twice.

To store adjustment parameters

Adjustment parameters from Auto PC Adjustment can be memorized in this projector. Once parameters are memorized, the setting can be done just by selecting Mode in the PC System Menu (p.6). See "Store" on page 29.

✔ Note:

• Fine sync, Total dots, Horizontal, and Vertical of some computers cannot be fully adjusted with this Auto PC Adjustment function. When the image is not provided properly with this operation, manual adjustments are required. (p.28, 29)

• The Auto PC Adjustment cannot be operated when 480i, 575i, 480p, 575p, 720p, 1035i, or 1080i is selected in the PC System Menu. (p.26)
Manual PC Adjustment

Some computers employ special signal formats which may not be tuned by Multi-scan system of this projector. Manual PC Adjustment enables you to precisely adjust several parameters to match those signal formats. The projector has 5 independent memory areas to memorize those parameters manually adjusted. It allows you to recall the setting for a specific computer.

1. Press the MENU button to display the On-Screen Menu. Press the Point \[\uparrow\downarrow\] buttons to move the red framed pointer to the PC Adjust Menu icon.

2. Press the Point \[\uparrow\downarrow\] buttons to move the red framed pointer to the item that you want to adjust and then press the SELECT button to display the adjustment dialog box. Press the Point \[\uparrow\downarrow\] buttons to adjust the value.

Fine sync
Eliminate flicker from the image displayed. Press the Point \[\uparrow\downarrow\] buttons to adjust the value. (From 0 to 31.)

Total dots
Adjust the number of total dots in one horizontal period. Press the Point \[\uparrow\downarrow\] buttons to adjust number to match your PC image.

Horizontal
Press the Point \[\uparrow\downarrow\] buttons to adjust the horizontal picture position.

Vertical
Press the Point \[\uparrow\downarrow\] buttons to adjust the vertical picture position.

Current mode
Press the SELECT button to show H-sync freq. and V-sync freq. of the connected computer.

Clamp
Adjust clamp level. When the image has dark bars, try this adjustment.
Display area H
Adjust the horizontal area displayed by this projector. Press the Point \( \uparrow \downarrow \) buttons to decrease/increase the value.

Display area V
Adjust the vertical area displayed by this projector. Press the Point \( \uparrow \downarrow \) buttons to decrease/increase the value.

Reset
To reset the adjusted data, select Reset and press the SELECT button. The confirmation box appears and then select [Yes]. All adjustments return to their previous figures.

Mode free
To clear the stored data, move the red framed pointer to the Mode free item and then press the SELECT button. Move the red arrow pointer to the Mode that you want to clear and then press the SELECT button.

Store
To store adjusted data, move the red framed pointer to the Store item and then press the SELECT button. Move the red arrow pointer to any of Mode 1 to 5 in which you want to store and then press the SELECT button.

Quit
Exit the PC Adjust Menu.

✔ Note:
Display area (H/V) cannot be selected when 480i, 575i, 480p, 575p, 720p, 1035i, or 1080i is selected in the PC System Menu (p.26).
Image Level Selection

Direct Operation

Select an image level among Dynamic, Standard, Real, Blackboard (Green), Image 1, Image 2, Image 3, and Image 4 by pressing the IMAGE button on the remote control.

Dynamic
Picture level suitable for viewing picture in a bright room.

Standard
Normal picture level preset on this projector.

Real
Picture level with improved halftone for graphics.

Blackboard (Green)
Picture level suitable for the image projected on a blackboard. This mode assists to enhance the image projected on a blackboard. This is mainly effective on a green colored board, not truly effective on a black colored board.

Image 1 ~ 4
User preset image in the Image Adjust Menu. (p.32)

Menu Operation

1  Press the MENU button to display the On-Screen Menu. Press the Point ▼▲ buttons to move the red framed pointer to the Image Select Menu icon.

2  Press the Point ▼▲ buttons to move the red framed pointer to the level that you want to set and then press the SELECT button.

Dynamic
Picture level suitable for viewing picture in a bright room.

Standard
Normal picture level preset on this projector.

Real
Picture level with improved halftone for graphics.

Blackboard (Green)
Picture level suitable for the image projected on a blackboard. See above for further description.

Image 1 ~ 4
User preset image in the Image Adjust Menu. (p.32)
Image Level Adjustment

1. Press the MENU button to display the On-Screen Menu. Press the Point ◀► buttons to move the red framed pointer to the Image Adjust Menu icon.

2. Press the Point ▲▼ buttons to move the red framed pointer to the item that you want to adjust, and then press the SELECT button. The level of each item is displayed. Adjust each level by pressing the Point ◀► buttons.

- **Contrast**
  Press the Point ◀ button to decrease the contrast and the Point ► button to increase contrast. (From 0 to 63.)

- **Brightness**
  Press the Point ◀ button to adjust the image darker and the Point ► button to adjust the image brighter. (From 0 to 63.)

- **Color temp.**
  Press the Point ◀ button or the Point ► button for Color temp. level that you want to select. (XLow, Low, Mid, or High)

- **White balance (Red)**
  Press the Point ◀ button to lighten the red tone and the Point ► button to deepen the red tone. (From 0 to 63.)

- **White balance (Green)**
  Press the Point ◀ button to lighten the green tone and the Point ► button to deepen the green tone. (From 0 to 63.)

