OWNER'S MANUAL

LC-XBS500
LC-WBS500
Maintenance and cleaning  Be sure to clean filter #1 (page 72) and #2

Cleaning air filter #2

The air filter prevents dust from accumulating on the surface of the optical elements inside the projector. Should the air filter become clogged with dust particles, it will reduce cooling fans’ effectiveness and may result in a buildup of internal heat and adversely affects the life of the projector. If the Filter warning icon appears on the screen, the air filter should be cleaned immediately. Clean the air filter following the steps below.

1. Turn off the projector, and unplug the AC power cord from the AC outlet.
2. Remove the air filter.
3. Gently clean the filter with a brush.
4. Reinstall the filter into the projector properly.

Caution
Do not operate the projector with the air filter removed. Dust may accumulate on the optical elements, degrading picture quality. Do not put any small objects into the air intake vents. Otherwise, it may result in malfunction of the projector.

Recommendation
We recommend avoiding dusty/smoky environments when you operate the projector. Usage in these environments may cause poor image quality. When you use the projector under dusty or smoky conditions, dust may accumulate on the lens, LCD panels, or optical elements inside the projector. When the symptoms above are noticed, contact your authorized dealer or service station for proper cleaning.

Filter counter reset

Be sure to reset the filter counter after cleaning or replacing the filter.

1. Press Menu on the remote control to display the screen menu. Press ▲▼ to select "Expand", then press the OK button.
2. Press ▲▼ to select "Filter counter", and then press the OK button. Press ▲▼ to select "Filter counter reset" and press the OK button, "Filter counter Reset?" appears on screen, select "Yes" to continue.
3. When another dialog box pops up, select "Yes" to reset the filter.
Features and Design

This Projector is designed with the most advanced technology for portability, durability, and ease of use. This projector utilizes built-in multimedia features, a palette of 10.7 million colors, and matrix liquid crystal display (LCD) technology.

Simple Computer System Setting
The projector has the Multi-scan system to conform to almost all computer output signals quickly. Up to WUXGA resolution can be accepted.

Useful Functions for Presentations
The digital zoom function allows you to focus on the crucial information during a presentation.

Lamp Control
Brightness of the projection lamp can be selected.

Logo Function
The Logo function allows you to customize the screen logo.

Multilanguage Menu Display
This projector provides multi-language screen menu.

Helpful Maintenance Functions
Lamp and filter maintenance functions provide for better and proper maintenance of the projector.

Security Function
The Security function helps you to ensure security of the projector. With the Key lock function, you can lock the operation on the top control or remote control. PIN code lock function prevents unauthorized use of the projector.

LAN Network Function
This projector is loaded with the wired and wireless LAN network function. You can operate and manage the projector via network. (Page 59-66.)

Auto Setup Function
This function enables input source search, auto pc adjust and auto keystone by simple pressing the AUTO button on the remote control.

Colorboard Function
At the time of simple projection on the colored wall, you can get the close color image to the color image projected on a white screen by selecting the similar color to the wall color from the preset four colors.

Switchable Interface Terminal
The projector provides a switchable interface terminal. You can use the terminal as computer input or monitor output conveniently.

Power Management
The Power management function reduces power consumption and maintains the lamp life.

Closed Caption
This is a printed version of the program sound or other information displayed on the screen. You can turn on the feature and switch the channels.

✓ Note:
- The screen menu and pictures in the manual may slightly differ from the real product.
- The manual is subject to change without prior notice.

Safety Instructions

Please read this manual completely before installing and operating the projector.
The projector provides many convenient features and functions. Proper operation may enable you to fully utilize the features and keep it in good condition. Otherwise, it will not only shorten the service life of the unit, but also may cause malfunction, a fire, or other accidents.

If your projector cannot work properly, please read this manual again, check the operating methods and cable connection, and try the solutions in the part of Troubleshooting. If the problem still exists, contact the dealer or the service center.

The lamp of the projector is a wearing part. The luminance may decrease after a period of operation and be weaker than that of a new lamp. This is normal. Please strictly follow the steps in Turning on the unit and Turning off the unit to turn on/off the projector, and the requirements in Maintaining and cleaning the projector to service and clean the projector regularly. Otherwise the high temperature residual heat may not radiate, greatly shorten the service life of the projector and lamp, or even damage them within a short period.

**Caution**

- Do not cover the vent of the projector. Poor radiation may shorten the service life or even cause dangers.
- Remove the AC power plug if the projector is not to be used for a long time.
- Do not project the same image for a long time; otherwise, a residual image may appear on the LCD panel due to its characteristic.

**Safety precautions**

**Caution:**
- The projector must be grounded.
- Do not expose the projector to raindrops or high humidity to avoid a fire or electric shock.
- This projector produces intense light from the projection lens. Avoid staring directly into the lens, otherwise eye damage could be caused. Be especially careful that children do not stare directly into the beam.
- Place the projector in a proper position. Otherwise it may result in fire hazard.
- Leave an appropriate space from the top, sides, and back of the shell in order to ventilate and cool down the projector. The figures below indicate the minimum distance to be left. It must be satisfied if the projector is placed in sealed environment like a cabinet.

- Do not set the projector in greasy, wet, or smoky conditions such as in a kitchen, to prevent a malfunction or accident. If the projector comes in contact with oil or chemicals, it may become deteriorated.

Read and keep this manual for future reference.

The mains plug/appliance coupler is used as disconnect device, the disconnect device shall remain readily operable.

FOR EU USERS

The symbol mark and recycling systems described below apply to EU countries and do not apply to countries in other areas of the world.

Your product is designed and manufactured with high quality materials and components which can be recycled and/or reused. The symbol mark means that electrical and electronic equipment, batteries and accumulators, at their end-of-life, should be disposed of separately from your household waste.

Note:
If a chemical symbol is printed beneath the symbol mark, this chemical symbol means that the battery or accumulator contains a heavy metal at a certain concentration. This will be indicated as follows: Hg: mercury, Cd: cadmium, Pb: lead. In the European Union there are separate collection systems for used electrical and electronic equipment, batteries and accumulators.

Please, dispose of them correctly at your local community waste collection/recycling centre.

Please help us to conserve the environment we live in!
All the safety and operating instructions should be read before the product is operated.

Read all of the instructions given here and retain them for later use. Unplug this projector from AC power supply before cleaning. Do not use liquid or aerosol cleaners. Use a damp cloth for cleaning.

Follow all warnings and instructions marked on the projector.

For added protection to the projector during a lightning storm, or when it is left unattended and unused for long periods of time, unplug it from the wall outlet. This will prevent damage due to lightning and power line surges.

Do not expose this unit to rain or use near water... for example, in a wet basement, near a swimming pool, etc....

Do not use attachments not recommended by the manufacturer as they may cause hazards. Do not place this projector on an unstable cart, stand, or table. The projector may fall, causing serious injury to a child or an adult, and serious damage to the projector.
Use only with a cart or stand recommended by the manufacturer, or sold with the projector. Wall or shelf mounting should follow the manufacturer's instructions, and should use a mounting kit approved by the manufacturers.

An appliance and cart combination should be moved with care. Quick stops, excessive force, and uneven surfaces may cause the appliance and cart combination to overturn.

Slots and openings in the back and bottom of the cabinet are provided for ventilation, to ensure reliable operation of the equipment and to protect it from overheating.

The openings should never be covered with cloth or other materials, and the bottom opening should not be blocked by placing the projector on a bed, sofa, rug, or other similar surface. This projector should never be placed near or over a radiator or heat register.

This projector should not be placed in a built-in installation such as a book case unless proper ventilation is provided.

Never push objects of any kind into this projector through cabinet slots as they may touch dangerous voltage points or short out parts that could result in a fire or electric shock. Never spill liquid of any kind on the projector.

Do not install the projector near the ventilation duct of air-conditioning equipment.

This projector should be operated only from the type of power source indicated on the marking label. If you are not sure of the type of power supplied, consult your authorized dealer or local power company.

Do not overload wall outlets and extension cords as this can result in fire or electric shock. Do not allow anything to rest on the power cord. Do not locate this projector where the cord may be damaged by persons walking on it.

Do not attempt to service this projector yourself as opening or removing Covers may expose you to dangerous voltage or other hazards. Refer all servicing to qualified service personnel.

Unplug this projector from wall outlet and refer servicing to qualified service personnel under the following conditions:

a. When the power cord or plug is damaged or frayed.
b. If liquid has been spilled into the projector.
c. If the projector has been exposed to rain or water.
d. If the projector does not operate normally by following the operating instructions. Adjust only those controls that are covered by the operating instructions as improper adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore the projector to normal operation.
e. If the projector has been dropped or the cabinet has been damaged.
f. When the projector exhibit a distinct change in performance-this indicates a need for service.

When replacement parts are required, be sure the service technician has used replacement parts specified by the manufacturer that have the same characteristics as the original part. Unauthorized substitutions may result in fire, electric shock, or injury to persons.

Upon completion of any service or repairs to this projector, ask the service technician to perform routine safety checks to determine that the projector is in safe operating condition.

Information for users in the European Union

This is a device to project images onto a screen, etc., and is not intended for use as indoor lighting in a domestic environment. Directive 2009/125/EC.

NOTE FOR CUSTOMERS IN THE US

This product contains mercury and must be recycled or disposed of according to local, state or federal laws.
Safety Guide

Air circulation

Vents in the cabinet are provided for ventilation. To ensure reliable operation of the product and to protect it from overheating, these openings must not be blocked or covered.

