Projection lens is optional.

OWNER'S INSTRUCTION MANUAL
TO THE OWNER

Before operating this projector, read this manual thoroughly and operate the projector properly.

This projector provides many convenient features and functions. Operating the projector properly enables you to manage those features and maintain it in better condition for a considerable time.

Improper operation may result in not only shortening the product life, but also malfunctions, fire hazard, or other accidents.

If your projector seems to operate improperly, read this manual again, check operations and cable connections and try the solutions in the “Troubleshooting” section in the end of this booklet. If the problem still persists, contact the dealer where you purchased the projector or the service center.

NOTE: This symbol mark and recycle system are applied only to EU countries and not applied to the countries in the other area of the world.

Your EIKI product is designed and manufactured with high quality materials and components which can be recycled and reused.

This symbol means that electrical and electronic equipment, at their end-of-life, should be disposed of separately from your household waste.

Please dispose of this equipment at your local community waste collection/recycling centre.

In the European Union there are separate collection systems for used electrical and electronic products.

Please help us to conserve the environment we live in!

CAUTION: TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE COVER (OR BACK). NO USER-SERVICEABLE PARTS INSIDE EXCEPT LAMP REPLACEMENT. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.

THIS SYMBOL INDICATES THAT DANGEROUS VOLTAGE CONSTITUTING A RISK OF ELECTRIC SHOCK IS PRESENT WITHIN THIS UNIT.

THIS SYMBOL INDICATES THAT THERE ARE IMPORTANT OPERATING AND MAINTENANCE INSTRUCTIONS IN THE OWNER’S MANUAL WITH THIS UNIT.

NOTE: This symbol mark and recycle system are applied only to EU countries and not applied to the countries in the other area of the world.

Your EIKI product is designed and manufactured with high quality materials and components which can be recycled and reused.

This symbol means that electrical and electronic equipment, at their end-of-life, should be disposed of separately from your household waste.

Please dispose of this equipment at your local community waste collection/recycling centre.

In the European Union there are separate collection systems for used electrical and electronic products.

Please help us to conserve the environment we live in!

SAFETY PRECAUTION

WARNING: TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, DO NOT EXPOSE THIS APPLIANCE TO RAIN OR MOISTURE.

– This projector produces intense light from the projection lens. Do not stare directly into the lens as much as possible. Eye damage could result. Be especially careful that children do not stare directly into the beam.

– Install the projector in a proper position. If not, it may result in a fire hazard.

– Provide appropriate space on the top, sides and rear of the projector cabinet for allowing air circulation and cooling the projector. Minimum clearances must be maintained. If the projector is to be built into a compartment or similarly enclosed, the minimum distances must be maintained. Do not cover the ventilation slot on the projector. Heat build-up can reduce the service life of your projector, and can also be dangerous.

– If the projector is not to be used for an extended time, unplug the projector from the power outlet.

CAUTION ON HANGING FROM THE CEILING

When hanging the projector from the ceiling, clean the air intake vents, air filters, and top of the projector periodically with a vacuum cleaner. If you leave the projector without cleaning for a long time, the dust will block the operation of the cooling function, and it may cause a breakdown or a disaster.

DO NOT SET THE PROJECTOR IN GREASY, WET, OR SMOKY CONDITIONS SUCH AS IN A KITCHEN TO PREVENT A BREAKDOWN OR A DISASTER. IF THE PROJECTOR COMES IN CONTACT WITH OIL OR CHEMICALS, IT MAY BECOME DETERIORATED.

READ AND KEEP THIS OWNER’S MANUAL FOR LATER USE.
SAFETY INSTRUCTIONS

All the safety and operating instructions should be read before the product is operated.

Read all of the instructions given here and retain them for later use. Unplug this projector from AC power supply before cleaning. Do not use liquid or aerosol cleaners. Use a damp cloth for cleaning.

Follow all warnings and instructions marked on the projector.

For added protection to the projector during a lightning storm, or when it is left unattended and unused for long periods of time, unplug it from the wall outlet. This will prevent damage due to lightning and power line surges.

Do not expose this unit to rain or use near water... for example, in a wet basement, near a swimming pool, etc...

Do not use attachments not recommended by the manufacturer as they may cause hazards.

Do not place this projector on an unstable cart, stand, or table. The projector may fall, causing serious injury to a child or adult, and serious damage to the projector. Use only with a cart or stand recommended by the manufacturer, or sold with the projector. Wall or shelf mounting should follow the manufacturer's instructions, and should use a mounting kit approved by the manufacturers.

An appliance and cart combination should be moved with care. Quick stops, excessive force, and uneven surfaces may cause the appliance and cart combination to overturn.

Slots and openings in the back and bottom of the cabinet are provided for ventilation, to insure reliable operation of the equipment and to protect it from overheating.

The openings should never be covered with cloth or other materials, and the bottom opening should not be blocked by placing the projector on a bed, sofa, rug, or other similar surface. This projector should never be placed near or over a radiator or heat register.

This projector should not be placed in a built-in installation such as a book case unless proper ventilation is provided.

Never push objects of any kind into this projector through cabinet slots as they may touch dangerous voltage points or short out parts that could result in a fire or electric shock. Never spill liquid of any kind on the projector.

This projector should be operated only from the type of power source indicated on the marking label. If you are not sure of the type of power supplied, consult your authorized dealer or local power company.

Do not overload wall outlets and extension cords as this can result in fire or electric shock. Do not allow anything to rest on the power cord. Do not locate this projector where the cord may be damaged by persons walking on it.

Do not attempt to service this projector yourself as opening or removing covers may expose you to dangerous voltage or other hazards. Refer all servicing to qualified service personnel.

Unplug this projector from wall outlet and refer servicing to qualified service personnel under the following conditions:

a. When the power cord or plug is damaged or frayed.

b. If liquid has been spilled into the projector.

c. If the projector has been exposed to rain or water.

d. If the projector does not operate normally by following the operating instructions. Adjust only those controls that are covered by the operating instructions as improper adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore the projector to normal operation.

e. If the projector has been dropped or the cabinet has been damaged.

f. When the projector exhibits a distinct change in performance-this indicates a need for service.

When replacement parts are required, be sure the service technician has used replacement parts specified by the manufacturer that have the same characteristics as the original part. Unauthorized substitutions may result in fire, electric shock, or injury to persons.

Upon completion of any service or repairs to this projector, ask the service technician to perform routine safety checks to determine that the projector is in safe operating condition.

CAUTION

Ne peut être utilisé dans une salle d'ordinateurs telle que définie dans la norme ANSI/NFPA 75 Standard for Protection of Electronic Computer/Data Processing Equipment.

Voor de klanten in Nederland

Bij dit product zijn batterijen geleverd. Wanneer deze leeg zijn, moet u ze niet weggooien maar inleveren als KCA.
Federal Communication Commission Notice
This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense. Do not make any changes or modifications to the equipment unless otherwise specified in the instructions. If such changes or modifications should be made, you could be required to stop operation of the equipment.

CAUTION!
This is a Class A equipment. This equipment can cause interference in residential areas; in this case, the operator can be asked to take adequate countermeasures.

AC POWER CORD REQUIREMENT
The AC Power Cord supplied with this projector meets the requirement for use in the country you purchased it.

AC Power Cord for the United States and Canada:
AC Power Cord used in the United States and Canada is listed by the Underwriters Laboratories (UL) and certified by the Canadian Standard Association (CSA). AC Power Cord has a grounding-type AC line plug. This is a safety feature to be sure that the plug will fit into the power outlet. Do not try to defeat this safety feature. Should you be unable to insert the plug into the outlet, contact your electrician.

THE SOCKET-OUTLET SHOULD BE INSTALLED NEAR THE EQUIPMENT AND EASILY ACCESSIBLE.

- Each name of corporations or products in the owner's manual is a trademark or a registered trademark of its respective corporation.
This Multimedia Projector is designed with most advanced technology for portability, durability, and ease of use. This projector utilizes built-in multimedia features, a palette of 1.07 billion colors, and matrix liquid crystal display (LCD) technology.

◆ Compatibility

This projector widely accepts various video and computer input signals including:

<table>

</tbody>
</table>

High Resolution Image

This projector provides 1024 x 768 dots resolution for computer input and 800 horizontal TV lines. Resolution from a computer between XGA (1024 x 768) and UXGA (1600 x 1200) is compressed into 1024 x 768 dots. This projector cannot display image of over 1600 x 1200 dots. When resolution of your computer is over than 1600 x 1200, reset a computer output for lower resolution.

Multi-Scan System

This projector has Multi-Scan System to conform to almost all computer output signals quickly. There is no need for troublesome manual adjustment of frequency and other settings.

One-Touch Auto PC Adjustment

Incoming computer video signals are recognized and best adjustment is automatically set by Auto PC Adjustment. No complicated setup is necessary and projection is always precise.

Progressive Scan Function

This function converts interlace video signals into progressive scan signals and provide fine picture quality.

Digital Zoom (for Computer)

Digital Zoom function adjusts image size to approx. 0.5 ~ 49 times of original image size, allowing you to focus on crucial information at a presentation.

Keystone Correction

Positioning height of a projector may result in distorted image being displayed in a trapezoid shape. Keystone Correction solves this problem by digitally altering projection to produce undistorted images.