- **White balance (Blue)**
  Press the Point ◀ button to lighten the blue tone and the Point ► button to deepen the blue tone. (From 0 to 63.)

- **Sharpness**
  Press the Point ◀ button to soften the image and the Point ► button to sharpen the image. (From 0 to 15.)

- **Gamma**
  Press the Point ◀► buttons to obtain better balance of contrast. (From 0 to 15.)

- **Reset**
  To reset the adjusted data, select Reset and press the SELECT button. The confirmation box appears and then select [Yes]. All adjustments returns to their previous figures.

**Note:**
After adjusting any of the White balance Red, Green, or Blue, the Color temp changes to "Adj."
**Store**

To store the adjusted data, select Store and press the SELECT button. Select a level from Image 1 to 4 with the Point ▲▼ buttons and press the SELECT button. A confirmation box appears and then select [Yes]. Stored data can be called up by selecting "Image" in the Image Level Selection on page 30.

**Quit**

Exit the Image Adjust Menu.

---

**Screen Size Adjustment**

This projector has the picture screen resize function, which enables you to customize the image size.

1. Press the MENU button to display the On-Screen Menu. Press the Point ◀▶ buttons to move the red framed pointer to the Screen Menu icon.

2. Press the Point ▲▼ buttons and move the red framed pointer to the function that you want to select and then press the SELECT button.

**Normal**

Provide the image to fit the screen size.

**True**

Provide the image in its original size. When the original image size is larger than the screen size (1024 x 768), this projector enters panning mode automatically. Pan the image with Point ▲▼ ◀▶ buttons. When adjusted, the arrows turns red. When reached to the correction limit, the arrows disappears.

**Wide**

Provide the image to fit wide video aspect ratio (16:9) by expanding the image width uniformly. This function can be used for providing a squeezed video signal at 16:9.

**Full screen**

Provide the full screen image.

---

**Note:**

- This Screen Menu cannot be operated when 720p(HDTV), 1035i (HDTV), or 1080i (HDTV) is selected in the PC System Menu (p.26).
- The projector cannot display any resolution higher than 1600x1200. If your computer’s screen resolution is higher than it, reset the resolution to the lower before connecting to the projector.
- The image data in other than XGA (1024x768) is modified to fit the screen size in initial mode.
- True, Full screen, and Digital zoom +/- cannot be selected when 480i, 575i, 480p, or 575p is selected in the PC System Menu (p.26).
Adjust the screen scale and position manually with this function.
Press the SELECT button at Custom and the "Custom" is displayed on the screen for a few seconds and then the Aspect dialog box appears.

Scale H/V .................. Adjust the Horizontal/Vertical screen scale.
H&V ....................... When set to "On", the aspect ratio is fixed. The "Scale V" appears dimmed and becomes unavailable. Adjust the "Scale H", then the screen scale is automatically modified based on the aspect ratio.
Position H/V ............... Adjust the Horizontal/Vertical screen position.
Common .................. Save the adjusted scale to all the inputs. Press the SELECT button at Common to display a confirmation box. To save the scale, press the SELECT button at "Yes." When Custom is selected, the saved scale is used.
Reset ..................... Reset the all adjusted values. Press the SELECT button at Reset to display a confirmation box. To reset, press the SELECT button at "Yes".

Press the SELECT button at Common or Reset, to display a confirmation box.

✓ Note:
- When no signal is detected, "Normal" is set automatically and the Aspect dialog box disappears.
- The adjustable range for Scale H/V and Position H/V is limited depending on the input signal.
For Zooming in and out the images

Digital zoom +

When the Digital zoom + is selected, the On-Screen Menu disappears and the message "D. zoom +" is displayed. Press the SELECT button to expand the image size. And press the Point ▲▼◄► buttons to pan the image. The Panning function can work only when the image is larger than the screen size.

A projected image can be also expanded by pressing the D.ZOOM ▲ button on the remote control.

Digital zoom –

When Digital zoom – is selected, the On-Screen Menu disappears and the message "D. zoom –" is displayed. Press the SELECT button to compress image size.

A projected image can be also compressed by pressing the D.ZOOM ▼ button on the remote control.

To exit the Digital zoom +/- mode, press any button except the D.ZOOM ▲▼ buttons, SELECT, and Point buttons.

To return to the previous screen size, select a screen size from the Screen Size Adjustment or select an input source from the Input Source Selection (p.25) again, or adjust the screen size with the D.ZOOM ▲▼ buttons.

Remote Control

✔ Note:

• The panning function may not operate properly if the stored Mode in the PC Adjust Menu is used. (p.29)

• The minimum compression ratio can be limited depending on the input signal or when the Keystone function is working.

• True, Full screen, and Digital zoom +/- cannot be selected when 480i, 575i, 480p, or 575p is selected in the PC System Menu (p.26).

• Digital zoom +/- cannot be selected when Full screen or True is selected.
**Video Input**

**Input Source Selection (Video, S-Video)**

**Direct Operation**

Choose Video by pressing the INPUT button on the top control or the VIDEO button on the remote control. Before using these buttons, correct input source should be selected through menu operation as described below.

---

**Top Control**

- **Input Menu icon**
- **INPUT button**
- **Video**
- **Computer 1**
- **Computer 2**

* See Note at the bottom of this page.

**Remote Control**

- **VIDEO button**
- **Input Menu icon**
- **Input Menu**
- **Computer 1**
- **Video**

**Menu Operation**

1. Press the MENU button to display the On-Screen Menu. Press the Point buttons to move the red framed pointer to the Input Menu icon.

