About the Owner’s Manual

Please read the owner’s manual thoroughly to ensure correct usage of the projector and its features. After reading, store the owner’s manual in a safe place for future reference.

Features

1. Dress up Design
2. Designed for tough environment
3. Side change lamp
4. Side change filter
5. Quick power off
6. Advanced Anti-theft features
7. Five auto features (Auto Search, Auto Sync, Auto Ceiling, Auto Keystone and Auto Filter Alert)
8. Seven display modes (Natural, Cinema, Daylight, Green board, White Board, Black Board and User)
9. Built-in 8W speaker
10. Logo capture
11. Image freeze function
12. Digital zoom adjustment

Contents of Your Box

Please make sure that following items are included in the box. If any items are missing, contact your dealer please.

1. Projector

2. Computer cable

3. Power cord

4. Quick Start Guide

5. Owner’s Manual CD

6. Remote control
Contents of Your Box

7. USB Cable

8. Soft Bag
Safety Instructions

The projector is designed and tested to meet the latest standards for safety of information technology equipment. However, to ensure safe use of this product, it is important that you follow the instructions mentioned in this manual and marked on the product.

⚠️ **WARNING**  
This symbol indicates information that, if ignored, could possibly result in personal injury or even death.

⚠️ **CAUTION**  
This symbol indicates information that, if ignored, could result in personal injury or physical damage.

**Typical Symbols**

This symbol indicates an additional warning (including cautions). An illustration is provided to clarify the contents (for example: the illustration to the left indicates danger of electrical shock).

This symbol indicates a prohibited action. The contents will be clearly indicated in an illustration or description near the symbol (for example: the symbol to the left indicates that disassembly is prohibited).

This symbol indicates a compulsory action. The contents will be clearly indicated in an illustration or description near the symbol (for example: the symbol to the left shows that the power plug should be disconnected from the power outlet).
Safety Instructions

⚠️ WARNING

If a problem should occur
If smoke or strange odors arise, continued use could result in fire or electrical shock. In such case, immediately turn off the power switch and then disconnect the power plug from the power outlet. After making sure that the smoke or odor has stopped, contact your dealer for repairs. Never attempt to make repairs yourself because this is dangerous.

Do not use this projector if there is no image or sound, or if the sound is distorted. Continued use could result in fire or electrical shock. In such case, immediately turn off the power switch; disconnect the power plug from the power outlet and contact your dealer.

If water would enter the inside of this projector, immediately turn off the power switch, disconnect the power plug from the power outlet and contact your dealer.

Do not install on an unstable surface.
Do not install this projector on an unstable surface such as a wobbly stand or incline because this could result in the projector falling and causing injury.

Do not open the cabinet.
Never open the cabinet. There is high voltage inside which can cause electrical shock. Contact your dealer for internal inspection, adjustment and repair.

Do not modify.
Do not modify this projector because this could result in fire or electrical shock.

Do not place the projector upon either side to project an image.

Do not use in the bathroom or near water site.
Do not expose this unit to rain or use near water… for example, in the bathroom, a wet basement, near a swimming pool, etc…

Do not insert objects into the Projector.
Do not insert metal objects through the ventilation openings, etc., of this projector or drop such objects inside because this could result in fire or electrical shock.

If a foreign object should enter this projector, immediately turn off the power switch, disconnect the power plug from the power outlet and contact your dealer.

Continued use could result in fire or electrical shock. Use special caution in household and where children are present.
Safety Instructions

⚠️ WARNING

Do not look through the lens when the lamp is on.
Never look through the lens when the lamp is on. The powerful light could adversely affect vision. Use special caution in households where children are present.

Avoid shock or impact on the projector.
If the projector should fall, resulting in damage to the cabinet, immediately turn off the power switch, disconnect the power plug from the power outlet and contact your dealer. Continued use could result in fire or electrical shock.

Do not place this projector in a container containing liquid. Do not place flower vases, flowerpots, cups, cosmetics, liquids such as water, etc., on top of this projector.

Do not use any power cable except those supplied with the projector.
The use of any other power cable could result in fire or electrical shock.

Do not shine the laser beam onto yourself or other.
The laser pointer function of projector remote control emits class II laser beam. Do not look directly into the laser beam outlet or direct the laser beam at other people. Vision can be impaired if the laser beam enters the eyes. Especially pay attention if children are present.

High temperatures are generated when the lamp is lit; so do not place objects in front of the lens.