⚠️ Caution

Hot air is exhausted from the exhaust vent. When using or installing the projector, the following precautions should be taken.
- Do not put any flammable objects, or spray can near the projector. Hot air is exhausted from the air vents.
- Keep the exhaust vent at least 1m away from any objects.
- Do not touch a peripheral part of the exhaust vent, especially screws and metallic part. This area will become hot while the projector is being used.
- Do not put anything on the projector. Objects put on the cabinet will not only get damaged but also may cause fire hazard by heat.
- Cooling fans are provided to cool down the projector.
- The fan’s running speed is changed according to the temperature inside the projector.

Installing the projector properly

Please set the projector on nearly-level. Be sure to install the projector properly. Improper installation may reduce the lamp lifetime and even cause a fire hazard.

- Do not roll the projector over 10° from side to side.
- Do not pitch the projector more than 10° backward and forward.
- Do not point the projector up to project an image.
- Do not point the projector down to project an image.
- Do not put the projector on either side to project an image.

⚠️ Caution in ceiling installation the projector

- Only qualified personal is authorized for ceiling installation.
- We are not responsible for the hurt and damage caused by ceiling bracket that purchased from unauthorized dealer even in warranty period.
- Remove the ceiling bracket immediately while not use.
- While installing, torque screwdriver is suggested, don't use electric or impact-type screwdriver.
- Please read the manual of bracket for details.
Moving the projector
When moving the projector, take care of the lens and retract the adjustable feet to prevent damage to the lens and cabinet.

Notes on Lens Protective Ring
Before operating the projector, remove the lens protective ring. In case of transportation, rotate the FOCUS ring and LENS SHIFT lever to let the lens back to its central position and put on the lens protective ring to protect the lens.

Caution in moving or transporting the projector
- Do not drop or bump the projector, otherwise damages or malfunctions may result.
- When carrying the projector, use a suitable carrying case.
- Do not transport the projector by courier or any other transport service in an unsuitable transport case. This may cause damage to the projector. For more information about transporting the projector by courier or any other transport service, consult your dealer.
- Do not put the projector in a case before it is cooled enough.

Notes on Projector Handling
When lifting or moving the projector, do not hold the lens and the peripheral part to prevent damage on the lens or projector.

Be careful in handling the projector. Do not drop or bump it to avoid strong force, or place other objects on the cabinet.

Note:
The lens of the projector is manual. When operating the projector, pay attention to the following conditions.
- When the lens is rotating, do not touch it, otherwise your fingers may get hurt.
- Do not allow a child to touch the lens.
Compliance

FCC Caution

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy, and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Use of shielded cable is required to comply with class B limits in Subpart B of Part 15 of FCC Rules.

Do not make any changes or modifications to the equipment unless otherwise specified in the instructions. If such changes or modifications should be made, you could be required to stop operation of the equipment.

Model Number: LC-XBS500, LC-WBS500
Trade Name: EIKI
Responsible party: EIKI International, Inc.
Address: 30251 Esperanza Rancho Santa Margarita CA 92688-2132
Telephone No.: 800-242-3454 (949-457-0200)

AC Power Cord Requirement

The AC Power Cord supplied with this projector meets the requirement for use in the country you purchased it.

AC Power Cord for the United States and Canada:

AC Power Cord used in the United States and Canada is listed by the Underwriters Laboratories (UL) and certified by the Canadian Standard Association (CSA).

AC Power Cord has a grounding-type AC line plug. This is a safety feature to be sure that the plug will fit into the power outlet. Do not try to defeat this safety feature. Should you be unable to insert the plug into the outlet, contact your electrician.

AC Power Cord Requirement

AC Power Cord for the United Kingdom:

This cord is already fitted with a moulded plug incorporating a fuse, the value of which is indicated on the pin face of the plug. Should the fuse need to be replaced, an ASTA approved BS 1362 fuse must be used of the same rating, marked thus ✪. If the fuse cover is detachable, never use the plug with the cover omitted. If a replacement fuse cover is required, ensure it is of the same colour as that visible on the pin face of the plug (i.e. red or orange). Fuse covers are available from the Parts Department indicated in your User Instructions.

If the plug supplied is not suitable for your socket outlet, it should be cut off and destroyed. The end of the flexible cord should be suitably prepared and the correct plug fitted.

WARNING: A PLUG WITH BARED FLEXIBLE CORD IS HAZARDOUS IF ENGAGED IN A LIVE SOCKET OUTLET.

The Wires in this mains lead are coloured in accordance with the following code:
- Green-and-yellow . . . . . . . Earth
- Blue . . . . . . . . . . . . . . . . . . . Neutral
- Brown . . . . . . . . . . . . . . . . . . Live

As the colours of the wires in the mains lead of this apparatus may not correspond with the coloured markings identifying the terminals in your plug proceed as follows:
- The wire which is coloured green-and-yellow must be connected to the terminal which is marked by the letter E or by the safety earth symbol ✪ or coloured green or green-and-yellow.
- The wire which is coloured blue must be connected to the terminal which is marked with the letter N or coloured black.
- The wire which is coloured brown must be connected to the terminal which is marked with the letter L or coloured red.

WARNING: THIS APPARATUS MUST BE EARTHED.

THE SOCKET-OUTLET SHOULD BE INSTALLED NEAR THE EQUIPMENT AND EASILY ACCESSIBLE.

Terminals

① DC OUT
DC out 12V 1.5A.

② VGA IN 1/YCbCr/S-VIDEO IN
This is the terminal to input RGB, YCbCr or S-video signals.

③ VGA IN 2/VGA OUT
- Connect a computer output to this terminal.
- Output the analog signal form ② to other monitor.

④ HDMI
This is the terminal to input HDMI signals.

⑤ LAN
This is the LAN terminal to connect to the network.

⑥ USB-B
This terminal is used to connect the projector to the computer with a USB cable when you want to use the "USB Display" function.

⑦ USB-A
When using the "Memory Viewer" function, insert the USB memory directly to this terminal.

⑧ RS-232C
When using RS232 to control the projector, please connect the serial control line to this terminal.

⑨ R/C
Connect the wired remote control cable to this jack while operation the projector by wired remote control.

⑩ AUDIO OUT
Connect external audio amplifier to this jack.

⑪ AUDIO IN
This is the terminal to input computer audio signals.

⑫ MONO(R/L)
For a mono audio signal (a single audio jack), connect it to MONO(R/L) jack.

⑬ VIDEO IN
This is the terminal to input video signals.

⑭ Remote Control receiver(BACK)
Operation the projector by remote control.
Part names and functions

Top control and Indicators

① POWER
Turn on/off the projector.

② ▲▼◄►/UP/DOWN/VOL+/VOL-
- Select an item or adjust the value in the screen menu.
- Pan the image in the D. Zoom +/- mode.
- Increase or decrease volume.

③ MENU
Open or close the screen menu.

④ ESC
Return to the previous menu.

⑤ AUTO
Perform various settings configured automatically, including the "Input search", "Auto PC adj." and "Auto keystone".

⑥ OK
- Enter menu operation.
- Execute the selected item.

⑦ INPUT
Select an input source.

⑧ KEYSTONE
Correct the keystone distortion.

⑨ Remote Control receiver(Front)
Operation the projector by remote control.

⑩ POWER
- It lights red when the projector is in standby mode.
- It lights green during normal operations.
- It flashes green in the Power management mode.
- It flashes red during fans cooling.

⑪ LAMP
- It turns yellow when the life of the projection lamp draws to an end.

⑫ WARNING
- It flashes red when the internal projector temperature is beyond the operating temperature range.
- It lights red when the power supply of the projector is abnormal.
Remote control

* Laser Transmitting Window:
  Laser beam will emit from this window. While pressing LASER button during the projection to use the remote control as a laser pointer.

Do not stare directly at the laser transmitting window or aim the window at human body to avoid any physical injury.

1 POWER
   Turn on or turn off the projector.

2 LASER
   Press this button during projection, the remote control can be used as a laser pointer.

3 HDMI
   Select “HDMI” as input source.

4 VIDEO
   Select “Video” as input source.

5 NETWORK
   Select “Network” as input source.

6 VGA IN 1
   Select “Computer 1” as input source.

7 S-VIDEO
   Select “S-video” as input source.

8 USB DISPLAY
   Select “USB Display” as input source.

9 VGA IN 2
   Select “Computer 2” as input source.

10 COMPONENT
   Select “Component” as input source.

11 MEMORY VIEWER
   Select “Memory Viewer” as input source.

12 MENU
   Open or close the screen menu.

13 AUTO
   Enter auto setup adjust mode.

14 ▲▼►▼ button
   - Select item or adjust data in screen menu.
   - Select the image display area in digital zoom + mode.

15 OK
   Enter the menu or select an item in the menu.

Note:
- It only can switch input source to "Computer 2" when select VGA IN2/VGA OUT as VGA IN2.
Part names and functions

19 **FREEZE**
Freeze the projected image.

20 **TIMER**
Enable the timer function.

21 **MUTE**
Turn off the volume.

22 **IMAGE**
Select the image mode.

23 **SCREEN**
Select the screen size.

24 **VOLUME +**
Increase the volume.

25 **LAMP**
Select the lamp mode.

26 **D.ZOOM +**
Digital zoom in the image.

27 **VOLUME -**
Decrease the volume.

28 **PATTERN**
Set the internal test image.

29 **D.ZOOM -**
Digital zoom out the image.

30 **INFO.**
Display the projector information.

31 **Wired remote control output port**
Connect the wired remote control cable to this port while operation the projector by wired remote control.

**ESC**
Return to the previous menu.

**KEYSTONE**
Correct the keystone distortion.

**BLANK**
Temporarily close the image on the screen.
Install remote control batteries

1. Open the battery cover.
2. Install new batteries.
3. Put the cover back.

Two AA batteries For correct polarity (+ and –), be sure battery terminals are in contact with pins in the compartment.