2. Press the Point buttons to move the red arrow pointer to Video and then press the SELECT button to display the Source Select Menu.

3. Move the pointer to the source that you want to select and then press the SELECT button.

**Auto**

When selecting Auto, the projector automatically detects the incoming video signal, and adjusts itself to optimize its performance. The projector selects a connection in the following order:

1. S-Video
2. Video

**Video**

When video input signal is connected to the VIDEO jack, select Video.

**S-Video**

When video input signal is connected to the S-VIDEO jack, select S-Video.

**Note:**

- When the Input Search function is set On1 or On2, the input signal will be searched automatically (p.46)
- When Monitor out is selected in the Terminal function (p.47), Computer 2 is not displayed.
Input Source Selection (Component, RGB Scart 21-pin)

Direct Operation
Choose Computer 1 by pressing the INPUT button on the top control or press the COMPUTER button on the remote control.
Before using these buttons, correct input source should be selected through Menu operation as described below.

Menu Operation
1. Press the MENU button to display the On-Screen Menu. Press the Point \( \uparrow \downarrow \) buttons to move the red framed pointer to the Input Menu icon.
2. Press the Point \( \uparrow \downarrow \) buttons to move the red arrow pointer to Computer 1 and then press the SELECT button.
3. After the Source Select Menu appeared for Computer 1, move the pointer to Component or RGB (Scart) and then press the SELECT button.

Component When the input source is coming from video equipment connected to the COMPUTER IN 1/COMPONENT IN terminal with a Component-VGA Cable (not supplied), select Component.

RGB (Scart) When the input source is coming from video equipment connected to the COMPUTER IN 1/COMPONENT IN terminal with a Scart-VGA Cable (not supplied), select RGB (Scart).

✔ Note:  
• When the Input Search function is set On1 or On2, the input signal will be searched automatically (p.46)  
• Computer 2 is not displayed when the COMPUTER IN 2/MONITOR OUT terminal is set as Monitor out. (p.47)
Video System Selection

1. Press the MENU button to display the On-Screen Menu. Press the Point ◄► buttons to move the red framed pointer to the AV System Menu icon.

2. Press the Point ▲▼ buttons to move the red arrow pointer to the system that you want to select and then press the SELECT button.

Video or S-Video

Auto
The projector automatically detects incoming video system, and adjusts itself to optimize its performance. When Video System is PAL-M or PAL-N, select system manually.

PAL/SECAM/NTSC/NTSC4.43/PAL-M/PAL-N
If the projector cannot reproduce proper video image, it is necessary to select a specific broadcast signal format among PAL, SECAM, NTSC, NTSC 4.43, PAL-M, and PAL-N.

Component

Auto
The projector automatically detects incoming video signal, and adjusts itself to optimize its performance.

COMPONENT VIDEO SIGNAL FORMAT
If the projector cannot reproduce proper video image, it is necessary to select a specific component video signal format among 480i, 575i, 480p, 575p, 720p, 1035i, and 1080i.

✓ Note:
The AV System Menu cannot be selected when selecting RGB (Scart).
Video Input

Image Level Selection

Direct Operation

Select an image level among Dynamic, Standard, Cinema, Blackboard (Green), Image 1, Image 2, Image 3, and Image 4 by pressing the IMAGE button on the remote control.

Dynamic
Picture level suitable for viewing picture in a bright room.

Standard
Normal picture level preset on this projector.

Cinema
Picture level adjusted for the picture with fine tone.

Blackboard (Green)
Picture level suitable for the image projected on a blackboard. This is mainly effective on a green colored board, not truly effective on a black colored board.

Image 1 ~ 4
User preset image in the Image Adjust Menu (p.39, 40).

Menu Operation

1. Press the MENU button to display the On-Screen Menu. Press the Point ▼ buttons to move the red framed pointer to the Image Select Menu icon.

2. Press the Point ▲▼ buttons to move the red framed pointer to the level that you want to set and then press the SELECT button.

Dynamic
Picture level suitable for viewing picture in a bright room.

Standard
Normal picture level preset on this projector.

Cinema
Picture level adjusted for the picture with fine tone.

Blackboard (Green)
Picture level suitable for the image projected on a blackboard. See above for further description.

Image 1~4
User preset image in the Image Adjust Menu (p.39, 40).
Image Level Adjustment

1 Press the MENU button to display the On-Screen Menu. Press the Point ▼► buttons to move the red framed pointer to the Image Adjust Menu icon.

2 Press the Point ▲▼ buttons to move the red framed pointer to the item that you want to adjust, and then press the SELECT button. The level of each item is displayed. Adjust each level by pressing the Point ▼► buttons.

Contrast
Press the Point ◄ button to decrease the contrast and the Point ► button to increase contrast. (From 0 to 63.)

Brightness
Press the Point ◄ button to adjust the image darker and the Point ► button to adjust the image brighter. (From 0 to 63.)

Color
Press the Point ◄ button to lighten the color and the Point ► button to deepen the color. (From 0 to 63.)

Tint
Press the Point ▼► buttons to obtain a proper color. (From 0 to 63.)

Color temp.
Press the Point ◄ button or the Point ► button for Color temp. level that you want to select. (XLow, Low, Mid, or High)

White balance (Red)
Press the Point ◄ button to lighten the red tone and the Point ► button to deepen the red tone. (From 0 to 63.)