Motor-driven Lens Shift

Projection lens can be moved up, down left and right with motor-driven lens shift function. This function makes it easy to provide projected image where you want. Zoom and focus can be also adjusted with motor-driven operation.

Power Management

Power Management function is provided to reduce power consumption while a projector is not in use. This Power Management function operates to turn Projection Lamp off when a projector detects signal interruption and any button is not pressed over 5 minutes. Projection Lamp is automatically turned on again when a projector detects signal or any operation button is pressed. This projector is shipped with this function ON.

Digital Visual Interface

This projector is equipped with DVI 29-pin terminal for connecting DVI output from a computer.

Multi Versatile Platform

This projector applies various input/output terminals and 4 terminal slots for expansion to tune to diversity of signals from computers and video equipment.

Selectable Terminal Slots

4-built-in Terminal Slots enable you to arrange any combinations of input sources just by changing Terminal Boards. For Terminal Boards, contact sales dealer where you purchased a projector.

Multilingual Menu Display

Operation menu is displayed in; English, German, French, Italian, Spanish, Portuguese, Dutch, Swedish, Russian, Chinese, Korean or Japanese.

Network board (Optional)

Network board is an optional product to control and set up a projector via the network cable by accessing to the connected projector using the web browser on your computer. It can be controlled and set up the projector remotely. Contact the sales dealer where you purchased this projector for optional parts.
Do not turn on a projector with lens cap attached. High temperature from light beam may damage lens cap and result in fire hazard.

Air blown from exhaust vent is hot. When using or installing a projector, following precautions should be taken.
- Do not put a flammable object near this vent.
- Keep rear grills at least 3.3' (1m) away from any object, especially heat-sensitive object.
- Do not touch this area, especially screws and metallic parts. This area will become hot while a projector is used.

This projector detects internal temperature and automatically controls operating power of Cooling Fans.

This projector is equipped with cooling fans for protection from overheating. Pay attention to following to ensure proper ventilation and avoid a possible risk of fire and malfunction.
- Do not cover vent slots.
- Keep bottom clear of any objects. Obstructions may block cooling air.
This projector uses nominal input voltages of 120 V or 200-240 V AC. This projector automatically selects correct input voltage. It is designed to work with single-phase power systems having a grounded neutral conductor. To reduce risk of electrical shock, do not plug into any other type of power system.
Consult your authorized dealer or service station if you are not sure of type of power supply being in use.
Connect a projector with peripheral equipment before turning a projector on. (Refer to pages 13 ~ 16 for connection.)

Connect AC Power Cord (supplied) to a projector. AC outlet must be near this equipment and must be easily accessible.

CAUTION
AC Power Cord must meet requirement of country where you use a projector.
Confirm AC plug type with chart below and proper AC power cord must be used.
If supplied AC Power Cord does not match AC outlet, contact your sales dealer.

<table>
<thead>
<tr>

Before setting up a projector, install Projection Lens on a Projector.

1. Before installation, check where a projector is used and prepare suitable lens. For specifications of Projection Lens, refer to manual separately attached or contact sales dealer where you purchased a projector.
2. For installation, refer to installation manual supplied to a Projector.

When moving or setting up a projector, be sure to replace a Lens Cap to protect a surface. And be careful not to hold or subject a lens to strong forces. It may damage lens, cabinet, or mechanical parts.

This projector is designed to project on a flat projection surface.

Brightness in room has a great influence on picture quality. It is recommended to limit ambient lighting in order to provide best image.

This projector is equipped with cooling fan to protect it from over-heating. Pay attention to following to ensure proper ventilation and avoid a possible risk of fire and malfunction.

- Do not cover vents with papers or other materials.
- Keep rear grill at least 3.3 feet (1 m) away from any object.
- Make sure that there are no objects under a projector. An object under a projector may prevent a projector from taking cooling air through bottom vent.

Projection lens can be moved up, down, left and right with motor-driven lens shift function. This function makes it easy to provide projected image where you want.

Use LENS SHIFT button and POINT UP/DOWN button to move image up or down. (Refer to page 24.)

Use LENS SHIFT button and POINT LEFT/RIGHT button to move image left or right. (Refer to page 24.)
PICTURE LEVEL AND TILT ADJUSTMENT

Picture tilt and projection angle can be adjusted with handles on both sides of a projector. Projection angle can be adjusted to 5.7 degrees upper way.

1. Press knob on handle. Handle pop out.

2. Turn handles (right and left) until picture is projected on proper position. Adjust height of rear adjustable feet by rotating them until projector properly stabled on table.

3. Press knob and retract handle.

INSTALLING PROJECTOR IN PROPER POSITION

Install the projector properly. Improper installation may reduce the lamp lifetime and cause a fire hazard.

Do not tilt the projector more than 10 degrees above and below.

Do not point the projector up to project an image.

Do not point the projector down to project an image.

Do not put the projector on either side to project an image.
MOVING PROJECTOR

For safety, be sure to hold Carrying Handles on both sides by 2 or more people when moving a projector. Moving it unproperly may result in damage of cabinet or person's injury. Replace lens cap and retract feet to prevent damage to lens and cabinet.

1. Pull up lock buttons on each side of carrying handles and release locks.

2. Pull carrying handles out fully until it's locked (with a click). Move a projector by holding two handles by 2 or more people.

3. To retract carrying handles, pull up lock buttons and release lock of handles and press handles fully in until it's locked.

CAUTION IN CARRYING OR TRANSPORTING A PROJECTOR

- Do not drop or bump a projector, otherwise damages or malfunctions may result.
- When carrying a projector, use a suitable carrying case.
- Do not transport a projector by using a courier or transport service in an unsuitable transport case. This may cause damage to a projector. To transport a projector through a courier or transport service, consult your dealer and best case should be applied.
- Please remove the lens when you carry the projector.
TERMINALS OF PROJECTOR

This projector applies various input/output terminals and 4 terminal slots for expansion to tune to diversity of signals from computers and video equipment. 4-built-in Terminal Slots enable you to arrange desired combinations of input sources just by changing Terminal Boards. For Terminal Boards, contact sales dealer where you purchased a projector.

4 TERMINAL SLOTS (Factory set)

NOTE; When replacement of terminal board, MAIN ON/OFF switch should be OFF position.

1. Remove 2 Screws on terminal.
2. Pull out terminal by holding handle.
4. Tighten screws to secure terminal.

NOTES ON ORDERING OR USING OPTIONAL INTERFACE BOARD

When ordering or using Optional Interface Board (Terminal Board), contact your sales dealer. When contacting the sales dealer, tell the Optional Control Number (Op.cont.No.) in the menu that is located under Language Select Menu. (See page 39.)
Connect audio output from computer or video equipment to these jacks.
(Refer to P15, 16.)

Connect component video output (Cr, Y, Cb or Pr, Y, Pb) from video equipment to R/Pr, G/Y and B/Pb jacks or connect computer output [5 BNC Type (Red, Green, Blue, Horiz. Sync and Vert. Sync.)] from computer to R/Pr, G/Y, B/Pb, H/HV and V jacks. (Refer to P15, 16.)

Connect computer output (Digital/Analog DVI-I type) to this terminal.
(Refer to P15.)
HD (HDCP Compatible) signal can also be connected. (Refer to P16.)

Connect audio output from computer or video equipment to these jacks. (Refer to P15, 16.)

The port is not functioning in this model.

Connect computer output (Analog HDB 15-pin type) to this terminal.
(Refer to P15.)
CONNECTING PROJECTOR

SERIAL PORT
IN TERMINAL
If you control a projector by computer, you must connect a cable (not provided) from your computer to this terminal.

SERIAL PORT
OUT TERMINAL
This terminal outputs signal from SERIAL PORT IN. More than two projectors can be controlled with one computer by connecting SERIAL PORT IN of another projector to this terminal.

R/C JACK
When using Wired / Wireless Remote Control Unit as Wired Remote Control, Connect Wired Remote Control Unit to this jack with Remote Control Cable (not supplied). (Refer to page 19.)

RESET BUTTON
This projector uses a micro processor to control unit. Occasionally, micro processor may malfunction and need to be reset. This can be done by pressing RESET button with a pen, which will shut down and restart unit. Do not use RESET function excessively.

AUDIO OUTPUT JACKS
Connect an external audio amplifier to these jacks. (Refer to P15, 16.)

USB PORT (Series B)
This port is used to service this projector. Connect USB port of computer to this port.

PROJECTOR ID SETTING
This feature allows users to set serial communication configuration (Projector ID) when connecting several projectors via the RS-232C terminal (serial port) of the projector.

1 Press the AUTO PC ADJ. button on the projector or on the remote control Unit for 10 seconds. Projector ID appears on the screen.

2 Press POINT LEFT/RIGHT button to adjust the Projector ID.

3 Press POWER ON-OFF button to set the Projector ID completely.
   ● Projector ID ... 1 - 999. (Factory default setting : Projector ID 1)
Cables used for connection (※ = Cables are not supplied with this projector.)
- VGA Cable (HDB 15 pin)
- DVI Cable ※
- BNC Cable (BNC x 5) ※
- Audio Cables (RCA x 2) ※

NOTE:
When connecting cable, power cords of both a projector and external equipment should be disconnected from AC outlet. Turn a projector and peripheral equipment on before computer is switched on.