To ensure safe operation, please observe the following precautions:

- Use two (2) AA or LR6 type alkaline batteries.
- Always replace batteries in sets.
- Do not use a new battery with a used battery.
- Avoid contact with water or liquid matter.
- Do not expose the remote control to moisture or heat.
- Do not drop the remote control.
- If the battery has leaked in the remote control, carefully wipe the case clean and install new batteries.
- Risk of explosion if two batteries are replaced by an incorrect type.
- Dispose of used batteries according to the instructions on the battery or local regulations or guides.

Operating range

Point the remote control toward the remote control receivers on the projector (front and back) when pressing any button.

The maximum operating range for the remote control is about 5 meters and 60 degrees.

Wired Remote Control Transmitter

The remote control can be used as a wired remote control. Wired remote control helps you use the remote control outside of the operation range (26.25'/8m). Connect the remote control and the projector with the remote control cable. Connected with the remote control cable, the remote control does not emit wireless signal.
Installation

Positioning the projector

✓ Note:

- The brightness in a room has a great influence on picture quality. It is recommended to limit the ambient lighting in order to get the best image.
- All measurements are approximate and may vary from the actual sizes.

LC-XBS500:

✓ Note:
The data in "()" is the project distance for 16:9 aspect ratio.

Adjustable foot

The projector can be adjusted up to 40 mm with the adjustable feet. Rotate the adjustable feet to lift the projector to a certain height. During lifting, rotate the two feet clockwise.
To lower or retract the adjustable feet, rotate the two feet counterclockwise.
Keystone distortion of projected images can be corrected by auto settings, remote control operation or menu operation.
**Lens shift adjustment**

Projection lens can be moved from side to side and up to down. This function makes the positioning of images easy on the screen.

- The display position can be shifted upward up to 40%(XGA), 50%(WXGA) elevation of the display.
- The display position can be shifted downward up to 40%(XGA), 50%(WXGA) elevation of the display.
- The display position can be shifted to the left up to 10% width of the display.
- The display position can be shifted to the right up to 10% width of the display.
- When the lens is shifted to top.
- When the lens is shifted to bottom.
- When the lens is shifted to leftmost.
- When the lens is shifted to rightmost.

Shifting range

- a: 40%(LC-XBS500) 50%(LC-WBS500)
- b: 10%(LC-XBS500) 10%(LC-WBS500)
Installation

Connecting to computer (Digital and analog RGB)

Cables used for connection:
- VGA cable
- HDMI cable*
- Serial cable*

(*=Cables are not supplied with the projector)

Unplug the power cords of both the projector and external equipment from the AC outlet before connecting the cables.
Connecting to video equipment (Video, S-Video)

Cables used for connection:
- S-video cable**
- Component conversion cable*
- Video cable*

(*=Cables are not supplied with the projector)
(**=Dedicated cable is required and can be ordered through your dealer)

Unplug the power cords of both the projector and external equipment from the AC outlet before connecting the cables.
Installation

Audio cable

Note: The left and right channels are combined when there is only the L(mono) is inserted.

Unplug the power cords of both the projector and external equipment from the AC outlet before connecting the cables.
Connecting to USB device (USB-A, USB-B)

Cables used for connection:
- USB-B cable*

(*=Cables are not supplied with the projector)

Unplug the power cords of both the projector and external equipment from the AC outlet before connecting the cables.
Installation

Connecting the AC power cord

This projector uses nominal input voltages of 100–240V AC and it automatically applies to different input voltages. It is designed to work with a single-phase power system having a grounded neutral conductor. To reduce the risk of electrical shock, do not plug into any other type of power system. If you are not sure of the type of power being supplied, consult your authorized dealer or service station. Connect the projector with all peripheral equipment before turning it on.

⚠️ Note:
The AC outlet should be near this equipment and must be easily accessible.

✓ Note:
For safety, unplug the AC power cord when the projector is not in use. When the projector is connected to an outlet with AC power cord, it is in stand-by mode and consumes a little electric power.

Note on the power cord
AC power cord must meet the requirements of the country where you use the projector. Confirm the AC plug type with the chart below and proper AC power cord must be used. If the supplied AC power cord does not match your AC outlet, contact your sales dealer.

<table>

To power cord connector on your projector.

Ground

To the AC outlet.

Ground

To the AC outlet.

To the AC outlet.

✓ Note:
- Using incorrect power cord may influence the product performance, or even cause hazards like an electric shock or fire. To ensure the product performance and security, please apply the cable of the same model with the original one.
Basic operation

Turn on the projector

1. Complete peripheral connections (with a computer, VCR, etc.) before turning on the projector.

2. Connect the projector’s AC power cord into the AC outlet. The POWER indicator turns red.

3. Press the POWER button on the top control or on the remote control. The POWER indicator becomes green and the cooling fans start to work. The preparation display appears on the screen.

4. If the projector is locked with a PIN code, a PIN code input dialog box appears. Enter the PIN code as instructed below.

   ✓ Note:
   • When the logo select is set to be “Off”, the logo will not be displayed on the screen. (See page 49)

Enter a PIN code
Press the OK button, press ▲▼ button to select a number, then press the OK button, select a number and enter it to the PIN code box, then number changes to “***”, automatically move the cursor to next box. If you fixed an incorrect number, press MENU button to reset it again. Repeat this step to complete entering a three-digit number.

After entering the three-digit number, move the cursor to “Set”, then you can start to operate the projector.

If you entered an incorrect “PIN code”, the number (“***”) turn red. PIN code will be reset within one second automatically. Enter the correct PIN code all over again.

What is PIN code?
PIN (Personal Identification Number) code is a security code that allows the person who knows it to operate the projector. Setting the PIN code can prevent unauthorized use of the projector. A PIN code consists of a three-digit number. Refer to the PIN code lock function in the “Expand” “Security” menu on page 50 for PIN code lock operation of the projector.

Caution on handling the PIN code
If you forget your PIN code, the projector can no longer be started. Take a special care in setting a new PIN code. Write down the number in a column on page 88 of this manual and keep it properly. Should the PIN code be missing or forgotten, consult your dealer or service center.
Basic operation

Turn off the projector

1. Press the POWER button on the top control or on the remote control, and "Power off?" appears on the screen.

2. Then, press the POWER button again in 4 seconds. The POWER indicator starts to flash red, and the cooling fans keep running (You can select the fan noise and running speed). Now you can unplug the AC power cord after the fans stop running. Otherwise, the service life of the projector will be affected or the projector will not be turned on or turn on abnormal.

3. When the projector has cooled down enough to be turned on again, the POWER indicator stops flashing.

To maintain the lamp life, once you turn the projector on, wait at least 5 minutes before turning it off.

Do not operate the projector continuously without reset. Continuous use may result in shortening the lamp life. Turn off the projector and let it standby for about an hour in every 24 hours.

Note:
- When the On start function is “On”, this projector is turned on automatically by connecting the AC power cord to an AC outlet.
- The running speed of cooling fans is changed according to the temperature inside the projector.
- Do not put the projector in a case before it is cooled enough.
- If the POWER indicator flashes or emits a red light, see page 82.
- While the POWER indicator is flashing, the lamp is being cooled down and the projector cannot be turned on. Wait until the POWER indicator turns red to turn on the projector again.
- The fan rotation will terminate directly if the AC power cord is unplugged immediately after the projector is turned off.
- The projector can be turned on after the POWER indicator turns red. The waiting time to restart will be shortened when the normal power-off processing for fan cooling is completed, comparing with the time the AC power cord is immediately unplugged after the power-off.

“Power off ?" disappears after 4 seconds.
How to operate the screen menu

The projector can be adjusted or set via the on-screen menu. Each main menu can be divided into several levels of submenus, and submenus are also divided into several levels of sub-submenus. For each adjustment and setting procedure, refer to the respective sections in this manual.

1 Press the MENU button on the remote control or top control to display the screen menu.

2 Press ▲▼ buttons to select an entry in the main menu and then press the OK button to enter the submenu.

3 Press ▲▼ buttons to select an item, and then press the OK button to set or enter the submenu.

4 Press ▲▼ buttons to adjust settings or switch among the items. Press the OK button for corresponding operation.

5 Press ESC button on the remote control or top control to go back to the previous menu. Press MENU button again to exit the screen menu.
Basic operation

Menu bar

① Display
- Adjust computer parameters to match with VGA input signal format: **Auto PC adj.**, **Fine sync**, **H Position**, **V Position** and **H.Size**.
- **Aspect**: Normal and Wide.
- **Project way**: select a project way among **Front**, **Rear**, **Ceiling/Front** and **Ceiling/Rear**.
- **Menu position**: set the menu's position on the screen.
- **Background display**: set the background display color for project screen.
- **System**: select a system signal format to match the input source.

② Color adjust
- **Image mode**: the available image modes is **Standard**, **Dynamic**, **User Image**, **Colorboard**, **Blackboard(Green)** or **Cinema**.
- Image color adjust:
  - If a computer is selected as a signal source, the following image adjusting options are available: **Contrast**, **Brightness**, **Color temp.**, **White balance (R/G/B)** and **Sharpness**.
  - If video equipment is selected as a signal source, the following image adjusting options are available: **Contrast**, **Brightness**, **Color**, **Tint**, **White balance (R/G/B)** and **Sharpness**.

③ Setting
Configure basic operation settings of the projector: **On start**, **Standby mode**, **High land**, **Lamp control**, **Cooling fast**, **Closed caption**, **Key lock**, **Iris**, **Terminal**, **Sound** and **HDMI setup**.