White balance (Green)
Press the Point ◄ button to lighten the green tone and the Point ► button to deepen the green tone. (From 0 to 63.)

White balance (Blue)
Press the Point ◄ button to lighten the blue tone and the Point ► button to deepen the blue tone. (From 0 to 63.)

✔ Note:
• The Tint cannot be selected when the video system is PAL, SECAM, PAL-M, or PAL-N.
• After adjusting any of the White balance Red, Green, or Blue, the Color temp. changes to “Adj.”.
Video Input

**Sharpness**
Press the Point ◄ button to soften the image and the Point ► button to sharpen the image. (From 0 to 15.)

**Gamma**
Press the Point ◄► buttons to obtain better balance of contrast. (From 0 to 15.)

**Noise reduction**
Noise interference on the screen can be reduced. Select one of the following to get smoother images.
- Off . . . . disabled.
- L1 . . . . . lower reduction
- L2 . . . . . higher reduction

**Progressive**
Interlaced video signal can be displayed in a progressive picture. Select one of the following.
- Off . . . . disabled.
- L1 . . . . . Select "L1" for an active picture.
- L2 . . . . . Select "L2" for a still picture.
- Film . . . Select "Film" for watching a film. With this function, the projector reproduces pictures faithful to the original film quality.

**Reset**
To reset the adjusted data, select Reset and press the SELECT button. The confirmation box appears and then select [Yes]. All adjustments return to their previous figures.

**Store**
To store the adjusted data, select Store and press the SELECT button. Select a level from Image 1 to 4 with the Point ▲▼ buttons and press the SELECT button. A confirmation box appears and then select [Yes]. Stored data can be called up by selecting "Image" in the Image Level Selection on page 38.

**Quit**
Exit the Image Adjust Menu.

✔ **Note:**
Noise reduction and Progressive cannot be selected when 480p, 575p, 720p, 1035i, or 1080i is selected. (p.37)
Screen Size Adjustment

This projector has the picture screen resize function, which enables you to customize the image size.

1. Press the MENU button to display the On-Screen Menu. Press the Point ▼ buttons to move the red framed pointer to the Screen Menu icon.

2. Press the Point ▲▼ buttons and move the red framed pointer to the function that you want to select and then press the SELECT button.

Normal

Provide the image at a normal video aspect ratio of 4:3.

Wide

Provide the image at a wide screen ratio of 16:9.

Custom

Adjust the screen scale and position manually with this function.

Press the SELECT button at Custom and the "Custom" is displayed on the screen for a few seconds and then the Aspect dialog box appears.

Scale H/V ............... Adjust the Horizontal/Vertical screen scale.

H&V ................. When set to "On", the aspect ratio is fixed. The "Scale V" appears dimmed and becomes unavailable. Adjust the "Scale H", then the screen scale is automatically modified based on the aspect ratio.

Position H/V .......... Adjust the Horizontal/Vertical screen position.

Common ............... Save the adjusted scale to all the inputs. Press the SELECT button at Common to display a confirmation box. To save the scale, press the SELECT button at "Yes". When Custom is selected, the saved scale is used.

Reset ................ Reset the all adjusted values. Press the SELECT button at Reset to display a confirmation box. To reset, press the SELECT button at "Yes".

✔ Note:

Screen Menu cannot be operated when 720p, 1035i, or 1080i is selected in the AV System Menu (p.37).
Setting

This projector has Setting menu that allows you to set up the other various functions described as follows:

1. Press the MENU button to display the On-Screen Menu. Press the Point \[\text{button} \] buttons to move the red framed pointer to the Setting Menu icon.

2. Press the Point \[\text{button} \] buttons to move the red framed pointer to the item that you want to set and then press the SELECT button. The Setting dialog box appears.

Language

The language used in the On-Screen Menu is available in English, German, French, Italian, Spanish, Portuguese, Dutch, Swedish, Finnish, Polish, Hungarian, Romanian, Russian, Chinese, Korean, or Japanese.

Keystone

This function corrects distortion of a projected image. Select either Store or Reset with the Point \[\text{button} \] buttons, and then press the SELECT button. The keystone dialog box appears. Correct keystone with the Point \[\text{button} \] buttons. (p.22)

Store . . . . store the keystone correction even when the AC power cord is unplugged.

Reset . . . . reset the keystone correction when the AC power cord is unplugged.

Blue back

Press the Point \[\text{button} \] buttons to switch On/Off. When this function is "On", a blue image is displayed while the input signal is not detected.

Setting Menu (Language)

Set the red framed pointer to the item and press the SELECT button.

Press the SELECT button at Language item, the Language Menu appears.

Press the SELECT button at this item to display the other languages.

Press the SELECT button at this item to close the dialog box.
**Display**

Press the Point ◀◀ buttons to switch On/Off. This function decides to display On-Screen Displays.

On . . . . . . . . . . . . Show all the On-Screen Displays. Use this function when you want to project images after the lamp becomes bright enough. Factory default setting is this mode.

Countdown off . . Show the input image instead of the countdown when turning on the projector. Use this function when you want to project the image as early as possible even when the lamp is not bright enough.