Used to select an item or adjust value in ON-SCREEN MENU. They are also used to pan image in DIGITAL ZOOM +/- mode. (P33)
To insure safe operation, please observe following precautions:

● Use (2) AA or LR6 type alkaline batteries.
● Replace two batteries at same time.
● Do not use a new battery with an used battery.
● Avoid contact with water or liquid.
● Do not expose Remote Control Unit to moisture, or heat.
● Do not drop Remote Control Unit.
● If a battery has leaked on Remote Control Unit, carefully wipe case clean and install new batteries.
● Danger of explosion if battery is incorrectly replaced.
● Dispose of used batteries according to batteries manufacturers instructions and local rules.

Remote Control Batteries Installation

1. Remove battery compartment lid.
2. Slide batteries into compartment.
3. Replace compartment lid.

To install batteries:

- Pull up lid and remove it.
- Slide two AA batteries into compartment, ensuring correct polarity (+ and -).
- Replace lid.

Operating Range

Point Remote Control Unit toward projector (Infrared Remote Receiver) whenever pressing any button. Maximum operating range for Remote Control Unit is about 16.4’ (5m) and 60° in front and rear of a projector.
HOW TO OPERATE ON-SCREEN MENU

You can control and adjust this projector through ON-SCREEN MENU. Refer to following pages to operate each adjustment on ON-SCREEN MENU.

1 DISPLAY MENU
Press MENU button to display ON-SCREEN MENU.

2 MOVING POINTER
Move pointer (see below) or adjust value of item by pressing POINT button(s) on Side Control or on Remote Control Unit.

* Pointer is a icon on ON-SCREEN MENU to select item. See figures on section "FLOW OF ON-SCREEN MENU OPERATION" below.

3 SELECT ITEM
Select item or set selected function by pressing SELECT button.

FLOW OF ON-SCREEN MENU OPERATION

Display ON-SCREEN MENU
1 Press MENU button to display ON-SCREEN MENU (MENU BAR). A red frame is POINTER.

Select Menu to be adjusted
2 Move POINTER (red frame) to MENU ICON that you want to select by pressing POINT LEFT / RIGHT buttons.

Control or adjust item through ON-SCREEN MENU
3 Press POINT DOWN button and move POINTER (red frame or red arrow) to ITEM that you want to adjust, and then press SELECT button to show ITEM DATA.

4 Adjust ITEM DATA by pressing POINT LEFT / RIGHT buttons. Refer to following pages for details of respective adjustments.
BEFORE OPERATION

MENU BAR

FOR PC SOURCE
Press MENU BUTTON while connecting to PC input source.

GUIDE WINDOW
Shows selected item of ON-SCREEN MENU.

PC SYSTEM MENU
Used to select computer system.
(Refer to P27)

IMAGE SELECT MENU
Used to select image level among Standard, Real and Image 1 ~ 4.
(Refer to P31)

SETTING MENU
Used to change settings of projector or reset Lamp Replace Counter.
(Refer to P39-41)

SCREEN MENU
Used to adjust size of image. [Normal / True / Wide / Digital zoom +/-]
(Refer to P33)

INPUT MENU
Used to select input source (Input 1, Input 2, Input 3 or Input 4).
(Refer to P26)

PC ADJUST MENU
Used to adjust parameters to match with input signal format.
(Refer to P28-30)

IMAGE ADJUST MENU
Used to adjust computer image.
[Contrast/Brightness /Color Temp. /White Balance (R/G/B) /Sharpness/Gamma /Noise Reduction /Progressive]
(Refer to P32)

FOR VIDEO SOURCE
Press MENU BUTTON while connecting to VIDEO input source.

GUIDE WINDOW
Shows selected item of ON-SCREEN MENU.

INPUT MENU
Used to select input source (Input 1, Input 2, Input 3 or Input 4).
(Refer to P34)

IMAGE SELECT MENU
Used to select image level among Standard, Cinema and Image 1 ~ 4.
(Refer to P36)

SCREEN MENU
Used to set size of image to Normal or Wide.
(Refer to P38)

INPUT MENU
Used to select input source (Input 1, Input 2, Input 3 or Input 4).
(Refer to P34)

IMAGE SELECT MENU
Used to select image level among Standard, Cinema and Image 1 ~ 4.
(Refer to P36)

SCREEN MENU
Used to set size of image to Normal or Wide.
(Refer to P38)

SAME FUNCTION AS MENU FOR PC SOURCE.
BASIC OPERATION

TURNING ON / OFF PROJECTOR

TURNING ON PROJECTOR

1. Complete peripheral connections (with Computer, VCR, etc.) before turning on projector. (Refer to “CONNECTING TO PROJECTOR” on Pages 13-16 for connecting that equipment.)

2. Connect a projector’s AC Power Cord into a wall outlet and turn MAIN ON/OFF SWITCH to ON. LAMP indicator lights RED, and READY indicator lights GREEN.

3. Press POWER ON-OFF button on Side Control or on Remote Control Unit to ON. LAMP indicator dims, and Cooling Fans start to operate. Preparation Display appears on a screen and countdown starts. Signal from source appears after 20 seconds. Current Input position and Lamp status are also displayed on screen for 5 seconds. (Refer to “LAMP MANAGEMENT” on page 43.)

4. Preparation Display disappears after 20 seconds.

TURNING OFF PROJECTOR

1. Press POWER ON-OFF button on Side Control or on Remote Control Unit, and a message “Power off?” appears on a screen.

2. Press POWER ON-OFF button again to turn off projector. LAMP indicator lights bright and READY indicator turns off. After approximate 90 seconds, READY indicator will light green again and projector may be turned on by pressing POWER ON-OFF button.

3. Cooling fans will operate for approximate 2 minutes after projector is turned off. To power down completely, turn MAIN ON/OFF SWITCH to OFF and disconnect AC Power Cord.

4. TO MAINTAIN LIFE OF LAMP, ONCE YOU TURN PROJECTOR ON, WAIT AT LEAST 5 MINUTES BEFORE TURNING IT OFF.

When Power Management function is ON, projector detects signal interruption and turns off Projection Lamp automatically. Refer to “Power Management” on pages 39 and 40.

When WARNING TEMP. indicator flashes red, projector is automatically turned off. Wait at least 5 minutes before turning on projector again.

When both WARNING TEMP. and READY indicators to flash, follow procedures below:
1. Turn MAIN ON/OFF SWITCH to OFF.
2. Turn a projector on again.

When WARNING TEMP. indicator continues to flash, follow procedures below:
1. Turn MAIN ON/OFF SWITCH to OFF and disconnect AC Power Cord from an AC outlet.
2. Check Air Filters for dust accumulation.
3. Clean Air Filters. (See "AIR FILTER CARE AND CLEANING " section on page 42.)
4. Turn a projector on again.

If WARNING TEMP. indicator should still continue to flash, contact sales dealer where you purchased this projector or service center.

Continuous use may result in shortening the lamp life. Turn off the projector and rest it for about an hour in every 24 hours.

!
BASIC OPERATION

ADJUSTING SCREEN

ZOOM ADJUSTMENT

1. Press ZOOM ▲/▼ button on Side Control or on Remote Control Unit. Message “Zoom” is displayed.
2. Press ZOOM ▲ button to make image larger, and press ZOOM ▼ button to make image smaller.

FOCUS ADJUSTMENT

1. Press FOCUS ▲/▼ button on Side Control or on Remote Control Unit. Message “Focus” is displayed.
2. Adjust focus of image by pressing FOCUS ▲/▼ button(s).

LENS SHIFT ADJUSTMENT

1. Press the LENS SHIFT button on Side Control or on the Remote Control Unit. Message “Lens shift” is displayed.
2. Press POINT UP button to move image up, press POINT DOWN button to move image down, press POINT LEFT to move image left and press POINT RIGHT to move image right.

KEYSTONE ADJUSTMENT

If a projected picture has keystone distortion, correct image with KEYSTONE adjustment.

1. Press KEYSTONE button on Remote Control Unit or select Keystone on SETTING menu. (Refer to page 39.) Keystone dialog box appears.
2. Correct keystone distortion by pressing POINT UP/DOWN button(s). Press POINT UP button to reduce upper part of image, and press POINT DOWN button to reduce lower part.

Reduce upper width with POINT UP button. Reduce lower width with POINT DOWN button.
PICTURE FREEZE FUNCTION
Press FREEZE button on Remote Control Unit to freeze picture on-screen. To cancel FREEZE function, press FREEZE button again or press any other button except POINT UP/DOWN/LEFT/RIGHT and SELECT button.

NO SHOW FUNCTION
Press NO SHOW button on Remote Control Unit to black out an image. To restore to normal, press NO SHOW button again or press any other button except POINT UP/DOWN/LEFT/RIGHT and SELECT button.

Message disappears after 4 seconds.

P-TIMER FUNCTION
Press P-TIMER button on Remote Control unit. Timer display “00 : 00” appears on a screen and timer starts to count time (00 : 00 ~ 59 : 59). To stop P-TIMER display, press P-TIMER button. And then, press P-TIMER button again to cancel P-TIMER function.
COMPUTER INPUT

SELECTING INPUT SOURCE

DIRECT OPERATION
Select INPUT source by pressing INPUT 1/2, INPUT 3/4 or INPUT 1 - INPUT 4 buttons on Side Control or on Remote Control Unit.