④ Expand

⑤ Memory viewer
Configure operation settings for Memory Viewer function: **Set Slide**, **Slide transition effect**, **Sort order**, **Rotate**, **Best fit**, **Repeat** and **Apply**.

⑥ Info.
The system information of the projector.
**Adjust zoom and focus**

Rotate the ZOOM to zoom in or zoom out the image.

Rotate the FOCUS to adjust the focus of the image.

**Lens shift adjustment**

Perform the lens shift adjustment with ① and ②.

Rotate ①, the screen may deviate up-and-down from the central axis of lens shift 40% (XGA), 50% (WXGA) elevation of the display.

Rotate ②, the screen may deviate left-and-right from the central axis of lens shift 10% width of the display.

**Auto setup function**

This function is available just by pressing the AUTO button on the remote control or top control. The system then automatically performs various settings in the "Expand" menu, including "Input search", "Auto PC adj." and "Auto keystone".
Basic operation

Keystone

If a projected image has keystone distortion, follow the steps below to manually correct the keystone distortion.

Press KEYSTONE button on the top control or on the remote control. The Keystone screen will displayed, (it includes: H/V Keystone, Corner correction, Curved correction and Reset value), press ▲▼ to select the item.

H/V Keystone...........Adjusts when the horizontal or vertical trapezoid of the projected image is distorted.

Corner correction...Adjusts when the four corners of the projected image are distorted.

Curved correction...Adjusts when the linearity is not uniform or the vertical and horizontal lines are distorted.

Reset value.............Return the corrected values to the factory default values.

H/V Keystone

- The arrows are white when there is no correction.
- The arrows that are used for correction turns red.
- Press ▲▼ button long time, the arrows turn red and can be adjusted quickly
- The arrows disappear at the maximum correction.
- If you press the KEYSTONE button on the remote control or top control once again while the keystone dialog box is being displayed, the keystone adjustment is canceled.
- The adjustable range can be limited depending on the input signal.
Volume

Direct operation

Volume
Press the VOLUME +/- buttons on the remote control or top control to adjust the volume.

Mute
Press the MUTE button on the remote control and select "On" to turn off the audio temporarily. To restore the audio to its previous level, press the MUTE button again and select "Off" or press the VOLUME +/- buttons. Mute function is also effective for AUDIO OUT jack.

Menu operation
1 Press the MENU button to display the screen menu. Press ▲▼ button to select the "Setting" menu icon. Press the OK button to enter the submenu entry.

2 Press ▲▼ button to select "Sound" and then press the OK button.

3 Press ▲▼ button to select "Volume" or "Mute" to adjust.

Volume
Press ▲ to increase the volume and ▼ to decrease the volume.

Mute
Press ▲▼ button to switch the mute function (On/Off).

4 Press the OK button to select.
Basic operation

Remote control operation

Using the remote control for some frequently used operations is advisable. Just pressing one of the buttons enables you to quickly without calling up the screen menu.

FREEZE button
Press FREEZE button on the remote control, video will be paused and the audio is muted. The icon is displayed on the screen during Freeze. Press FREEZE button again, the video playback resumes and the audio is unmuted.

MUTE button
Press MUTE button on the remote control to turn off the volume. Press MUTE button again or VOLUME +/- button to cancel mute function.

VOLUME +/- button
Press VOLUME +/- button on the remote control to increase or decrease the volume.

IMAGE button
Press IMAGE button on the remote control to select the image mode you want.

LAMP button
Press LAMP button to select a lamp mode to change the brightness of the screen.

Normal ..Normal brightness.

ECO ..... Lower brightness, reducing the lamp power consumption and extending the lamp life.

INFO button
Press INFO button on the remote control to display the projector information.

Note:
See the next page for the description of other buttons.
Basic operation

ESC button
Return to the previous menu.

BLANK button
Press BLANK button on the remote control to black out the image. To restore to normal, press the BLANK button again or press any other button.

The screen changes each time you press the button as follows:
Black out → Normal → Black out → Normal ...

“Blank” disappears after 2 seconds if there is no other button operation.

TIMER button
Press TIMER button. The timer display “00:00” appears on the screen and the timer starts to count time (00:00–59:59).
To stop the Timer, press TIMER button. Press TIMER button again, and then the Timer display disappears.

SCREEN button
Press SCREEN button on the remote control to select the screen size you want.

D.ZOOM+ button
Press D.ZOOM+ button, the on-screen menu will disappear, while the information on digital zoom + appears.
Press ▲▼◄► to move the image horizontally and vertically.

The moving is effective only when the image is larger than the size of the screen.

D.ZOOM- button
Press D.ZOOM- button, the on-screen menu will disappear, while the information on digital zoom - appears.
To exit the “digital zoom +/-” mode, press any button except the D.ZOOM+-.

To return to normal size, select “SCREEN” button on the remote control to adjust screen size, or press ▲▼◄► button to move the image horizontally or vertically.
Basic operation

**Input select**

Direct Operation
Press VGA IN 1, VGA IN 2, HDMI, Component, Video, S-video, Network, Memory Viewer or USB Display on the remote control as input source.

Menu operation
1. Press INPUT button on the top control to display the input select menu.

2. Press ▲▼ button to select Computer 1, Computer 2, HDMI, Component, Video, S-video, Network, Memory Viewer or USB Display, then press the OK button.

- **Computer 1**
  When input source is from computer connected to VGA IN 1 terminal with VGA cable, please select "Computer 1".

- **Computer 2**
  When input source is from computer connected to VGA IN 2/VGA OUT terminal with VGA cable, please select "Computer 2".

- **HDMI**
  When input source is from equipment connected to HDMI terminal with HDMI cable, please select "HDMI".

- **Component**
  Select it when the input source is from the video equipment connected to YCbCr terminal.

- **Video**
  Select it when the video input signal is connected to VIDEO IN terminal.

- **S-video**
  Select it when the video input signal is connected to S-VIDEO IN terminal.

**Note:**
- When the "Input search" function is set to "On" in the "Auto setup" function, press AUTO button, the input signal will be searched automatically.
- When VGA IN 2/VGA OUT terminal is used as VGA OUT, Computer 2 can not be selected.
Basic operation

**Input select**

Direct Operation
Press VGA IN 1, VGA IN 2, HDMI, Component, Video, S-video, Network, Memory Viewer or USB Display on the remote control as input source.

Menu operation
1 Press INPUT button on the top control to display the input select menu.
2 Press ▲▼ button to select Computer 1, Computer 2, HDMI, Component, Video, S-video, Network, Memory Viewer or USB Display, then press the OK button.

Remote control

**Note:**
- When the "Input search" function is set to "On" in the "Auto setup" function, press AUTO button, the input signal will be searched automatically.
- When signal is in "USB Display", "Memory Viewer" and "Network", FREEZE, ASPECT, IMAGE, AUTO SETUP and SCREEN function cannot work.
- Memory Viewer function, please refer to page 67~68.
- USB Display function, please refer to page 69~70.
Auto PC adj.

Auto PC Adjustment function is provided to automatically adjust Fine sync, Horizontal, Vertical and H.Size to conform to your computer.

Menu operation

Auto PC adj.

1. Press MENU button on the remote control or top control to display screen menu. Press ▲▼ button to select "Display", then press the OK button.
2. Press ▲▼ button to select "Auto PC adj.", then press the OK button. "Please wait" will be displayed on the screen, the Auto PC adj. function will be executed.

Fine sync

You can cut off flicker from the image displayed by pressing ▲▼ to adjust the value.(from 0 to 31).

H Position

Press ▲▼ to adjust the horizontal image position.

V Position

Press ▲▼ to adjust the vertical image position.

H.Size

This function is used to adjust and minimize the effect of interference caused by projection of patterns consisting of vertical stripes. The projection of the vertical striped pattern may cause cyclic patterns (noise). Adjust to minimize the amount of interference.(From -15 to +15).

Note:

The adjustment of Fine sync, H Position, V Position and H.Size is only for computer signal input.
Aspect

You can set a screen size to fit the image while maintaining the aspect ratio of the input signal.
1. Press ▲▼ to select "Aspect" and then press the OK button.
2. Press ▲▼ button to select the item, then press the OK button.
Normal...Projects the image at the maximum size while maintaining the aspect ratio of the input signal.
Wide....Projects the image at 16:9 aspect ratio.

Project Way

This function is used to set the project way.
1 Press MENU button on the remote control to display screen menu. Press ▲▼ button to select "Display", then press the OK button.
2 Press▲▼ button to select "Project way", press the OK button.
3 Press▲▼ button to select the item you want to set, press the OK button.
Front ........ Projects to front screen when projector is front standing.
Rear ........ Projects to rear screen when projector is front standing.
Ceiling/Front .... Projects to front screen when projector is in ceiling state.
Ceiling/Rear ..... Projects to rear screen when projector is in ceiling state.

Menu Position

This function is used to change the position of screen menu.
1 Press MENU button on the remote control to display screen menu. Press ▲▼ button to select "Display", then press the OK button.
2 Press▲▼ button to select "Menu position", press the OK button.
3 Press▲▼ button to select the item you want to set, press the OK button.
Upper left .... Menu locates on upper left of the screen.
Upper right .. Menu locates on upper right of the screen.
Center ........ Menu locates at the center of the screen.
Lower left .... Menu locates on lower left of the screen.
Lower right .. Menu locates on lower right of the screen.
Display

Background Display

This function is used to select the screen background of the projector when there is no signal detected.

1 Press MENU button on the remote control or top control to display screen menu. Press ▲▼ button to select "Display", then press the OK button.
2 Press ▲▼ button to select "Background display", press the OK button.
3 Press ▲▼ button to select the item you want to set, press the OK button.