Allowing the proper amount of space on the top, sides, and rear of the projector cabinet is critical for proper air circulation and cooling of the unit. The dimension shown here indicate the minimum space required. If the projector is to be built into a compartment or similarly enclosed, these minimum distances must be maintained.
Safety Instructions

⚠️ CAUTION

Placing heavy objects on top of this projector could result in loss of balance or falling and cause personal injury or damage the projector.

**Do not block the ventilation openings of this projector.**
Blocking ventilation could lead to internal overheating which could result in fire.

Do not place this projector on its side during use or push it into a small, poorly ventilated location.

Do not place this projector on a carpet or bedding or cover it with a tablecloth, etc.

**Care and maintenance.**
For safety purposes, disconnect the power plug from the power outlet before starting the care and maintenance of this projector.

**Battery usage.**
*Replace the batteries with the same type only.*
Do not mix old and new batteries; this could result in fire or personal injury due to battery cracking or leakage.

**Make sure the plus and minus terminals are correctly aligned when loading the batteries.**
Incorrect loading could result in personal injury or contamination of the surroundings due to battery cracking or leakage.

**Have the projector interior cleaned regularly.**

**Contact your dealer to arrange for the service.**
Accumulations of dust inside the projector can result in fire or malfunction if not cleaned for an extended period.
Ask your dealer for details about internal cleaning.
Safety labels are used on or within the projector to alert you to items or areas requiring your attention.

**WARNING LABEL**

- BEFORE OPERATING, PLEASE READ USER'S MANUAL.
- BEFORE REMOVING SCREWS, DISCONNECT POWER CABLE.
- DO NOT BLOCK VENTILATION OPENINGS.

**WARNING**

- TURN THE PROJECTOR OFF TO AVOID unexpected operation.
- DO NOT OPERATE THE PROJECTOR WITHOUT THE AIR FILTER.

**ATTENTION**

- LA LAMPE À HAUTE PRESSION PEUT EXPLOSER SI ELLE EST MANIPULÉE INCORRECTEMENT.
- NE PAS REMPLACER UNE LAMPE AVEC UN NUMÉRO DE TYPE D’IDENTITÉ DIFFÉRENT.

**LAMP DOOR WARNING LABEL**

- CAUTION HOT
- TURN THE POWER OFF AND WAIT 1 HOUR BEFORE CHANGING THE LAMP.

**ATTENTION CHAUD**

- CAUTION HOT
- HIGH-PRESSURE LAMP MAY EXPLODE IF IMPROPERLY HANDLED.
- REPLACE WITH SAME TYPE NUMBER LAMP.
- DO NOT OPERATE THE PROJECTOR WITHOUT THE AIR FILTER.

**EMI Label**

Part Names

Projector

1. **Control panel**
   Operating system.

2. **Filter cover**
   Prevents dust and other foreign particles from being drawn into projector.
   Remove the filter cover to clean the air filter.

3. **Foot adjust button**
   Lock / unlock the adjustable foot.

4. **Front adjustable foot**
   Extend and retract to adjust the projection angle.

5. **Anti-dust glass**
   Dustproof function.

6. **Gate Plate**
   Dustproof function.

7. **Zoom ring**
   Use the zoom ring to adjust the size of the projected image.
   Rotate the zoom ring until the image is the desired size.

8. **Focus ring**
   Use the focus ring to focus the projector image.
   Rotate the focus ring until the image is clear.

9. **Lamp door**
   The lamp unit is inside.
**Part Names**

**Control Panel**

10 **KEYSTONE**
Adjust the vertical keystone.

11 **VOLUME + / -**
Sound louder or lower.

12 **INPUT**
Select input source:

- RGB 1 ➔ RGB 2 ➔ DVI-I
- S-Video ➔ Video ➔ Y, Pb, Pr

*Note:*
If the projector cannot be captured the signals within 15 minutes, it will be shut down automatically.

13 **BLANK**
Blank the projected image. The time of Blank mode can be set in 15 minutes, 30 minutes or 60 minutes. The projector will shut down automatically after passing each set time.

14 **LAMP INDICATOR**
BIndicate a status in the projector.

15 **.Power On / Off.**

16 **POWER INDICATOR**
Light on or flash to indicate the operating status of the projector.

17 **AUTO**
Automatically adjust the setting to match the current input.