Off . . . . . . . . . . . Do not show On-Screen Displays, except:

- On-Screen Menu
- "Power off?" message
- P-Timer
- "No signal" message for Power management item (p.47)
- "Please wait..." message
- Arrows for True item in the Screen Menu (p.32)

**Logo (Logo and Logo PIN code lock settings)**

This function allows you to customize the screen logo with Logo select, Capture, and Logo PIN code lock functions.

✔ **Note:**

When On is selected in Logo PIN code lock function, Logo select and Capture functions cannot be selected.

**Logo select**

This function decides the start-up display as follows:

- User . . . the image you captured
- Default . . the factory-set logo
- Off . . . . . countdown only
Capture

This function enables you to capture the image being projected and use it for a start-up display or interval of presentations.

After capturing the projected image, go to the Logo select function and set it to "User". Then the captured image is displayed when turning on the projector next time or pressing the NO SHOW button. (p.24)

To capture the image, select [Yes]. To cancel the Capture function, select [No].

✔ Note:
• Before capturing an image, select Standard in the Image Select Menu to capture a proper image. (p.30, 38.)
• A signal from a computer can be captured up to XGA (1024x768). A signal from video equipment can be captured except for 720p, 1035i, and 1080i.
• When capturing the image that has been adjusted by the Keystone function, the adjustment data is automatically reset and the projector captures an image without keystone adjustment.
• When the Logo PIN code lock function is "On", Capture menu cannot be selected.
• When starting to capture a new image, the previously stored image is cleared even if you cancel the capturing.

Logo PIN code lock

This function prevents an unauthorized person from changing the screen logo.

Off ......... the screen logo can be changed freely from the Logo select menu.  
(p.43)

On ......... the screen logo cannot be changed without the Logo PIN code.

If you want to change the Logo PIN code lock setting, enter a Logo PIN code along the following steps. The initial Logo PIN code is set "4321" at the factory.
Setting

To Enter the Logo PIN code
Select a number by pressing the Point ▲▼ buttons. And then press the Point ► button to fix the number and move the pointer. The number changes to “✳”. If you fixed an incorrect number, move the pointer to the number you want to correct by pressing the Point ◀ button, and then select the correct number by pressing the Point ▲▼ buttons.

Repeat this step to complete entering a four-digit number.

After entering the four-digit number, move the pointer to "Set" by pressing the Point ▶ button. Press the SELECT button so that you can change the Logo PIN code lock setting.

If you entered an incorrect Logo PIN code, "Logo PIN code" and the number (✳✳✳✳) turns red. Enter a correct Logo PIN code all over again.

To Change the Logo PIN code
Logo PIN code can be changed to your desired four-digit number. Select "Logo PIN code change" with the Point ▼ button and press the SELECT button. Set a new Logo PIN code.

Be sure to note the new Logo PIN code and keep it at hand. If you lost the number, you could no longer change the Logo PIN code setting. For details on PIN code setting, refer to relevant instructions of the PIN code lock function on pages 49 and 50.

CAUTION:
WHEN YOU HAVE CHANGED THE LOGO PIN CODE, WRITE DOWN THE NEW PIN CODE IN COLUMN OF THE LOGO PIN CODE NO. MEMO ON PAGE 66, AND KEEP IT SECURELY. SHOULD THE LOGO PIN CODE BE LOST OR FORGOTTEN, THE PROJECTOR CAN NO LONGER BE OPERATED.
Setting

Ceiling
When this function is "On", the picture is top/bottom and left/right reversed. This function is used to project the image from a ceiling mounting the projector.

Rear
When this function is "On", the picture is left/right reversed. This function is used to project the image to a rear projection screen.

Input search
This function detects the input signal automatically. When finding a signal, the search will stop. Use the Point buttons to select one of the following.
Off... Input search does not work.
On1... Input search works under the situation below.
  • When pressing the INPUT button on the top control.
  • When pressing the COMPUTER button or VIDEO button on the remote control.
On2... Input search works under the situation below.
  • When turning on the projector with pressing the POWER ON/STAND-BY button on the top control or on the remote control.
  • When pressing the COMPUTER button or VIDEO button on the remote control.
  • When missing the current input signal. *
  • When pressing the INPUT button on the top control.

* If the No show or Freeze function is active, cancel it to activate the Input search. It is also unavailable when On-Screen menu is displayed.

✔ Note:
• While Input search is set On1 or On2, the status of Input and Lamp are displayed every time the signal is switched.
• If any of the INPUT button on the top control or COMPUTER/VIDEO button on the remote control is pressed while Input search is on, Input search will stop and go back to the previous input signal.
**Terminal**

The COMPUTER IN 2/MONITOR OUT terminal on the back of the projector is switchable for computer input or monitor output. (See page 9) Select Computer 2 or Monitor Out with the Point buttons.

Computer 2 . . . . . computer input
Monitor Out . . . . . monitor out

Terminal function is not available when selecting Computer 2 to the input source. Change the input source to the others (Computer1 or Video) so that the Terminal function will be available. (p.25, 35, 36)

**Power management**

For reducing power consumption as well as maintaining the lamp life, the Power management function turns off the projection lamp when the projector is not used for a certain period.

When the input signal is interrupted and no button is pressed for more than 30 seconds, the timer display with "No signal" appears. The countdown starts to turn off the lamp.

Select one of the operations:

- **Ready** . . . . . When the lamp has been fully cooled down, the POWER indicator changes to green blinking. In this condition, the projection lamp is turned on if the input signal is reconnected or any button on the top control or remote control is pressed.
- **Shut down** . . . When the lamp has been fully cooled down, the power is turned off.
- **Off** . . . . . Power management function is off.