Black .... Select black background.
Blue ...... Select blue background.

System

Computer system select

The projector automatically tunes to various types of computers with its function of Multi-scan system and Auto PC Adjustment. If a computer is selected as a signal source, the projector automatically detects the signal format and tunes to project proper images without any additional setting.

One of the following messages may appear when:

**Auto**

When the projector cannot recognize the connected signal conforming to the provided computer system, Auto is displayed on the System menu box and the Auto PC Adj. function works to display proper images. If the image is not projected properly, a manual adjustment is required.

-----

There is no signal input from computer. Check the connection between your computer and projector.
Select computer system manually

The system can also be selected manually.
1 Press MENU button on the remote control or on top control to display the screen menu. Press ▲▼ button to select the "Display" icon, and press the OK button.
2 Press ▲▼ button to select "System" and press the OK button.
3 Press ▲▼ button to select your required system, and then press the OK button.

Note:
When HDMI is selected, System menu for computer is disable.

Video or S-video

Auto
The projector automatically detects an incoming video system, and adjusts itself to optimize its performance. When Video System is PAL-M, PAL-N or PAL60, select the system manually.

PAL/SECAM/NTSC/NTSC4.43/PAL-M/PAL-N/PAL60
If the projector cannot reproduce proper video images, select a specific broadcast signal format from PAL, SECAM, NTSC, NTSC 4.43, PAL-M, PAL-N and PAL60.
Color adjust menu is used to set the image mode and adjust the image.

**Image Mode**

Direct operation
Press IMAGE button on the remote control to select the image mode.

Menu operation
1. Press MENU button on the remote control or top control to display screen menu. Press ▲▼ button to select "Color adjust" menu, then press the OK button.
2. Press ▲▼ button to select "Image mode", press the OK button.
3. Press ▲▼ button to select the item you want to set, press the OK button.

**Dynamic**
The light output is maximized for use in bright areas.

**Standard**
The picture becomes suitable for moving images in general.

**Cinema**
For watching movies with multiple gray scale levels.

**Blackboard (Green)**
For viewing the image projected on a blackboard (green) by enhancing the image quality. This is mainly effective on a green colored board instead of a black colored board.

**Colorboard**
For images projected onto a red, blue, yellow, or green wallpaper.

**User Image**
Image quality preset by the user in the Image adjustment menu.
Color adjust (Computer)

1 Press MENU button on the remote control or top control to display screen menu. Press ▲▼ button to select "Color adjust", then press the OK button.
2 Press ▲▼ button to select the item you want to set, press the OK button.
3 Press ▲▼ button to adjust the data.

Contrast
Press ▼ to decrease the contrast and ▲ to increase it.

Brightness
Press ▼ to decrease the brightness and ▲ to increase it.

Color temp.
Press ▲▼ to select color temperature. (Low, Mid and High)

Red (White balance)
Press ▼ to lighten the red tone and ▲ to deepen it.

Green (White balance)
Press ▼ to lighten the green tone and ▲ to deepen it.

Blue (White balance)
Press ▼ to lighten the blue tone and ▲ to deepen it.

Sharpness
Press ▼ to decrease the sharpness of the image and ▲ to increase it.

√ Note:
- If you only adjust projector to "Video", "S-video" or "Component", "Sharpness" is disable.
Color adjust

Color adjust (Video, S-video, Component)

1. Press MENU button on the remote control or top control to display screen menu. Press ▲▼button to select "Color adjust", then press the OK button.
2. Press ▲▼button to select the item you want to set, press the OK button.
3. Press ▲▼button to adjust the data.

Contrast
Press ▼ to decrease the contrast and ▲ to increase it.

Brightness
Press ▼ to decrease the brightness and ▲ to increase it.

Color
Press ▼ to decrease the chroma and ▲ to increase it.

Tint
Press ▲▼ to select the appropriate tone for the image.

Red (White balance)
Press ▼ to lighten the red tone and ▲ to deepen it.

Green (White balance)
Press ▼ to lighten the green tone and ▲ to deepen it.

Blue (White balance)
Press ▼ to lighten the blue tone and ▲ to deepen it.

Sharpness
Press ▼ to decrease the sharpness of an image and ▲ to increase it.

√ Note:
- Signal input "Video", "S-video" or "Component", "Tint" is in grey, it is disable.
- If you only adjust projector to "Video", "S-video" or "Component", "Sharpness" is disable.
The projector has "Setting" menu that allows you to set the other various functions described as follows.

1 Press MENU button on the remote control or top control to display screen menu. Press ▲▼ button to select "Setting", then press the OK button.
2 Press▲▼ button to select the item you want to set, press the OK button.
3 Press▲▼ button to adjust the item, then press the OK button.

**On start**

Enable the projector to be turned on automatically just by connecting the AC power cord to an outlet when this function is set to On.
On ........ Start the projection immediately, enter countdown display.
Off ........ Start up in the standby mode.

**Standby mode**

This function is available when operating the projector via network.
Press▲▼ button to select the item below:
Eco.......... Restrict some functions in the standby mode to reduce power consumption. In this case, you cannot use network functions and some RS-232C commands.
Normal ... Do not restrict network function and serial communication function even in the standby mode.
Setting

High land
Enable to control the fan through the Setting menu.
You can select the running speed of the fan according to the altitude of the location where the projector is installed.
Off ...... Normal speed. Set it so if the projector is operated at a lower altitude.
On ...... Faster than Off. Set it so if the projector is operated at a higher altitude because fans will produce weaker effects.

✓ Note:
Please set High land "On" when operating the projector higher than 1400 meters.

Lamp control
Change the brightness of the screen.

Normal .... Normal brightness.

Eco .......... Lower brightness, reducing power consumption and extending the lamp life.

Cooling fast
This function provides the following options in the cooling fans' operation after turning off the projector.
Normal... Normal cooling speed.
60 sec ... Faster and lounder than Normal, cooling time is shorter.
0 sec ..... Enable you directly unplug the AC power cord after turning off the projector, no need waiting for cooling.

✓ Note:
When it is set to "0 sec", you cannot restart the projector immediately after the power-off. The lamp remains high temperature and needs to be cooled, so it takes longer time than usual for the lamp to light up again.
Closed Caption

Allows the subtitle to be displayed for the audio contents or other information. If the input source contains closed caption, you can enable this function and change the channel. Press ▲▼ to select Off, CC1, CC2, CC3 or CC4.

✓ Note:
- The icon of Closed Caption is displayed in grey when it is disable.
- Closed caption is disable when screen menu or Timer displayed on screen.

Key lock

This function allows you to use the Key lock to set the security for the projector operation. Select "Key lock" and press the OK button, then press ▲▼ button to select the item you want.

......... Unlock.

Projector ...... Lock the operation of the top control. To unlock, use the remote control.

Remote Control ...... Lock the operation of the remote control. To unlock, use the top control.

If the top control accidentally becomes locked and you do not have the remote control nearby or there is something wrong with your remote control, contact the dealer where you purchased the projector or the service center.
Setting

Iris
This function is used to increase the contrast of the image.
On .... Enable Iris function, increase the contrast of the image.
Off .... Disable Iris function.

Terminal
The VGA IN 2/VGA OUT terminal can be used as computer input or monitor output. Press ▲▼ to select input or output.
Computer 2 ...... Computer 2 input.
Monitor out ...... Monitor out.

Sound
This item is used to adjust the volume.
Sound ... Press ▲ button to increase the volume, press▼ button to decrease the volume.
Mute ..... Press ▲▼ button to switch mute function. (On/Off)
HDMI setup

When the external equipment is connected to "HDMI" terminal, if the image is not projected properly, please switch the settings of "Image" or "Sound" in "HDMI setup" menu.

1 Press the MENU button to display the screen menu. Press ▲▼ button to select the "Setting" menu icon. Press the OK to enter the submenu entry.
2 Press ▲▼ button to select "HDMI setup" and then press the OK button.
3 Press ▲▼ button to select "Image" or "Sound" to adjust.
4 Press ▲▼ button to switch the item.

Image

64-940 ....... Select when the HDMI terminal of an external device (such as a blu-ray player) is connected to the "HDMI" terminal.

0-1023 ....... Select when the DVI-D terminal output of an external device (such as a computer) is connected to the "HDMI" terminal via a conversion cable or similar cable. Select also when the HDMI terminal output of a computer or other device is connected to the "HDMI" terminal.

✓ Note:
The optimal setting varies depending on the output setting of the connected external device. Refer to the operation instruction of the external device regarding the output of the external device.

Sound

HDMI ........ Select when the HDMI cable is connected, the image and audio are transmitted, and you do not need to connect the audio signal separately.

Computer ... Select when the DVI-D terminal output of an external device (such as a computer) is connected to the "HDMI" terminal via a conversion cable or similar cable. The sound will not be transmitted, the audio signal is input to "AUDIO IN" terminal.
Expand

The projector has Expand menu that allows you to set the other various expand functions described as follows.

1 Press MENU button on the remote control to display screen menu. Press ▲▼ button to select "Expand", then press the OK button.
2 Press ▲▼ button to select the item you want to set, press the OK button.
3 Press ▲▼ button to adjust the item, then press the OK button.

Language

This projector provides multi-language screen menu.

You can press ▲▼ button to select the language you want.

Auto setup

Press AUTO button on the remote control to execute "Input search", "Auto PC adj." and "Auto keystone" functions.

Input search

Allows you to automatically detect input signals. It stops when a signal is found. Press ▲▼ button to select an option below:

On ....... Enabled. This function is used to detect input signals automatically and stops when finding a signal.

Off ....... Disabled.

Auto PC adj.