MENU OPERATION
1 Press MENU button and ON-SCREEN MENU will appear. Press POINT LEFT/RIGHT buttons to select Input and press SELECT button. Another dialog box INPUT SELECT Menu will appear.

2 Press POINT DOWN button to move arrow to INPUT source that you want to select, and then press SELECT button.

SELECTING COMPUTER SYSTEM

WHEN SELECT INPUT 1 (DVI INPUT TERMINAL)

1 Press MENU button and ON-SCREEN MENU will appear. Press POINT LEFT/RIGHT button to move a red frame pointer to INPUT Menu icon.

2 Press POINT DOWN button to move a red arrow pointer to Input 1 and then press SELECT button. Source Select Menu will appear.

3 Move a pointer to source that you want to select and then press SELECT button.

RGB (Analog)
When your computer is connected on DVI terminal, select RGB (Analog).

RGB (Scart)
When scart video equipment is connected on DVI terminal, select RGB (Scart).

RGB (PC Digital)
When your computer is connected on DVI terminal, select RGB (PC Digital).

RGB (AV HDCP)
If a HDCP-compatible signal source is connected on DVI terminal, select RGB (AV HDCP).

NOTE:
HDCP (High-bandwidth Digital Content Protection) is a system for protecting digital entertainment content which is delivered by DVI (Digital Visual Interface) from being copied. The specification of HDCP is decided and controlled by Digital Content Protection, LLC. Should the specification be changed, this projector may not display the digital content protected by HDCP.
COMPUTER INPUT

WHEN SELECT INPUT 2 (5 BNC INPUT JACKS)

When connect a computer output [5 BNC Type (Red, Green, Blue, Horiz. Sync and Vert. Sync.)] from a computer to R/Pr, G/Y, B/Pb, H/HV and V jacks.

1. Press MENU button and ON-SCREEN MENU will appear. Press POINT LEFT/RIGHT button to move a red frame pointer to INPUT Menu icon.
2. Press POINT DOWN button to move a red arrow pointer to Input 2 and then press SELECT button. Source Select Menu will appear.
3. Move a pointer to "RGB", and then press SELECT button.

AUTOMATIC MULTI-SCAN SYSTEM

This projector automatically tunes to most different types of computers based on VGA, SVGA, XGA, SXGA, WXGA or UXGA (refer to "COMPATIBLE COMPUTER SPECIFICATIONS" on page 51-52). When selecting Computer, this projector automatically tunes to incoming signal and projects proper image without any special setting. (Some computers need setting manually.)

Note: Projector may display one of following messages.

Auto

When projector cannot recognize connected signal as PC system provided in this projector, Auto PC Adjustment function operates to adjust projector and message "Auto" is displayed on SYSTEM Menu icon. (Refer to P28.) When image is not provided properly, manual adjustment is required. (Refer to P29 and 30.)

———

There is no signal input from computer. Make sure connection of computer and a projector is set correctly. (Refer to TROUBLESHOOTING on page 47.)

SELECT COMPUTER SYSTEM MANUALLY

This projector automatically selects PC system among those provided in this projector and PC system can be also selected manually.

1. Press MENU button and ON-SCREEN MENU will appear. Press POINT LEFT/RIGHT buttons to move a red frame pointer to PC SYSTEM Menu icon.
2. Press POINT DOWN button to move a red arrow pointer to system that you want to set, and then press SELECT button.
Auto PC Adjustment function is provided to automatically adjust Fine sync, Total dots and Picture Position to conform to your computer. Auto PC Adjustment function can be operated as follows.

1. Press MENU button and ON-SCREEN MENU will appear. Press POINT LEFT/RIGHT button to move a red frame pointer to PC ADJUST Menu icon.

2. Press POINT DOWN button to move a red frame pointer to AUTO PC Adj. icon and then press SELECT button twice. This Auto PC Adjustment can be also executed by pressing AUTO PC ADJ. button on Side Control or on Remote Control Unit.

Store adjustment parameters. Adjustment parameters from Auto PC Adjustment can be memorized in this projector. Once parameters are memorized, setting can be done just by selecting Mode in PC SYSTEM Menu (P27). Refer to step 3 of MANUAL PC ADJUSTMENT section (P30).

NOTE
- Fine sync, Total dots and Picture Position of some computers can not be fully adjusted with this Auto PC Adjustment function. When image is not provided properly through this function, manual adjustments are required. (Refer to page 29, 30.)
- Auto PC Adjustment function cannot be operated in Digital Signal input on DVI terminal and “480i”, “575i”, “480p”, “575p”, “720p (HDTV)”, “1035i (HDTV)”, “1080i/50 (HDTV)” or “1080i/60 (HDTV)” is selected on PC SYSTEM Menu (P27).
MANUAL PC ADJUSTMENT

This projector can automatically tune to display signals from most personal computers currently distributed. However, some computers employ special signal formats which are different from standard ones and may not be tuned by Multi-Scan system of this projector. If this happens, projector cannot reproduce a proper image and image may be recognized as a flickering picture, a non-synchronized picture, a non-centered picture or a skewed picture.

This projector has a Manual PC Adjustment to enable you to precisely adjust several parameters to match with those special signal formats. This projector has 5 independent memory areas to memorize those parameters manually adjusted. This enables you to recall setting for a specific computer whenever you use it.

Note: This PC ADJUST Menu cannot be operated in Digital Signal input on DVI terminal is selected on PC SYSTEM MENU (P27).

1. Press MENU button and ON-SCREEN MENU will appear. Press POINT LEFT/RIGHT button to move a red frame pointer to PC ADJUST Menu icon.

2. Press POINT DOWN button to move a red frame pointer to item that you want to adjust and then press SELECT button. Adjustment dialog box will appear. Press POINT LEFT/RIGHT button to adjust value.

- **Fine sync**
  Adjusts an image as necessary to eliminate flicker from display. Press POINT LEFT/RIGHT button to adjust value. (From 0 to 31.)

- **Total dots**
  Number of total dots in one horizontal period. Press POINT LEFT/RIGHT button(s) and adjust number to match your PC image.

- **Horizontal**
  Adjusts horizontal picture position. Press POINT LEFT/RIGHT button(s) to adjust position.

- **Vertical**
  Adjusts vertical picture position. Press POINT LEFT/RIGHT button(s) to adjust position.

- **Current mode**
  Press SELECT button to show information of computer selected.

- **Clamp**
  Adjusts clamp position. When a image has a dark bar(s), try this adjustment.

Note: This menu cannot be operated in Digital Signal input on DVI terminal is selected on PC SYSTEM MENU (P27).
**COMPUTER INPUT**

**Display area**
Selects area displayed with this projector. Select resolution at Display area dialog box.

**Display area H**
Adjustment of horizontal area displayed with this projector. Press POINT LEFT/RIGHT button(s) to decrease/increase value and then press SELECT button.

**Display area V**
Adjustment of vertical area displayed with this projector. Press POINT LEFT/RIGHT button(s) to decrease/increase value and then press SELECT button.

**Full screen**
Press POINT LEFT/RIGHT button(s) to switch Full screen function to “On” or “Off.” Set “On” to resize image with 4 x 3 aspect ratio to fit a screen.

**NOTE:** Fine sync, Display area, Display area H, Display area V and Full screen cannot be adjusted when “480i”, “575i”, “480p”, “575p”, “720p (HDTV)”, “1035i (HDTV)”, “1080i/50 (HDTV)” or “1080i/60 (HDTV)” is selected on PC SYSTEM Menu (P27).

3

**Store**
To store adjustment parameters, move a red frame pointer to Store icon and then press SELECT button. Move a red arrow pointer to any of Mode 1 to 5 that you want to store and then press SELECT button.

**Mode free**
To clear adjustment parameters previously set, move a red frame pointer to Mode free icon and then press SELECT button. Move a red arrow pointer to Mode that you want to clear and then press SELECT button.

Other icons operates as follows.

**Reset**
Reset all adjust parameters on adjustment dialog box to previous figure.

**Quit**
Closes PC ADJUST MENU.
PICTURE IMAGE ADJUSTMENT

IMAGE LEVEL SELECT (DIRECT)

Select image level among Standard, Real, Image 1, Image 2, Image 3 and Image 4 by pressing IMAGE/IMAGE SEL. button on Side Control or on Remote Control Unit.

**Standard**
Normal picture level preset on this projector.

**Real**
Picture level with improved halftone for graphics.

**IMAGE 1~4**
User preset picture adjustment in IMAGE ADJUST Menu (P32).

---

IMAGE LEVEL SELECT (MENU)

1. Press MENU button and ON-SCREEN MENU will appear. Press POINT LEFT/RIGHT button to move a red frame pointer to IMAGE SELECT Menu icon.

2. Press POINT DOWN button to move a red frame pointer to level that you want to set and then press SELECT button.

**Standard**
Normal picture level preset on this projector.

**Real**
Picture level with improved halftone for graphics.

**IMAGE 1~4**
User preset picture adjustment in IMAGE ADJUST Menu (P32).
**COMPUTER INPUT**

**IMAGE LEVEL ADJUSTMENT**

1. Press MENU button and ON-SCREEN MENU will appear. Press POINT LEFT/RIGHT buttons to move a red frame pointer to IMAGE ADJUST Menu icon.

2. Press POINT DOWN button to move a red frame pointer to item that you want to adjust and then press SELECT button. Level of each item is displayed. Adjust each level by pressing POINT LEFT/RIGHT button(s).

