

EIKI

AV SOLUTIONS FOR SOCIALLY DISTANCED EVENTS

PROJECT LARGE, BRIGHT, VIVID IMAGES

Combine the high brightness and vivid colors of an EIKI Laser Projector with a full suite of optional lenses to create a clear image for everyone in the room.

Available in LCD or DLP, up-to 16,000 lumens bright, these feature-rich, low-maintenance projectors are ideal for any installation environment.

DELIVER CRISP, CLEAR AUDIO

2.4G Wireless Conference System delivers clear, natural audio that is both secure and drop-out free. Separate Chairman and Delegate Mic units allow control over which mics are live at any given time.

With integrated frequency shift, feedback suppression and intelligent balancing, the system delivers world-class audio performance.

A SAFE, SECURE ENVIRONMENT

EIKI's FR20 Series products offer automatic temperature measurement with facial recognition, matching personnel info and body temp data in real-time.

Unattended, contact-free mode can be used to achieve secure, efficient and orderly access control.

AV SOLUTIONS FOR SOCIALLY DISTANCED EVENTS

LCD Laser Projectors

EK-1100LU - 11,000 Lumens

EK-850LU - 8,500 Lumens

- 100,000:1 Contrast • 20,000+ hour Laser Light Engine
- Low maintenance filter-less design • 4K Scaler
- 5 Optional Lenses

DLP Laser Projectors

EK-836DU - 16,000 Lumens

EK-833DU - 13,000 Lumens

EK-831DU - 11,000 Lumens

- 100,000:1 Contrast • 20,000+ hour Laser Light Engine
- Low maintenance filter-less design • 6 Optional Lenses

2.4G Wireless Conference System

- 2.4G Wireless with advanced frequency shift & digital transmission technology
- Support for up-to 255 microphones including up-to 3 Chairman units
- Chairman unit can override Delegate mics and approve/reject delegate requests to speak
- Microphones have 1.6ft effective pickup range • Antenna extends wireless range to 65ft

EM Series Wireless Conference System Components

EMMU02 - Main Processing Unit, **EMC02** - Chairman Microphone, **EMD02** - Delegate Microphone

EM63 - Directive Antenna, **EM48** - Charger Case

Facial Recognition & IR Temperature Access Management

- Integrated hardware and software in one package that can be rapidly deployed
- Automatic infrared temperature measurement with facial recognition
- Match personnel information and body temperature data

FR20 Series Products

FR20-FS - Facial Recognition & IR Thermometer System with Floor Stand

FR20-WM - Facial Recognition & IR Thermometer System with Wall Mount