On ....... Press the AUTO button on the remote control or top control to enable Auto PC adj. function automatically.

Off ....... Cancel Auto PC adj. function.

Auto keystone

Auto ...... When detecting the projector is tilted, correct the vertical keystone in real time.

Manual ......... When pressing KEYPSTONE button on the remote control or top control, perform a vertical keystone.

Off ....... Disabled.

Note:
- "Input search", "Auto PC Adj." and "Auto Keystone" cannot be set to "Off" at the same time. At least one of them is set to "On".
- Sometimes the auto keystone maybe correct image imperfectly, manual keystone is required.
- The Auto keystone function cannot work when "Display" → "Project way" is set to "Ceiling/Front" or "Ceiling/Rear".

Expand menu

Auto setup
**Keystone**

This function is used to store or reset the keystone correction when the AC power cord is unplugged.

1. Press MENU button on the remote control to display screen menu. Press ▲▼ button to select "Expand", then press the OK button.
2. Press ▲▼ button to select "Keystone", press the OK button.
3. Press ▲▼ button to select the item you want to set, press the OK button.

Keystone

Sets whether or not to keep the keystone correction after turn off the projector or plug out the power cord.

Store ..... The keystone correction will be kept when plug out the power cord or turn off the projector.

Reset .... When "Standby mode" is set to "Eco", plug out the power cord or turn off the projector, the keystone correction will be canceled. When "Standby mode" is set to "Normal", plug out the power cord, the keystone correction will be canceled; turn off the projector, the keystone correction will be kept.

**H/V Keystone**

Adjust when the horizontal or vertical trapezoid of the projected image is distorted.

Reduce the upper width with ▲ button.  Reduce the lower width with ▼ button.  Reduce the left width with ◄ button.  Reduce the right width with ► button.

**Corner correction**

Adjust when the four corners of the projected image are distorted. Press ▲▼◄► to adjust the item.

![Corner correction](image_url)

**Note:**
- The white arrows indicate that there is no correction.
- A red arrow indicates the direction of correction.
- An arrow disappears at the maximum correction.
Curved correction
Adjust when the linearity is not uniform or the vertical and horizontal lines are distorted.
Press ▲▼◄► to adjust the item.

✓ Note:
- Either "H/V Keystone", "Corner correction" or "Curved correction" setting value is valid. When the "H/V Keystone", "Corner correction" or "Curved correction" adjustment is finished, the adjusted value will be reset when you adjust the other one.
- The "Curved Correction X Offset" and the "Curved Correction Y Offset" can not be adjusted independently. After adjusting the "Curved Correction X/Y Gain" at the beginning, please adjust the "Curved Correction X Offset" and "Curved Correction Y Offset".
- Press the KEYSTONE button on the remote control when the keystone screen is displaying (it includes: H/V Keystone, Corner correction, Curved correction and Reset value), press ▲▼ button switch to the other adjustment screen.
- Correcting up to ±15° for the tilt in the vertical direction and ±15° for the tilt in the horizontal direction are available for adjustments with "Keystone". However, the image quality will degrade and it will get harder to focus with more correction. Install the projector so that the correction will be as small as possible.
- Screen size will also change when "H/V Keystone" is used to perform various adjustments.
- Aspect ratio of the image size may shift depending on the correction.

Reset value
Return the corrected values to the factory default values.
Press ▲▼ to select "Reset value", then press the OK button, the state of the keystone correction is released.
This function allows you to customize the screen logo with Logo select, Capture, Logo PIN code lock and Logo PIN code change functions.

**Logo Select**
This function decides on the starting-up display from following options.
- Default .... Show the factory-set logo.
- User..........Show the image captured by user.
- Off ........... Show the countdown display only.

**Capture**
You can capture a projected image as start logo . Select "Capture" and press the OK button. Confirmation dialog box appears, select "Yes" to start capturing.

**Logo PIN code Lock**
This function prevents an unauthorized person from changing the screen logo.
- Off ..........The screen logo can be changed freely from the Logo menu.
- On ...........The screen logo cannot be changed without a Logo PIN code.
If you want to change the Logo PIN code lock setting, press the OK button and the Logo PIN code dialog box appears. Enter a Logo PIN code by following the steps below.

**PIN code reset**
Press ▲▼ button to select a number, and then press the OK button to enter this number, automatically move the cursor to next box. If you fixed an incorrect number, press MENU button to reset it again.
Repeat this step to complete entering a three-digit number.
After entering the three-digit number, automatically move the cursor to "Set", and press the OK button, then you can start to operate the projector.
If you entered an incorrect PIN code, the number (*** turn red, it will be reset automatically within one second. Enter the correct PIN code all over again.

**Logo PIN code change**
You can change the Logo PIN code (three number). Press the OK button to select Logo PIN code change. Logo Pin code dialog box appears, press ▲▼ button to enter the correct code. The New Logo PIN code input dialog box appears. Set a new Logo PIN code, confirmation box appears, select Yes to set the new Logo Pin code.
Be sure to note the new Logo PIN code and keep it on hand. If you lost the number, you could no longer change the Logo PIN code setting.

**CAUTION:**
WHEN YOU HAVE CHANGED THE LOGO PIN CODE, WRITE DOWN THE NEW PIN CODE IN COLUMN OF THE LOGO PIN CODE NO. MEMO ON PAGE 88, AND KEEP IT SECURELY.
SHOULD THE LOGO PIN CODE BE LOST OR FORGOTTEN, THE LOGO PIN CODE SETTING CAN NO LONGER BE CHANGED.
Security

This function allows you to use the PIN code lock and PIN code change functions to set the security for the projector operation.

PIN code lock
This function prevents the projector from being operated by unauthorized persons and provides the following setting options for security.

Off ............. Unlocked.
On ............. Enter the PIN code every time turning on the projector. If you want to change PIN code lock setting or PIN code, you must enter the PIN code. The original PIN code is "111".

If you want to change the PIN code lock setting, press the OK button, then PIN code dialog box appears.

Enter PIN code
Press ▲▼ button to select a number, and then press the OK button to enter this number, automatically move the cursor to next box. If you fixed an incorrect number, press MENU button to reset it again.
Repeat this step to complete entering a three-digit number.
After entering the three-digit number, move the cursor to "Set", and press the OK button, then you can start to operate the projector.
If you entered an incorrect PIN code, the number (*** ) turn red, it will be reset automatically within one second. Enter the correct PIN code all over again.

PIN code change
The PIN code can be changed to three-digit number. Press ▲▼ button to select PIN code change. Pin code dialog box appears, Press ▲▼ button to enter the correct code. The New PIN code input dialog box appears. Set a new PIN code.

CAUTION:
WHEN YOU HAVE CHANGED THE PIN CODE, WRITE DOWN THE NEW PIN CODE IN COLUMN OF THE PIN CODE NO. MEMO ON PAGE 88, AND KEEP IT SECURELY. SHOULD THE PIN CODE BE LOST OR FORGOTTEN, THE PIN CODE SETTING CAN NO LONGER BE CHANGED.
For reducing power consumption as well as maintaining the lamp life, the Power management function turns off the projection lamp when the projector is not operated for a certain period. Select one of the following options:

- **Ready** .................. When the lamp has been fully cooled down, the POWER indicator changes to green blinking. In this condition, the projection lamp will be turned on if the input signal is reconnected or any button on the remote control or top control is pressed.
- **Shut down** ............ When the lamp has been fully cooled down, the power will be turned off.
- **Off** ........................ Power management function is off.
- **Timer** ........................ If the input signal is interrupted and no button is pressed for more than 30 seconds, the timer display with No signal appears. It starts the countdown until the lamp is turned off. Press ▲▼ button to set the Timer(1~30min.)
- **Ready countdown**..Set the time that ready status transfers to standby status automatically.(0-30min. 0 Min: not transfer automatically)

In ready status, press POWER button to switch to standby status, and press any other button to turn on the projector.

- **Note:**
  - Factory default: “Timer: 5 min”,
  - “Ready countdown: 0 min”.

Time left before Lamp is off.
Expand

**Filter counter**

This function is used to set a frequency for filter cleaning.

When the projector reached a specified time between cleanings, a Filter warning icon appears on the screen, notifying the cleaning is necessary. After cleaning the filter, be sure to select RESET and set the timer. The Filter warning icon will not turn off until the filter counter is reset.

Filter counter .......... Display the using time of the filter.

Timer ..................... Set the time to display the warning icon.

Filter counter reset ... Reset the filter counter.

**Test Pattern**

This function is used to set the internal test signal: Gray scale 1, Gray scale 2, Gray scale 3, Gray scale 4, Color bar, Red, Green, Blue, Cross hatch, White, Black and Raster gray.
Network

Function: PC controls projector via LAN.

Preparation:
1. Equipment: PC, projector, cables
2. Connection procedures:
   - Connect the projector to routers or switches of the LAN by direct or cross cable. If it fails to connect PC and projector by parallel cable, please switch to cross cable as suggested.
3. After the computer is booted and the projector is plugged in, indicator lights of LAN interface on will flash continuously.

Operation procedures:
1. Turn on the projector.
2. Obtain network address. DHCP set is displayed as On and obtain network address automatically. (If familiar with network, you can set DHCP as Off and obtain network address manually.)
3. Enter network settings menu.
   - Press MENU button on the remote control to display screen menu. Press ▲▼ button to select Expand, then press the OK button.
   - Press ▲▼ button to select Network, and then press the OK button to enter the network menu.
     - MAC address ... Displays the MAC address of wired network of this projector.
     - IP address ......... Displays the IP address of wired network of this projector.
   - When DHCP is set On, IP address, Subnet, Gateway and DNS will be obtained automatically, press the OK at "Set" to confirm the parameters.
   - When DHCP is set Off, press the OK button to enter IP address, then press ▼ button to enter Subnet, Gateway and DNS respectively, press the OK at "Set" to confirm the parameters.