   - **Contrast**
     Press POINT LEFT button to decrease contrast, and POINT RIGHT button to increase contrast. (From 0 to 63.)

   - **Brightness**
     Press POINT LEFT button to adjust image darker, and POINT RIGHT button to adjust brighter. (From 0 to 63.)

   - **Color temp.**
     Press either POINT LEFT button or POINT RIGHT button to Color temp. level that you want to select. (XLow, Low, Mid or High)

   - **White balance (Red)**
     Press POINT LEFT button to lighten red tone and POINT RIGHT button to deeper tone. (From 0 to 63.)

   - **White balance (Green)**
     Press POINT LEFT button to lighten green tone and POINT RIGHT button to deeper tone. (From 0 to 63.)

   - **White balance (Blue)**
     Press POINT LEFT button to lighten blue tone and POINT RIGHT button to deeper tone. (From 0 to 63.)

   - **Sharpness**
     Press POINT LEFT button to soften image, and POINT RIGHT button to sharpen image. (From 0 to 15.)

   - **Gamma**
     Press either POINT LEFT button or POINT RIGHT button to obtain better balance of contrast. (From 0 to 15.)

   - **Noise reduction**
     Press POINT LEFT/RIGHT button(s) to change noise reduction mode. Dialog box display is changed to “On” to reduce noise (rough parts) of image. Press POINT LEFT/RIGHT button(s) again, to change noise reduction mode to off.

   - **Progressive**
     Press POINT LEFT/RIGHT button(s) to change progressive scan mode. Dialog box display is changed to “Off” and progressive scan mode to off. Press POINT LEFT/RIGHT button(s) again, progressive scan mode to on.

3. **Store**
   To store manually preset image, move a red frame pointer to Store icon and press SELECT button. Image Level Menu will appear. Move a red frame pointer to Image 1 to 4 where you want to set and then press SELECT button.

Other icons operates as follows.

   - **Reset**
     Reset all adjustment to previous figure.

   - **Quit**
     Closes IMAGE ADJUST MENU.

**NOTE:**
- Noise reduction can be operated when “480i”, “575i”, “480p”, “575p”, “720p (HDTV)”, “1035i (HDTV)”, “1080i/50 (HDTV)” or “1080i/60 (HDTV)” is selected on PC SYSTEM MENU (P27) only.
- Progressive can be operated when “480i”, “575i”, “1035i (HDTV)”, “1080i/50 (HDTV)” or “1080i/60 (HDTV)” is selected on PC SYSTEM MENU (P27) only.
PICTURE SCREEN ADJUSTMENT

This projector has a picture screen resize function, which enables you to display desirable image size.

1. Press MENU button and ON-SCREEN MENU will appear. Press POINT LEFT/RIGHT button(s) to move a red frame pointer to SCREEN Menu icon.

2. Press POINT DOWN button and move a red frame pointer to function that you want to select and then press SELECT button.

- **Normal**
  Provides image to fit screen size.

- **True**
  Provides image in its original size. When original image size is larger than screen size (1024 x 768), this projector enters “Digital zoom +” mode automatically.

- **Wide**
  Provides image to fit wide video aspect ratio (16 : 9) by expanding image width uniformly. This function can be used for providing a squeezed video signal at 16 : 9.

- **Digital Zoom +**
  When Digital Zoom + is selected, ON-SCREEN MENU disappears and message “D. Zoom +” is displayed. Press SELECT button to expand image size. And press POINT UP/DOWN/LEFT/RIGHT button(s) to pan image. Panning function can work only when image is larger than screen size.
  Press D.ZOOM button on Remote Control Unit. The message “D. Zoom +” is displayed. Press SELECT button to expand image size.

- **Digital Zoom –**
  When Digital Zoom – is selected, ON-SCREEN MENU disappears and message “D. Zoom –” is displayed. Press SELECT button to compress image size.
  Press D.ZOOM button twice on Remote Control Unit. The message “D. Zoom –” is displayed. Press SELECT button to compress image size.

To cancel Digital Zoom +/- mode, press any button except SELECT, POINT UP/DOWN/LEFT/RIGHT and AUTO PC ADJ. buttons.

**NOTE**

- Picture screen adjustment cannot be operated when “720p (HDTV)”, “1035i (HDTV)”, “1080i/50 (HDTV)” or “1080i/60 (HDTV)” is selected on PC SYSTEM Menu (P27).
- True and Digital Zoom +/- cannot be operated when “480i”, “575i”, “480p” or “575p” is selected on PC SYSTEM Menu (P27).
- This projector cannot display any resolution higher than 1600 X 1200. If your computer’s screen resolution is higher than 1600 X 1200, reset resolution to lower before connecting projector.
- Image data in other than XGA (1024 x 768) is modified to fit screen size in initial mode.
- Panning function may not operate properly if computer system prepared on PC ADJUST Menu is used.
VIDEO INPUT

SELECTING INPUT SOURCE

DIRECT OPERATION
Select INPUT source by pressing INPUT 1/2, INPUT 3/4 or INPUT 1 - INPUT 4 buttons on Side Control or on Remote Control Unit.

MENU OPERATION

1. Press MENU button and ON-SCREEN MENU will appear. Press POINT LEFT/RIGHT buttons to move a red frame pointer to INPUT Menu icon. Move a pointer to “Y, Pb/Cb, Pr/Cr” and then press SELECT button.

2. Press POINT DOWN button to move a red arrow pointer to INPUT source that you want to select, and then press SELECT button.

WHEN SELECT INPUT 2 (5 BNC SLOT)
When connect component video output (Cr, Y, Cb or Pr, Y, Pb) from video equipment to R/Pr, G/Y and B/Pb jacks.

1. Press MENU button and ON-SCREEN MENU will appear. Press POINT LEFT/RIGHT button to move a red frame pointer to INPUT Menu icon.

2. Press POINT DOWN button to move a red arrow pointer to Input 2 and then press SELECT button. Source Select Menu will appear.

3. Move a pointer to “Y, Pb/Cb, Pr/Cr” and then press SELECT button.
SELECTING VIDEO SYSTEM

1 Press MENU button and ON-SCREEN MENU will appear. Press POINT LEFT/RIGHT buttons to move a red frame pointer to AV SYSTEM Menu icon.

2 Press POINT DOWN button to move a red arrow pointer to system that you want to select and then press SELECT button.

Y, Pb/Cb, Pr/Cr JACKS

Auto
Projector automatically detects incoming Video signal, and adjusts itself to optimize its performance. When Video System is 1035i, 1080i50 or 1080i60, select system manually first.

COMPONENT VIDEO SIGNAL FORMAT
If projector cannot reproduce proper video image, it is necessary to select a specific component video signal format among 480i, 575i, 480p, 575p, 720p, 1035i, 1080i50 or 1080i60.

AV SYSTEM MENU (COMPONENT VIDEO)

AV SYSTEM Menu icon
This box indicates system being selected.

Move pointer to system and press SELECT button.
PICTURE IMAGE ADJUSTMENT

IMAGE LEVEL SELECT (DIRECT)

Select image level among Standard, Cinema, Image 1, Image 2, Image 3 and Image 4 by pressing IMAGE/IMAGE SEL. button on Side Control or on Remote Control Unit.

- **Standard**
  Normal picture level preset on this projector.

- **Cinema**
  Picture level adjusted for picture with fine tone.

- **IMAGE 1–4**
  User preset picture adjustment in IMAGE ADJUST Menu (P38).

IMAGE LEVEL SELECT (MENU)

1. Press MENU button and ON-SCREEN MENU will appear. Press POINT LEFT/RIGHT button to move a red frame pointer to IMAGE SELECT Menu icon.

2. Press POINT DOWN button to move a red frame pointer to level that you want to set and then press SELECT button.

- **Standard**
  Normal picture level preset on this projector.

- **Cinema**
  Picture level adjusted for picture with fine tone.

- **IMAGE 1–4**
  User preset picture adjustment in IMAGE ADJUST Menu (P38).
**IMAGE LEVEL ADJUSTMENT**

1. Press MENU button and ON-SCREEN MENU will appear. Press POINT LEFT/RIGHT button(s) to move a red frame pointer to IMAGE ADJUST Menu icon.

2. Press POINT DOWN button to move a red frame pointer to item that you want to adjust and then press SELECT button. Level of each item is displayed. Adjust each level by pressing POINT LEFT/RIGHT button(s).

- **Contrast**
  Press POINT LEFT button to decrease contrast, and POINT RIGHT button to increase contrast. (From 0 to 63.)

- **Brightness**
  Press POINT LEFT button to adjust image darker, and POINT RIGHT button to adjust brighter. (From 0 to 63.)

- **Color**
  Press POINT LEFT button to lighten color, and POINT RIGHT button to deeper color. (From 0 to 63.)

- **Tint**
  Press POINT LEFT button or POINT RIGHT button to obtain proper color. (From 0 to 63.)

- **Color temp.**
  Press either POINT LEFT button or POINT RIGHT button to Color temp. level that you want to select. (XLow, Low, Mid or High)

- **White balance (Red)**
  Press POINT LEFT button to lighten red tone and POINT RIGHT button to deeper tone. (From 0 to 63.)

- **White balance (Green)**
  Press POINT LEFT button to lighten green tone and POINT RIGHT button to deeper tone. (From 0 to 63.)