Then set the countdown timer with the Point buttons.

✔ **Note:**
Factory default is "Ready, 5 min".
On start

When this function is "On", the projector is automatically turned on just by connecting the AC power cord to a wall outlet.

✔ Note:
- Be sure to turn the projector off properly (see "Turning Off the Projector" on page 19). If the projector is turned off in the incorrect sequence, the On start function does not operate properly.

Lamp control

This function allows you to change brightness of the screen.

- Normal . . . . normal brightness
- Auto . . . . brightness according with the input signal
- Eco . . . . lower brightness reduces the lamp power consumption and extends the lamp life.

Remote control

This projector provides two different remote control codes: the factory-set initial code (Code 1) and the secondary code (Code 2). This switching function prevents remote control interference when operating several projectors or video equipment at the same time.

When operating the projector in "Code 2", both the projector and the remote control must be switched to "Code 2".

To change the code for the projector:
Select either "Code 1" or "Code 2" in this Setting Menu.

To change the code for the remote control:
Press and hold both the MENU and IMAGE buttons together for 10 seconds or more. After changing the code, make sure the remote control operates properly.

✔ Note:
If the batteries are removed from the remote control for a long period of time, the remote control code will be reset.
Security (Key lock and PIN code lock settings)
This function allows you to use Key lock and PIN code lock function to set the security for the projector operation.

Key lock
This function locks operation of the top control or the remote control.
It is useful to prevent operation by an unauthorized person.

. . . . . . not locked.
. . . . . . lock the operation of the top control. To unlock, use the remote control.
. . . . . . lock the operation of the remote control. To unlock, use the top control.

If the top control accidentally becomes locked and you do not have the remote control or there is something wrong with your remote control, contact the dealer where you purchased the projector or the service center.

PIN code lock
This function prevents the projector from being operated by an unauthorized person and provides the following settings for security options.

Off . . . . . the projector is not locked with a PIN code.
On1 . . . . require to enter a PIN code every time turning on the projector.
On2 . . . . require to enter a PIN code to operate the projector once the power cord is disconnected; as long as the AC power cord is connected, the projector can be operated without a PIN code.

Whenever to change the PIN code lock setting or the PIN code (the four-digit number), you are required to enter the PIN code. The "1234" is set as the initial PIN code at the factory.
To Enter the PIN code
Select a number by pressing the Point ▲▼ buttons. And then press the Point ► button to fix the number and move the pointer. The number changes to “✳”. If you fixed an incorrect number, move the pointer to the number you want to correct by pressing the Point ◄ button, and then select the correct number by pressing the Point ▲▼ buttons.

Repeat this step to complete entering a four-digit number.

After entering the four-digit number, move the pointer to "Set" by pressing the Point ► button. Press the SELECT button so that you can change the following PIN code lock settings.

If you entered an incorrect PIN code, "PIN code" and the number (✳✳✳✳) turns red. Enter a correct PIN code all over again.

To Change the PIN code lock setting
Select Off, On1, or On2 with the Point ◄► buttons and then move the red framed pointer to "Quit" with the Point ◄ button. Press the SELECT button to close the dialog box.

To Change the PIN code
The PIN code can be changed to your desired four-digit number.

Select "PIN code change" with the Point ◄ button, and press the SELECT button to display the New PIN code input dialog box.

Select a number by pressing the Point ▲▼ buttons. And then press the Point ► button to fix the number and move the pointer. Repeat it to complete entering a four-digit number. After entering the four-digit number, move the pointer to "Set" by pressing the Point ► button. Then press the SELECT button.

CAUTION: WHEN YOU HAVE CHANGED THE PIN CODE, WRITE DOWN THE NEW PIN CODE IN COLUMN OF THE PIN CODE NO. MEMO ON PAGE 66, AND KEEP IT SECURELY. IF YOU FORGET YOUR PIN CODE, THE PROJECTOR CAN NO LONGER BE STARTED.
**Fan**

This function provides the following alternatives in the cooling fans’ operation after turning off the projector. (p.19)

- **L1**...... normal operation
- **L2**...... slower and lower-sound than the normal operation (L1), but it takes longer to cool the projector down.

**Lamp counter**

This function is used to reset the lamp replacement counter. When replacing the projection lamp, reset the lamp replacement counter by using this function. See page 56 for operation.

**Factory default**

This function returns all setting values except for the user logo, PIN code lock, Logo PIN code lock, and the lamp counter to the factory default settings.

**Quit**

Exit the Setting Menu.
Maintenance and Cleaning

Warning Temp. Indicator

The WARNING TEMP. indicator shows the state of the function which protects the projector. Check the state of the WARNING TEMP. indicator and the POWER indicator to take proper maintenance.

The projector is shut down and the WARNING TEMP. indicator is blinking red.

When the temperature inside the projector reaches a certain level, the projector is automatically shut down to protect the inside of the projector. The POWER indicator is blinking while the projector is being cooled down. When the projector has cooled down sufficiently (to its normal operating temperature), it can be turned on again by pressing the POWER ON/STAND-BY button.

✔ Note:

After the temperature inside the projector returns to normal, the WARNING TEMP. indicator still continues to blink. When the projector is turned on again, the WARNING indicator stops blinking.