✓ Note:
See page 59 for usage of Network.
Expand

**Remote control**

Remote control
This switching function prevents remote control interfering when operating several projectors or video equipment at the same time.

The projector is assigned 10 different remote control codes (Code 0-9), which are default initial code (Code 0) and another 9 codes (code 1-9).

Code set on the projector and remote control should be the same. For example, when using code 7 to operate the projector, the remote control code also must be switched to Code 7.

Change the projector’s code: Select "Remote control" in advanced menu.

Change the remote control code: Press the OK button and a number key (0-9) on the remote control for more than 5 seconds to switch the codes. When the light start flashing, it means code is completed.

**RC sensor**

Set RC sensor when using remote control to operate projector.

Front ..... Choose the front remote control receiver.
Back ..... Choose the back remote control receiver.
Both ..... Choose both front and back remote control receivers.

**Factory default**

This function returns all setting values except for the User logo, PIN code lock, Logo PIN code lock, Lamp counter and Filter counter to the factory default settings.
Lamp counter

Be sure to reset the Lamp counter after the lamp is replaced. When the Lamp counter is reset, the WARNING indicator stops lighting and the Lamp replacement icon disappears.

1 Press MENU button on the remote control to display screen menu. Press ▲▼ button to select "Expand", then press the OK button.

2 Press ▲▼ button to select "Lamp counter", press the OK button.

3 Press ▲▼button to select "Lamp counter reset" and then press the OK button. "Lamp replacement counter reset? " appears. Select "Yes" to continue.

4 Another confirmation dialog box appears, select "Yes" to reset the Lamp counter.

√ Note:
Do not reset the Lamp counter without implementing lamp replacement. Be sure to reset the Lamp counter only after replacing the lamp.
Memory viewer

The Memory Viewer function makes it possible to project the pictures which are stored in the USB memory when the USB memory is inserted into the projector.

1 Press MEMORY VIEWER button on the remote control.
2 Press MENU button on the remote control to display screen menu. Press ▲▼ button to select "Memory Viewer", then press the OK button.
3 Press ▲▼ button to select the item you want to set, press the OK button.
4 Press ▲▼ button to adjust the item, then press the OK button.

Set Slide
Start the slide show.

Slide transition effect
Set the slide transition effect when the slide show image is switching.
Slide down .... Switch the image from the top to the bottom.
Slide right ..... Switch the image from the left to the right.

Sort Order
Set the sort order of the slide show.
Extend Order ...... Sort files or folders in extended order.
Size Order ........ Sort files or folders in amount of data order.
Time Order ........ Sort files or folders in stored time order.
Name Order ........ Sort files or folders in name order.

✓ Note:
See page 67 for Memory viewer function.
Memory viewer

**Rotate**
Set the rotate direction of image.

No Rotate .......... Rotate is disabled.
270 Degrees ...... Rotate 270 degrees in anti-clockwise direction.
180 Degrees ...... Rotate 180 degrees.
90 Degrees ........ Rotate 90 degrees in anti-clockwise direction.

**Best Fit**
Set the image whether or not to fit with the projected screen.

On ...... Display the image to fit with the aspect of the projected screen.
Off ...... Display in the normal pixels of the image.

**Repeat**
Set whether or not to play the slide show repeatedly.

On ...... Repeat broadcast the first file after the last file is broadcasted.
Off ...... Return to the thumbnail display after the last file is broadcasted.

**Apply**
Execute the setting in slide show.

Press ▲▼ to select "Apply", then press the OK button, the setting of the items except for "Set Slide" will be effective.
Information

The information menu is used to the detect signal of projected image and running state.

Menu operation
Press MENU button on the remote control or top control to display the screen menu. Press ▲▼ to select Info., the information menu will appear as the right picture.

The information below will display in information menu.

Input
The selected input source is displayed.

H-sync freq.
The horizontal frequency of the input signal is displayed in KHz or - - - -KHz when no signal is detected.

V-sync freq.
The vertical frequency of the input signal is displayed in Hz or - - - - Hz when no signal is detected.

Lamp status
The setting status of "Lamp control" is displayed.

Lamp counter
The usage time of the lamp is displayed.

Power management
The setting status of "Power management" is displayed.

Image mode
The setting status of "Image mode" is displayed.
LAN control

Function: PC controls projector via LAN.

Preparation:
1. Equipments: PC, projector, cables
2. Connection procedures:
   Connect the projector to routers or switches of the LAN by direct or cross cable. If it fails to connect PC and projector by parallel cable, please switch to cross cable as suggested.
3. After the computer is booted and the projector is plugged in, indicator lights of LAN interface and computer interface will flash continuously.

Operation procedures:
1. Turn on the projector.
2. Obtain network address. DHCP set is displayed as on and obtain network address automatically. If familiar with network, you can set DHCP as close and obtain network address manually.
3. Enter network settings menu.
   (1) Press MENU button on top control or remote control to display screen menu. Press ▲▼ button to select "Expand" icon, then press the OK button.
   (2) Press ▲▼ button to select "Network" setting and press the OK button enter the network setting.
   (3) Press ▲▼ button to set DHCP as on.
   (4) Press ▲▼ button to "Set" and press the OK button."Please wait..." appears.

✓ Note:
* When connecting to wireless network, please check the SSID/ESSID and IP address in "Network information".
Network Control Instructions

4. Activate the Web browser in the personal computer.

5. Enter the IP address set by the projector into the URL input field of the Web browser.

6. Select "Login" to login the Network Display System page. (Both the initial name and passwords are "admin").

Note:
- You can click the upper right corner of the web browser screen to select the display language.
- Do not perform setting or control simultaneously by starting up multiple web browsers. Do not set or control the projector from multiple computers.
- Change the password first. (8 half-width characters). (page 61)
- If the screen for the web control is not displayed, consult your network administrator.

- There is no guarantee for all computers that meet the above conditions will operate properly.

Projecting the USB Display
1. Connect the USB-B terminal of the projector to a computer with a USB converting cable.
2. Press the USB DISPLAY button on the remote control or switch the input source to USB Display.
   - Press the INPUT button on the top control and select the input source in the Input menu.
   - The startup screen will be displayed automatically due to the driver which is built-in the projector, and executes the installation according to the instructions of the screen. The displaying of the auto installation screen depends on the setting of computer. At this time, please select "Run autorun.exe". Please double-click "autorun.exe" in the folder of the USB Display when the automatical startup is disabled.
   - The image on the computer screen is projected.
3. Click the driver icon 🔄 in the task bar of computer and select one item in Pop-up menu.
   - Pop-up menu is only displayed in English.
   - The item which is displayed in gray is unavailable.

<table>
<thead>
<tr>
<th>Active audio/Disable audio</th>
<th>Set whether to output the audio from the computer.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Play video/Pause video</td>

</tr>
<tr>
<td>Start/Stop</td>
<td>Set whether to display the image from the computer.</td>
</tr>
<tr>
<td>Exit</td>
<td>Exit USB Display.</td>
</tr>
</tbody>
</table>

ётNote:
- The driver is not installed in your computer, and it will be removed from the computer when disconnecting the USB cable.
- It will take a while when you want to project the computer screen.
- Connect a USB cable directly to the USB connector of a computer. It will not work when connecting through a USB hub.

Termination of the USB display
When terminate the USB display, remove the USB cable directly. There is no need to follow "Remove hardware safely" when a USB cable is disconnected.
Using useful functions

When using Mac OS

Mac OS operating environment

<table>
<thead>
<tr>
<th></th>
<th>Mac OS X 10.5, 10.6, 10.7</th>

<tr>
<td>Display</td>
<td>Resolution 640 x 480 or more, 1600 x 1200 or less</td>
</tr>
</tbody>
</table>

• There is no guarantee for all computers that meet the above conditions will operate properly.

Projecting the USB Display

1. Connect the USB-B terminal of the projector to a computer with a USB converting cable.
2. Press the USB DISPLAY button on the remote control or switch the input source to USB Display.
   • Press the INPUT button on the top control and select the input source in the Input menu.
   • The image on the computer screen is projected.
3. Double-click "Monitor.app" in the virtual disk that has been mounted.
4. Right-click the driver icon in the dock of computer and select one item in Pop-up menu.
   • Pop-up menu is only displayed in English.
   • The item which is displayed in gray is unavailable.

<table>
<thead>
<tr>
<th>Active audio/Disable audio</th>

<tr>
<td>Quit</td>
<td>Terminate the USB Display.</td>
</tr>
</tbody>
</table>

✓ Note:
- It will take a while when you want to project the computer screen.
- Connect a USB cable directly to the USB connector of a computer. It will not work when connecting through a USB hub.

Termination of the USB display

When terminate the USB display, remove the USB cable directly.
Maintenance and cleaning

**WARNING indicator**

The WARNING indicator shows the state of the function which protects the projector. Check the state of the WARNING indicator to take proper maintenance.

The projector is shut down and the WARNING indicator is flashing red.

When the temperature inside the projector exceeds the normal temperature, the projector is automatically shut down to protect internal components. The WARNING indicator is blinking while the projector is being cooled down. When the projector has cooled down enough (to its normal operating temperature), it can be turned on again by pressing the POWER button.

✓ Note:

*The WARNING indicator continues to blink even after the temperature inside the projector returns to normal. When the projector is turned on again, the WARNING indicator stops blinking.*

Check the items below:

– Did you provide appropriate space for the projector to be ventilated?
  Check the installing condition to see if ventilation slots are not blocked.