18 **MENU**
Display or hide the OSD main menu.
**Part Names**

**Rear**

**A** USB
Connect a USB mouse cable to a computer to control computer mouse functions.

**B** RS232
Serial data port for controlling the projector with a computer or other RS-232 control device.

**C** AUDIO IN 1 & **N** AUDIO IN 2
Mini jack port corresponds to computer input. (RGB IN → AUDIO IN 1, DVI-I IN → AUDIO IN 2)

**D** RGB IN
Input analog RGB signal from a computer.

**E** DVI-I IN
Input digital DVI-I signal from a computer.

**F** S-VIDEO
S-Video signal from a video source.

**G** AUDIO IN 3, R / L
RCA type corresponds to video input.

**H** LAN
Please see page 37 Network Control Application for details.

**I** SPEAKER

**J** COMPONENT (Y, Pb, Pr / Y, Cb, Cr)
Input Component signal from a DVD player.

**K** VIDEO
Composite video signal from a video source.

**L** RGB OUT
Connect an external monitor to this connection to view the “RGB IN” input.

**M** AUDIO OUT
This jack outputs the audio signal from computer signal to external audio equipment.

**O** Slot for Kensington Micro Saver Security System
Built-in Security Slot
This security slot supports the MicroSaver® Security System. MicroSaver® is a registered trademark of Kensington Microwave Inc. The logo is trademarked and owned by Kensington Microwave Inc.

**P** REAR IR RECEIVER
Arrangement

1. Before installation, make sure that the projector is turned off and the power cord is disconnected.
2. Do not set up and move the projector, while it is hot.
3. The distance between the projector and screen determines the actual image size. Refer to the table below to determine the screen size at a given distance.

Note: The dimensions in the table below are approximate.

<table>
<thead>
<tr>
<th>Screen size (diagonal)</th>

</tbody>
</table>

When installed against a wall, leave about 20cm (7.9in.) between the projector and the wall.
### Setting Up

#### Power ON / OFF

![Diagram of projector with labels: Power indicator, Focus ring, Zoom ring, AC inlet, Outlet]

**Turning On The Power**

1. Make sure that power cord is firmly and correctly connected to the projector.
2. The green Power indicator blinks slowly.
3. Remove the lens cover.
4. Press POWER button on the control panel or the remote control to turn on the projector.
5. Rotate the zoom ring to adjust the screen size.
6. Rotate the focus ring to adjust the focus.

![Image of power on button with message: Power off? Please press POWER key again to power off.]

**WARNING**

⚠️ A strong light is emitted when the projector’s power is on. Do not look into the lens of the projector or look inside of the projector through any of the projector’s openings.

**CAUTION**

⚠️ Do not turn off the AC power for 120 seconds after the lamp is turned on. Doing so could cause premature lamp failure.

---

![Image of remote control with menu options]

**Turning Off The Power**

1. Press the POWER button on the control panel or the remote control. The "power off" confirmation message will appear.
2. Press the POWER button again while the message is shown on the screen.
3. When the projector enters "Standby" mode, the green Power indicator blinks slowly.
4. The projector cannot be turned on while red "Lamp indicator" is blinking slowly in cooling mode.
5. If you don’t use the projector for a long time, remove power cord.

![Image of remote control with menu options]

**WARNING**

⚠️ Do not touch around the lamp cover and the exhaust vents during use or just after use, since it is too hot.
Setting Up

Setting Up The Projector

The projector supports the following four different projection methods.

1. Front projection

2. Rear projection

3. Rear ceiling projection

4. Front ceiling projection

The projector can be installed pitched by any angle (360 degree) without any setting in fan mode. As for rolling it must be within 10 degree.

Special installation is required in order to suspend the projector from the ceiling. Please ask your dealer for details.
Ceiling Mounted Installation Guide

Attach ceiling mount at four-suspension bracket fixing points when suspending from a ceiling. Special installation is required in order to suspend the projector from the ceiling. Please ask your dealer for details.

MAX M4x8 mm For Mounting

Security Anchor

The product is equipped with security anchor and PIN LOCK (See page 33 for details) functions to help prevent unauthorized removal of the projector.

⚠️ WARNING

- Do not grasp the security anchor to carry projector, since it is not designed for it.
- The security anchor is not for comprehensive theft prevention measures. It is intended to be used as supplemental theft prevention measure.
Setting Up

Adjusting The Projector’s Elevation

Use the adjustable foot at the front of the projector to set the image height.