Then check the matters below:

– Did you provide appropriate space for the projector to be ventilated? Check the installing condition to see if ventilation slots are not blocked.
– Is the projector not installed near the ventilation duct of air-conditioning equipment which may be hot? Install the projector away from the ventilation duct of air-conditioning equipment.
– Are the air filters clean? Clean the air filters periodically. (p.53)

The projector is shut down and the WARNING TEMP. indicator emits a red light.

When the projector detects an abnormal condition, it is automatically shut down to protect the inside and the WARNING TEMP. indicator becomes red. In this case, disconnect the AC power cord and reconnect it, and then turn the projector on once again for check. If the projector cannot be turned on and the WARNING TEMP. indicator emits a red light, disconnect the AC power cord and contact the service station for check and repair.

⚠️ CAUTION

DO NOT LEAVE THE PROJECTOR WITH THE AC POWER CORD CONNECTED UNDER THE ABNORMAL CONDITION. IT MAY RESULT IN FIRE OR ELECTRIC SHOCK.
Cleaning the Air Filters

Air filters prevent dust from accumulating on the optical elements inside the projector. Should the air filters become clogged with dust particles, it will reduce cooling fans' effectiveness and may result in internal heat build up and adversely affect the life of the projector. Clean the air filters following the steps below.

1. Turn off the projector, and disconnect the AC power cord from the AC outlet.
2. Turn over the projector and remove the air filters by pulling the latches upward.
3. Clean the air filters with a brush or rinse them softly.
4. When cleaning the air filters by rinsing, dry them well. Replace the air filters properly. Make sure that the air filters are fully inserted.

**CAUTION**
Do not operate the projector with the air filters removed. Dust may accumulate on the optical elements degrading picture quality.
Do not put small parts into the air intake vents. It may result in malfunction of the projector.

**RECOMMENDATION**
We recommend avoiding dusty/smoky environments when operating the projector. Usage in these environments may cause a poor image quality.
When using the projector under dusty or smoky conditions, dust may accumulate on a lens, LCD panels, or optical elements inside the projector. This condition may degrade the quality of a projected image. When the symptoms above are noticed, contact your authorized dealer or service station for proper cleaning.

Attaching the Lens Cover

When moving this projector or while not using it over an extended period of time, replace the lens cover.

Attach the lens cover according to the following procedures.

1. Pass the string through a hole of the lens cover.
2. Turn over the projector and remove the screw with a screwdriver.
3. Attach the string with lens cover to a hole at the bottom of the projector and secure it with a screw.
Cleaning the Projection Lens

Follow these steps to clean the projection lens.

1. Disconnect the AC power cord before cleaning.

2. Softly wipe the projection lens with a cleaning cloth that contains a small amount of non-abrasive camera lens cleaner, or use lens cleaning paper or a commercially available air blower to clean the lens. Avoid using an excessive amount of cleaner. Abrasive cleaners, solvents, or other harsh chemicals might scratch the surface.

3. When the projector is not in use, replace the lens cover.

Cleaning the Projector Cabinet

Follow these steps to clean the projector cabinet.

1. Disconnect the AC power cord before cleaning.

2. Softly wipe the projector body with a soft, dry cleaning cloth. When it is heavily soiled, use a small amount of mild detergent and finish with a soft, dry cleaning cloth. Avoid using an excessive amount of cleaner. Abrasive cleaners, solvents, or other harsh chemicals might scratch the surface.

3. When the projector is not in use, put the projector in an appropriate carrying case to protect it from dust and scratches.
Lamp Replacement

When the life of the projection lamp of this projector draws to an end, the LAMP REPLACE indicator emits a yellow light. If this indicator lights yellow, replace the lamp with a new one promptly.

WARNING: TURN OFF THE UV LAMP BEFORE OPENING THE LAMP COVER

CAUTION

Allow a projector to cool, for at least 45 minutes before you open the Lamp cover. The inside of the projector can become very hot.

For continued safety, replace with a lamp of the same type. Do not drop a lamp or touch a glass bulb! The glass can shatter and may cause injury.

Follow these steps to replace the lamp.

1. Turn off the projector and disconnect the AC power cord. Allow the projector to cool for at least 45 minutes.
2. Remove the screw with a screwdriver, and remove the lamp cover.
3. Remove 2 screws of the lamp with a screwdriver and pull out the lamp upwards vertically by grasping the handle.
4. Replace the lamp with a new one and tighten the 2 screws back into position. Make sure that the lamp is set properly. Replace the lamp cover and tighten the screw.
5. Connect the AC power cord to the projector and turn on the projector.
6. Reset the lamp replacement counter. See "Lamp Replacement Counter" on the next page.

ORDER REPLACEMENT LAMP

Replacement lamp can be ordered through your dealer. When ordering a projection lamp, give the following information to the dealer.

- Model No. of your projector: LC-XB31 / LC-XB33
- Replacement Lamp Type No.: POA-LMP115
- Service Parts No.: 610 334 9565
Lamp Replacement Counter

Be sure to reset the Lamp replacement counter after the lamp is replaced. When the Lamp replacement counter is reset, the LAMP REPLACE indicator stops lighting.

1. Turn the projector on, press the MENU button to display the On-Screen Menu. Press the Point ▲▼ buttons to move the red framed pointer to the Setting Menu icon.