– Has the projector been installed near the duct or vent of an airconditioning?
  Move the installation of the projector away from the duct or vent.

– Are the air filters clean? Clean the air filters periodically.

The projector is shut down and the WARNING indicator lights red.

When the projector detects an abnormal condition, it is automatically shut down to protect the internal components and the WARNING indicator lights red. In this case, unplug the AC power cord and plug it, and then turn on the projector once again to verify operation. If the projector cannot be turned on and the WARNING indicator lights red, unplug the AC power cord and contact the service station for servicing and maintenance.

⚠️ Caution

Do not leave the projector with the AC power cord connected under an abnormal condition. It may result in fire or electric shock.
Cleaning the filter
The air filter prevents dust from accumulating on the surface of the optical elements inside the projector. Should the air filter become clogged with dust particles, it will reduce cooling fans’ effectiveness and may result in a buildup of internal heat and adversely affects the life of the projector. If the Filter warning icon appears on the screen, the air filter should be cleaned immediately. Clean the air filter following the steps below.

1. Turn off the projector, and unplug the AC power cord from the AC outlet.
2. Remove the air filter.
3. Gently clean the filter with a brush.
4. Reinstall the filter into the projector properly.

Caution
Do not operate the projector with the air filter removed. Dust may accumulate on the optical elements, degrading picture quality. Do not put any small objects into the air intake vents. Otherwise, it may result in malfunction of the projector.

Recommendation
We recommend avoiding dusty/smoky environments when you operate the projector. Usage in these environments may cause poor image quality. When you use the projector under dusty or smoky conditions, dust may accumulate on the lens, LCD panels, or optical elements inside the projector. When the symptoms above are noticed, contact your authorized dealer or service station for proper cleaning.

Filter counter reset
Be sure to reset the filter counter after cleaning or replacing the filter.

1. Press Menu on the remote control to display the screen menu. Press ▲▼ to select "Expand", then press the OK button.
2. Press ▲▼ to select "Filter counter", and then press the OK button. Press ▲▼ to select "Filter counter reset" and press the OK button, "Filter counter Reset?" appears on screen, select "Yes" to continue.
3. When another dialog box pops up, select "Yes" to reset the filter.
**Clean the projector lens**

Unplug the AC power cord before cleaning.

Gently wipe the projection lens with a cleaning cloth that contains non-abrasive camera lens cleaner, or use a lens cleaning paper or commercially available air blower to clean the lens.

Avoid using an excessive amount of cleaner. Abrasive cleaners, solvents, or other harsh chemicals might scratch the surface of lens.

---

**Clean the cabinet**

Unplug the AC power cord before cleaning.

Gently wipe the projector surface with a soft dry cleaning cloth. When the cabinet is heavily soiled, use a small amount of mild detergent and finish with a soft dry cleaning cloth. Avoid using an excessive amount of cleaner. Abrasive cleaners, solvents, or other harsh chemicals might scratch the surface of the cabinet.

When the projector is not in use, put the projector in a pouch to protect it from dust and scratches.
Replace the lamp

When the projection lamp of the projector reaches its end of life, the Lamp replacement icon appears on the screen and LAMP indicator flashes yellow. Replace the lamp with a new one of the same type promptly. The timing when the LAMP indicator should light is depending on the lamp mode.

Maintenance and cleaning

Lamp replacement icon

To replace the lamp, follow the steps below:

1. Power off the projector and unplug the power cord. Then let the projector cool for at least 45 minutes.

2. Loosen the screw on the lamp cover to remove the cover.

3. Make sure the lamp is well protected and remove three screws. Hold the handle to take out the lamp.

4. Install a new lamp with the same model and tighten the three screws. Make sure the installation is correct. Put lamp cover in place and then tighten the screw.

5. Plug the AC power cord and power on the projector.

CAUTION

As temperature inside the projector is high, you should cool the projector for at least 45 minutes before you open the lamp cover.

CAUTION

When the lamp isn’t illuminated, it may indicate that the lamp has been damaged. When you replace the lamp in a projector installed on the ceiling, you should stand beside the lamp cover other than under it; for the broken glass may fall down to hurt you. To do that, remove the lamp cover gently to avoid being hurt by falling debris. If debris drops into your eyes or mouth, you should see the doctor immediately.

CAUTION

For the sake of safety, only use the lamp of the same model. Never drop the lamp onto the ground nor touch the glass bulb! The glass can shatter and hurt.

Indicator

When the projection lamps reaches its end of life, LAMP indicator flashes yellow.

ORDER REPLACEMENT LAMP

Replacement lamp can be ordered through your dealer. When ordering a projection lamp, give the following information to the dealer.

Replacement Lamp Model No.: 23040049

LAMP HANDLING PRECAUTIONS

This projector uses a high-pressure lamp which must be handled carefully and properly. Improper handling may result in accidents, injury, or create a fire hazard.

- Lamp life may differ from lamp to lamp and according to the environment of use. There is no guarantee of the same life for each lamp. Some lamps may fail or terminate their life in a shorter period of time than other similar lamps.
- If the projector indicates that the lamp should be replaced, i.e., if the WARNING indicator lights up, replace the lamp with a new one IMMEDIATELY after the projector has cooled down. (Follow carefully the instructions in the Lamp Replacement section of this manual.) Continuous use of the lamp with the WARNING indicator lighted may increase the risk of lamp explosion.
- A lamp may explode as a result of vibration, shock or degradation as a result of hours of use as its lifetime draws to an end. Risk of explosion may differ according to the environment or conditions in which the projector and lamp are being used.

IF A LAMP EXPLODES, THE FOLLOWING SAFETY PRECAUTIONS SHOULD BE TAKEN:

If a lamp explodes, disconnect the projector’s AC plug from the AC outlet immediately. Contact an authorized service station for a checkup of the unit and replacement of the lamp. Additionally, check carefully to ensure that there are no broken shards or pieces of glass around the projector or coming out from the cooling air circulation holes. Any broken shards found should be cleaned up carefully. No one should check the inside of the projector except those who are authorized trained technicians and who are familiar with projector service. Inappropriate attempts to service the unit by anyone, especially those who are not appropriately trained to do so, may result in an accident or injury caused by pieces of broken glass.
Appendix

Troubleshooting

Before calling your dealer or service center for assistance, check the items below once again.
- Make sure you have properly connected the projector to peripheral equipment.
- Make sure all equipment is connected to the AC outlet and the power is turned on.
- If the projector does not project an image when it is connected to a PC, restart the PC.

<table>

### Appendix

<table>
<thead>
<tr>
<th>Issue</th>
<th>Possible Solutions</th>
</tr>
</thead>
</table>
| **No Sound** | - Check the audio cable connection from audio input source.  
- Adjust the audio source.  
- Press the VOLUME + button.  
- Press the Mute button.  
- When the AUDIO OUT is plugged in, the projector’s built-in speaker is not available.  
- Is the image projected? The sound can only be heard when the image is projected. |
| **The color is abnormal** | - Check the input signal, color system, video system or computer system mode.  
- Make sure that Blackboard is not selected in Image Mode menu. |
| **Auto PC adj. function does not work.** | - Check the Input signal. Auto PC adj. function can not work when 480p, 576p, 720p, 480i, 576i, 1080i or 1080p is selected. |
| **The Settings cannot be saved after turning off the projector.** | - Make sure you have selected “store” after you changed the settings. Some settings can’t be saved if “store” is not selected. |
| **Power management function does not work.** | - Power management function can not work while Freeze or Blank function is running. |
| **Logo function does not work.** | - Check connections and input source. |
| **Auto setup function does not work.** | - Make sure no function in the Auto setup menu is set to “Off”.  
- Make sure “On” is not chosen in the Ceiling function. |
| **The image is distorted or disappears.** | - Check and adjust “Screen” menu. |
| **PIN code dialog box appears at start-up** | - PIN code lock is being set. |
| **The remote control does not work.** | - Check the batteries.  
- Make sure no obstruction is between the projector and the remote control.  
- Make sure you are not too far from the projector when using the remote control. Maximum operating range is 5 m.  
- Make sure the code of the remote control is conformed to that of the projector.  
- Unlock the Key lock function in the Setting menu for the remote control. |
| **Indicators light or flash.** | - Refer to Indicators and projector condition to check the status of the projector. |
| **Exclamatory mark appears on the screen.** | - Your operation is invalid. Operate correctly. |
| **top control cannot be operated.** | - Unlock the Key lock in Setting -> Key lock. |
| **Unable to unlock the Logo PIN code, Key lock or PIN code lock.** | - Contact the dealer or the service center. |

**Warning:**

High voltages are used to operate this projector. Do not attempt to open the cabinet.

If problems still persist after following all operating instructions, contact the dealer where you purchased the projector or the service center. Specify the model number and explain about the problem. We will advise you how to obtain service.

*3 Pixel-Repetition signal (dot clock frequency 27.0 MHz) only.
*4 When a 1125 (1035)/60i signal was input, it is displayed as a 1125 (1080)/60i signal.
*5 VESA CVT-RB (Reduced Blanking)-compliant.

**Note:**
- “i” added to the resolution value indicates an interlaced signal.
- When interlaced signals are connected, flicker may occur on the projected image.
- The specification is subject to change without any prior notice.

</tr>
</tbody>
</table>

## Accessories

- Power Cord, Owner’s Manual(CD), Remote Control & battery, VGA Cable
- Lens Protection Ring

- The aforesaid specification is subject to change without prior notice.
- Liquid crystal panel is made on the basis of high standard, where 99.99% of the pixels are effective. Due to the nature of the liquid crystal panel, a fraction of the pixels (0.01% or less) may be ineffective.