1. Holding the projector, push the foot adjust buttons to loosen the front adjustable foot.
2. Position the front side of the projector to the desired height.
3. Release the foot adjust buttons in order to lock the front adjustable feet.
4. Please make sure that the front adjustable feet are locked.
5. Please rotate the adjustable feet when fine adjustment of tilt is needed.

CAUTION

* The adjustment range of front adjustable foot is 0 to 8.5 degrees.
* When the foot is adjusted, it may cause the shape of the projected image to become distorted. Use the keystone correction function to correct this distortion.
Setting Up

How To Connect

Laptop or desktop computer

Before starting, make sure that the projector and computer are both turned off.

Connect the computer

Connect the computer cable from the computer to the projector's RGB IN or DVI-I IN. Connect a computer cable from the MONITOR OUT to an external monitor to view the signal on RGB IN or DVI-I IN. Tighten the screw on all connectors.
How To Connect

Laptop or desktop computer

**Connect the audio cable if necessary**

1. Please connect the audio cable to the AUDIO IN 1 if the computer cable is connected to the projector's RGB IN.

2. Please connect the audio cable to the AUDIO IN 2 if the computer cable is connected to the projector's DVI-I IN.

3. Please connect the audio cable to the AUDIO IN 3 if the video cables are connected to the VEDIO / S-VIDEO / Component port of the projector.

If the selected video image is not displayed after the projector is turned on and the correct video source has been selected, please check whether the video source device is turned on and operating correctly. Also check whether the signal cables have been connected correctly.

Many laptop computers may need to change the setting for monitor output when connecting to the projector. Usually a key combination like \( \text{Fn} + F3 \) or CRT/LCD key turns the external display on / off. Locate a function key labeled CRT/LCD or a function key with a monitor symbol on the laptop. Press \( \text{Fn} \) and the labeled function key simultaneously. Refer to your laptop’s documentation to find out your laptop’s key combination.
Remote Control Batteries
Installation

1. Remove the battery cover.

2. Load the batteries.
   Make sure the poles are correctly oriented.

3. Close the battery cover.

Caution

► Avoid excessive heat and humidity.
► Do not drop the remote control.
► If the remote control will not be used for an extended period, remove the batteries.
► Do not expose the remote control to water or moisture. This could result in malfunction.
► Replace the battery when remote control operation becomes sluggish or unresponsive.
► Do not place the remote control close to the exhaust ventilation opening of the projector, because the exhaust air is hot.
► Do not use batteries of different types at the same time.
► Do not mix a new battery with used one. Make sure the plus and negative terminals are correctly aligned when loading batteries.
► Dispose of batteries in accordance with environmental laws of your area.
► Do not disassemble the remote control. If the remote control needs service, please contact your dealer.
Remote Control

POWER
Power on / operation mode, Standby mode, Cool down mode.

INPUT
Select input source :

- RGB 1 ➔ RGB 2 ➔ DVI-I
- S-Video ➔ Video ➔ Y,Pb,Pr

MENU
Display or hide the On-Screen Display main menu page.

Press or to select On-Screen Display menu item.

Press or to select and adjust the function of On-Screen Display menu item or value.

LASER
Aim the remote control at the screen, press and hold button to activate the laser pointer.

MUTE
Mute audio.

AUTO
Refresh the current image.

BLANK
Hide the current image, become black color on the screen.

Press / / / / button to move arrow direction of window.

MOUSE-L / MOUSE-R
The function is like mouse of desktop/ notebook.

Remote control’s mouse functions will only work if the USB cable is connected (see page 17 for instructions)
How To Operate On-Screen Display

1. Press "Menu" button. Following menu will appear.

2. Press up / down / left / right button on control panel or remote control to select item or adjust value.
### Picture Menu

**Step:**

1. Use the ▲ /▼ buttons to select an item.

<td>After changing a new lamp, execute this function to reset the lamp timer.</td>
</tr>
</tbody>
</table>

**Step:**

1. Use the ▲ /▼ buttons to select an item.
2. Use the ◄ / ► buttons to select an item or adjust the value.
**Presentation Menu**

**Reset Lamp Timer**

The lamp timer is the time counted after the last resetting. The usage time of the lamp is shown in the PRESENTATION Menu. Select the “RESET LAMP TIMER” if the lamp timer is required to reset. The dialog of “Reset Lamp Timer?” is shown on the screen as below. To reset the lamp time, select “yes” of Lamp Reset and push the button on the top cabinet.

