1. OverView

- 1.1 This Functional Specification defines communication functions for LC-XA20 (0.6" XGA).
- 1.2 Compatible to Firmware Ver. 1.x of the projector.

2. Serial Interface Specification

2.1 Transfer Specification

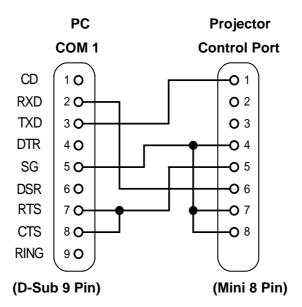

| Item | Specification |
|--------------------|---------------|
| Synchronous System | Asynchronous |
| Transmission Speed | 9600 / 19200 |
| Data Length | 8 bit |
| Parity | N/A |
| Stop Bit | 1 |
| Flow Control | N/A |

Note1) Transmission Speed: initial setting value is 19200

Note2) Transmission Speed can be changed in service mode.

2.2 Connection

Dedicated serial cable must be used for a connection to a computer and a projector.

3. Notes for communication

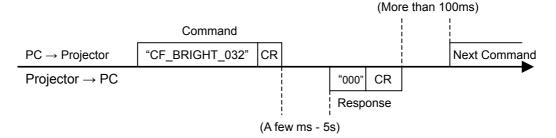

- 3.1 Expand Serial Command is defined as one command / one line that starts with "C" and ends with carriage return (0x0D)
- 3.2 There are two types of commands: Functional Execution Command and Status Read Command.
 - Example of Functional Execution Command: "CF BRIGHT 032" [CR]
 - Example of Status Read Command: "CR_RIGHT"[CR]
 - Example of Control Switch Command: "PF_LANMODE 1"[CR]

Note) "_" means a space

3.3 When it takes more than one second to receive one command, it is not executed.

When it takes more than one second to receive carriage return (0X0D) since the projector has received the first data "C", it clears the information of buffer.

3.4 When the command pipelining, it must wait for 100ms till sending next command after the response.

- 3.4.1 When a computer sends next command before receiving a response, the projector may not operate properly.
- 3.4.2 Except when there is no response for more than 5 seconds.
- 3.5 It takes about 5 seconds for internal initialization after plugging in AC power. During this time it cannot process commands. Do not issue any command.

4. Name Definition

- 4.1 Data from a controller to a projector is represented as COMMAND, and data from a projector to a controller for the incoming command is represented as RESPONSE.
- 4.2 [CR]: Carriage Return Code

Command ends with cartridge return code.

Response command also ends with carriage return code.

4.3 _: Space Code

All space Code is indicated by ().

4.4 %1 : Parameter in Command

When there are some parameters, they are defined as %2, %3...

4.5 %%%: Error code returned from a projector

Acceptable: "000".

Unacceptable: See [7. Error Code Table].

4.6 %a: Parameter in Response Command

When there are some parameters, they are defined as %b, %c...

Note) These error codes are applied to Expand Command, not to Basic Command

8. Functional Execution Command

8.1 Format

1)PC issues commands in format as below:

Pattern1: "CF_COMMAND" [CR]

Pattern2: "CF_COMMAND_"%1 [CR]

CF_: Header

COMMAND: Character line

%1 : Parameter (Character line)

_ : Space (To separate COMMAND and Parameter)

2) The projector decodes the received command and when it is ready to receive the next command, it returns the response.

"000" [CR]: (0x06, 0x0D) When receiving Functional Execution Command

"nnn" [CR]: Except "000", when it is unable to execute command by any specific reason.

See Error Code Table for details

3) When the received data cannot be decoded, the projector returns "?" [CR]

8.2 Transfer Example

When setting projector's total dots to 1344 by Expand Serial Command

PC ← PJ: "000" [CR] - - - - - - Acceptable

8.3 Operation Requirements

Functional Execution Command is limited when the projector status is as below.

However, Status Read Command is effective even under these conditions.

| Projector Status | Available Functional Execution Command |
|---|---|
| Standby Mode | C00: POWER ON |
| Processing Countdown | C00: POWER ON (Terminates Countdown) C01: POWER OFF C02: POWER OFF (Terminates Countdown) |
| Processing Cooling down | N/A |
| Processing Cooling down due to Abnormal Temperature | N/A |
| Abnormal Temperature | N/A |
| Power Failure (For 60 seconds after Power Failure occurred) | N/A |
| Processing Power Save / Cooling down | N/A |
| Processing Power Save | C00: POWER ON C01: POWER OFF |

Note:) When the projector receives the other command in this above status, it returns error code to show the status.