- **White balance (Blue)**
  Press POINT LEFT button to lighten blue tone and POINT RIGHT button to deeper tone. (From 0 to 63.)

- **Sharpness**
  Press POINT LEFT button to soften image, and POINT RIGHT button to sharpen image. (From 0 to 15.)

- **Gamma**
  Press either POINT LEFT button or POINT RIGHT button to obtain better balance of contrast. (From 0 to 15.)

- **Noise reduction**
  Press POINT LEFT/RIGHT button(s) to change noise reduction mode. Dialog box display is changed to "On" to reduce noise (rough parts) of image. Press POINT LEFT/RIGHT button(s) again, to change noise reduction mode to off.

- **Progressive**
  Press POINT LEFT/RIGHT button(s) to change progressive scan mode. Dialog box display is changed to "Off" and progressive scan mode to off. Press POINT LEFT/RIGHT button(s) again, progressive scan mode to on.

**NOTE:**
Tint cannot be adjusted when video system is PAL, SECAM, PAL-M or PAL-N.
Progressive cannot be operated when “480p”, “575p” or “720p” is selected on AV SYSTEM MENU (P35).
PICTURE SCREEN ADJUSTMENT

This projector has a picture screen resize function, which enables you to display desirable image size.

1 Press MENU button and ON-SCREEN MENU will appear. Press POINT LEFT/RIGHT button(s) to move a red frame pointer to SCREEN Menu icon.

2 Press POINT DOWN button and move a red frame pointer to function that you want to select and then press SELECT button.

![SCREEN Menu icon]

Move a red frame to function and press SELECT button.

NOTE: SCREEN Menu cannot be operated when “720p”, “1035i”, “1080i/50” or “1080i/60” is selected on AV SYSTEM Menu (P35).

Provides image at a normal video aspect ratio of 4 : 3.

Provides image at a wide screen ratio of 16 : 9.

Press MENU button and ON-SCREEN MENU will appear. Press POINT LEFT/RIGHT button(s) to move a red frame pointer to SCREEN icon.

Move a red frame pointer to function that you want to select and then press SELECT button.

Other icons operates as follows.

![Store icon]

To store adjustment data, move a red frame pointer to Store icon and press SELECT button. Image Level Menu will appear. Move a red frame pointer to Image Level 1 to 4 and then press SELECT button.

![Reset icon]

Reset all adjustment to previous figure.

![Quit icon]

Closes IMAGE ADJUST MENU.
SETTING MENU

1 Press MENU button and ON-SCREEN MENU will appear. Press POINT LEFT/RIGHT button(s) to move a red-frame pointer to SETTING icon.

2 Press POINT DOWN button to move a red-frame pointer to item that you want to set and then press SELECT button. Setting dialog box appears.

Language

Language used in ON-SCREEN MENU is selectable from among English, German, French, Italian, Spanish, Portuguese, Dutch, Swedish, Russian, Chinese, Korean and Japanese.

Keystone

When image is distorted vertically, select Keystone. ON-SCREEN MENU disappears and Keystone dialog box is displayed. Correct keystone distortion by pressing POINT UP/DOWN button(s). Refer to KEYSTONE ADJUSTMENT on page 24.

Blue back

When this function is “On,” this projector will produce a blue image instead of video noise on screen when any input source is unplugged or turned off.

Display

This function decides whether to display On-Screen Displays.

On .... shows all On-Screen Displays.

Off .... sets On-Screen Displays disappeared except:

- ON-SCREEN MENU
- “Power off?” message
- “No signal” message
- “Please wait....”
- P-Timer counter

Logo

When this function is “On,” projector displays our logo when starting up.

Ceiling

When this function is “On,” picture is top/bottom and left/right reversed. This function is used to project image from a ceiling mounted projector.

Rear

When this function is “On,” picture is left/right reversed. This function is used to project image to a rear projection screen.
**Power management**

This function turns Projection Lamp off when this projector detects signal interruption and is not used for a certain period in order to reduce power consumption and maintain Lamp-life. (This projector is shipped with this function ON.)

Power Management function operates to turn Projection Lamp off when input signal is interrupted and any button is not pressed over 5 minutes. This function operates as follows;

1. When any input signal is interrupted, “No signal” and counting down display appears (for 5 minutes).
2. After counting down for 5 minutes, projector lamp and READY indicator are turned off.
3. When READY indicator flashing, Projection Lamp can be turned on again (Power Management mode).

   In this Power Management mode, Projection Lamp is automatically turned on when input signal connected or projector is operated with any button on Side Control or on Remote Control Unit again.

**Lamp control**

This function allows you to change brightness of the screen.

- normal brightness.
- lower brightness reduces the lamp power consumption and extends the lamp life.

**Lamp Mode**

This Projector is equipped with 4 Projection Lamps and a number of using lamps can be switched to 4 lamps or 2 lamps. Using 2 lamps maintain life of Projection Lamps.

To change over Lamp Mode

2. Press POINT DOWN button to move a red frame pointer to “Lamp mode”. Set “4 lamps mode” or “2 lamps mode” by pressing POINT LEFT/RIGHT button(s). When Lamp Mode is set from “4 lamps mode” to “2 lamps mode” image becomes little darker. When Lamp Mode is set from “2 lamps mode” to “4 lamps mode” image become brighter gradually.

**NOTE**: After changing Lamp Mode, it cannot be switched again for 90 seconds.
Remote control

This projector provides eight different remote control codes (Code 1 to Code 8); the factory-set, initial code (Code 1) and the other seven codes (Code 2 to Code 8). This switching function prevents remote control interference when operating several projectors or video equipment at the same time. For example, operating the projector in “Code 7”, both the projector and the remote control must be switched to “Code 7”.

To change the code for the projector:
Select a remote control code in this Setting Menu.

To change the code for the remote control:
Check the Reset Switch to “Use position” in the compartment lid on back of the remote control. And then while holding down the MENU button, press the IMAGE button number of times corresponding to the remote control code for the projector.

To reset the code for the remote control:
Slide the Reset Switch to “Reset position” in the compartment lid on back of the remote control.

NOTE: The remote control code is reset when the battery is removed and leaves for a long time.

On start

When this function is “On,” projector is automatically turned on just by switching MAIN ON/OFF SWITCH on.

Note: Be sure to turn projector off properly (refer to section “TURNING OFF PROJECTOR” on P23). If projector is turned off in wrong steps, On Start function does not operate properly.

Lamp counter reset

This function is used to reset the lamp replace counter. When replacing the projection lamp, reset the lamp replace counter by using this function. See page 45 for operation.

Factory default

This function returns all setting values except the lamp counter to the factory default settings.

Quit

Closes SETTING MENU.
VENTILATION SLOTS OF A PROJECTOR MAY BE BLOCKED. IN SUCH AN EVENT, REPOSITION A PROJECTOR SO THAT VENTILATION SLOTS ARE NOT OBSTRUCTED.

AIR FILTER MAY BE CLOGGED WITH DUST PARTICLES. CLEAN AIR FILTER BY FOLLOWING SECTION AIR FILTER CARE AND CLEANING ON THIS PAGE.

IF WARNING TEMP. INDICATOR REMAINS ON AFTER PERFORMING ABOVE CHECKS, COOLING FANS OR INTERNAL CIRCUITS MAY BE MALFUNCTIONING. CONTACT THE SERVICE STATION.

WHEN BOTH OF THE WARNING TEMP. AND READY INDICATORS ARE FLASHING:

1. Ventilation Slots of a projector may be blocked. In such an event, reposition a projector so that Ventilation Slots are not obstructed.

2. Air Filter may be clogged with dust particles. Clean Air Filter by following section AIR FILTER CARE AND CLEANING on this page.

3. If WARNING TEMP. Indicator remains on after performing above checks, Cooling Fans or Internal Circuits may be malfunctioning. Contact the service station.

WHEN THE PROJECTOR DETECTS AN INTERNAL PROBLEM, IT WILL SHUT DOWN AUTOMATICALLY AND BOTH OF THE WARNING TEMP. AND READY INDICATORS STARTS FLASHING. IN THIS CONDITION, THE PROJECTOR CANNOT BE TURNED ON EVEN IF YOU PRESS THE ON/OFF BUTTON ON THE REMOTE CONTROL UNIT OR ON THE SIDE CONTROL. IF THIS CASE HAPPENS, DISCONNECT AND RECONNECT THE AC POWER CORD, AND THEN TURN ON THE PROJECTOR AGAIN TO CHECK ITS OPERATION. IF THE PROJECTOR SHUTS DOWN AGAIN OR FAILS TO BE TURNED ON, THE INTERNAL CHECK AND REPAIR WILL BE REQUIRED. PLUG OFF THE AC POWER CORD AND CONTACT SERVICE STATION.

AIR FILTER CARE AND CLEANING

Air filters help prevent dust from accumulating on the optical elements inside the projector. To whatever extent the air filters become clogged with dust particles, the cooling fans’ effectiveness is reduced, which may result in an internal heat build-up and adversely affect the life of the projector. Therefore, for appropriate care and use of the projector, regular cleaning of the air filters is necessary.