![Reset Lamp Timer dialog](image)

**NOTE**

- The replacement warning message is set to appear after about 2500 hours of lamp use in order to maintain the initial brightness. When replacement message appears, replace the lamp with a new one as soon as possible, even if the lamp is still workable.
## Security Menu

### Step:

1. Use the ▲ /▼ buttons to select an item.
2. Use the ◄ / ► buttons to select an item or adjust the value.

Auto Filter Alert

Auto Filter Alert in SECURITY category shows the air filter use time and alerts user to change filter. When the operating time reaches the set time, a warning message will appear on the screen to remind user of filter cleaning /replacing.

Filter Replace...
Filter has been used for more than 500 hours.

NOTE
► Please reset the Filter time only when you replace the filter.
**PIN Key In Operation**

When the projector is turned on and the PIN LOCK PROTECTION is set to [ON], the image will show as on the right side.

1. Press the MENU button on the projector or remote control. Enter PIN code by keypad or remote control.

2. How to enter a PIN code?
   You can use control panel or remote control.

Refer to photo below to enter a sequence of PIN code by control panel or remote control buttons.

1. Press ◄ button: Select the [ 1 ]
2. Press ▲ button: Select the [ 2 ]
3. Press ► button: Select the [ 3 ]
4. Press ▼ button: Select the [ Enter ] to move to next row.(4~6,7~9, ◄~OK)
5. Press ◄ (backspace) item:
   In case you enter a wrong digit, select ◄ to delete the wrong digit you entered.
6. Press ▼ item:
   Once all four digits of the PIN are entered, select ▼ to confirm.

**NOTE**

1. Please enter: 0000 for first-time use.
2. If the PIN is incorrect, a "Enter new code" message will be shown. Please try again. If the PIN code input is incorrect for three times, a warning message will show up and the projector will shut itself down in 30 seconds.
3. If you have no idea about the PIN, please contact your dealer for help.
Procedure to utilize this function

1. Register the projector(s) to be controlled only for the first time. "Auto Search" finds and lists up the projectors in the network. Assign Projector name and Group name for ease.

2. Save the setting as a Project file. By opening the Project file the setting can be recovered easily from next time.

3. Monitor the status of registered projectors up to 255 units. Status of Power, Temperature and System and Input selection, used hours of Lamp and Filter can be monitored. For used hours the limit for alert can be set.

4. Control registered projector one by one. By using "Link" of Network Control Software each projector can be controlled.

NOTE
To monitor and control the projector(including stand-by mode), the following conditions are needed to be ready:
(1) Projector is powered on or in stand-by mode.
(2) Projector is connected to network.
(3) LED light of the projector network port shows normal. (Green light on, Orange twinkling)
Before Use

Before Using Network Control Software

1. Copy and paste the "Network Control Software" folder in the CD-ROM of the Owner's Manual to the PC.
2. Create and put the short-cut icon for "Network Control.exe" on the desktop.
3. Confirm that AC is supplied to the projector and the projector and the PC are connected to each other with LAN cable (through the network).
4. The LAN module ON/OFF item in SECURITY menu of OSD should be setting ON.

Activate Network Control Software

1. Execute the Network Control Software.

2. Monitor window below appears.
Before Use

Projector Auto Search.

1. Click the (Projector search), then the Search Window below appears.

![Graph 2]

**NOTE**
If the security warning window appears, please select "Unblock" to allow the Network Control software to work.

![Graph 3]

2. Click (search again), then the target projectors will be listed as follows.

**NOTE**
If there is no projector found on the display window, the following maybe the causes:
1. There is no DHCP server available on the LAN. The LAN module is shipping with DHCP-configured client enabled in default.
2. If there is no DHCP server available on the LAN. The LAN module default IP address should be 169.254.1.1. Please modify the PC/Laptop IP address setting to make the PC/Laptop IP address located on the same segment as 169.254.xxx.xxx and try again.
Before Use

Modify The Projector Setting

1. If you need to modify the projector’s setting, please move mouse cursor to the table on the left and press button on the column. The contents of the setting will appear on the right side table.

![Graph 5: Register Table.](image)

2. After changing the projector setting, you can save the data by clicking button or cancel by clicking button.

<table>
<thead>

</tbody>
</table>

![Table 1: Setting Windows.](image)

3. Click (register projector), then the projectors will be shown in the Monitor Window as shown below.

![<Graph > Monitor window](image)
Before Use

Sorting the projectors

4 Projector can be sorted easily by clicking the monitor window title (Group Name) or (Projector Name).

![Projector Sorting Screenshot]

5 After registering, you can click button (Data single capture) in the tool bar or click button (Start Auto Scan) to update the status.