2. Press the Point ▲▼ buttons to move the red framed pointer to the Lamp counter function and then press the SELECT button. The first dialog box appears and shows the total accumulated time of the lamp usage and the reset option. If you select "Reset", a "Lamp replacement counter Reset?" message appears. Select [Yes] to continue.

3. Another confirmation dialog box appears, select [Yes] to reset the Lamp replacement counter.

**Note:**
Do not reset the Lamp replacement counter without implementation of lamp replacement. Be sure to reset the Lamp replacement counter only after replacing the lamp.

---

**LAMP HANDLING PRECAUTIONS**

This projector uses a high-pressure lamp which must be handled carefully and properly. Improper handling may result in accidents, injury, or create a fire hazard.

- Lamp life may differ from lamp to lamp and according to the environment of use. There is no guarantee of the same life for each lamp. Some lamps may fail or terminate their life in a shorter period of time than other similar lamps.

- If the projector indicates that the lamp should be replaced, i.e., if the LAMP REPLACE indicator lights up, replace the lamp with a new one IMMEDIATELY after the projector has cooled down. (Follow carefully the instructions in the Lamp Replacement section of this manual.) Continuous use of the lamp with the LAMP REPLACE indicator lighted may increase the risk of lamp explosion.

- A Lamp may explode as a result of vibration, shock or degradation as a result of hours of use as its lifetime draws to an end. Risk of explosion may differ according to the environment or conditions in which the projector and lamp are being used.

**IF A LAMP EXPLODES, THE FOLLOWING SAFETY PRECAUTIONS SHOULD BE TAKEN.**

If a lamp explodes, disconnect the projector's AC plug from the AC outlet immediately. Contact an authorized service station for a checkup of the unit and replacement of the lamp. Additionally, check carefully to ensure that there are no broken shards or pieces of glass around the projector or coming out from the cooling air circulation holes. Any broken shards found should be cleaned up carefully. No one should check the inside of the projector except those who are authorized trained technicians and who are familiar with projector service. Inappropriate attempts to service the unit by anyone, especially those who are not appropriately trained to do so, may result in an accident or injury caused by pieces of broken glass.
# Troubleshooting

Before calling your dealer or service center for assistance, check the items below once again.

- Make sure you have properly connected the projector to peripheral equipment as described on pages 15-17.
- Make sure all equipment is connected to AC outlet and the power is turned on.
- When you operate the projector with a computer and it does not project an image, restart the computer.

# Appendix

## Some displays are not seen during operations
- Check the Display item. (See page 43.)

## PIN code dialog box appears at the start-up
- PIN code lock is being set. Input a PIN code (1234 or numbers you have set). (See pages 18, 49 and 50.)

## Computer 2 cannot be selected
- Select Computer 2 at the Terminal function. (See page 47.)

## The Terminal function cannot be selected
- The Terminal function cannot be selected after Computer 2 is selected. Select other input source such as Computer 1 or Video with the INPUT button on the top control, the COMPUTER button or the VIDEO button on the remote control so that the Terminal function can be selected.

## The Remote Control does not work
- Check the batteries.
- Make sure there is no obstruction between the projector and remote control.
- Make sure you are not too far from the projector when using the remote control. Maximum operating range is 16.4’ (5 m).
- Make sure the code of the remote control is conformed to that of the projector. (See page 48.)
- Unlock the Key lock function for the remote control. (See page 49.)

## The Top Control does not work
- Unlock the Key lock function for the top control of the projector. (See page 49)

**WARNING:**

High voltages are used to operate this projector. Do not attempt to open the cabinet.

If problems still persist after following all operating instructions, contact the dealer where you purchased the projector or the service center. Give the model number and explain about the problem. We will advise you how to obtain service.

---

The CE Mark is a Directive conformity mark of the European Community (EC).

This symbol on the nameplate means the product is Listed by Underwriters Laboratories Inc. It is designed and manufactured to meet rigid U.L. safety standards against risk of fire, casualty and electrical hazards.

<td>The projector detects an abnormal condition and cannot be turned on. Unplug the AC power cord and plug it again to turn on the projector. If the projector is turned off again, disconnect the AC power cord and contact the dealer or the service center for service and checkup. Do not leave the projector on. It may cause an electric shock or a fire hazard.</td>
</tr>
</tbody>
</table>

*When the life of the projection lamp draws to an end, the LAMP REPLACE indicator lights yellow. When this indicator lights yellow, replace the projection lamp with a new one promptly. Reset the lamp replacement counter after replacing the lamp. See pages 55 and 56.*
## Appendix

### Compatible Computer Specifications

Basically this projector can accept the signal from all computers with the V, H-Frequency below mentioned and less than 140 MHz of Dot Clock.

When selecting these modes, PC adjustment can be limited.

● The specifications are subject to change without notice.
● LCD panels are manufactured to the highest possible standards. Even though 99.99% of the pixels are effective, a tiny fraction of the pixels (0.01% or less) may be ineffective by the characteristics of the LCD panels.

Optional Parts
The parts listed below are optionally available. When ordering those parts, specify the item and Model No. to the sales dealer.

<tbody>
<tr>
<td>Factory default set No: 4 3 2 1*</td>
</tr>
</tbody>
</table>

* Should the four-digit number be changed, the factory set number will be invalid.

While the projector is locked with the PIN code....

Put the label below (supplied) on in a prominent place of the projector's body while it is locked with a PIN code.