How often the air filters should be cleaned really depends upon the environment in which the projector is being operated. As a rough guide, under a normally clean operating environment, the air filters should be cleaned approximately every 200 hours of use. However, if the projector is being operated in a somewhat dusty or smoky environment, the air filters should be cleaned more often; for consistently good projector operation and performance, timely cleaning of the air filters is a very important factor. When appropriate, clean the air filters following the steps below.

1. Turn power off, and disconnect AC power cord from AC outlet.
2. Pull out air filter from a projector.
3. Pulling up center frame of air filter top, separate air filter top and air filter from air filter base.
4. Clean each parts with brush out dust and particles. Be sure to dry them out.
5. Assemble sheet and air filter and replace air filter to a projector.

CAUTION
Do not operate the projector with the Air Filter(s) removed. Dust may accumulate on the LCD Panels and Projection Mirrors degrading the picture quality. Do not put anything into the air intake vents. Doing so may result in a malfunction of the projector. Failure to properly clean the projector’s air filters (in accordance with the instructions in your Projector’s Operating Manual, or more frequently in any environment which is somewhat dusty or smoky) could result in overheating and will void the warranty on the projector.

NOTE: If the dust cannot be removed by cleaning, it is probably time to replace the air filters with new ones. Please consult your dealer.

Air Filter Parts No. 910 301 4815
LAMP MANAGEMENT

This Projector is equipped with 4 Projection Lamps to ensure brighter image and those lamps are controlled by Lamp Management Function. Lamp Management Function detects status of all lamps and shows status on screen or on LAMP REPLACE indicator. This function also automatically controls Lamp Mode when any of lamps is out for end of life or malfunctions.

Lamp Replace Indicator

This LAMP REPLACE indicator lights yellow when any of Projection Lamps is nearing its end, and flashes when any of them becomes out. Check number of lamp on Lamp Status Display and replace lamp.

Lamp Status Display

Lamp Status Display appears on screen when power switch is on or changed input position (input 1, input 2, Input 3 or input 4). This shows status of each lamp as; ON, OFF, NEAR END, or OUT. Refer to following for each status.

Yellow Lamp - Projection Lamp lights normally.
Dim Lamp - Projection Lamp is turned off.
Red Lamp - Projection Lamp is nearing its end. When image becomes darker or color becomes unnatural, replace lamp. (LAMP REPLACE indicator lights yellow.)
X Mark on Lamp - (LAMP REPLACE indicator flashes yellow.) Projection lamp is defective or fails to be turned on. Restart a projector on, and make sure lamp is on. If this mark still appears, replace lamp corresponding with number marked X.

Lamp Mode Changeover

Lamp Management Function automatically changes combination of lighting lamp (Lamp Mode) by detecting status of lamp. When any of 4 lamps becomes out, Lamp Mode is changed over from 4 lamps to 2 lamps. And when any of 2 lamps are out, a projector operates with 1 lamp. Lamp Mode can be switched to 4 lamps or 2 lamps manually. Refer to SETTING section on page 39, 40.
LAMP REPLACEMENT

When the life of the Projection Lamp of this projector draws to an end, the LAMP REPLACE indicator lights yellow. If this indicator lights yellow, replace the projection lamp with a new one promptly.

Follow these steps to replace lamp assembly.

1. Check number of lamp to be replaced on Lamp Status Display.
2. Turn off a projector and disconnect AC Power Cord. Allow a projector to cool down for at least 45 minutes.
3. Remove two screws on Lamp Cover and press button to open Lamp Cover. (See right figure.)
4. Loosen two screws and pull out Lamp Assembly to be replaced by grasping handle.
5. Replace Lamp Assembly with a new one and tighten two screws. Make sure Lamp is set properly.
6. Replace Lamp Cover and tighten two screws.
7. Connect AC Power Cord to a projector and turn a projector on.
8. Reset Lamp Replacement Counter. (Refer to section "Lamp Replace Counter" on page 45.)

NOTE: Do not reset LAMP REPLACEMENT COUNTER when lamp is not replaced.

CAUTION : DO NOT OPERATE A PROJECTOR WHILE ANY OF LAMPS IS REMOVED. IT MAY RESULT IN MALFUNCTIONS, FIRE HAZARD, OR OTHER ACCIDENTS.

NOTES ON LAMPS REPLACEMENT
To maintain quality of picture (better balance of color and brightness in entire screen), we recommend replacing all 4 lamps at a time.

NOTE: Do not reset LAMP REPLACEMENT COUNTER when lamp is not replaced.

CAUTION : DO NOT OPERATE A PROJECTOR WHILE ANY OF LAMPS IS REMOVED. IT MAY RESULT IN MALFUNCTIONS, FIRE HAZARD, OR OTHER ACCIDENTS.

NOTES ON LAMPS REPLACEMENT
To maintain quality of picture (better balance of color and brightness in entire screen), we recommend replacing all 4 lamps at a time.
ORDER REPLACEMENT LAMP
Replacement Lamp can be ordered through your dealer. When ordering a Projection Lamp, give the following information to the dealer.

- Model No. of your projector: LC-XT9
- Replacement Lamp Type No.: POA-LMP49

(Service Parts No. 610 300 0862)

LAMP REPLACE COUNTER
Be sure to reset Lamp Counter when Lamp Assembly is replaced. When Lamp Replace Counter is reset, LAMP REPLACE indicator stops lighting.

1. Turn projector on, press MENU button and ON-SCREEN MENU will appear. Press POINT LEFT/RIGHT button(s) to move a red frame pointer to SETTING Menu icon.

2. Press POINT DOWN button to move a red frame pointer to “Lamp counter reset” and then press SELECT button.

3. Move arrow to replaced lamp number (Lamp 1, Lamp 2, Lamp 3 or Lamp 4) and then press SELECT button. Message “Lamp replace counter Reset?” is displayed. Move pointer to [Yes] and then press SELECT button.

   NOTE: Be sure to reset correct lamp number otherwise LAMP REPLACE indicator continues lighting.

4. Another confirmation dialog box appears and select [Yes] to reset Lamp Replace Counter.

Do not reset Lamp Replace Counter except after Projection lamp is replaced.
LAMP HANDLING PRECAUTIONS

This projector uses a high-pressure lamp which must be handled carefully and properly. Improper handling may result in accidents, injury, or create a fire hazard.

● Lamp lifetime may differ from lamp to lamp and according to the environment of use. There is no guarantee of the same lifetime for each lamp. Some lamps may fail or terminate their lifetime in a shorter period of time than other similar lamps.

● If the projector indicates that the lamp should be replaced, i.e., if the LAMP REPLACE INDICATOR lights up, replace the lamp with a new one IMMEDIATELY after the projector has cooled down. (Follow carefully the instructions in the LAMP REPLACEMENT section of this manual.) Continuous use of the lamp with the LAMP REPLACE INDICATOR lighted may increase the risk of lamp explosion.

● A Lamp may explode as a result of vibration, shock or degradation as a result of hours of use as its lifetime draws to an end. Risk of explosion may differ according to the environment or conditions in which the projector and lamp are being used.

IF A LAMP EXPLODES, THE FOLLOWING SAFETY PRECAUTIONS SHOULD BE TAKEN.

If a lamp explodes, disconnect the projector’s AC plug from the AC outlet immediately. Contact an authorized service station for a checkup of the unit and replacement of the lamp. Additionally, check carefully to ensure that there are no broken shards or pieces of glass around the projector or coming out from the cooling air circulation holes. Any broken shards found should be cleaned up carefully. No one should check the inside of the projector except those who are authorized trained technicians and who are familiar with projector service. Inappropriate attempts to service the unit by anyone, especially those who are not appropriately trained to do so, may result in an accident or injury caused by pieces of broken glass.

SERVICE

WARNING: High voltages are used to operate this projector. Do not attempt to open cabinet.

You can often correct operating problems yourself. If a projector fails to work properly, see “TROUBLESHOOTING” section on page 47. To correct failure, try “Solutions”.

If after following all operating instructions, you find that service is necessary, contact Eiki Service Station or store where you purchased unit.

Give model number and explain difficulty. We will advise you how to obtain service.

This symbol on the nameplate means the product is Listed by Underwriters Laboratories Inc. It is designed and manufactured to meet rigid U.L. safety standards against risk of fire, casualty and electrical hazards.

The CE Mark is a Directive conformity mark of the European Community (EC).
## TROUBLESHOOTING

Before calling your dealer or service center for assistance, check matters below once again.

1. Make sure you have connected a projector to your computer or video equipment as described in section "CONNECTING PROJECTOR" on pages 13 ~ 16.
2. Check cable connection. Verify that all computer, video and power cord are properly connected.
3. Verify that all power is switched on.
4. If a projector still does not produce an image, re-start your computer.
5. If an image still does not appear, unplug a projector from your computer and check your computer monitor's display. Problem may be with your graphics controller rather than with a projector. (When you reconnect a projector, be sure to turn a computer and monitor off before you power up a projector. Power equipment back on in order of : Projector and computer.)
6. If problem still exists, check following chart.