NOTE
While Auto Scan is running to update the status, the scroll bar for the window is grayed out and the hidden column can not be shown. Therefore before starting Auto Scan place the column in the window by using drag-drop or scroll bar in advance.

Meaning of Status Icons
The following table can be displayed by pressing "Help button.
Delete

Select the registered projector in monitor window. Click mouse right key and select "Delete" to erase the registered projector data.

< Graph 6 >: Register Table.
Registering And Configuring The Projector

Projector Setting (Setting for individual projector)

1. Select the registered projector in monitor window. Click mouse right key and select "projector setting" to modify the registered projector data. After finishing the setting, you can save by clicking button or cancel by clicking button.

<Graph 7>: Register table.

<Graph 8>: Setting table.
Registering And Configuring The Projector

System Setting (Setting for all projectors)

2. Click button (system setting) to modify system alert setting.

Saving the setting

Maintenance of Projector

Filter

Keep the air filters clean by cleaning them periodically. By using Filter Counter the projector can remind you of the timing. There are 2 types of air filters in this projector, one is black sponge attached just back side of the filter cover and the other is the filter assembly called Anti-dust filter (consists of a white folded cloth and black frame).

How to clean or replace the filters

Turn off the projector, and unplug the power cord. Wait to allow the projector to cool down sufficiently.

1. Push up 2 white stoppers of the Filter cover and remove it from the side of projector as shown below.
2. Remove the Anti-dust filter from the Filter cover by pushing and sliding it as shown below. (There is $\text{ABS}$ sign on the top the black frame of the Anti-dust filter.)
3. Clean the filters with a vacuum cleaner except for the back side of the sponge, because the vacuum cleaner may suck it. Brush the sponge gently by a brush. (Do not clean the filters with water.)

*If the Anti-dust filter is too dirty to clean, please replace it with new one.
The part number of the Anti-dust filter is "23390006".
4. Install the Anti-dust filter to the filter cover.
   (a) Place the Filter cover so as the sponge filter faces you.
       (There is >PC< sign on the top middle of the Filter cover.)
   (b) Place the Anti-dust filter on it so as the 4 white hooks show up through the
       openings in the corners.
       (There is >ABS< sign on the top of the black frame.)
   (c) Slide down the Anti-dust filter so that the two black hooks of the Anti-dust filter go
       into the slots on the bottom of the Filter cover.
       (you shall hear a "click" sound)
       Make sure that all of 4 white hooks of the Filter cover are well hooked on the
       frame.

5. Insert the projected parts of the Filter cover to the side of the projector first and then
   close the Filter cover by pushing 2 white stoppers. Make sure that the Filter cover is
   well closed.

6. Reset the Filter Timer.(P.34)
Maintenance of Projector

Lamp

Please turn off the projector and unplug the AC power cord. And then, let the projector cool down at least 60 minutes.

Replacing New Lamp (Part Number: 23040034)

1. Remove the lamp door.
2. Loosen 2 screws of the lamp holder. Hold the handle on the top of the lamp, pull out the lamp straight off the projector.
3. Insert new lamp, lock the lamp door firmly with 2 screws.
4. Put the lamp door on.
5. Please reset the lamp timer after replacing lamp. (P.32)

When changing lamp, it is recommended that you change the filter at the same time.
WARNING

The projector uses a high-pressure mercury lamp. The explosion of lamp with a loud bang or burn out could possibly cause injury or a fire. When the bulb bursts, it is possible for shards of glass to fly into the lamp housing; and for gas containing mercury to escape from the projector’s vent holes. If the lamp has broken, do not check the inside of the projector. Please ventilate the room immediately. Do not touch or bring your face close to the broken pieces since it might get into your eyes or mouth. In case of injury, seek medical advice immediately.

Disposal of a Lamp

Dispose of a lamp in accordance with the local recycling laws. Do not put it to your trash.
Recycling Lamp’s laws of the USA, go to www.lamprecycle.org.
Recycling Product’s laws of USA, go to www.eiae.org.
Recycling Product’s laws of Canada, go to www.epsc.ca.
For more information about recycling laws, please contact local government agency or dealer.

CAUTION HOT

Before replacing the Lamp unit, pay attention to the following items:
1. The Lamp is optional part. Contact the dealer for replacement lamp.
2. The lamp becomes very hot when in use. Turn the power off and disconnect the power cord.
3. Wait for 1 Hour before replacing the lamp.
4. Do not use old lamp unit.
**Maintenance of Projector**

**Additional**

-In order to ensure the safe use of your projector, please contact your dealer to inspect about once a year.

-Before maintenance, make sure the power cable is unplugged, allow the projector to cool sufficiently. The high temperature state of the projector could cause a burn in and/or malfunction to the projector.

-Never try to maintain the inside of the projector by yourself.
### Troubleshooting

#### Indicator

The power and lamp indicators show the status of the projector. Before requesting repair, check the projector status using the chart below. If the problem cannot be resolved, contact your dealer.

#### In normal status~~~

# Troubleshooting

## Error For Machine Defects

The following problems may be confused with a machine defect. Check and follow the table. If it couldn’t be improved, contact your dealer.

<table>
<thead>
<tr>
<th>Symptom</th>
<th>Cause / Remedy</th>
</tr>
</thead>
</table>
| Projector power does not turn on | **The power cord is disconnected.**  
Plugging the power cord into an AC outlet.  
**Intending to turn on the projector again during the cool down mode.**  
Wait until the cool down mode has completed.  
**There is no lamp and/or lamp cover is not firmly closed.**  
Please turn off the power and disconnect the power plug from the power outlet. Check if the lamp is installed or the lamp cover is firmly closed and turn on the power again.  
**Power cord has impaired.**  
When you touch the power cord, the indicator goes on then off, please remove the power cord and connect it again. If the situation is repeated, remove the power cord and contact your dealer. |
| No Image                       | **The input is not connected correctly.**  
Select the appropriate input source.  
**No signal input.**  
Connect correctly.  
**The lens cover is attached to the lens.**  
Remove the lens cover. |
| Colors are pale                | **Color density and color matching are not adjusted correctly.**  
Adjust the RGB setting.  
**Color lose.**  
Caused by poor VGA cable connection. |
| Abnormal brightness & contrast | **Brightness and contrast are not adjusted correctly.**  
Adjust the brightness and contrast setting.  
**The lamp is near the end of its service life.**  
Replace with a new lamp. |
| Image is blurred               | **The projection lens is not focused.**  
Adjust the focus using the focus ring.  
**The lens is dirty or misty.**  
Clean the lens. |

## Technical Specifications

### Mechanical Information

<table>
<thead>
<tr>
<th>Specification</th>
<th>Value</th>
</tr>
</thead>
<tbody>
<tr>
<td>Projector Type</td>
<td>Multi-media Projector</td>
</tr>
<tr>
<td>Dimensions(WxHxD)</td>
<td>325 x 265.4 x 110.4 mm</td>
</tr>
<tr>
<td>Net Weight</td>
<td>3.4 kg</td>
</tr>
<tr>
<td>Feet Adjustment</td>
<td>up to 8.5°</td>
</tr>
</tbody>
</table>

### Panel Resolution

<table>
<thead>
<tr>
<th>Specification</th>
<th>Value</th>
</tr>
</thead>
<tbody>
<tr>
<td>LCD Panel System</td>
<td>0.63&quot; TFT LCD Panel, 3 panels</td>
</tr>
<tr>
<td>Panel Resolution</td>
<td>1,024 x 768 dots</td>
</tr>
<tr>
<td>Number of Pixels</td>
<td>2,359,296 (1,024 x 768 x 3 panels)</td>
</tr>
</tbody>
</table>

### Signal Compatibility

<table>
<thead>
<tr>
<th>Specification</th>
<th>Value</th>
</tr>
</thead>
<tbody>
<tr>
<td>Color System</td>
<td>PAL, SECAM, NTSC</td>
</tr>
<tr>
<td>SD/HD TV Signal</td>
<td>480i, 480p, 575i, 575p, 720p, 1080i and 1080p</td>
</tr>
<tr>
<td>Input Scanning Frequency</td>
<td>H-sync. 31<del>92kHz, V-sync. 48</del>120Hz</td>
</tr>
</tbody>
</table>

### Optical Information

<table>
<thead>
<tr>
<th>Specification</th>
<th>Value</th>
</tr>
</thead>
<tbody>
<tr>
<td>Projection Image Size</td>
<td>40&quot;~300&quot; Diagonal</td>
</tr>
<tr>