<table>
<thead>
<tr>
<th>Problem:</th>
<th>Try these Solutions</th>
</tr>
</thead>
</table>
| **No power.** | ● Plug a projector into your AC outlet.  
 ● Turn MAIN ON/OFF switch to ON.  
 ● Press POWER ON/OFF switch to ON.  
 ● Make sure READY Indicator lights.  
 ● Wait 90 seconds after a projector is turned OFF when turning a projector back on.  
 **NOTE :** After pressing Power ON-OFF button to OFF, make sure a projector works as follows:  
 1. LAMP indicator lights bright and READY indicator turns off.  
 2. After 90 seconds, READY indicator lights green again and a projector may be turned on by pressing Power ON-OFF button.  
 ● Check WARNING TEMP. and READY indicator. If both WARNING TEMP. and READY indicator flashes, a projector cannot be turned on.  
 (See "TURNING ON/OFF PROJECTOR" section on page 23.)  
 ● Check Projection Lamp. (Refer to page 44.) |
| **Image is out of focus.** | ● Adjust focus of a projector.  
 ● Check Projection Lens to see if it needs cleaning.  
 **NOTE :** Moving a projector from a cool temperature location to a warm temperature location may result in moisture condensation on Projection Lens. In such an event, leave a projector OFF and wait until condensation disappears. |
| **Picture is Left/Right reversed.** | ● Check Ceiling / Rear feature. (See “SETTING” section on page 39.) |
| **Picture is Top/Bottom reversed.** | ● Check Ceiling feature. (See “SETTING” section on page 39.) |
| **Some displays are not seen during Operation.** | ● Check Display feature.(See “SETTING” section on page 39.) |
| **No image.** | ● Check connection between your computer or video equipment and a projector.  
 ● When turning a projector on, it takes about 20 seconds to display an image.  
 ● Check system that you select is corresponding with your computer or video equipment.  
 ● Make sure temperature is not out of Operating Temperature (5°C ~ 35°C). |
| **Remote Control Unit does not work.** | ● Check batteries.  
 ● Make sure nothing is between Infrared Remote Receiver and Remote Control Unit.  
 ● Make sure you are not too far from a projector when using Remote Control Unit.  
 Maximum operating range is 16.4’ (5m).  
 ● Check remote control code from Remote Control Unit.  
 (See “SETTING” section on page 41.) |

Depending on the condition of signals and the type and length of cables, these signals may not be properly viewed.

### OPTIONAL PARTS

The parts listed below are optionally supplied. When ordering those parts, give the name and Type No. to the sales dealer.

- **DVI Board (HDCP Compatible)** Type No. : AH-72003
- **5 BNC Board** Type No. : AH-72015
- **Video/Y,C & S-Video Board** Type No. : AH-72023
- **D-Sub 15 Board** Type No. : AH-72031
- **Network Board** Type No. : AH-72142
- **Dual SDI Board** Type No. : AH-72162
- **Warp & Blending Board** Type No. : AH-72181
- **DVI Board** Type No. : AH-72002

</table>

- Specifications are subject to change without notice.
- LCD panels are manufactured to the highest possible standards. At least 99.99% of the pixels are effective, however a tiny fraction of the pixels (0.01% or less) may be ineffective by the characteristics of the LCD panels.
- Each projector has its own characteristics. When projecting with several projectors on the same screen or side by side, you may recognize different white balance and color uniformity on each projector.
CONFIGURATIONS OF TERMINALS

DVI-I TERMINAL (DIGITAL/ANALOG)
This terminal accepts only Digital (TMDS) or Analog (RGB) output signal. Connect display output terminal of computer to this terminal with DVI cable (not supplied).

CAUTION

When installing or replacing the Projection Lens, refer to this manual. For installation of the lens, use the parts designated in the manual. Do not use the installation manual and Light-Block Sheets in the lens package. Check the following parts supplied to this projector.

- LIGHT-BLOCK SHEETS 6 pcs.
- LENS ATTACHMENT (01) 1 pce.
- LENS ATTACHMENT (02) 1 pce.

AVAILABLE LENS

This projector applies the Projection Lenses listed below. Use the suitable lens for where the projector is used.

NOTES ON LENS INSTALLATION

- Lens installation and replacement should be made by the qualified service personnel.
- Be sure to install the lens following this procedure precisely.
- Do not touch or remove any parts except the lens and related parts. It may result in malfunctions, electrical shock, fire hazard or other accidents.
- Before installing or replacing the lens, check that the Model No. of the Projection Lens matches to the projector.
- When moving or setting up the projector, be sure to replace the Lens Cover to protect the surface. And be careful not to hold or subject the lens to strong forces. It may damage the lens, cabinet, or mechanical parts.
- For details of the lens and installation, contact the sales dealer where you purchased the projector.
NOTE: The installation procedure and needed parts for lens installation depend on the type of the Projection Lens. Check the Model No. of the Projection Lens and be sure to install or replace the lens following procedure below.

1. Remove Lens Cover. Remove 2 Screws A. Push part B and pull Upper Lens Cover up. (See Fig. 1.)

2. Remove 4 Screws C. Pull Lower Lens Cover toward front and remove. (See Fig. 2.)

3. Remove 2 Screws D and Cover Plate on the back of Upper Lens Cover. (See Fig. 3.)
Remove Lens Cap on the rear (mounting side) of Projection Lens and mount Lens on the lens attachment with 4 Screws. (Use screws attached on lens.)

Connect the Lens Motor Lead connector to the socket on the right-top of the lens attachment. (Motor Driven Lens only.) See Fig. 5.

</tbody>
</table>

Grasp the Lens Lock Lever and turn it fully upward. (See Fig. 6.) Install the Lens into the projector. Grasp the Lens Lock Lever and turn the Lever fully downward until lever is Locked (clicked position) properly. (See Fig. 7.) When installing the Motor Driven Lens, be sure to mount Lens Motor on right side. (See Fig. 4.) After installing the lens, make sure the Lens is not loose and properly installed.

NOTE: Please go while supporting the lens when you detach the lens for safety.
This projector has 6 Light-Block Sheets. Use 2 Light-Block Sheets corresponding with lens. (Refer to the list below.) Use 1 Light-block Sheet for MODEL LNS-W03
Set 2 Light-Block Sheets through the lens.
Make sure the shape of the Light-Block Sheets are correct and be sure to set them as shown in the Fig. 8.

**NOTE:**
- Be sure to set each Light-Block Sheet as shown in Fig-8.
- Make sure the mark (TOP and BACK) on Light-Block Sheets are correct and set them properly.

**Light-Block Sheets For each lens.**

**MODEL LNS-W03**

![Fig-8 Diagram](image)
7. Adjust focus of the Projection Lens. (LNS-W01, LNS-W01Z, LNS-T01, LNS-T01Z and LNS-W03 only.)
Set up the projector and project image on the screen. Loosen Focus Lens Lock Screw and rotate
Projection Lens to obtain proper focus. After adjusting focus, be sure to lock Projection Lens with Focus
Lens Lock Screw securely. (See Fig. 4.) Adjust focus of Projection Lens MODEL LNS-W03, following
Focus Adjustment on page 6.

8. Replace Lower Lens Cover. Slide Light-Block Sheets into the guide of Lower Lens Cover and set them
in front of the flap. (See Fig. 9.) Fix Lower Lens Cover with 4 Screws C. (See Fig. 2.)

9. Replace Upper Lens Cover. Slide Light-Block Sheets into the guide of Upper Lens Cover and set them
in front of the flap. (See Fig. 9.) Fix Upper Lens Cover with 2 Screws A. (See Fig. 1.)

10. Turn the projector on and operate Lens shift, Zoom and Focus fully to check Light-Block Sheets.
If Light-Block Sheets interfere with those operations, check Light-Block Sheets are set properly.

Slide both upper sides of LIGHT BLOCK
Sheets in between ① and ②.

Fig-9
FOCUS ADJUSTMENT (For Model LNS-W03)

Set up the projector and project image on the screen.
1. Loosen the Focus Lock Screw on the projection lens.
2. Rotate the projection lens to obtain proper focus on center area of the screen.

When the distance of the screen and lens is 1 meter, set ● mark (yellow) of the lens on Focus Lock Screw position.
3. Lock the Focus Lock Screw securely.

When proper focus is not observed at outer area of the screen, proceed following adjustments.
4. Loosen the Focus Lock Ring on the projection lens. (Turn the Lock Ring counter-clockwise.)
5. Rotate the lens to obtain proper focus on outer area of the screen.
6. Lock the Focus Lock Ring securely. (Turn the Lock Ring to clockwise.)

If proper focus is not observed over the entire screen, repeat above adjustments 1~ 6.
Correcting the focus

When the lens is attached to the projector and images are being projected onto the screen, the peripheral focus may be out of focus in some localized areas. If this happens, insert the accessory in between the lens attachment and the lens to correct the focus.

Inserting the spacers corrects the distance for best diagonal focus at the screen. The corrected distance is determined by the thickness of the spacers that are used. As a guide, the distance is adjusted by approximately 30 mm for each 0.1-mm thickness of the spacers.

There are three types of spacers provided, and there are four of each spacer type. Use these spacers to correct the distance as required.

<table>

BE SURE TO CHECK FOR SAFETY

After installing or replacing the lens, be sure to check the following for safety.

1. Check the lens is securely fixed with the screws.
2. Check no wiring is damaged or tangled on the gear of the lens motor or the other mechanical parts.
3. Check no part is missing, and no mounting part is loose.

Some parts are not used for installation or replacement. Keep these parts for later use. NOTE: Figures in this manual may differ from the actual product.
## SPECIFICATIONS

(Throw distance and screen size, screen of lens shift.)

NOTE: Following table shows approximate measurement. Actual measurement depends on lens and projectors.
